It has been the driest spring on record, only an inch of rain from Feb. 1st till into May, yet the ground was so well saturated last fall that things have not suffered much. We have immense beds of perennials which have been kept wet by water from a windmill. Winds were so drying and fierce we had to water beds twice a day. Looking it all over, however, the losses have not been so very severe. The drouth has now been broken by a heavy rain of 24 hours duration. Transplanted stock suffered some. Leaves have been killed on many trees and shrubs, but they will come out again.

It has been a fine spring for work. Not a day lost till now. Leaves on the trees are coming out again and the country will soon forget its fearful scourging.

Sales have been heavy. Men have been worked to the utmost limit. We are making York a headquarters for evergreens, ornamentals and perennials, and have planted an immense amount of stock, which is looking fairly well.

C. S. HARRISON.

A commission appointed by the government of Nova Scotia to investigate and determine the advisability of a compulsory provincial eight-hour law, has just made a report to the effect that such a law would be a fatal blow to the industrial prospects of the Province. Consul-General James W. Ragsdale, of Halifax, forwards a synopsis of the report, which is filed for reference in the Bureau of Manufactures.

CHICAGO NOTES.

The Floral Auto Parade.

Owing to the rain the floral auto parade was postponed till Monday the 9th. Some of those who decorated with natural flowers were at a decided disadvantage for their machines, trimmed Friday night or Saturday morning before the rain commenced, were not at their best on Monday. As might be expected the artificial flowers made the showier cars and their brilliant colors rather outrivalled the natural flowers which were used on fourteen of the machines. It is hard to put the work of nature against that of art in the shape of solid masses of gorgeous paper chrysanthemums, strings of brilliant poinsettias without partially eclipsing the natural bloom, in the open air and bright sunshine, but our florists did well and their work deserves much credit. The Chicago Tribune of Tuesday had a picture of Mr. and Mrs. Chas. McKellar seated in their auto which took first prize in the private owners' class. It was trimmed with artificial poinsettias. One decorated by Fleischman on Saturday was presentable for competition and was winner of 2nd prize in its class. The first prize in its division was won by D. J. Joyce's Alco, done in American Beauty roses by J. Raske.

Mothers' Day.

May 8th was proclaimed by Gov. Deneen to be Mothers' Day and a difference of opinion existed as to the extra demand for flowers as the result. The same difference was reported later in the various localities as to sales. A great advance has been made since last

year when the flowers sold by the retailers were used chiefly to be worn by the individual and usually a single bloom was considered sufficient. Miss Grace Sawyer of the Pansy Flower Store says the demand there was much greater than that of one year ago for churches and cemetery use in addition to the individual sales. In LaGrange the large churches distributed white carnations to each Sunday School scholar, each flower having an appropriate verse attached. In some Chicago churches each man was presented with a white carnation. In Oak Park the supply of white flowers ran out before Saturday night and some of the decorations planned had to be abandoned or carried out with colored flowers. Some of the florists report large orders for cemetery use and one of the large cemeteries is said to have had 75 per cent. of the mothers' graves decorated with flowers.

A Good Example.

Florists are pleased with the action of the Northwestern Elevated Co. in its effort to improve the outlook from the car windows. This Co. is offering rewards to householders along its right of way who can show the best kept grass plots and most attractive porch and window boxes. Chicago florists would like to see this same course pursued by the other "L" lines. Work has begun on the Gage Farm, owned by the city and to be used for a nursery to grow stock for the city's use. Small shrubbery was set out a week ago. The greenhouses will be begun as soon as the weather will permit.

Florists' Club.

Regular meeting of the Florists' Club

was held May 5 with Pres. Asmus in the chair. A. A. Vermeuller of Nelson Bros. was elected to membership and the names of Geo. Grimm of Peoria St. and P. J. Saunders of Cottage Grove Ave. were proposed. Margaret Flint was chosen to serve as collector of dues for the Club.

Bedding Plants Preferred.

The opening of the amusement parks in the city is using up a large amount of bedding stock. Though the plants are not all in the ground the stock is set aside. The growers of bedding stock are glad to see this tendency to decorate the grounds with large beds of geraniums and other plants gaining in popularity each year. These have nothing to do with the city parks and an admission is charged but the flower beds have proved to be a decided attraction and in the several parks of this kind a large amount of bedding is used.

Trade Notes.

Harry C. Rowe made the bridal bouquet for Ruth Bryan Leavitt Owen who was married at Lincoln, Neb., on the 3rd. It was of solid lily of the valley and was sent together with two large cases of lilies.

Strail & Hahn is the name of a new firm in the retail florists' business at 27 Jackson Boul., the Wellington hotel. Fred Strail has been with some of the largest retailers for years, and he will be capable of handling a first class business. J. Hahn came here recently from Belvedere, Ill., where he has been engaged in landscape gardening.

Lloyd Vaughan thinks radical meas-

For Decoration Day

We have this year the most complete, elegant and salable stock of florists' goods ever offered for the MEMORIAL DAY trade. Our line of PRE-SERVED FOLIAGE and other INDESTRUCTIBLE DECORATIVE MATERIAL cannot be excelled and the name of BAYERSDORFER & CO., on the package guarantees that goods and prices are

What Every Florist Wants

Don't wait until the last moment to make inquiry. SEND NOW for list of Standard and New Goods for this important occasion. All you have to do is to show the goods. THEY'LL SELL. Wreaths of Cycas, Magnolia, Fern and other foliage in Green, Autumn Tints and Moss effects are among the novelties.

METALLIC WREATHS are our specialty; we make them up with Roses, Pansies, Forget-me-nots or anything you please. STANDING ANCHORS, PILLOWS, WREATHS, ETC., all graceful and true to nature. Cape Flowers; Immortelles, all colors; Doves; Sheaves.

H. BAYERSDORFER & CO.

The Florists' Supply House of America

1129 Arch Street, Philadelphia, Pa.

ures should be taken by the wholesale trade to protect themselves from the wiles of the retailer who is unscrupulous. The law, he thinks, does not protect the honest but on the contrary works to the advantage of the dishonest in this business. As stated before, nearly all the wholesalers were losers by the closing of the Visas Bros.' store and their Easter bills are on file at the U. S. Court but that is small comfort.

Personal.

Fred Sperry is back at his post looking pale but plucky.

Chas. McKellar is rapidly recovering from his recent illness.

The two-year-old son of John Kruchten who was bitten in the face by a bulldog is doing nicely and few if any scars will remain.

The little son of Mr. and Mrs. Brooks of Morton Grove is home from a protracted stay at the Augustina hospital for treatment for a severe injury to his knee.

O. P. Bassett and bride surprised their relations and friends by returning unexpectedly from California Sunday. After a few days here they will leave for the East.

Visitors.—Geo. A. Heintz, Toledo, O.; P. N. Obertin, Kenosha, Wis.; J. E. Meinhart, Webb City, Mo.; C. H. Woolsey, Rockford, Ill.; Frank Stuppe, St. Joseph, Mo.; Wm. Desmond, Minneapolis, Minn., in the interest of the big flower show to be held there in November; H. Phillpot of Winnipeg, B. C.; J. A. Peterson, Cincinnati, O.; Mr. and Mrs. N. H. Long, Dixon, Ill.; J. Ebinger, Boskoop, Holland, Martin Reukauf, representing H. Bayersdorfer & Co., Phila., Pa.

AN IMPOSTOR.

Editor HORTICULTURE:

Dear Sir:—Some man representing himself to be Mr. Thornton is going around among different flower and seed houses. Kindly note in your paper that this man is an impostor and request any to whom he may apply to hold him for the police and notify us.

Yours truly,

THORNTON BROS.

Lawrence, Mass.

MEMORIAL DAY.

"And this day shall be unto you for a memorial." Exodus XII, 14.

The day that is meant for silence, the day that is set apart

To show all the love and honor that throb in the nation's heart;

To show that we still hold sacred their hope, and their faith and trust.

By placing the tender tribute of roses above their dust.

The day that is meant for quiet, except that the muffled drum

Shall thrum to the whispered rife that tells when the marchers come,

Except that the soft-voiced bugle shall sing of the growing gaps

In the ranks of the living comrades that lullaby low of "Taps"

The day that is meant for silence; a day that is meant for thought;

The flag as a sign and symbol of all that these dead have wrought;

And roses and waxen lilies, a-drip with the dew of dawn.

To gleam in the silent places where slumber the soldiers gone

This day it is meant for stillness, for stillness on land or sea,

For hushes on hill, in valley wherever their places be;

For some rest below the billows and some sleep beneath the sod,

But all have a country's honor, and all have the peace of God.

Wilbur D. Nesbit, in *Boston Post*.

APHINE

Is proving a most effective, while at the same time absolutely harmless, insecticide for use on young stock.

It destroys the insects, and invigorates the plants.

Have you tried it?

Aphine Manufacturing Company

MADISON, N. J.

Palms that Bring "Repeat" Orders

That's the test of quality—not the first order, but the second, and the third. We're glad for new business—and we're getting a lot of it—but we value most of all the patronage of those who have been with us steadily for years. Such orders prove beyond question the superiority of our Palms—prove the advantage of buying home-grown stock produced under the care of Palm experts.

All our Palms are propagated from the seed, right here in our own houses. Ours are clean, strong and vigorous—vastly better than any imported Palms you could buy—yet they cost no more.

These Palms not only bring "repeats" to us, but to YOU, too—your customers will appreciate their excellence and will order again. It's little trouble to dispose of such

"quality stock" and there's profit in it. Use Heacock's Palms for straight sales, for store display, decorating contracts, or renting; you can build up a department showing a good income—florists everywhere are doing it.

We offer a very choice collection this spring and advise placing orders early before the stock is picked over. Shipments are made by fast freight, assuring quick deliveries at low carriage rates.

Oncidium varicosum Rogersii

BODDINGTON'S TYPE

We are expecting an importation to arrive at an early date. We have imported this variety for many years from an experienced collector and it has proved all we claim for it both as to size of flowers and intense coloring.

This Orchid is one of the most popular and free-flowering types of the Oncidium family. Our past importations have come fully up to standard. Oncidium varicosum Rogersii throws 3-foot stems, bearing as many as 170 blossoms of an intensely rich golden yellow, 2 inches and over in diameter, and can be successfully grown either on blocks of wood, in pots or in baskets, and flowers in November and December in a night temperature of 55 to 60 degrees.

\$1.25 each, \$12 per doz., \$100 per 100; selected plants \$1.50, \$2, \$3, and \$5 each according to size.

LILIES

PLANTS

BAMBOO STAKES

THE YOKOHAMA NURSERY CO.
31 BARCLAY STR. NEW YORK.

WE know a grower who recently sent to Maine for a barrel of fancy seed potatoes. Price was no object—he had to have the stuff, he said. He does raise a small lot of fine potatoes and he prides himself upon the fact.

This same man buys his lily bulbs where he can buy cheapest. Last year he had almost an entire failure and this year he bought from five firms and had half a crop; but as he mixed them all up he don't know where the good ones came from. Every year he threatens not to grow them anymore because of bad luck as he calls it. It is bad sense rather than bad luck for if he paid as much attention to his bulb buying as he does to his potatoes, he would have something in profits. You have to secure a good quality of lily bulbs to be a successful lily grower and as long as a buyer will insist upon holding a cent so close to his eye that he can't see the dollar, he cannot make good.

PHILADELPHIA NOTES.

Wm. J. Muth has severed his connection with the Philadelphia Cut Flower Co.

Cattleya Schroederæ offered last week by Alphonse Pericat should have read 55, not 35 dollars per case.

Alphonse Pericat will build a 21x72 lean to facing the south, for Dendrobium Palænopsis, etc. Lord & Burnham have the contract.

The date for the peony show of the Pennsylvania Horticultural Society has not yet been fixed. It will probably be either Saturday, the 21st, or Tuesday, the 24th inst.

Gladiolus America and May are especially fine at present and meet with ready sale. These and the shrubby calceolaria are prominent features in many of the big stores at present.

Among those from Philadelphia who will attend the big orchid show in Boston, the following are reported at this writing: Robert Craig, G. C. Watson, Joseph Heacock, James Griffin, and Alphonse Pericat.

The amateurs of the main line will hold a flower show at the Merion Cricket Club, Haverford, Pa., May 28th. David Rust, secretary of the Pennsylvania Horticultural Society has been appointed one of the judges.

A. L. Jones, of the Pennock-Meehan Co., has just returned from a sojourn in Washington, where he has been superintending the branch establishment of the firm during the illness of Mr. Moore. The latter is happily quite recovered again and back in harness in good shape.

The new pot hanger illustrated in the Rice adv. in our present issue, is revolutionizing the art of economically and artistically displaying pot plants in windows, porches, conservatories, etc. Costs next to nothing, is adaptable, effective, lasting and cheap and is being used by the thousands in the up-to-date centers.

Samuel J. Irvine returned to his old position on the 8th inst. as superintendent of the Grovedale greenhouses of Louis Burk, at Fisher's lane and Wyoming avenue. This is a commercial place growing a general stock but making a specialty of orchids. Mr. Burk is an enthusiast in the latter flower and owns a fine collection as an amateur, as well as marketing his surplus.

J. Liddon Pennock argues that the growers, through their agents, the wholesalers, make a mistake when they try to get a bigger price for anything on special occasions like Mothers' Day, Easter, Christmas, etc. That any profit coming from such belongs legitimately to the retailers. That the retailer has the whip hand and can make or break the popularity of any flower. That when they advertise a thing and boost it, the profit and expense are both theirs—so what right has the grower to share?

Alphonse Pericat says that his partner Mr. De Buck has had a very successful collecting season in South America the past six months and has sent already several fine consignments of Schroederæ and Trianae which have arrived at Collingdale, Phila., in fine condition. An offering of a part of

these will be found in this issue. A nice lot of Dendrobium formosum has also arrived. Mr. De Buck is expected to arrive in this country in a few weeks.

Raymond Kester, an old and experienced employee of the big retail business of Pennock Bros., gives valuable advice as to keeping peony blooms from drooping. He says to plunge them up to the neck in water in a deep vase. The trollius or globe flower is another trying subject. But it generally comes up the second day all right. Lilacs and peonies keep best if partly stripped of the foliage. Keep the foliage fresh in a vase separate from the blooms and use as required.

PERENNIALS FOR SPRING PLANTING.

Replying to a query taken from the "Question Box" at the last meeting of the Gardeners' and Florists' Club of Boston Frederic J. Rea named the following varieties of herbaceous perennials which do better if planted in the spring.

Anemone japonica varieties, hardy chrysanthemums, dornicums, eulalias, gaillardias, gerbera, heucheras, Iris germanica, Iris Kaempferi, Iris pumila, Papaver orientalis, pentstemons, potentillas, Pyrethrum roseum hybrids, stokesia, tritomas, Canterbury bells, foxgloves and hollyhocks.

Of the above list the following can be safely planted in August: Dornicums, Iris germanica, Iris pumila, papavers, potentillas, pyrethrum, Canterbury bells and foxgloves.

Dreer's Select Hardy Vines and Climbers

Potted Stock for Present Planting

AKEBIA QUINATA.

We offer extra heavy pot-grown plants of this handsome climber.
Strong 4-inch pots, \$1.25 per doz.; \$8.00 per 100.
Heavy 6 " " 2.00 " 15.00 "

AMPELOPSIS VEITCHII.

Strong 2-year-old, \$1.50 per doz.; \$10.00 per 100.
Extra selected plants, \$2.00 per doz.; \$15.00 per 100.

AMPELOPSIS VIRGINICA. (Virginia Creeper.)

Strong 2-year-old plants, \$1.25 per dozen; \$8.00 per 100.

AMPELOPSIS TRICOLOR. (Vitis Heterophylla Variegata.)

Very strong, 3-inch pots, \$1.00 per doz.; \$7.00 per 100.

AMPELOPSIS ENGELMANNI.

Extra strong, 2-year-old plants of this most useful variety.
\$1.75 per doz.; \$12.00 per 100.

AMPELOPSIS LOWII.

A new variety of the same general character as A. Veitchii and clinging to the smoothest surface without support, but with foliage much smaller and deeply cut, giving a light and airy appearance to the plant not possessed by the older sort. In spring and summer the leaves are of a bright apple-green color, changing to a brilliant crimson and scarlet in the autumn. 60 cents each; \$6.50 per doz.

APIOS TUBEROSA.

Strong tubers, \$2.00 per 100.

ARISTOLOCHIA SIPHO.

(Dutchman's Pipe Vine.)

Extra heavy, \$4.00 per doz.; \$30.00 per 100.

BIGNONIA. (Trumpet Creeper.)

Grandiflora. Strong plants, \$3.00 per doz.; \$20.00 per 100.

Radicans. Strong plants, \$1.50 per doz.; \$10.00 per 100.

CELASTRUS SCANDENS.

(Bitter Sweet, or Wax Work.)

Extra heavy plants, \$2.00 per doz.; \$15.00 per 100.

CINNAMON VINE.

Strong roots, 40 cents per doz.; \$3.00 per 100.

CLEMATIS PANICULATA.

(Japanese Virgin Bower.)

We have an immense stock of exceptionally fine plants of this most popular of all the Clematis, and offer

Strong 2-year-old plants, \$1.50 per doz.; \$10.00 per 100; \$90.00 per 1000.

CLEMATIS MONTANA GRANDIFLORA.

The plant is of stronger growth than any other Clematis, not subject to the attacks of insects, and succeeds under the most adverse conditions. It is perfectly hardy, having withstood without the least damage in a most unfavorable position in our trial grounds. Its flowers, which resemble the Anemone or Windflower, are snow white, 1½ to 2 inches in diameter, and frequently begin to expand as early as the last week in April, continuing well through May, and are produced in such masses as to completely hide the plant. Extra strong, 2-year-old plants, 35 cents each; \$3.50 per dozen.

CLEMATIS MONTANA RUBENS.

Identical in every way with the white flowered variety, excepting in color, which is of a most pleasing shade of soft rosy red.

We offer a limited stock of strong plants, 75 cents each; \$8.00 per dozen.

EUONYMUS RADICANS VARIEGATA.

A nice lot of 3-inch pots, \$1.00 per doz.; \$7.00 per 100.

LARGE-FLOWERING HARDY CLEMATIS.

We have again this season a fine stock of good, strong plants, two years old, own roots.

Boskoop Seedling or Sieboldi. Extra large lavender.

Duchess of Edinburgh. Double pure white.

Henryi. Finest large single white.

Jackmani. The popular dark rich royal purple.

Madam Baron Veillard. Light rose, shaded lilac.

Ville de Lyon. Bright carmine red.

30 cts. each; \$3.00 per doz.; \$20.00 per 100.

"White Pearl." A magnificent, new, pure white variety, with individual flowers fully double the size of the ordinary Everlasting Pea. These are produced in really gigantic trusses. We offer very strong roots at 20 cents each; \$2.00 per dozen.

POLYGONUM.

Baldschuanicum. This beautiful, hardy, woody, twining plant is one of the most interesting and showy flowering climbers. Its flowers are white, and are borne in great feathery sprays at the extremities of the branches. Strong plants, 35 cents each; \$3.50 per dozen.

Multiflorum. A very desirable climbing plant, which seems peculiarly adapted to our climatic conditions. It is of strong, rapid, but not coarse, growth, frequently attaining a height of 15 to 20 feet in one season. Its bright green, heart-shaped leaves are never bothered by insects, and during September and October it produces masses of foamy-white flowers in large trusses from the axil of each leaf. \$1.50 per dozen; \$10.00 per 100.

SCHIZOPHRAGMA HYDRANGEOIDES.

(Climbing Hydrangea.)

One of the most interesting of our hardy climbers. Its flowers, which are borne in large trusses, are similar to white Hydrangea, and when in flower during July and August, make a handsome display. A limited stock of strong plants, 75 cents each.

WISTARIA SINENSIS.

	Per doz.	Per 100
Blue	\$3 50	\$25 00

F. R. PIERSON CO.,

TARRYTOWN-ON-HUDSON,
NEW YORK

THE "SIMMONS BILL."

F. W. Kelsey, in a communication to the Committee on Agriculture, at Washington, calls attention to the following impracticable and inconsistent features of the Simmons Bill, H. R. 23252, for the inspection of imported nursery stock. Mr. Kelsey says:

First—It is absurd for any nurseryman or importer doing an extended business to make "an application stating the number and kind of nursery stock to be imported," unless duplicates of all orders placed for foreign stock, whether by cable or letter, be transmitted to the Secretary of Agriculture; a technical proceeding of governmental interference with private business, as unreasonable and unnecessary as it is inconsistent with the spirit of our form of Government.

Second—In Section 7, the provision for detention "in quarantine a necessary time to determine the result of such disinfection" would, in practical workings result in most cases to simple and direct confiscation—an object presumably not intended by the advocates of the Bill and one that would not, if thus understood, be tolerated by you.

Third—The authority conferred upon the Secretary of Agriculture "to quarantine against any importations from said district" is a dangerous precedent, an arbitrary and wholly unjustifiable imposition, which, in effect, might cause needless injustice and loss; and in view of the other protective features of the Bill would, unquestionably do much more harm than good. Indeed, in case of fright or a wave of hysteria with subordinate officials, very serious injury would follow without any compensating benefits.

The desirability of an efficient national law for the proper regulation of nursery stock importations in co-operative harmony with the approved inspection laws of the states, is by the progressive men in the nursery business generally recognized. But I beg to submit that care should be taken in conferring arbitrary power and creating new conditions, not to make the proposed remedy worse than the insect pest diseases which the law aims to prevent.

George Rackham of Detroit finds a very interested audience at every school where he delivers his short discourses on plant growing. There is no limit to the questions asked by the children.

Seed Trade

The Condition of Seed Crops and Prospects.

The average temperatures for May up to this date have been lower than were those the latter part of March, which of course has not been good for vegetation. But few crops have been planted excepting peas and market gardeners' products. Reports about peas are not entirely clear, but it seems that the crop has not suffered very severely up to this time. Practically no sugar corn or beans for seed purposes have been planted. Root crops, such as beets, cabbage and turnips for seed have been planted and are generally looking well. This does not apply to European crops, about which we have had but little information of a reliable character, but as our sources of information are of the best, we shall give from time to time such reports as reach us.

Very small reserves of standard varieties of seeds will be carried over into next season. This applies particularly to cabbage, turnips, mangels and several varieties of garden beets, golden self-blanching celery, parsnips and many odds and ends of biennials. No doubt, prices will rule high on all of these lines again next year—possibly higher than during the past season, and retailers will make no mistake in buying early; in fact they seldom do.

Seedsmen's Convention.

It is barely six weeks to the Seedsmen's Convention, which, as is generally known, is to be held this year at Atlantic City, with headquarters at the St. Charles Hotel. This is one of the best "Taverns" at the Ocean City and doubtless most of the seedsmen and their friends will recall with pleasure their last convention held there. While perhaps, there is not much danger of the hotel being overcrowded, it might be well for those expecting to attend the convention to engage rooms in advance. A little forethought often saves much inconvenience.

Spinach, Turnips and Farmers' Alaskas.

It is reported that present supplies of spinach are short, especially Bloomdale, and as the new crop will not be available for this year's requirements, holders are likely to stand firm for advanced prices. The same may be said of turnips. Purple Top White Globe is firmly held at 20c. or better, and Purple Top Strap Leaf at 16 to 18c. in liberal quantities.

Alaska peas of pedigree strain are scarce, but so-called "Farmers' Alaskas," grown by Wisconsin farmers, are procurable in liberal quantities at around \$2.00. Several hundreds of bushels of these peas are usually required in the south for second planting. Everyone in the trade is supposed to know what "Farmers' Alaskas" are. A word to the wise is sufficient.

TRADE PRICES AND THE AMATEUR PURCHASER.

The following correspondence fully explains itself:

WINTERSON'S SEED STORE,

45 47-49 Wabash Avenue.

Chicago, April 26th, 1910.

Mr. A. T. Boddington,

342 W. 14th Street,

New York, N. Y.

Dear Sir:

Some time ago, we sold a wealthy Chicago man by the name of Jos. N. Patterson who has a home in Libertyville, Ill., some Cannas. His private gardener saw the advertisement in the various trade papers and ordered some considerable amount of the Cannas. Mr. Patterson is a wealthy man and in no way entitled to a wholesale price. He kicked several times on the price charged and would say, we charged him the regular price in our retail catalogue.

We wrote to him advising him that if he could show us stationery or any proof whereby he earned his living growing these Cannas for profit we should be glad to give him the wholesale price—otherwise, the retail price.

He comes back with a letter today as follows: "In regard to your letter of the 16th inst. (copy herein enclosed) kindly point out to me wherein your catalogue of Dec. 25th, 1909 (he refers to our retail catalogue) you state that customers must earn their livelihood in the flower business in order to escape being charged 400 per cent more for your goods than the price at which you advertise them."

We also enclose a copy of the letter sent him today and will you kindly write Mr. Patterson a letter direct, explaining to him that he is not entitled to wholesale prices. He is a man very well able to pay the bill as charged and simply wants to get the wholesale price, which we cannot afford to give him. Yours truly,

E. F. WINTERSON CO.,

Per S. H. Winterson.

WINTERSON'S SEED STORE.

45-47-49 Wabash Avenue.

Chicago, April 26th, 1910.

Mr. Joseph N. Patterson,

Libertyville, Ill.

Dear Sir:

Yours at hand regarding the Canna deal. Would say our retail catalogue is for retail trade only and we charged you the prices listed in this catalogue, such as we would do to any other person ordering Cannas, who are strictly private people.

There is no argument whatever about this case and we would say that the publishers of the trade papers are to blame for your getting the trade papers, wherein different items are listed at wholesale prices. These prices quoted in trade papers are strictly for wholesale people only and not private parties. As we explained to you before, you are in no way entitled to wholesale prices on Cannas.

We have taken the matter up with Mr. Boddington and have asked him to write to you from his standpoint regarding this question.

As to your statement that we charged you 400 per cent more than the wholesale price advertised, we cannot figure it as you do as there is no such difference in the prices. As before explained, the bill rendered you is the regular retail price and for which we expect your immediate check. Yours truly,

E. F. WINTERSON CO.,

Per S. H. Winterson.

ARTHUR T. BODDINGTON, SEEDSMAN.

342 West 14th Street, New York City.

April 29th, 1910.

Jos. N. Patterson, Esq.,

Libertyville, Ill.

Dear Sir:

Winterson's Seed Store, wholesale western sales agents for Boddington's Cannas, write us that you are refusing to pay their bill for Cannas charged to you at their retail catalogue prices, you claiming that you are entitled to wholesale rates for the reason that you are a subscriber to one of the trade papers and thus come in possession of wholesale prices.

While I have nothing to do with this matter, Messrs. Winterson have asked me to write you a letter explaining the practice of the majority of reputable houses in the seed trade in this respect. In my opinion, if you stated in your order to Winterson's Seed Store that you had taken the prices from their advertisement in one of the trade papers, it was up to Messrs.

Winterson the minute they received this order to decide whether they would accept same or not. If they accepted your order under these conditions they have only themselves to blame. If you did not name the prices, in my opinion, they were perfectly justified in charging you their retail prices if that is a general rule in their establishment as it is in ours. We do not supply goods to retail buyers at prices charged to the trade and by "the trade" we mean bona fide Seedsmen, Nurserymen and Florists. Our reasons are as follows:

First—It is necessary for the welfare of our business with the trade to afford protection to them and enable them to make a margin or profit.

Second—It is impossible to handle retail orders on the wholesale margin of profit for the reason that the expense of handling the retail business is much greater. As an example of this our wholesale catalogues complete and mailed costs 3 cents per copy. Our retail catalogue complete and mailed costs 27 cents per copy.

Third—The publication of the majority of seedsmen's catalogues today is carrying on an educational campaign which is making for great progress in Horticulture and it is manifestly to the benefit of mankind and Horticulture that this campaign should be continued. This educational campaign has been carried on for some time with the aid of truthful half-tone engravings and photographic illustrations from nature and with elaborate and extensive cultural directions. This is a heavy expense to the entire trade and is only made possible by the fact that a greater margin of profit can be obtained from the amateur than from the florist purchaser.

The only way that I see out of this difficulty is for every seed house that is publishing a retail catalogue to resolutely stick to the policy of making wholesale prices only to people who are entitled to them. Any other policy will undermine the very foundations of the seed business. Several times lately this matter has come up and in future we shall run a line into our advertisement that the prices advertised in the trade papers are intended for bona fide Dealers, Nurserymen, Seedsmen and Florists only. The conditions of this trade are peculiar. The trade papers have a circulation of about 8,000. Their papers sell for a dollar and to mail them at the magazine rate they are compelled to forward the paper to any person who pays the subscription of \$1.00 per year. An ideal remedy would be to have these papers circulated by private subscription only as the trade papers in Europe are circulated, but if these difficulties continue to increase we shall be compelled to stop advertising prices in the present trade papers and start to circulate a publication of our own by private subscription.

This custom does not extend to any other business that I know of. Recently I mentioned to a member of a firm of hot-water engineers and greenhouse builders that I wished to purchase a steam boiler to heat my dwelling house. This gentleman has on different occasions purchased seed of me and being a member of an allied trade we gave him the courtesy of wholesale prices, but when I asked him about a boiler he told me he could only sell it through any firm of local plumbers or steamfitters I cared to select so that they could acquire their profit. I do not see why the horticultural trade should be an exception. Truly yours,

ARTHUR T. BODDINGTON.

While we do not understand it to be strictly true that the publisher of a trade paper is compelled to accept subscriptions tendered by applicants who are amateurs in order to hold his second-class mail privileges, yet it requires no elaborate argument to prove that a paper, once printed and sent out, cannot be prevented from reaching the eyes of people other than its approved subscribers. It is clearly up to the dealers who advertise wholesale prices to protect their trade buyers by refusing to sell at trade rates to any party who cannot show his right to same, as instanced in the case of the steam boiler dealer above referred to. HORTICULTURE upholds this principle as well-founded and right and, whatever others may do, does not make a practice of accepting subscriptions from amateurs, for that

reason. But, as already stated, the control of the system lies, not with the trade papers, but is wholly in the province of the dealers themselves. We might add that Mr. Winterson's canna advertisement which caused this trouble did not appear in HORTICULTURE.—(Ed.)

No. 4858 in "Weekly Consular and Trade Reports" states that an American consular officer in the Far East reports that a railway company in his district desires to obtain grass seed for making lawns at its various stations and settlements along its entire line. The men in charge do not know just what kind of grass would be most suitable; it is therefore suggested by them that seed men in submitting prices and descriptions bear in mind the climatic conditions of hot, dry summers and long cold winters, together with thin soil full of stones and none too fertile.

The address of applicant may be obtained by writing to the Bureau of Manufactures, Washington, D. C., and mentioning file number.

NEWS NOTES.

Denver, Colo.—The Columbus Floral
Co. has moved to 1553 Curtis street.

Newton, Kans.—The Rosebud Co.
have leased the C. L. Shanks green-
house.

Muskogee, Okla.—The Muskogee
Carnation Co. has been sold to Robert
Bebb, formerly in business at Des
Moines, Ia.

Ashtabula, Ohio.—The partnership
of L. Silvius & Son has been dis-
solved and L. Silvius will hereafter
conduct the business.

Williamsville, N. Y.—The Bryner
property has been purchased by L. H.
Neubeck. He will use these houses
to supply his Main street store.

St. Louis reports that the price of
white carnations advanced to \$5.00 per
100, wholesale, for Mothers' Day, but
there was very little doing. The
weather is blamed for the poor busi-
ness. The weather comes in handy as
a scapegoat in all kinds of affairs that
miscarry.

Montreal, P. Q.—The case against
the Canadian Floral Company for in-
fringement of a municipal by-law
which compels the closing of all re-
tail stores at 7 p. m. on certain even-
ings has been decided in favor of
the defendant. Mr. Hay, the manager,
was able to show that he did a whole-
sale as well as a retail business in
flowers, and the court decided that
this fact exempted him from the obli-
gation to close up at seven o'clock.

FLOWERS FOR MOTHERS' DAY.

Mothers' Day enthusiasts forgot one
thing. Dame Nature does not produce any
more white carnations on Mothers' Day
than on any other day. Then, where are
all the white carnations to come from to
satisfy the extra demand? As a horti-
cultural writer for the trade press, it is my
duty to report the wholesale flower mar-
ket weekly, and I know that there will be
one white carnation to a hundred eager
buyers.

But why limit the tender and creditable
sentiment to a white carnation? Didn't
mother love all flowers—the roses, the
peonies, the sweet peas and all the rest,
as well as the pinks? Of course, she
did!

Just now there are the loveliest of white
roses on the market, plentiful and low

priced—the Bride, the White Killarney,
the Kaiserin Augusta Victoria, the Niphe-
tos, besides many lovely pink shades,
such as my Maryland and Bridesmaid and
Killarney. American Beauty, Richmond
and Liberty are the finest among the red
shades. Sweet peas are good also, pink,
white, crimson and lavender; so are the
old-fashioned double red and pink early
flowering peonies.

The pure white fragrant gardenia is
plentiful and not expensive. The mignon-
ette, the daisy, in white and yellow, the
lilac in purple and white, lovely pansies
in all colors. Lily of the valley and snap-
dragon are all to be had in perfection,
fresh and fragrant, and at exceedingly
reasonable prices. In fact, the choicest
products of the flower growers' art have
never before been of quite as high a
standard of quality as at present, and
prices on the average, have ruled and are
ruling lower than ever before—consequent
on improved growing facilities, modern
equipment and labor-saving methods of
culture.

We Grow Our Own Flowers.

Roses and Carnations Our Specialty

Flower Market Reports.

Business is holding up **BOSTON** very satisfactorily and stock is moving through ordinary channels all right as compared with previous years. White carnations have been running in shorter supply with the result of a slight stiffening of rates on all grades. Roses have never been of finer quality at this season than they are now. Whatever may be the situation as regards outdoor flowers for Memorial Day—and nobody can say with any certainty yet—the condition of all indoor crops is very promising and the trade here is looking forward to a very heavy demand. Orchids are looking up, under the impetus of the Orchid Exhibition which opens next week and the call for them is from widely separated territory.

More rain and cloudy **BUFFALO** weather continued for two weeks past and has shortened the supply on cut flowers to such an extent that prices have raised a notch. The demand has been good for carnations and other material, and trade is quite active. A heavy call for peas, lily of the valley and white roses almost makes us think the wedding month has arrived. There is little or no out door stock at present. Lilacs and lily of the valley will be had shortly but are held in check by the cold weather. It must be said that trade has been exceptionally good for the past two weeks.

The market felt the effect of two big days, **CHICAGO** Mothers' Day and the day of the auto parade. The high price of white carnations continued till near the end of the week when it fell to one-half. All the wholesalers report large sales for Mothers' Day, and welcome one more day for special use of flowers. The scarcity of white before the orders were all filled brought the colored into use and it would be most welcome to the trade to have this day celebrated by the use of flowers of all colors. The auto parade also worked off many roses and carnations, though in the decorations as a whole, artificial flowers largely predominated. Snow ferns from Michigan are arriving in good condition and sell for \$2.50 per 1000. The eastern stock from cold storage is also of good quality. Peonies, in white and pink, principally, are coming in quite freely and sell from \$4.00 to \$6.00 per 100, mostly at the latter figure. It is expected that by the time this is in print gladioli will be here in quantity; all colors. Lily of the valley is not plentiful. Asparagus is still coming in from the South and the quality is good. Callas are said by the growers to be in about one-half supply and sell at \$1.50 to \$2.00 per dozen. Hundred rates are seldom quoted.

Detroit reports good trade and firm prices.

(Reports continued on page 707)

BOXWOOD

One of the P. M. Introductions
FOR MEMORIAL DAY

The best lot we ever had to offer our customers, good, hard, dark, glossy green sprays no chance to wilt, as all this stock was gathered before the spring growth started, put up in 50-lb. crates, at

Boston Flowers for Memorial Day

We can ship in good order to all points in New England and New York State, all regular lines of Flowers in full supply, besides

PEONIES and SOUTHERN GARDENIAS AS SPECIALTIES

Also GREENS and other Requisites

Last year the weather was unprecedentedly hot and successful shipping was accomplished with difficulty. This year our roses will be packed in ice instead of standing in jars of water until shipping, and we hope to have them arrive at destination in first class unopened condition.

Send for Price List.

Flower Market Reports

(Continued from page 743)

NEW YORK The general tone of the market is dull.

Supply of most every kind of stock is more than enough to meet daily requirements, and prices rule low for the season. The cut of Beauties, Killarneys and Marylands is heavy, which makes almost impossible daily clearances. Carnations are not particularly numerous, but are cheap because of other material being so plentiful. There are plenty of Bridesmaids and Brides, and quite enough of cattleyas and gardenias, the latter selling at very low figures. Thousands of bunches of A-1 quality sweet peas are shipped in every day, and all find a market at some figure. Lilies are in good supply. Of the outdoor stock the sum is made up of lilac, lily of the valley and peonies, most of the latter coming from neighboring southern states, and a few from Jersey and the demand for them is tame.

PHILADELPHIA Wind up was very satisfactory last week. White

carnations realized good figures, although probably not as high as anticipated. There were fully twice as many white carnations sold this year for the Mothers' Day event as last year, at conservative estimate, some authorities claiming that three times would be nearer the mark. Other flowers were affected by this event, also, there being a great many used in mortuary work where otherwise the white carnation would have come in. The general tone of the market was sluggish early in the week but brisked up very materially later. Roses and the general line of flowers in the darker colors were not in as good demand—the lighter colors all along the line cleaning up best. Festiva Maxima peonies are the harbingers in the oncoming army of these, which will be in fine shape this year for Memorial Day work.

An old-time, busy spring is reported by the Detroit garden planters and florists. Bedding plants selling briskly.

FIRE RECORD.

Des Moines, Ia.—The J. S. Wilson Floral Co., on the afternoon of April 28, lost the packing sheds, boiler room and stables by fire. The total loss was \$2,000, insurance \$1,000. The ends of the greenhouses adjoining part of the property burned were damaged and plants for a distance of about 15 feet were destroyed.

BUSINESS CHANGES.

Wichita, Kans.—D. B. Cain & Co. are now proprietors of the greenhouse establishment at 1621 Fairview avenue. Although the greater part of the glass was broken by hail in the recent storm, most of the plants escaped injury and the house is still open to business.

Ford Bros., wholesale florists, New York City, have dissolved partnership, Wm. Ford retiring, and Michael will continue the business. The business

has been moved this week to the new store, 129 W. 28 St.

Why HORTICULTURE has stood the test as a profitable Advertising medium for the trade.

Because It is read by the men of standing and influence in the Horticultural field, every one of whom is a prospective buyer.

Why HORTICULTURE is so widely read.

Because Its contents are distinctly representative of American Horticulture and are thus indispensable to the Florist, Nurseryman, Seedsman and Gardener.

An Admirer of HORTICULTURE in the Central West writes; "It has won on its merits. It is our most prized weekly visitor."

And Now How HORTICULTURE has managed to elbow its way in between its older rivals and why the best trade advertisers find it an indispensable auxiliary.

It's No Secret That the men who read HORTICULTURE are the sort of men that advertisers like to talk to and if you have anything to advertise you can't afford to get along without them.

MASSACHUSETTS AGRICULTURAL COLLEGE.

The following letter is being sent out by Prof. T. C. Waters of the Department of Horticulture:

Dear Sir: I am carrying on some research work at the college in connection with my graduate course and am making a special investigation of rose culture. I wish additional information from practical growers along certain lines and shall appreciate your kindness in answering the following questions:

1. Varieties of roses?
2. Size of range and annual output?
3. Soil composted or prepared directly in field?
4. Kinds of manures or fertilizers used in preparation of soil, and amounts used?
5. Do you grow own root or grafted stock?
6. What opinion have you formed regarding the merits of these two methods?
7. Do you use blind wood or flowering wood for cions?
8. How often do you replant your beds or benches?
9. What kind of benching do you find best adapted to rose growing, solid beds or raised benches?
10. Fertilizers used for forcing crop, do you use liquid manures or chemicals, or both? If chemicals what kinds?
11. Watering, do you believe in soaking? If so, under what conditions?
12. Do you keep records of blooms produced per plant for each variety or house for the year or month? If so, will you kindly state your average monthly yield of the different varieties?
13. Which type of house do you find best adapted to rose growing, even span, 2-3 span, etc.?
14. Do your houses run east and west or north and south? If you have both kinds, which do you find to be best?
15. What is your heating system?
16. What remedies or preventions do you use for red spider, green fly, thrips, rose slugs, ell worms (root galls), mildew and black spot?
17. Is your market local or long distance?
18. What is the average price?

Very truly yours,
T. C. WATERS.

NEWS NOTES.

Stuart Low & Co. write that after exhibiting flowers of Lyon rose in the warm atmosphere of the hall at the Royal Horticultural Society in London they despatched the blooms to Falmouth, 300 miles distant, and they looked quite well at the exhibition there on Thursday and Friday, well demonstrating the lasting qualities of the variety.

The Engelmann Botanical Club held an interesting meeting last Monday night in the Central High School Bldg., St. Louis. Prof. Geo. T. Moore's paper on "Life in the Soil" was very interesting. Secretary Jensen says that the

meetings of late have been well attended. All in the trade regardless of membership are invited.

Obituary.

Samuel W. Saunders.

Samuel W. Saunders, father of Ernest Saunders, florist, Lewiston, Me., died at his home in Lewiston, on May 6, aged 68 years.

Henry Blanksma.

Henry Blanksma, of the firm of Blanksma Bros., Kalamazoo avenue, Grand Rapids, Mich., died May 5th at Reed's Lake Sanitarium, in his thirty-eighth year.

Henry C. Eickhoff.

Henry C. Eickhoff a well-known nurseryman, died suddenly on April 29 of heart trouble, at his home, near Indianapolis, Ind. Mr. Eickhoff was born June 9, 1853, on the farm where since his twentieth year he carried on the nursery business. Originally he conducted the business in partnership with his brother, Edward A. Eickhoff, under the firm name of Eickhoff Bros. In later years, however, he conducted the business in his own name.

His home and surroundings were always a beautiful example of landscape gardening. In 1907 he became ill with heart disease and complications, from which he never fully recovered.

He leaves a widow, formerly Miss Elizabeth Kuehn, and eight children, five girls and three boys.

Thomas E. Marr.

Thomas E. Marr, whose reputation as a photographer of landscapes was national, died at 16 Hiawatha road, Mattapan, Mass., the home of his son, on May 7. He had been ill with the grippe when he returned to his studio on Sunday, and a relapse which followed proved fatal.

The death of Mr. Marr is a loss to photography as an art. He was a maker of camera pictures the greater part of his life. He learned the daguerrotype business in his early manhood and, after photography was invented, turned all his energies toward perfecting the new art.

A number of the pictures of Mark Twain printed since the humorist's death were the work of Mr. Marr. He had also photographed many other notables. It was as the photographer of landscapes that his fame was greatest, however. He furnished many magazines and periodicals with illustrations and was called upon to photograph many of America's show places.

Mr. Marr was 61 years old and a native of Nova Scotia. He had been in business in Boston for forty years.

W. E. Hall.

Wm. E. Hall, passed away at his home at Clyde, Ohio, Tuesday, May 3rd, aged fifty-three years.

His severe illness of four weeks' duration was due to a relapse after having a siege of the grip. Mr. Hall was born May 17, 1857, and raised in Clyde, where he has spent all of his life. He was married to Eva Stark, June 17, 1885. To this union were born four sons, Eugene, Breese, Lloyd and Frank and two daughters, Amy and Lulu, who with the sorrowing wife and mother are left to mourn the loss of a loving husband and father. He also

leaves an aged father, Ezra Hall, who thirty years ago started in the floral and gardening business in Clyde. He retired in 1898 and the business has since been carried on by his son, the subject of this sketch, in a most prosperous manner, and in latter years he has been assisted by his sons, Eugene and Breese. Through his prosperous business as a florist he has gained a wide reputation and was also well known and highly respected by the community at large. The funeral on Friday, May 6, was attended by many florists, among those from out of town being I. Husbands of Bellevue and Messrs Bayer and Krueger of Toledo. Deceased was a member of the S. A. F., American Carnation Society and Toledo Florists' Club.

NEWS NOTES.

Jefferson City, Mo.—The Jefferson Floral Company's plant of five greenhouses has been purchased by Hugo Bush.

Port Arthur, Tex.—A new nursery has been started here. C. D. Otis of Lake Charles, La. and John W. Gates are the chief stockholders.

Goshen, Ind.—Fifty acres near here have been purchased by A. E. Kunderd, formerly of North Wayne, and will be planted to gladioli.

Olean, N. Y.—The Whitney Avenue Greenhouses have been sold to Edward Long. Mr. and Mrs. Johnson, who have conducted them for nearly a quarter of a century, will retire.

Kansas City, Mo.—Mr. Hall's interest in the Rudy-Hall Seed Co., 732 Minnesota avenue, has been purchased by Frank Rudy, who will hereafter conduct the business under the name of The Frank Rudy Seed Co.

Harrisburg, Pa.—The Berryhill Nursery has purchased 45 acres of land on the Johnstown road from R. Sherman Care. The nursery has been located at 13th and Berryhill streets. O. P. Beckley is president.

Massillon, Ohio.—Tom and Frank Kester have leased four acres of land east of this city and will erect two greenhouses. They will establish temporary quarters in the Crone Bldg., South Erie street. Frank Kester was formerly employed by A. Weaver.

West Quincy, Mass.—George F. Elcock, a well-known dahlia fancier, plans to give residents and visitors something well worth looking at during the coming summer. He has imported from Germany and France many new cactus dahlias, all of which took prizes at the London Union last year.

San Francisco, Cal.—Luther Burbank, whose experiment farms are situated at Santa Rose, has offered his seeds for sale this year through several houses among which is the "Emporium" of this city. This is the fact back of the widely circulated rumor that Mr. Burbank had opened a retail store in the Emporium.

Westboro, Mass.—Wm. M. Gardner, a florist at 50 High street, has recently received word from his old home in Dumfries, Scotland, that he is one of the four heirs to \$25,000, left by the death of his uncle. The Scotland lawyers who have been settling the estate have been searching for Mr. Gardner since last June.

PUBLICATIONS RECEIVED.

The Boston Museum of Fine Arts, by Julia de Wolf Addison, author of Arts and Crafts in the Middle Ages. This elegant volume gives a descriptive and critical account of the rich and rare treasures collected together in the Boston Museum of Fine Arts, which represents the arts and crafts from remote antiquity to the present time. The cover presents a picture in gold of the main entrance to the splendid new building recently occupied by the museum, and there are sixty full page illustrations, with two diagrams showing the arrangement and lay out of the two main floors. The contents are in fifteen chapters covering American Painting, Old Masters, French School, Persian and other Textiles, Pottery and Tapestry, Glass, Porcelain Art, the Buffam Collection of Amber, Prints, Egyptian, Classical and Greek departments, Coins, Chinese and Japanese Sculpture, Painting and Metal Work and Oriental Pottery and Porcelain. The decorative artist will find in the pages devoted to the classical department and pottery exhibits very much that is instructive and helpful to anyone seeking to advance in the practice of floral decorative art.

The book is published by L. C. Page & Co., Boston; the price, \$3.00.

From the same publishers have just been issued two books of fiction, both being works of unusual merit. A Cavalier of Virginia, by G. E. Theodore Roberts, with illustrations by Louis D. Gowing, is an absorbing story full of adventure and tragic word pictures. Price \$1.50. Kilmeny of the Orchard, by L. M. Montgomery, with four illustrations in color, from paintings by George Gibbs, is a delightful little romance, replete with thrilling situations and sweet sentiment. Price \$1.25, postpaid. Either one of these books will make an acceptable gift for either sex. The typographical work, binding, etc., are par excellence.

"Transactions Illinois State Horticultural Society."—This is a very interesting and valuable book of 554 pages. Besides the papers and discussions at the 1909 annual meeting of the State Horticultural Society it contains the proceedings of the meetings of the Northern, Central and Southern Illinois Societies for 1909, and much other information of practical use to fruit and vegetable growers. The papers on "Asparagus Culture"; "A Maple Leaf by T. J. Burrill, of the University of Illinois"; "Making and Use of Concentrated Lime-Sulphur" by Prof. John P. Stewart, State College, Penn.; "Problems in the Pollination of Fruits" by Prof. S. A. Beach, Ames, Iowa; "The Gypsy and Brown Tail Moths," by Dr. S. A. Forbes, State Entomologist; "Results of Spraying Experiments" by R. B. Howe and W. S. Perrine, and the discussion of "Smudge Pots as a Protection from Frost" are of special interest just now.

This society is doing good work. Any person paying one dollar may become an annual member and receive a copy of the report postpaid; officers of County Farmers Institutes in Illinois may have copies for free distribution among members by ordering of the Secretary and paying the express charges. Upon application copies of

the book will be furnished school and other libraries of the State, and to local Horticultural Societies. Applicants are expected to pay express charges or send stamps to cover postage.

All communications should be addressed to W. B. Lloyd, Secretary, Kimmund, Ill.

A new method of preventing potato disease is suggested by a West-country correspondent, who writes that by an accident a bluestone solution found its way on to a heap of seed potatoes, and when these potatoes were sown it was remarked that they grew the only healthy part of the crop.—*Market Growers' Gazette*.

NEWS NOTES.

The florists' Hail Association is adjusting losses at Durham, N. C.; Dallas, Texas; Oklahoma City, Oklahoma; and Wichita, Lawrence, Emporia, Strong City, and Manhattan, Kansas. So far Wichita, Kansas, has had the prize hail storm for 1910, seventy-five per cent. of the glass in the town having been destroyed by the storm of May 1st.

Hastings, Neb.—Further report of the damage done by hail to the greenhouses of C. W. Sidles is to the effect that he lost 1700 lights of glass and the Tanher greenhouse lost about the same amount. Chas. Winkler had his glass protected with wire netting, so he lost no glass at all. Sidles was insured and received \$150. Tanner had no insurance.

PATENTS GRANTED.

- 956,601. Lawn Mower. William M. Potter, Syracuse, N. Y., assignor to E. C. Stearns & Co., Syracuse, N. Y.
- 956,654. Lawn Trimmer. Orla H. Watkins, Ames, Iowa.
- 956,771. Portable Greenhouse or the like. Edward C. Kline, Streator, Ill.
- 957,009. Lawn Mower. Josiah H. Smith, Philadelphia, Pa., assignor to William H. Tigerman, Philadelphia, Pa.

IRON VASES

Made with reservoir containing sufficient water to last 10 to 15 days. Desirable for lawns, invaluable for cemeteries. Thousands in use.

**Over 100 styles and sizes
\$3.00 to \$75.00 each**

Write for price list to
WALBRIDGE & CO.
BUFFALO, N. Y.

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

GREENHOUSES BUILDING OR CONTEMPLATED.

- Duluth, Minn.—R. Lutey, one house.
- Davis, Calif.—University Farm, one house.
- St. Joseph, Mo.—Stuppe Bros., range of houses.

Compare Them

Compare the cost of the wooden house with our Iron Rafter House; bear in mind that the Iron Rafter costs less to erect, less to keep in repair, and gives you greater returns in quantity and quality of flowers, than the best cypress house made. This construction pays for itself many times over.

The next best proposition is our Half Iron Frame House. Send for circulars.

Hitchings & Company

New York—1170 Broadway

The House of "Increased Efficiency"

The L & B Sectional Iron Frame Houses, whether for private places or among the florists, are today being run at less expense, and are yielding greater returns than other constructions.

It is because of their unequaled durability and "increased efficiency." Send for particulars.

Growing Orchids

A FEW HINTS TO THOSE WHO CONTEMPLATE STARTING A COLLECTION OF ORCHIDS.

ODONTOGLOSSUM CRISPUM

Much has been written about orchids in recent years in various magazines and newspapers and this, together with the various horticultural exhibitions in which orchids have figured has aroused the curiosity of the general public to no small degree. The word "Orchid" alone seems to have something fascinating about it, due perhaps to the many weird tales which have been told about or in connection with them. The public is evidently very much interested in orchids and anxious to see and learn more about them. The coming exhibition of the Massachusetts Horticultural Society will accomplish a good deal in that direction, and is certainly a very commendable undertaking; but it will not and can not be of any great benefit except to those who are fortunate enough to be able to attend the exhibition. The great mass of people can not be reached in this way. What we need is more collections of orchids on the many private estates throughout the country. Orchids ought to be well represented in any establishment where several greenhouses are at the disposal of the gardener and should there be but one house, a place can be found in it for at least a dozen or more representatives of this interesting and beautiful section of the floral kingdom.

"Where there is a will there is a way" and any gardener who can successfully grow the regular run of greenhouse plants can, if he will try, learn to grow orchids too. It will not be absolutely necessary to have

specially built houses for them, for orchids can be grown in any greenhouse, no matter what its construction or heating facilities may be, so long as the temperature can be kept above the freezing point in severe cold weather. There is such a great variety of orchids to be had from all parts of the tropical and semi-tropical countries where they may be found growing in the hot and dry lowlands, near the seashores, in the forests and up the sides of the great mountains to within a few feet of the snowline, (a collector in Costa Rica and adjoining countries used to tell of gathering *Odontoglossum Schlieperianum* growing on the sunny side of big rocks and a few feet away in the shade, the ground would be frozen hard,) that it is obvious that some variety or other can be successfully grown in any greenhouse where the temperature does not go below 40 degrees during winter. I have often had the temperature in my cool house go down as low as 34 degrees during a spell of severe cold weather without any harm being done to the various orchids growing therein, but I would not advise to let the temperature go below 45 degrees in any house if it can be helped. A great variety of orchids can be grown under one roof and if several houses with different temperatures can be had, it will be all the better.

AN EXTENSIVE COLLECTION IN SMALL QUARTERS

For the benefit of those who would like to make a beginning towards getting up a collection of orchids and who have had no previous experience in growing them I will try to show how I manage to grow quite an extensive collection (without the aid of special orchid houses and without sacrificing too much room needed by the regular selection of plants grown here) by finding suitable places for the different species and varieties, naming the most important as I go along. The houses here are small, consisting of two curved

roof structure (ground glass) running north and south, each 20 x 58 feet, one of them divided off in two sections; these two ranges are connected at the south end with a little three-quarter span 18 x 24 feet. Back of this and connected with it is a little old fashioned house 11 x 31 feet, running north and south. This is all the glass here except some 18 sashes, but these are seldom used for orchids. It is surprising what a great variety of plants are grown in these five small houses outside the collection of orchids which alone contains about 65 genera and 325 species and varieties and altogether about 1500 plants. I will say right here that all of them are not doing as well as I would like to see them do, but there is a good reason for it and that is simply—too much work for one man.

The little old house last mentioned is used mostly for calceolarias, primulas and like plants requiring but little heat and during winter no orchids are grown in it except that when I want to hold back *Coelogynes* or other orchids, it makes a good place for that purpose. During summer it is well adapted for the cooler growing *Cypripediums*, *Odontoglossums*, *Masdevallias* and many others requiring shade and a cool, moist atmosphere. I have made lath shades for this house out of firring strip and plaster laths, the laths being spaced $\frac{1}{2}$ inch apart. These give a nice shade and have a cooling effect; in cloudy weather they can be removed, being made in sections 4 x 7 feet. This house is kept as cool as possible during summer, the ventilators, both top and bottom, being left wide open day and night.

IN THE "ROSE" HOUSE

From this house we enter into the $\frac{3}{4}$ span or rose house as we call it here. The temperature in this house during winter is kept at about 56 at night with a rise of from 5 to 10 degrees during the day. This house has clear glass and a southern exposure and makes an ideal place for resting *Dendrobiums* in winter

COELOGYNE CRISTATA, CHATSWORTH VARIETY

which are suspended from the roof, wires being stretched along the roof for that purpose. *Vanda teres*, *V. Kimballiana*; *Renanthera coccinea* and a few other things also find a home here and do well. The center table of this house is occupied by callas or carnations; the front bench by various flowering plants according to the season. In a pit against the back wall are growing some climbing tea roses. After planting out time the house is shaded some and then turned into a stove to accommodate the fancy-leaved caladiums of which quite a number are grown here for the summer. The extra heat required by these will also suit the *Dendrobiums* which will be growing well by that time and all that can be accommodated are grown here for the summer months. Here they get plenty of heat, light and fresh air and can be freely syringed without hurting the plants below. As nearly all *Dendrobiums* are grown in small pots, they dry out quickly and should therefore be syringed quite often and occasionally dipped in a tub of water containing a small quantity of some liquid fertilizer.

Most any variety of *Dendrobium* can be wintered in a house like this with the temperature given above, but during the summer, their growing season, some of them require different treatment. For instance, *D. Phalaenopsis*, *D. superbum* and several others will do better if given a little more heat and shade than the *D. nobile* section; the *thysiflorum* sections requires plenty of heat and light; *D. moniliforme*, *D. atro-violacea* and several other dwarf growing varieties will grow best in the cool house all the year round, giving them a light and airy position; *D. formosum* and its allies grow best with the *Cattleyas*; so one must look around and try to find a suitable place for each one.

ONCIDIUM MARSHALLIANUM

If a plant grows well on any one place, leave it there.

THE "COOL" HOUSE

From this little rose house we enter into what I call the azalea—or cool house; it is 25 x 20 feet. The temperature in this house during the winter is kept at from 45 to 50 degrees at night and from 50 to 55 degrees during the day; in summer it is kept as cool as outside conditions will permit. There is a pit in the center of the house occupied by large specimen azaleas and other plants; smaller azaleas are grown on one of the side benches, and a lot of other cool growing stuff on a bench in the southwest corner. Suspended overhead in this corner where they get plenty of sun are some plants of *Oncidium concolor*, *O. cheiroporum*, *O. crispum*, *Odontoglossum grande*, *O. Insleayi*, *O. Schlieperianum*, *O. cordatum* and *O. Rossii majus*, also *Sophronitis grandiflora*, *Cattleya citrina* and the curious little *Restrepia antennifera*. *Dendrobium nobile* finds a place here to rest during the winter and spring, being suspended at the southern end where they can get the full benefit of the sun and plenty of fresh air. A few dozen *Oncidiums*, mostly *O. verrucosum*, are suspended from the roof well up near the ventilators and judging from the way they have been growing and flowering for the last 5 or 6 years, they evidently enjoy just such a place; the same holds good with nearly all of the different *Oncidiums* coming from the Organ Mountains of Brazil, all of which are by no means easy to keep in good health for any length of time. *Oncidium incurvum* and *Epidendrum fragrans*, also do well in this

ODONTOGLOSSUM GRANDE (BABY ORCHID)

house. One short bench, which is partly shaded all the year by the adjoining rose house makes an ideal place for the various *Masdevallias*, *Warscewiczella aromatica*, *Odontoglossum Bictoniensis* and a few other botanical varieties which like to grow in a cool shady place. Further on on this bench where there is more light, *Odontoglossum crispum* and *Miltonia vexillaria* are doing well, the last named being removed to warmer quarters during the cold winter months. This house and the adjoining one are provided with bottom ventilators which are a good thing to have wherever orchids are grown as they assure an abundance of fresh air which is the life and soul of orchids. During the hot summer months roller blinds, made of a strong cloth called open duck, are used on the houses and are let down during the hottest part of the day. They help to keep the temperature down and prevent the foliage from getting too yellow.

THE CATTLEYA HOUSE

Next we come to the so called *Cattleya* house where most of the different *Cattleyas* are grown. These occupy the biggest part of the side benches, the end part of the benches being used for those taller growing orchids which succeed in these surroundings. The temperature of this house is kept from 58 degrees to 60 degrees at night during winter and spring; through the summer from 60 degrees to 65 degrees. The house, like the rest of them, is damped down thoroughly once a day (except during a prolonged spell of cloudy weather), those plants which require water being watered at the same time and if the weather is bright all the plants get a good syringing which helps to keep down insects. All the watering is usually done in the forenoon, but in summer the plants are sprayed overhead again towards night if the day has been hot and dry. Besides the *Cattleyas* a number of other orchids are grown in this house, mostly suspended from the roof. One side of the house is shaded in summer from two trees which stand very near the house, sorry to say; so no blinds are used on this side. On this side of the house *Cattleya labiata* grows best as that variety seems to like a little more shade than the rest of the *Cattleyas*. One shady corner of this bench is used for *Selenipedi-*

MASDEVALLIA IGNEA

ums and suspended from the roof *Oncidium ornithorynchum*, *O. luridum*, *Bifraneria Harrisonia*, *Dendrobium formosum giganteum*, *D. Pierardi*, *D. Findleyanum* and some botanical orchids thrive here. On the other side bench *Cattleya Trianae*, *C. Mendelii*, *C. Schroederiae*, *C. Mossiae* and several others do well, as they get more sun there. At the end of this bench a place is found for the taller growing *Dendrobiums*, such as *D. muschatum*, *D. calceolaria*, *D. fimbriatum* and others, also *Phaius grandifolia* and *Zygopetalum Mackayi*. At the other end of this house a place is reserved for the different varieties of *Schomburgkias* (the beautiful *S. tibicinis* being in bloom at this writing.) *Laelia anceps* and *L. autumnalis*, *Brassavola Digbyana*, *B. glauca*, *B. cordata*, *Trichopilia suavis*, *T. tortilis*, *D. thyrsiflorum* and *densiflorum*, *D. Farmeri* and *D. Falconeri*, also *Oncidium splendidum* and *Odontoglossum citrosmum*. All these are suspended from the roof and all receive practically the same treatment. On a bench in a corner at this end of the house are found *Cymbidium Lowianum* and *C. Tracyanum*, *Brassia verucosa*, *Epidendrum radicans* and several other species of less importance. All these plants receive no shade save what little the ground glass affords. Several varieties of *Stanhopeas* are suspended at the shady side of this house. The center table is used for growing an assortment of shrubby begonias, ferns and various other plants which can stand a good deal of sun and do not mind to be watered overhead.

HEAT AND SHADE LOVING SPECIES

In the other range, the temperature of which is kept during winter from 60 degrees to 65 degrees at night and from 65 to 75 during the day, all heat and shade-loving orchids are housed, but the south end is but little shaded, for the benefit of the *Cattleya gigas*, *C. speciosissima* and other heat and light-loving orchids. *Laelia purpurata*, *Schomburgkia undulata*, *Chisia aurea*, *Dendrobium superbum*, *Oncidium Papilio* and various *Cattleya* and *Laelia cattleya* seedlings are also grown at this, the south end of the house. The center tables in this house are used for growing a general line of decorative plants which will succeed in a warm and shady position; for instance, anthuriums, crotons, marantas, ferns, *Eucharis amazonica* and many others. One end and part of one side of the center table is occupied by huge specimens of *Oncidium sphacelatum* and *Cypripedium insigne* which grow like weeds here. Over the center table and over part of the side benches are suspended from the roof about 450 *Phalaenopsis amabilis* and *Schilleriana* and a few other varieties and they are certainly doing well here. The plants growing underneath keep the atmosphere just moist enough to suit the *Phalaenopsis* and these in turn provide plenty of shade for the plants on the bench; the *Phalaenopsis* are also benefited by the extra heat and light which they receive from being so near the roof. When in bloom, as many as room can be found for are put on the benches and they make a beautiful display. They certainly are worth all the trouble it takes to grow them, which after all is not more than it is with any other orchid; the main thing is to prevent the atmosphere from getting stagnant. It has often been advised to close the houses early in the afternoon in summer, damping down the floors at the same time, in order to store up some heat and get up a nice balmy atmosphere for the night; the ventilators to be opened up again before leaving the place for the night. I have tried this treatment on numerous occasions and each time with fatal results. I have found out by experience that it is just such atmospheric conditions which cause *Phalaenopsis* and sometimes other orchids to rot off over

night. It is not on account of water lodging in the heart as is generally supposed, for if that was the cause of it I would have killed every *Phalaenopsis* on the place long ago. Moreover the rot very often starts on some part of the leaf, sometimes at the very end where it would be impossible for water to lodge for any length of time. I water my plants overhead with the hose every time; splashing the water all over them and syringe them almost daily in order to keep them free from insect pests; I frequently do this the last thing before closing up for the night, but I never lost a *Phalaenopsis* from having water standing in the crown. Keep the ventilators open just enough to allow of a free circulation of air and there will be no trouble from plants rotting off. It sometimes happens that the young growths of *Dendrobiums* and other orchids rot off; this is, in my opinion, usually caused by overwatering as one generally finds the roots decayed in such case.

One side bench in this house is used in part for growing *Calanthes*, the atmospheric conditions suiting them to perfection; they are allowed more light than the *Phalaenopsis* by not letting down the blinds over them. These should not be allowed to dry out after they have started to grow until the flower spikes are well developed; they are potted in a compost consisting of three parts well decayed cow manure and one part fibrous loam with the fine soil well shaken out. The pots are filled with crocks to within about 2 inches of the rim and the bulbs set deep enough to prevent their being knocked over when watering. The other part of this bench is used for the various species and varieties of *Vandas*, *Aerides*, *Angraecums*, *Cypripediums* and a large variety of interesting botanical orchids, too numerous to mention here for I am afraid my notes have already been stretched too far. There is so much of interest in a collection of orchids that one can't help but love them and try to encourage others to do likewise. I hope to live to see the day when every gardener is an orchid grower as well, for orchids are destined to be the most popular flowers of the floral kingdom.

Naugatuck, Conn.

M. J. Ope

200 FL. HOUSE OF CATTLEYS AT JOS. HEACOCK'S, WYNCOTE, PA.

Orchid Hybridization

There are few phases of horticulture that have progressed so rapidly and produced such wonderful results as the work of the cultivator and careful hybridizer of orchids. The man who went into the wilds and brought out hidden treasures used to be the hero of the day; scarcely an issue of the horticultural press but told of the flowering of some new species or rare variety, and the yearly totals of plants new to science required columns for their enumeration. This is not so now. Collectors rarely find a new plant, their efforts being wholly devoted to sending home in quantity those kinds most in demand, and they tell frequently of the greater difficulties experienced each time in securing and transporting their plunder.

Here is where the home-raised plants fit in, for if we knew there could be no more orchids secured from their native haunts, cultivators would start on another tack, and raise seedlings from the very best varieties in their possession, with the reasonable assurance of some being equally as good as the parent, some better, the greater portion without doubt being of less value for the tendency of all nature is to retrogress.

When speaking of hybridization, very much of the time cross-fertilization is meant. A plant the result of two varieties of *Cattleya* is a cross, and when we try to define the species in this genus it is no easy task, for the authorities are not of one opinion and may never be, so the term hybrid has become a generic one, often made to do duty for seedlings in general, and until the question "What is a species?" is better answered than it has been, the gardener may be excused his idiom.

HELPING SCIENCE

When seedlings were first flowered in cultivation, the old-time botanists did not enjoy them; possibly they foresaw the endless tangle in nomenclature that was to ensue! It is even asserted that some of the offsprings were called impolite names by those who were to be their sponsors, but in the meantime they went merrily on creating species, and not perhaps until the time of the younger Reichenbach did the suspicion creep in that some of these "species" were natural hybrids. The present day cultivator is proving again and again each year that the old names have to be changed by the addition of an \times as a prefix to denote the proper origin, even though it happened on the Andes. This is especially true of the *Odontoglossums*, as they are often found growing together, while the *Cattleya* districts rarely overlap. The conundrums of a generation ago are plain today to a novice, when he is shown.

THE CULTIVATOR

And this is where the cultivator comes in and is told that orchids must perforce be assisted in some way before seeds can be produced, and Darwin did it so well that the small boy in the greenhouse was eager to try his 'prentice hand, and he is doing it today. How wonderful the mechanism of a *Cattleya* flower, with radiating lines on the lip all converging at the point of contact! Doubtless these lines are visible to the bee in the forest. In some instances they are raised up to form a rough road for travel, so that in fighting his passage fertilization is assured. An instance of this is seen in *Laelia Dayana* and in the *Coelogynes*. In the beginning all sorts of attempts are made, including the impos-

CATTELEYA \times THAYERIANA (C. INTERMEDIA \times C. SCHROEDERAE ALBA.)

sible, these last being useful to teach how far one may go and succeed. It used to be considered impossible to cross two genera; this may even be true, but if it is the botanists will have to rearrange the whole family, for many beautiful bi-generic hybrids are in existence and—what is more important—they are not sterile, and are being used as parents themselves, as in some of the *Sophronitis* crosses, with success.

LIMITATIONS

As already noted, there is a limit to the possibilities, but it is not the intention of the writer now to name them, not even those proven, because more radical matings are being made by others; but there is another phase of the subject that calls for comment, namely, indiscriminate use of the material available. Seedlings today are cheaper than imported wild plants; thousands are thrown away even by one individual raiser, or were until he raised plants from the very best types possible, and only this is worth while today. The complaint has often reached the writer that home-raised plants do not equal introduced ones, and it is true that there are gems among the latter we shall never see excelled, such as a *Cypripedium Sanderae*, a *Cattleya Reineckiana*, or a snow white *C. gigas*—perhaps the rarest, certainly the newest, acquisition. We know, however, that these can now be perpetuated and even improved upon by other and more rapid means than the old lifetime method of division, and if the two last named *Cattleyas* were mated (they are now in bloom together) one could with certainty count on many being good, and, what is of more interest perhaps, the home-raised plants would be in bloom at various seasons.

VARIABILITY

The introduced types are fixed in their character of blooming at stated periods. Individuals may, and have been noted to vary less than a week from year to year in time of opening. In direct contrast to this is the fact that if we take *Laelia purpurata* and cross with *C. Gaskelliana*—two summer blooming kinds—the resulting plants will be in bloom every week in the year, and this is only one illustration. Herein it would seem lies the greatest triumph of the operator, inasmuch as the cross or hybrid is also a magnificent Orchid; no two

plants are alike, variations even greater than shown in either of the two parents is present in the progeny.

In the lot of over seventy *Cattleya* × *Thayeriana* no two are alike, and the variation is such that is hard even for the raiser to believe they are of one common origin, and the parents—*C. Schroderae* and *C. intermedia*—are among the least variable, but they *do* vary.

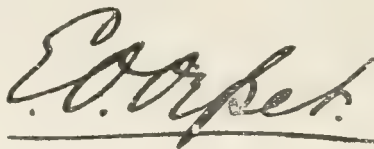

VIGOR

Orchids die slowly; they are long suffering, but the end is sure. This was the accepted fact twenty years ago in considering cattleyas. Now with rational methods of culture of introduced plants and the addition of seedlings, one may be sure of keeping his plants. Not all the latter live to flower; millions die annually before being visible, or barely so. There is vigor enough to enable the seed to germinate, but their environment is unsuitable and some die before we see them, others in later stages, but those that survive are eminently fitted and should never die. This is true of primary crosses. It is probable that those of more complex origin may not have this amount of vitality. We read recently of two trees proved to be of hybrid origin; one, the Italian Poplar, the most vigorous known, and the English "Cricket Bat" willow, well known for its value as a timber tree. Both were a puzzle for years.

It is hoped that vigor may be a first requisite in future experiments, though a plant if it be weak will produce a portion of good seeds, and the weakness, if temporary and not constitutional, will not be handed down.

The great exhibitions of today are filled with the work of the cross-breeder, and it is not too much to say that already they are producing as fine orchids as any existing in cultivation. Nature did not finish her productions, she only began; gave us the raw material as it were, and man was endowed with the intellect to carry it on, and he has but begun to realize the possibilities.

The only ones to be pitied are those who try to arrange the names in a reasonable way. It was a gigantic task the compilers of the "Stud Book" undertook! What will it be in the future when are produced plants having possibly four genera in their pedigree? Who shall coin a euphonious name?

VISITORS TO BOSTON NEXT WEEK

are cordially invited to call at the
OFFICE OF HORTICULTURE
and register.

Facilities for writing, telephoning, etc., will be freely extended, and those who so desire may have their mail addressed in our care. The office, 11 Hamilton Place, is centrally situated in the business section, almost directly opposite the Park street subway entrance, from which cars are conveniently taken for Horticultural Hall, where the Orchid Show will be held.

THE EXHIBITION

will open at

8 P. M. THURSDAY, MAY 26,

and will continue till the night of May 30. The opening evening will be in the nature of an evening dress reception.

Causes of Disappointment in Orchid Growing

Carnations, orchids and roses are doubtless the aristocracy of the floral world, and without doubt, too, one is as easily grown as the other—"Yes, yes," I hear someone say. "I have a fair amount of success with my roses and carnations, but am afraid to venture with orchids, having seen such dire results; and then, the expense!" Now, my dear sir, or madam, with less than ordinary expense and a little thought you may cast your fears to the wind.

I will first indicate the cause of failure. The would-be orchid grower puts his plant in a conspicuous place till it goes out of flower, when it is placed in the background, given a good watering and left to take its chances—the good watering at that particular time being, perhaps, the first nail in its coffin—as what is then wanted is a rest; but although treated ever so badly it won't die, but tries to make a fresh growth, but doing it so weakly that it fails to flower the next season. It then goes from bad to worse and gets called bad names.

Again a dozen or more plants are bought and as you are "going in for orchids" you run up the heat to 10 or 12 degrees above the needful, and not only weaken the plants but increase the number of insects which revel in a hot dry heat, and so disaster is assured to the plants, vexation and loss to the owner. I went into a cypripedium house once where the plants were red with the ravages of thrips, the place being like a lime kiln, and the temperature 80 to 90 degrees. The gardener (?) explained to me that the plants were suffering from condensed moisture—*condensed nonsense, I called it*. On another occasion the gardener was damping down at 5.55 p. m. on a cold, wet March afternoon. "What are you damping down for now?" said I. "Oh," he replied, "I have not had time before," and it would have been far better for the plants if he had not had time then. Now, it is such men who do their stoking, watering and damping down without any thought of what the plants require, that are a curse to the fraternity.

Want of fresh air is, too, a frequent cause of failure. People forget that orchids in their native habitats grow out of doors, and, although in the tropics, often at such an altitude that though hot in the day time, the nights are very cool.

"Well, then," I am asked, "what is the best way to begin?" Suppose you have a house or houses of varying temperatures partly filled with other stock, but wishing to add orchids. By a judicious selection you should be able to introduce plants that would do well either in a cool house, a fernery or a stove. The mistake so often made is to place in one house each and every orchid that takes your fancy. As well might you try to keep canaries and gold fish in one cage. If the house you have is only suitable for cool orchids, just buy cool orchids, than which none are more beautiful, and will only need a minimum temperature on winter nights of 45 degrees. Last week I saw in the nurseries

of Stuart & Low Co. over 1400 spikes of *Odontoglossum*. No description can adequately describe their beauty. Truly they have been called the "Gems of New Granada." The great difficulty you have in America is the extreme summer heat which *Odontoglossums* object to, and many attempts have been made—but so far with only partial success—because if a cool spot has been found or made, there has not been enough circulation of fresh air, which is an absolute necessity. But surely the wit of man that brings meat frozen and unharmed through the tropics and can make a cold house warm by water, can make a hot house cold with ice. Iced water is no novelty in America.

Therefore the intermediate house with minimum temperature of 50 to 55 degrees, where the gorgeous *Laelias* and *Cattleyas* grow so well, and where with your bright sun far better results are obtained than under the dull grey skies of England. What a feast of color and form is to be had!

The stove house again with night temperature of 60 to 65 degrees will give you the showy, early flowering *Dendrobes*, *Phalaenopses*, *Vandas*, *Aerides*, etc.

The large family of *Cypripediums* grow well in both the intermediate and stove department and has many lovers, the lasting qualities of the flowers being greatly in their favor. After finding the right place repotting and watering are the principal things to learn. As a rule the time to repot a plant is after it has done flowering and when it has had a rest—and then it must not be watered too much. A plant suffers far more from too much than too little water. There are many articles written with practical hints on both potting and watering.

Many plants are injured by leaving flowers too long on them. The plants get exhausted and do not then break soon or strong enough to give good results the following year.

It must not be forgotten that orchids, like all other plants, have their enemies, but as a rule these attack more fiercely plants in ill health or weakly. To keep them from becoming dirty is far better than always cleaning. Do not think there will be no trouble. But nothing worth having is got without trouble. Anyone who loves and watches them will soon understand their wants and they will prove a boundless source of interest and pleasure and will repay the cost and trouble.

To get a fair start just go or write to some of the leading orchid nurserymen—describe or let them see your houses, and let them make for you a selection to the value you wish to spend, and you may rely on their sending plants to suit the place. Of course, if you are going to build a new house, you will get better results and would naturally build your house on the most up-to-date pattern. The love of orchids is

CATTELYA INTERMEDIA ALBA

Photo at Stuart Low & Co., Bush Hill Park, Enfield, Middlesex, Eng.

greatly on the increase and a plant one grows has always more interest than one purchased in bloom.

Har Barnard

Bush Hill Park.

Trans-Atlantic Notes

STREPTOCARPUS

This genus of Gesnerads, the cultivation of which has greatly extended in British gardens since *S. Saundersii* was brought out in the early 70's, can now boast of a large number of varieties with handsome coloring. *S. Saundersii* is a many flowered hybrid that was brought out in 1875, bore three leaves and twenty flower spikes, some of which carried five blueish lilac colored flowers. The plants are native of the Cape of Good Hope; *S. Rexi*, known in gardens under the name of *S. biflorus*, by reason of the scape bearing two flowers; *S. polyanthus* and *S. Gardenii*.

All of the above are free flowering, and like gloxinias, are propagated by leaf cuttings. In the case of *S. Rexi*, one cotyledon forms the entire leafage of the adult plant. J. Veitch & Sons have succeeded in raising numerous crosses and are the holders of an extensive and varied collection of these showy plants, which in some respects rival the gloxinias. They do best in the warm greenhouse, and on a shelf near the roof glass, or in low pits.

The
orchid show

Only a few days more and the interesting floral event for which active preparations have been in progress for more than two years will be a reality. The simple announcement that an orchid exhibition of unusual extent was contemplated by the Massachusetts Horticultural Society was sufficient to cause a flurry of expectant excitement throughout the horticultural world and from the outset the interest has never lagged. Those who are privileged to see the unprecedented display of rare flora which is thus to be assembled together in Boston's Horticultural Hall have a big treat in prospect and the influence of the event upon the gardening fraternity of America will be profound and far-reaching. It goes without saying that it will give a strong impetus to the cultivation under glass of these exotic beauties and the direction of their more general use for floral decorative purposes.

Cutting out
the frills

Much has been said and written concerning orchids and their culture which has seemed to come more or less dangerously close to the domain of humbug. This has not been confined to such literature as has been intended for public consumption alone but has at times characterized that served up by the assumed expert for the enlightenment of his fellow gardeners. We take pride, therefore, in presenting for the entertainment and instruction of our readers on this occasion some plain, common-sense observation on topics connected with orchid culture by men of practical knowledge, whose accomplishments in their chosen lines are their own best credentials, and who have herein given the results of their experience with a candor which is both pleasing and convincing. The bugaboos which have deterred so many from any attempt at orchid growing should now have no terrors for any grower possessing normal intelligence who will shape his course in accordance with the simple principles laid down in these pages.

Things
worthy of the
florists' attention

One respect in which the orchid show will prove an eye-opener to the commercial florist will be the variety and abundance of sorts hitherto unfamiliar to the florist trade, more especially in the way of white orchids, of which there will be a very full representation of species and varieties which are only now becoming available for the cut flower trade because of their quality and moderate price. For bridal work, where hitherto *Dendrobium formosum giganteum* has been the main standby, the beautiful *Virginale* is within reasonable reach and what can be more serviceable and rich than some of the white *Trichopilias*, of which a nice showing is promised on this occasion. There will be in all probably a more general display of *odontoglossums*—in *crispums* and *Pescatorei* types—than ever before staged in this country and no florist—whether as grower or user of choice material—can afford to let slip this opportunity to carefully examine and ascertain as to the keeping qualities and the prospective abundance

and price of all these things, heretofore scarce, but which are destined in the near future to find a place in the cut flower market as standard stock.

Old-fashioned bouquets

One of the most interesting and attractive windows we have seen in a long time was the exhibition of "old fashioned bouquets" in the establish-

ment of Thos. F. Galvin, Boston, this week. There have been attempts made by florists here and elsewhere at various times to show the people of the present period examples of the floral work of the past generation, but always with an apparent disposition to ridicule the efforts of their predecessors and make comparisons with the style of today, to the discredit of the former, but they principally demonstrated that they knew little about their subject and were entirely lacking in the ability to make an "old fashioned" bouquet. Galvin's display was not of that nature. It was, indeed, a faithful reproduction of the prim but always pleasing and appropriate bunches of rose buds, lily of the valley, forget-me-nots and delicate greens, as made for ladies to carry to formal dress affairs, assemblies, weddings, etc., thirty or forty years ago, and, judging from the comments made by the spectators who thronged the sidewalks in admiration, a revival of the fashion would not be looked upon with disapproval by the Boston ladies. Should it really come to pass that this sort of floral work becomes popular again we can see many a modern "floral artist" whose principal claim to distinction lies in the beautifully finished material which the grower has provided for his use, at his wit's end as to how to proceed, for the dexterous skill essential in the making up of such examples as were displayed on this occasion is not acquired in a day or a year—or, in some cases, in a lifetime.

THE OLD SOLDIER.

"Over the hills and far away"—

The words of that old song come back
To the old man, now bent and gray,
Who marched to face the battle's wrack.
When Lincoln called the land to arms,
To die for freedom in the fray,
To march from home and all its charms
Over the hills and far away.

The sword is sheathed, the flag is furled,
The sun shines o'er a peaceful land;
The regiments that once were hurled
At death, are now a thin gray band.
And thinner grow the ranks as years
Recede from that exultant day,
Of those who marched 'mid cheers and tears
Over the hills and far away.

"Over the hills and far away":—

The music still is in his soul;
Again he hears the bugles play,
Once more he hears the war drums roll:
He still recalls the glorious tale,
Though old and bent and worn and gray:
And soon he'll march the endless trail
Over the hills and far away.

"Over the hills and far away":—

To where they cease from war's alarms;
The soldiers to the house of clay
Will come at last to stack their arms.
While time endures the world with pride
Will tell of that exultant day,
When youth and valor marched and died
Over the hills and far away.

—Joseph Smith, in *Boston Traveler*.

Trachelospermum

The small genus *Trachelospermum*, more commonly known as *Rhynchospermum*, according to Nicholson, inhabits the East Indies, the Malayan Archipelago and Eastern Asia, as far as Japan. They are stove and greenhouse shrubs and climbers, and the common and popular variety *T. jasminoides* should have a place in every collection of plants. I have no doubt that if this variety would make a fair-sized plant with a year's growth it would be a very popular florist plant, because of its beautiful white, very fragrant, cymes of flowers; but alas, like a good many more of the handsome hard-wooded, greenhouse plants, it takes too long to raise a decent sized specimen to make it a paying project for our hustling American florists. *T. jasminoides* has two forms, one with smaller and narrower leaves than the type, named *T. j. angustifolium*, and the other *T. j. variegatum* with the leaves variegated with white, but this variety is not so vigorous as the others. Gray mentions a variety named *T. difforme*, found in the low grounds of Virginia, which I have never seen. He describes it thus: "A barely woody twiner, the flowering branches herbaceous and downy; leaves thin, oval-lanceolate, pointed, or sometimes linear, narrowed into a petiole, flowers 1-4 of an inch long, in cymes, greenish-yellow, all summer."

The finest specimens of *Trachelospermum jasminoides* I have ever seen are at Prof. C. S. Sargent's place in Brookline, Mass., and when in flower they are well worth a long journey to see. Cuttings of these plants should be secured from the half ripened wood, and are easily rooted in an ordinary cutting bed, in a temperature around sixty-five degrees, keeping them shaded from sun while rooting. Small plants should be kept in vigorous growth, in a much higher temperature than old specimens that have attained a fair size, and if any flowers appear they should be immediately cut off. Never allow the young plants to get pot-bound, as the aim should be to get as quick a growth as possible. They will grow well in two parts loam to one of leaf mold, with a good sprinkling of sand and finely broken charcoal. If peat is on hand, as much of that as one uses of loam should be added, as nearly all plants of this nature are fond of peat. A small handful of Clay's fertilizer to every pailful of the compost is very beneficial. They should be firmly potted. As the shoots increase in length they should be tied around stakes until the plant arrives at the size desired, when they should be trained over a balloon or pyramid trellis, or perhaps they may be wanted to cover a wall or train around a pillar. Large specimens can be wintered in a cool pit from which the frost is kept.

When grown cool these plants are not subject to insect pests, but I have known both mealy bug and scale on small plants that were being kept in a fairly high temperature to get a quick growth on them. They may be kept in check by using a two-inch flower potful of kerosene to three gallons of water kept well agitated while applying. Use in the evening and syringe next morning with clean water. Kerosene is the best and cheapest insecticide for shiny, smooth-leaved plants that I know of, if used according to the above directions. Leaves with a furry soft surface, like a geranium, will not stand it.

SEASONABLE NOTES ON THE CULTURE OF FLORISTS' STOCK.

Acacias.

Only two or three of the acacias are of special value to the commercial florist, and of these *Armata* is the freest flowering, the most compact growing, and best adapted to pot culture. Any plants unsold should be cut back about half of last summer's growth, and those needing repotting should be potted at about this time. A good loam that is not too finely broken up with some well-rotted cow manure and about a fourth of leaf mold will grow them well. They will be better now for being plunged out of doors and fully exposed to the sun until the fall, as they grow and ripen their wood much better outside than under glass. They will require copious watering and must never be allowed to become dry.

Growing Carnations Indoors.

Carnation growing under glass instead of in the field, should have close attention right along. I think it is better to plant the latter part of May if possible. It will save shifting and the plants are more easily cared for when planted out on the benches than when they are kept in pots. If they are not planted before the first week in June and bench room is not yet available, they should be shifted into 4-inch pots, and the best place for them would be plunged outdoors where they can have sufficient water to keep them growing. They should be planted out before they become too pot-bound. The soil should be the same as that used for the field-grown ones. After planting, give a good watering around each plant to settle the soil, after which water should be given sparingly until the plants get well rooted, but be careful that the ball does not become dry. They should have a light spraying two or three times daily on warm days. Do not syringe so late as to leave them wet over night. At all times give all the air possible so as to make short-jointed and sturdy growth. Always select the best plants for indoor planting.

Begonia Gloire de Lorraine.

The early propagated stock which is regarded as most valuable for the far-off holidays, should now be sufficiently advanced to require 4-inch pots. In the shiftings from now on a larger portion of well-decayed cow manure should be added to the potting soil, making the mixture about four parts of fresh turf-like soil to two parts of manure, and about one part of clean sand. Good cultural encouragement just at this time before the hot weather starts in, will be a permanent gain on the stock in the early autumn. Careful watering, avoiding too much or too little, is most important at the present time. Avoid heavy shade. The house should now only have a light shading. A light but firmly nailed lathe frame, on which some cheese-cloth is stretched, will make the best, most convenient and lasting shade. The plants should be pinched back to

BRASSO-CATTELEYA FOURNIERAE
Photo at Julius Rochrs Co.

two or three joints, to insure a strong growth and shapely specimens. Discontinue pinching after August.

Memorial Day.

Much necessary work is often neglected during the rush of Memorial Day trade. Watering, especially, is done in a haphazard way. Now when the days are long and the sun's rays causing a fierce heat under glass, with most of the plants in full bloom and pot bound, watering is no easy job. Watering is the principal means of keeping your stock in good form, so don't neglect it. Many plants will have to be shipped to distant points. These should have their foliage dry and ball of earth soaked. At this time of the year all plants of a soft growth should be stood upright in their shipping boxes. Plants in bloom, of whatever description, are always in demand and are the chief money-bringers, so have them in as good shape as possible.

Odontoglossums.

This is one of the most interesting of all orchids. Care must be taken never to let the compost become dry. A copious supply of water is always essential at the roots, and the floors and benches must be dampened over often to keep the atmosphere moist. They enjoy a bright location but must be shaded from the direct sunlight either by a thin muslin or a light coat of shading, but where the mouse has a northern aspect shading is unnecessary. Fresh air should be given at all times when possible, in greater or lesser quantities according to the outside conditions, in order to keep the atmosphere from becoming stagnant.

They like fibrous peat, with a liberal top dressing of green sphagnum, and when decayed it should be replaced by some fresh compost. Sometimes this will have to be done twice a year. Very liberal drainage should be given in all cases. The winter temperature should be as near 50 degrees as possible.

Primulas.

If you have any old plants of *Primula Forbesi* or *obconica* that have done flowering, they can be torn apart and the divisions planted into small pots and grown on. They will do well during the summer in frames. Prepare a frame with some coal ashes for the pots to stand on and if given attention in the way of watering, fumigation, ventilation and shading they will grow into good bushy stock for next year's trade. They should be kept out of the greenhouse as long as the weather will allow in the fall, a cold frame that has close-fitting sashes being at that time a better place for them than to subject them to any forcing. Seeds of *obconica* and *sinensis* sown now will make nice plants for late winter and early spring trade.

JOHN J. M. FARRELL.

Mr. Farrell's next notes will be on *Borobias*; Carrying Roses Over; Cyas; Gardenias; Repairing and Cleaning Houses; and Sowing Hardy Perennials.

A letter just received from Mr. E. W. Wilson, the explorer, now on his way to China, informs us of his arrival at Moscow, Russia, and start therefrom for Peking, where he was due to arrive on May 16. He expresses gratification at the prospect of soon being in the field of work in which he is so intensely interested.

THE BRUSSELS EXHIBITION.

The Flower Show.

The planning, laying out of this exhibit of plants and flowers must have been done by a master hand, as nothing ever seen in this line could be more artistically and scientifically arranged to please and attract the mind and soul of the true lover of grand and beautiful effect than that which the eye looked upon when entering the hall, or pavilion, wherein the show was made. The only section that could be criticised was the one containing the azaleas, there being in this arrangement, perhaps, too much color to be pleasing. The flags of different nations, especially Belgium, were displayed on every support, making a pleasing effect with the bright flowers and green beneath. On entering, after passing through an assortment of palms, there was to be seen on the right, a small but neatly laid out garden large enough for many a country home, with running water with bridge over a small miniature lake, a summer

ground to relieve the walls' bareness. Between the orchid pots, anywhere and everywhere, small ferns were used, making a pleasing picture with the brightness of the orchid flowers above them. The value of this display in dollars would sum up something enormous.

Table Decorations.

There were a number of decorated tables the majority of them not being furnished other than the flower decorations being upon them. The one taking first premium was by a Paris firm. This table was in fine orchids entwined with plumosus asparagus, the center pieces being elevated about two and a half feet on fine cut glass stands, very frail but very neat. Persons sitting on either side could see through to those seated in front of them.

Fruits.

The exhibit of fruits was not as large as we expected to find, but we were informed that there would be more later on when more space was completed. What was shown was very

RE-POTTING CATTLEYSAS AND LAELIAS.

As at this season the plants of many species have ceased to flower and will be about to emit fresh roots from the newly formed pseudo-bulbs, re-potting should receive attention forthwith. Of cattleyas I may mention a few, viz.; *C. amethystoglossa*, *C. labiata*, *C. Schilleriana*, *C. maxima*, *C. Percivalliana*, *C. Trianae* and *C. intermedia*; also the hybrids, *C. Maronli*, *C. Claudian*, *C. Fabia*, *C. Iris*, *C. F. W. Wigan*, and *C. Atalanta*; and the *Laelio-cattleyas* *Dominiana*, *Clive*, *epicasta*, *Pallas*, &c.; and *Brassocattleya Rolfeae*; and some of the *Sophro-cattleya Laelias*. Where the plants are strong and healthy, the roots should not be much disturbed, and if the roots are numerous it is advisable to break the pot and to place the root mass in the new pot without breaking it up; and to err rather on the side of a small-sized pot. If a plant is lacking in vigor,

A TRIO OF ORCHID ENTHUSIASTS.

JAMES MCMANUS

M. J. POPE

JULIUS ROEHR

house, etc., etc., the whole planted with shrubbery in bloom (in pots, pots hidden) consisting of lilacs, snowballs, acacias, metrosideros, hydrangea, hibiscus, azalea, etc., etc., a few evergreens or palms interspersed to give effect; vases of vines and flowers, cineraria, calceolaria, lilies, geraniums, etc.; miniature beds of daisies and pansies, all making the garden beautiful in every sense of the word. No fairer picture could be painted, or desired. There were other beds laid off and planted, but none exactly like this, the others being more of one kind, but the color combination or effect was carried out so as to show everything to its best advantage.

The Orchid Exhibit.

On one entire side of the building was a raised promenade, on each side of which was tabling the whole length. One entire table was taken up with the orchid exhibit making one of the largest and finest exhibits ever staged of these increasingly popular plants, and thousands viewed them daily with admiration. The back of the table had a row of medium sized palms for a back-

nice, most of it coming from the colonies of Belgium. There was a large exhibit of citrus fruits from Africa, also pears, apples, pineapples, etc. The strawberries and raspberries were extra good plants, the strawberries in pots with bloom and good ripened fruit. A splendid exhibit of fruit in a glass case made an interesting show.

Outside Planting.

Near the building containing the floral display was a large piece of land well laid off so as to be easily viewed, each section planted by various growers in blocks of evergreens, shrubbery, roses—both dwarf and standard—fruit and ornamental trees, fruit trees trimmed as espaliers, pyramids, etc., also a lot of fantastically trimmed trees of holly, box, yew, etc., in every conceivable form and shape. Along one of the avenues leading up to the flower show was an avenue of bay trees of very large size, both pyramid and standard, with extraordinary tops, exhibited by Sander & Son.

On other sections large plantations of shrubbery, etc., were still going on.

RICHARD VINCENT, JR.

or has but few roots, cut away the dead and dying roots, cleansing the healthy ones, and re-pot into a smaller pot. Any choice cattleyas and laelias not in good health may be divided and the pieces re-potted singly, and hung up near the roof. The back pseudo bulbs may be retained to the number of three on each leading growth. The mixture used in potting should be made very porous; and the pots should be two-thirds filled with clean crocks, with a layer of sphagnum over all. Pot firmly, placing the rhizome level with the rim of the pot. When re-potted place the plants in a cattleya house, and afford shade during bright sunshine, and for several weeks apply but little moisture otherwise rotting of the old pseudo-bulbs will ensue. Let the syringe be applied several times daily round the sides of the pots, and if the compost appears to be very dry, afford water round the edges of the pots. As soon as root growth has commenced, afford more water by degrees, but very sparingly at the first.

F. M.

VISITORS

To the great Orchid Exhibition are cordially invited to call and inspect
the Beautiful Store and Conservatory of

Thomas F. Galvin

Boylston and Fairfield Streets

Convenient to the Halls of the Massachusetts Horticultural Society,
where the Orchid Show will be held. Also our down town store

124 Tremont Street

where visiting florists and gardeners will see the finest examples of
floral and decorative work as done here for the most critical buyers in
the country at

The Leading Floral Establishment of New England

We use more Orchids than any other establishment in Boston and shall
be especially glad to meet and make the acquaintance of Orchid growers
dealers and enthusiasts, who may visit the City on this occasion.

ESTABLISHED 1846

ORCHIDS

**The Most Beautiful of Nature's Products, Ever
Increasing in Popularity**

We have the largest range of Orchid houses on the American continent, containing hundreds of species, varieties and hybrids, in splendid health and being constantly increased by new importations.

Miltonia Chelseaensis, Westonbirt var.

All the leading popular varieties in moderate priced, established plants. Special prices on fresh imported stock.

We shall be represented at the Boston Show

by superb groups, unexcelled in beauty and variety and including rare varieties, hybrids and albinos never before shown in this country. If you are interested in Orchids meet us at the show, May 26 to 30 inclusive.

Our extensive plant houses and nurseries at Rutherford, N. J., are open for inspection at all times and you are invited to visit them.

JULIUS ROEHRS CO.,

ORCHIDS

**The Royal Gems of the Conservatory. No Place
Complete without a Collection**

We have spared no effort or expense to secure from all possible sources every desirable type and are prepared to stock conservatories or ranges of any extent with the choicest collections.

Cattleya Trianae

Special collections made up for beginners—Orchids alone or in connection with other decorative stove and greenhouse plants, of which we carry a stock *unrivalled in quality and extent*, and including all worthy novelties as they appear abroad. Palms in all useful commercial varieties and sizes. Plants for forcing. Ornamental conifers, nursery and pot grown. Boxwoods and Bays. Largest stock in the country of Standard and Pyramidal Bays. *Write for a Catalogue.*

RUTHERFORD, N. J.

NEWS OF THE CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

E. O. Orpet was the attraction at the May meeting of this organization and that he was a very prime attraction was evidenced by the well-filled hall. His topic, "Orchids," is one on which Mr. Orpet is very much at home and his talk, which was extempore, was attentively listened to and elicited an abundance of earnest discussion later on. Messrs. Cameron, Butterworth, Craig and Kenneth Finlayson, all past masters in the art, took part. Mr. Orpet disapproved of the so-called modern greenhouse for successful orchid growing, favoring the old-fashioned type even if pretty well run down as a structure. W. N. Craig disagreed entirely and believed that the best houses are not any too good for the orchid. On the question of feeding, on which Mr. Orpet dwelt at length, Mr. Butterworth picked up the gloves and declared that he had never in his life fed an orchid, although his product was recognized to be in the first rank as to quality.

Very little routine business was transacted and it is said that this was the first meeting since W. N. Craig assumed the secretaryship where there were no applications for membership. An invitation was presented from Dr. East for the members to attend the lectures at the Bussey Institution on Sundays 22 and 29th, inst., the topics being of especial interest to those engaged in floriculture. An invitation to visit William Sim, at Cliftondale, on June 4, was accepted with glee and a big delegation on that auspicious occasion is assured.

Action was taken towards ways and means for entertaining those members of the craft who may visit Boston on the occasion of the National Flower Show next year, and the president was authorized to appoint a committee accordingly.

There was a small exhibition, consisting of some trollius from Blue Hills Nurseries, pink antirrhinums from William Sim, and calceolaria from William Downs, all of which received honorable mention.

MASSACHUSETTS HORTICULTURAL SOCIETY.

Arrangements are now completed for the Orchid Show and entries placed indicate a turnout and display such as has never been seen in this country and far beyond the expectations of its promoters.

The exhibition will open on Thursday evening, May 26, at 8 o'clock, and will continue until Monday night, May 30. The first evening will be a full-dress affair, with price of admission tickets \$3.00 each. The best music obtainable will be provided and opening addresses will be made by distinguished officials.

AMERICAN GLADIOLUS SOCIETY.

The proposed American Gladiolus Society is now in progress of formation. The first meeting for the adoption of by-laws and the election of officers for the first year, will take place May 27, at 3 p. m., at Horticultural Hall, Boston.

NEW JERSEY FLORICULTURAL SOCIETY.

Dr. J. M. H. Kitchen of East Orange, read a paper on the "Question of Heating for Orchid Culture," before this society on Friday, May 13th. He recommended hot water as the best medium for heating and advised having plenty of radiating surface then the pipes need not be so hot, which makes it more congenial for the orchids.

A very interesting discussion followed in regard to time of shading. Dr. Kitchen said he shaded the latter part of January, using white lead and kerosene. J. A. Manda considered that time too early and recommended the latter end of March. He preferred crude oil and whitening as being the best and cheapest material for shading. To get rid of the cattleya fly, Dr. Kitchen said that he had tried all kinds of insecticides but found he got the best results from strong fumigation with tobacco stems, when the plants were not in flower.

The monthly exhibit for points was exceptionally fine and the competition very keen. Those who have the lead in the various classes at present are: Albert F. Larson, on roses; Max Schneider, on carnations; John J. Dervan, on vegetables, and Wm. Reid, on foliage and flowering plants.

The following awards were made:

Roses—Albert F. Larson, 90 points; John J. Dervan, 90; Frank Drew, 85; William Reid, 70. Carnations—Max Schneider, 80; John J. Dervan, 75; William Reid, 70. Flowering plant—John J. Dervan, 85; William Reid, 75. Foliage plant—Wm. Reid, 90. Vegetables—John J. Dervan, 90. Cattleya Mossiae—Lager & Hurrell, 80.

Cultural certificates were awarded to Max Schneider for cineraria, Victory carnations, rhubarb and lettuce; John J. Dervan, for calceolarias; Albert F. Larson, for roses, also a first class certificate for scarlet seedling carnation. Fritz Berglund, gardener for the Essex County Country Club, showed a nice vase of canterbury bells.

John J. Dervan will read an essay on growing roses under glass at our next meeting.

WILLIAM REID, Secy.

ST. LOUIS HORTICULTURAL SOCIETY.

Whereas, the officers of the St. Louis Horticultural Society have learned of the sudden and untimely demise of Mrs. M. S. Vesey; and

Whereas, The St. Louis Horticultural Society together with the horticultural profession is suffering severely by the loss of her counsel and her cheerful and congenial companionship; therefore, be it

Resolved, That the St. Louis Horticultural Society as a mark of high esteem and expression convey to the sorrowful family our consoling sympathy. Every life, no matter if its every hour is rich with love and every moment jeweled with a joy, will at its close become a tragedy as sad and deep and dark as can be woven of the warp and woof of mystery and death, but in the night of death hope sees a star and listening love can hear the rustle of a wing. She added to the sun of human joy and were every one for whom she did some loving service to bring a blossom to her grave she would sleep beneath a wilderness of flowers.

THE EXECUTIVE COMMITTEE.

Per Otto G. Koenig, Secretary.

May 13, 1910.

NATIONAL SWEET PEA SOCIETY OF AMERICA.

We take pleasure in notifying you that the following additional prizes have been offered for the annual exhibition of our Society to be held in July:

F. R. Pierson Co.'s prizes, for 12 vases of sweet peas; first, \$10.00; second, \$5.00.

Aphine Mfg. Co.'s prizes, for collection of sweet peas, open to the florists only; first, \$15.00; second, \$10.00.

Anton Zvolanek prize, for the best 10 vases of Spencer and Unwin types; \$10.00.

John Young prize, for the best vase of sweet peas never before exhibited; \$5.00.

We are expecting additional prizes and the regular schedule is now in course of preparation. The preliminary schedule will be mailed upon application to anyone requiring it.

If any concern or individual wishes to offer a prize for the coming exhibition, kindly notify the secretary. The prospects are that we shall have not less than 3000 vases exhibited this summer. Details and particulars will be furnished later.

HARRY A. BUNYARD, Secy.

AMERICAN ROSE SOCIETY.

The American Rose Society has commissioned the Rev. Dr. Spencer S. Sul-liger, of Vancouver, Wash., an amateur rosarian of repute and one of the Pacific Coast members of several years' standing, as representative to the annual Rose Show in England. Dr. Sul-liger leaves New York this month for Great Britain. Richard Vincent, Jr., of White Marsh, Md., takes a letter to the International horticultural meeting at Belgium, which he is going to attend. These gentlemen will report back to the Society, which will form a part of its annual proceedings. John F. Huss, of Hartford, Conn., one of our prominent members goes to France and Switzerland, and this trip also is in the interest of roses.

The Society has closed up its premium list as awarded at the spring show, with one exception. The membership of paid dues exceeds the number at any time received previously as regular members.

An inquiry has been received from one of the Government Departments, as to the value and volume of roses used commercially in the United States and inquiries forwarded to the various distributing centers have brought responses which indicate that probably one-fourth of the value of all flowers grown under glass are roses. The observations made in travel indicate that the Rambler class of all roses are becoming more and more in evidence of popular use, all of which shows that with the growth of the country the growth of nice things is also coming in for large development.

The officers of the Society wish to thank the many donors of special prizes for the prompt response and payment of their respective premiums.

BENJAMIN HAMMOND, Secy.

ORCHIDS ORCHIDS ORCHIDS

The love for this charming class of plants is evidently on the increase, and no wonder, considering the gorgeous effects given, especially in the Winter and Early Spring Months.

Their lasting qualities alone should warrant them a place in any Garden.

We very cordially invite a visit of inspection, by visitors to England, of our large and well grown stock. The Nurseries are easily reached by Rail or Motor from Central London.

We will be pleased to send our Catalogue on application, and can make special quotations for large quantities. The collection is most unusually complete, comprising in addition to most of the favorite species:—

CATTLEYAS AND LAELIAS of all the popular kinds.

LAELIA CATTLEYAS a most free flowering class.

BRASSO-CATTLEYAS AND BRASSO-LAELIAS

CYPRIPEDIUMS a most up-to-date collection, flowering mostly in Mid-Winter.

ODONTOGLOSSUM CRISPUM AND PESCATOREI by the thousand.

ODONTODA Hybrids between *Odontoglossum* and *Cochlioda* a class of *Odontoglossum*-like plants of all shades of Scarlet and Red.

BOTANICAL ORCHIDS one of the most complete collections in the country.

Our representative, Mr. H. A. Barnard, will be visiting the Great Boston Show and would be happy to give any information.

His address until mid-June is, Hotel Albert, 11th St., New York City.

Stuart Low & Company

Royal Nurseries, Bush Hill Park

ENFIELD, MIDDLESEX, ENGLAND

Oncidium varicosum Rogersii

BODDINGTON'S TYPE

We are expecting an importation to arrive at an early date. We have imported this variety for many years from an experienced collector and it has proved all we claim for it both as to size of flowers and intense coloring.

This Orchid is one of the most popular and free-flowering types of the *Oncidium* family. Our past importations have come fully up to standard. *Oncidium varicosum Rogersii* throws 3-foot stems, bearing as many as 170 blossoms of an intensely rich golden yellow, 2 inches and over in diameter, and can be successfully grown either on blocks of wood, in pots or in baskets, and flowers in November and December in a night temperature of 55 to 60 degrees.

\$1.25 each, \$12 per doz., \$100 per 100; selected plants \$1.50, \$2, \$3, and \$5 each according to size.

ARTHUR T. BODDINGTON

We've Been Talking to You APHINE

For several months Past. Made Big Claims, Didn't We as
to its Merits as the

Best General Insecticide

Ever Offered to the Plant and Flower Grower Pestered with Aphis, Mealy Bug, Scale, Red Spider and Plant Lice of Many Breeds? Seemed Hardly Credible that this New Comer Could Do So Much and do it so Much! Better than any Insecticide ever before tried? But it **did** Make Good and Already has a Reputation and Enthusiastic Users throughout the Length and Breadth of the Continent and if you, Plant Grower, are not already an ardent advocate of its efficacy, you surely will be, very soon, as are so many of your brother gardeners and florists, a few of whose experiences are given below:

"SAFE."

"The Aphine received from you has been thoroughly tested and proved to be a most effective exterminator of all such insects to which ferns are subjected. If your preparations are of uniform strength, a solution of 1 to 15 will be safe on the most delicate ferns."—J. F. Anderson Fern Specialist, Short Hills, N. J.

"ALMOST A SPECIFIC."

"I have again tried your material at various strengths on plant lice, and there is no doubt that, as against these insects, it is almost a specific. It kills everything that it touches at the strength that I have used. . . . You can guarantee your material to be effective against plant lice. I know that from personal experience and it seems to be equally effective against all the kinds of plant lice against which I have used it."—John B. Smith, Entomologist, New Jersey Agricultural Experiment Stations, New Brunswick, N. J.

"NOTHING THAT COMPARES WITH IT."

"I want to say that I have given your preparation for the destruction of Aphids a very thorough trial on cucurbits and other plants infested with Aphids and find it works very successfully; In fact, for this special purpose I have found nothing that compares with it."—Edmund B. Southwick, Entomologist, Department of Parks, New York City.

"DEATH IN A FEW MINUTES."

"Your sample of insecticide was received in due time. The Aphine I have tried on the

Green Fly, Sugar Maple Aphid, and Euonymus scale and found it entirely satisfactory. In each case the death of the insect occurred in a few minutes."—John Herlihy, Arboriculturist, Prospect Park, Brooklyn, N. Y.

"CANNOT AFFORD TO BE SHORT."

"After using your product for the past three months, find that it has effectively killed all the green and black fly on double and single violets in our houses, without injuring in the least the flowers or even tender center leaves. We sprayed our young sweet pea vines, which were badly infested with green fly and that one application has cleaned out every aphid visible to date. We have placed order for ten gallons Aphine with your local agents to keep on hand, as we cannot afford to be short should another crop of fly appear."—J. H. Slocombe, New Haven, Conn.

"NO INJURIOUS EFFECT WHATSOEVER."

"After having given your Aphine a most thorough test, using it for more than a month in my houses, I can certify that it does all you claim for it, and, that, although it has been applied to both tender foliage and flowers at various strengths, it had no injurious effect whatsoever on the same."—Benjamin Gary, Gardener, Holmesdale Greenhouses, Madison, N. J.

"BEST I HAVE EVER USED."

"Enclosed please find \$2.50 for one gallon of Aphine, the best article I have ever used to clear plants of insects."—K. T. H. Graves, Pinehurst Greenhouses, Au Sable Forks, N. Y.

*"Aphine has a future as wide and long as the United States" says "Collier's Weekly."
"Aphine will do all you claim for it and more" says Charles H. Totty.*

Equally successful on Outdoor and Indoor Vegetation, and is

Indispensable to the Orchid Grower

Aphine is sold in four sizes—Gallons \$2.50, Quarts \$1.00,
Pints 65 cents, Half Pints 40 cents

of

JULIUS ROEHRS CO.

OF RUTHERFORD, IN. J.

53 West 28th St., New York

ROYAL HORTICULTURAL SOCIETY OF LONDON.

The meeting held on Tuesday, May 3, was a large one, and besides the orchid, floral and vegetable and fruit committees, it was the occasion chosen for holding the National Auricula Society's annual exhibition of plants in bloom—always an attraction for amateurs and the trade interested in these pretty flowers. Exhibits of a miscellaneous description were numerous.

Orchids were shown by all the regular exhibitors at these meetings, including E. V. Low, M. Maurice Mertens, C. Turner, Sander & Son, E. Rogerson and others. Among Mr. Rogerson's plants was *Miltonia Bleueana* Hesse, var. a large white flower, four inches by three inches, with patches of light and dark purple in the centre, which obtained a first-class certificate.

J. Veitch & Sons showed *Brassocattleya-Laelia* Pink Beauty, the pale purple flowers having a much frilled lip edged with darker tint and orange staining in the throat. The parents are *Laelio-cattleya Hippolyte* × *Brassocattleya Digbyano Mossiae*.

Mr. d'Barri Crawshaw showed *Odontioda Charlesworthii*, a marvellously bright crimson colored variety with a spike of 10 flowers two inches in diameter. It is the finest *Odontioda* of the color yet raised. A first-class certificate was awarded.

Mr. MacBean obtained an award of merit for a magnificent exhibit of *Odontoglossum crispum*, and a similar one for a plant of *Cattleya Mendelii* Pearl MacBean. Charlesworth & Co. made a small display with plants of fine quality. Noted was *Trichopillea Backhouseana*, white flowered, except for the lip, which is stained yellow.

H. Burnett showed fine carnations, as he always does, of varieties raised at his nursery and in the U. S. A. The variety Mrs. C. F. Raphael received an award of merit. It was raised at the Guernsey nursery. Mrs. W. B. Clode, also raised there, is a fine large flower that indicated its origin from the Malmaison race. The exhibitor showed capitally, Winona, Bay State, The President, R. F. Felton, Hon. Mrs. Hunter, etc.

The various exhibits of narcissi had a great attraction for the visitors, but

there are too many alike and their name is legion. Someone should make a selection of the most distinct varieties in every class, and doing this would assist buyers who cannot come to the nurseries and shows to make their choice. The variety Will Scarlet, with a reddish orange cup one inch across and creamy white perianth segments; Larissa of the same section, with perianth white and good substance, were particularly admired. A fine bicolor variety is Harmony with a canary colored corona and a white perianth. The above were remarked in an exhibit from R. H. Bath of Wisbeck.

It is worth mentioning that the new varieties of *Schizanthus retusus* are great improvements on this old inmate of our gardens. Messrs Garraway

Special Announcement

The firm of FORD BROTHERS, 48 West 28th Street, New York, Wholesale Commission Dealers in Cut Flowers, was dissolved by mutual consent, May 1, 1910; William Ford retiring from the firm.

The Florist Trade are hereby notified that I have taken over the business and will continue it under the same methods which gave the firm of Ford Bros. so high standing in the estimation of the New York Trade.

I have removed to 121 West 28th Street, a locality where the leading Wholesalers are now locating, and with best of facilities ask for a continuance of past cordial business relations.

M. C. FORD 121 West 28th Street
NEW YORK CITY

& Co., showed these graceful plants in perfection. Streptocarpus in variety were also noted in several exhibits employed as edging to groups of other plants.

The first prize in the class for 24 show auriculas fell to the veteran cultivator J. Douglas of Edenside Nursery, who likewise secured a first class certificate for the novelty Seamew, a grey edged flower, and for the premier Show Auricula George Lightbody, green edged. F. M.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The regular meeting of this society was held in Glen Cove, N. Y., Wednesday, May 11th, with a large attendance. Messrs. Eccles, Gaut and Johnston acted as judges with the following decisions on the monthly competition: Lettuce, S. J. Trepass; gardenias, G. Wilson; mushrooms, G. Wilson. Cultural certificates were awarded to S. J. Trepass for tomatoes; J. Everett for a grand box of mushrooms, H. McDonald for cucumbers. Honorable mention to: H. Matz, for sweet peas, a very promising seedling; V. Cleres for canterbury bells and lettuce; Paul Reul for vegetables; F. Petroccia for beans; J. Reidenbach for lettuce, citrus and sweet peas; H. McDonald for antirrhinums; H. Fleishauer for Darwin tulips and rhubarb. G. Wilson received thanks of the society for deutzia and asparagus, H. Matz for sweet peas, F. Petroccia for lettuce, and Paul Reul for sweet peas. Last meeting a cultural certificate was awarded to V. Cleres for a grand vase of American Beauty roses that were greatly ad-

mired by everybody. At the next meeting, prizes will be for pteris, adiantum and nephrolepis.

PEOPLE'S GARDEN ASSOCIATION.

Within the past few weeks there has been formed in Washington an association known as the People's Garden Association, for the purpose of assisting in making the city beautiful, and is composed of the following officers: David G. Fairchild, president; Mrs. S. F. Emmons, chairman of the garden council; Herbert Parsons, second vice-president; Frank B. Noyes, third vice-president; Miss Martha Phillips, fourth vice-president; F. M. Estabrook, recording secretary; Robert F. Miller, treasurer. On May 6th the officers and a score of members had a meeting, when they were given suitable seeds for roadside culture, garden utensils and instructions as to where to plant, etc., and a number of roads have already been planted with them. The new club is quite enthusiastic over their new venture and it is hoped that they may fully realize their expectations.

DETROIT FLORIST CLUB.

At the last club meeting all the members were very interested to become acquainted with the secrets which cause a Doyle boiler to produce nothing but heat. No smoke, no soot, no cinders and but very little ashes. Previous reports by Messrs Doyle and Plumb, who had seen practical demonstrations in Chicago, seemed like a dream, but tonight's explanations by Dr. Price and Mr. Hummell, convinced us that inventor Doyle has at last solved the great problem of perfect combustion.

ORCHIDS

for the

Trade Only

Alphonse Pericat, Orchid Specialist and Importer, offers his brother orchid growers a part of his recent importation from South America—just arrived in splendid condition—as follows:—

	Per Case

HORTICULTURAL SOCIETY OF NEW YORK.

The annual meeting of the society was held on Wednesday, May 11th, at the Museum building, New York Botanical Garden. The annual report was read, showing a year of increased activity all along the line. Three exhibitions were given during the year, one in June, a large one last fall at the American Museum of Natural History, and one in March in conjunction with the American Rose Society. At the meeting just held the membership was increased by the election of 21 annual members, and 1 life member. This makes a total net gain during the year of 40 members, 3 of which are life members. This advance is most encouraging, for if the society can have a large membership, its usefulness in the world of horticulture will be greatly increased. If each member will consider himself a committee of one to add one more member to the society, the desired result will soon be accomplished.

At the annual meeting the officers and members of the council for the succeeding year are elected. The election just held resulted as follows:—President, Geo. T. Powell; vice-presidents, N. L. Britton, T. A. Havemeyer, Patrick O'Mara, Samuel Thorne, James Wood; secretary, George V. Nash; treasurer, F. R. Newbold. Council, elected members: F. L. Atkins, J. W. Cromwell, Henry P. Du Pont, Henry Hicks, John E. Lager, J. A. Manda, E. S. Miller, Clement Moore, W. Nilsson, F. R. Pierson, I. L. Powell, E. H. Roehrs, H. H. Rusby, H. A. Siebrecht, E. B. Southwick, James Stuart, J. H.

Troy, Robert Simpson, W. H. Waite, C. W. Ward, C. B. Weathered, A. L. Willis.

It was decided to hold a summer exhibition of plants and flowers at the New York Botanical Garden, on Saturday and Sunday, June 4th and 5th. All are invited to make this exhibition attractive, whether members of the society or not, by sending in exhibits. The following schedule has been prepared. A copy of this will be sent to anyone desiring it by addressing the secretary, George V. Nash, New York Botanical Garden, Bronx Park, N. Y. City.

Peonies.

Class P 1—3 white varieties, 6 flowers of each, first, \$5.00; second, \$3.00.

Class P 2—3 light pink varieties, 6 flowers of each, first, \$5.00; second, \$3.00.

Class P 3—3 rose varieties, 6 flowers of each, first, \$5.00; second, \$3.00.

Class P 4—3 crimson varieties, 6 flowers of each, first, \$5.00; second, \$3.00.

Class P 5—Collection of singles, 3 flowers of each, first, \$5.00; second, \$3.00.

Class P 6—Largest and best collection, not less than 6 flowers of each variety, first, \$25.00; second, \$15.00.

Miscellaneous.

Class M 1—Collection of hard roses, first, \$10.00; second, \$5.00.

Class M 2—Collection of hardy flowering shrubs and trees, first, \$10.00; second, \$5.00.

Class M 3—Collection of hardy rhododendrons and azaleas, or either, first, \$10.00; second, \$5.00.

Class M 4—Collection of hardy herbaceous plants, first, \$10.00; second, \$5.00.

Class M 5—Collection of irises, first, \$5.00; second, \$3.00.

Class M 6—6 orchid plants in bloom, first, \$10.00; second, \$6.00.

Class M 7—3 orchid plants in bloom, first, \$6.00; second, \$4.00.

Class M 8—1 orchid plant in bloom, first, \$3.00; second, \$2.00.

Class M 9—Collection of cut orchids, first, \$6.00; second, \$4.00.

Special Prize.

Offered by Mr. L. S. Livingston for the best collection of cut flowers of various irises of the *Oncocyclus* or *Regelia* sections, or hybrids of these, not less than ten varieties, \$25.00.

GEORGE V. NASH, Secy.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The Peony Show of the Pennsylvania Horticultural Society which was expected to occur either on the 21st or 24th inst., has been postponed to June 1st, and will now be combined with the Rose Show on the said date. The cool weather of the past three weeks has fooled everyone in regard to the peony. The plants seem to have stood stock still during all that time—in spite of their forward condition on May 1st.

PERSONAL.

George M. Stumpp, New York, N. Y., will sail for Europe on May 24.

George Aengle is the new manager for the Philadelphia Cut Flower Co., Philadelphia, Pa.

Wm. Muth has severed his connection with the Philadelphia Cut Flower Co., Philadelphia, Pa.

John H. Taylor and family of Bay-side, N. Y., will sail for a prolonged European trip on June 4.

John Graff is now in charge of the carnation department for the Cottage Gardens Co., Queens, N. Y.; he was formerly assistant grower.

Samuel Halre is now gardener at Reginald Vanderbilt's estate, Sandy Point Farm, South Portsmouth, R. I.

For Decoration Day

We have this year the most complete, elegant and salable stock of florists' goods ever offered for the MEMORIAL DAY trade. Our line of PRESERVED FOLIAGE and other INDESTRUCTIBLE DECORATIVE MATERIAL cannot be excelled and the name of BAYERSDORFER & CO., on the package guarantees that goods and prices are what every florist wants.

LAST CALL

Fresh flowers will be **Very Scarce** this time. SEND NOW for list of Standard and New Goods for this important occasion. All you have to do is to show the goods. THEY'LL SELL. Wreaths of Cycas, Magnolia, Fern and other foliage in Green, Autumn Tints and Moss effects are among the novelties.

METALLIC WREATHS are our specialty; we make them up with Roses, Pansies, Forget-me-nots or anything you please. STANDING ANCHORS, PILLOWS, WREATHS, ETC., all graceful and true to nature. Cape Flowers; Immortelles, all colors; Doves; Sheaves.

H. BAYERSDORFER & CO.

The Florists' Supply House of America

1129 Arch Street, Philadelphia, Pa.

Boston Flowers for Memorial Day

We can ship in good order to all points in New England and New York State, all regular lines of Flowers in full supply, besides

PEONIES and SOUTHERN GARDENIAS AS SPECIALTIES

Also GREENS and other Requisites

Last year the weather was unprecedentedly hot and successful shipping was accomplished with difficulty. This year our roses will be packed in ice instead of standing in jars of water until shipping, and we hope to have them arrive at destination in first class unopened condition.

Send for Price List.

N. F. McCarthy & Co., Tel. 5973 Main **84 Hawley St., Boston, Mass.**

He was for many years gardener for the late Gordon McKay.

M. Matheron, carnation grower for the Cottage Gardens Co., Queens, N. Y., has severed his connection with that concern and is building a greenhouse plant for himself at Baldwin, L. I.

Frank Jenkins recently resigned his position as gardener for Col. Payne at Thomasville, Ga., and is now in charge at "The Breakers," the estate of Mrs. Cornelius Vanderbilt, Newport, R. I.

Harry A. Barnard, representing Stuart Low & Co., arrived at New York Friday, the 13th inst., on the Lusitania. He will be an interested and interesting visitor at the Boston Orchid Show next week.

Mr. R. Vincent, Jr., who has been visiting the European exhibitions and has contributed some interesting notes

thereon for HORTICULTURE, writes that after a few days in London, he will sail for New York, where he expects to arrive next Sunday, 22d inst.

Charles Maynard, formerly at North Easton, and employed on several private estates of note in this country, and previously with Sander, St. Albans, as orchid raiser, is now representing Julius Roehrs Co. on the road. He will be present at the Boston show prepared to talk orchids to prospective buyers.

Visitors in Boston—Lawrence Cotter, Jamestown, N. Y.; E. O. Orpet, South Lancaster, Mass.; E. J. Harmon, Portland, Me.

Visitors in New York—H. A. Barnard, representing Stuart Low & Co., London, Eng.; P. Welch, Boston, Mass.; J. T. Butterworth, South Framingham, Mass.; C. H. Vick, Rochester, N. Y.

The statement that "the Frankfort palm and botanical garden is one of the most celebrated in the world" is made in a published description forwarded by Consul-General Richard Guenther. Furthermore, "contrary to most gardens of this kind it is managed upon a strictly commercial basis by a stock company, which explains the presence of devices for pleasure and sport."

Those Desiring Wreaths

For Memorial Day. We can supply them if order is placed now. Price and sizes of same given on application. Made of Laurel or Lycopodium. Best **Fancy Ferns** to be had \$1.50 per M for Memorial Day. Write for price on any kind of NATIVE DECORATIVE MATERIAL, ETC.

H. J. Smith, Hinsdale, Mass.

SUMMER ROSES FROM A GROWER'S POINT OF VIEW.

Paper read before the Buffalo Florists' Club on Tuesday, May 3rd, by Charles T. Guenther.

Not so many years ago there was practically no demand for good summer roses and in consequence none or very few were grown. Whatever demand there was had to be filled with roses which were grown for winter cut or all the year around. Of course a lot of LaFrance roses were grown during the whole year and it was certainly a beautiful flower, and I am at a loss to understand why it is not grown now.

About 1892 or 1893, Testout was sent out and first grown for winter flowering and was found to be too expensive. Kaiserin followed about the same time and, at a well known rose grower's place around New York, it gave such poor satisfaction during the winter months that it was thrown away after two years' trial. But what a grand flower for summer cut! After trials in several places for summer flowering it gave such good satisfaction that it is today the only good white summer rose grown. It has several faults but these can be overlooked when you get these grand flowers which the plants will produce all summer long. Testout was tried the same way and extensively grown on the same principle in the East.

Shortly after, President Carnot was sent out and while wanting as a winter bloomer, the fine flowers produced on long stems during summer were very pleasing to the grower. The public, however, was slow in taking hold and I remember that we were

growing this rose for about a year and a half before there was any real demand for same. Now it is well liked and a rose of the same color for winter cut would be very welcome.

A few years after Killarney appeared and while disappointing when first seen, we must say that since, it has conquered the world. It is a free bloomer during winter and the same plants will produce good flowers during the summer. It is more particular about treatment than other roses, but when well grown, the color is good, also the stem. The foliage takes mildew easily and the flowers are somewhat single, but the public like them.

La Detroit made its appearance shortly after and we always liked the flower. We are growing a few for the summer cut at present, but opening so quick in warm weather, we will probably replace it with another pink one called "Ideal." Ideal is a sport of La France, somewhat darker than the parent, but the plants we have have given such satisfaction that we may grow more for pink for summer cut. When you cut the flower it seems quite single, but the flowers open so nicely and are so full that you can scarcely improve it, and what a nice smell the flowers have. Wellesley is another good pink summer rose, but as we have not grown many, I cannot give you my opinion until later. In the darker red roses, we have practically only the American Beauty which gives good satisfaction to the buyer at any time of year, if not always to the grower.

Of the newer roses, My Maryland is very well spoken of, but what it will do can be seen only next year, as the

limited stock in this country is used this year for propagating. White Killarney showed up fine in several places where I have seen the flowers and if it will prove as good a seller as the pink Killarney, it may become a standard rose for all the year round. President Taft is another new rose and from what I have seen of the flowers would think that it will make a fine summer rose.

All these roses have to be grown in greenhouses around Buffalo to give good satisfaction. But one rose has given us very good satisfaction outdoors and that is M. Cochet. Flowers from outside are better than those grown inside unless they should get spoiled from rain. After several trials of keeping plants of this variety outside, all winter, we dig up the plants in the fall, pot them and store them in a cold house where they begin to grow slowly in the spring. At the end of May we plant them outdoors and if they are watered well you will get a lot of good flowers all summer long and I think that Cochet and its white sport should have the widest dissemination among owners of gardens who like to cut a few roses during the summer from their gardens. Around Baltimore this rose will stand the winter outdoors but here we have not succeeded in keeping them in good shape outdoors.

May more roses fairly good for indoors and very good for outdoors can be mentioned, but as my experience with these has been limited, I leave it to some one more able to handle the subject and hope that these few words will help to make roses more popular among all classes of people.

'MUMS THE WORD

We have many thousands of plants in 2 1/4 in. pots, of such varieties as Appleton, Miriam Hankey, Nellie Pockett, Wm Duckham, Cheltoni and other Standard kinds that we are offering at \$3.00 per hundred, \$25.00 per thousand.

We will also quote special price on **Singles** of which we have some 90 varieties. We will give you a good selection of colors in as many varieties as you wish at \$5.00 per hundred.

Our Special Commercial Novelty for this year is Yellow Ivory.

This, we can give immediate delivery on, 2 1/4 in., at \$15.00 per hundred.

CHARLES H. TOTTY
Madison, New Jersey

HENRY F. MICHELL CO. 518-1018 Market St., Philadelphia, Pa.

OBITUARY.

Miss Nellie Burt.

Miss Nellie Burt, sister of A. H. Burt the South Side Kankakee, Ill. florist, died at her home in North Morenci, Mich. recently.

Henry Cline.

Henry Cline, a well-known fruit grower and nurseryman of Carroll County, Ind., was found dead on the doorstep of his home near Flora, Ind., by neighbors recently. He was 78 years of age. It is believed he committed suicide in a fit of temporary insanity.

Joseph Lang.

Joseph Lang, one of Chicago's well-known florists, passed away at his home, 2010 Melrose street, early Sunday morning, May 15th, after a brief illness with peritonitis. Joseph Lang was born in Elgeswerer, Baden, in 1854, and left the Fatherland thirty years ago, spending a short time first in Dubuque, Ia., and then coming to Chicago, where he has resided ever since. After a few years as foreman of the greenhouses at Lincoln Park, he bought a place on the north side and erected greenhouses and a store, which business will be continued by Mrs. Lang, who with one daughter and three sons survive him. The funeral was Tuesday, May 17 and interment at St. Boniface cemetery.

In our notes on the approaching seedsmen's convention at Atlantic City, which appeared in issue of May 14, the St. Charles Hotel was mentioned as headquarters for the convention. We are informed that this selection was as originally made, but it was afterwards changed and the Hotel Rudolf chosen instead.

THE REAL MESSAGE THAT THE COMET BRINGS.

GROWTH OF THE NORTHWESTERN APPLE INDUSTRY.

As gold was the strong magnet which sent the first Americans across the unknown wastes of this continent to the California coast in 1849, so today the apple, the emperor of fruit, is attracting thousands to the western orchard belts. Millions of dollars have been invested in apple lands west of the Rockies during the last decade and beautiful orchards of young trees today mark the spots where but yesterday was a waste of brown, sagebrush-covered desert.

Reports from nurseries and growers in Washington, Oregon, Idaho, Montana and British Columbia are that between 4,000,000 and 5,000,000 one and two-year saplings will be planted in

the four states and provinces before the close of 1910. This means that more than 50,000 acres of land will be added to the area already under cultivation, thus giving a total of 400,000 acres in fruit in 1915.

INCORPORATED.

Twin Falls, Idaho.—The Twin Falls Nursery & Orchard Co., capital stock \$50,000. Incorporators, F. O. McFall, George C. Tyler, F. C. Schindler, C. W. Dyer, W. D. McCane, Robert Murdock and F. A. Hutto.

May 17, 1910.

Please discontinue my ad., and I must tell you I will not be so shy in using your columns again. I had splendid returns from my ad.

JOHN MCKENZIE.
No. Cambridge, Mass.

SEED TRADE.

Burpee Doings.

W. Atlee Burpee and his manager, Howard M. Earl, will leave Philadelphia on the 23rd inst. on their first inspection trip of the season among the western seed crops. The trip will extend as far as the Pacific coast and will there be more than usually interesting this year, as these gentlemen are keen to see how things are going at their new seed farms at Floradale under the management of our good friend, Edwin Lonsdale. "Floradale" is the name of the ranch as finally adopted by Mr. Burpee.

At the Fordhook Seed Farms in Pennsylvania the Messrs. Burpee are just commencing the erection of two new greenhouses for testing purposes, etc., each 16x100—plans and materials by the King Construction Co.

At Sunnybrook, their seed farm in southern New Jersey, a new seed and implement warehouse is in course of erection.

At Fifth street, Philadelphia, where the farm has its headquarters and seed warehouses, building operations are already under way for the erection of an additional warehouse on the property north of their present mammoth establishment.

Mr. Burpee and his able staff will certainly have their hands full this year. What with building operations and inspection tours in America and Europe there will be little time for resting up after the strenuous spring season.

Mr. Earl reports that despite the cool weather of the past few weeks, plant life at Fordhook is coming along nicely and if the comet's tail does not strike them, thinks the prospects excellent for big crops.

CHICAGO NOTES.**The Fern Situation.**

The fern situation should lead to better results next year. According to one of the largest dealers the boxes of ferns are either of very good or very bad quality, which leads to the conclusion that the stock is either in good condition when packed or in poor shape. The price has advanced now to \$3.00 per 1000. This refers to old ferns only.

Chicago Orchid Growers.

The orchids used in Chicago have mostly come from the eastern growers, but as these flowers have steadily grown in popularity here, their culture has been attempted by two or three local growers with some degree of success. The Poehlmann Bros. Co. has one house devoted to them and will probably have another next year. Geo. Reinberg was the first to make the venture and Peter Reinberg and J. C. Vaughan are growing a limited quantity this year as an experiment.

Personal and Trade Notes.

A Lange is back in his store after a short illness.

F. C. Morris, Hinsdale florist, is recovering from a severe illness.

The J. A. Budlong Co. has finished planting their 150,000 carnations and have their roses in.

Some unusually fine specimen plants of hydrangeas are making the windows of the retailers very attractive.

The opening of the new flower store with Strail & Hahn as proprietors, was necessarily postponed on account of the decorating till May 18.

The friends of John Degnan were startled Monday by the death notice of some one of like name in the morning papers. But Mr. Degnan is very much alive.

Samuelson is gathering in the peonies for two large decorations in June. He had a particularly beautiful window this week done with rhododendrons and hydrangeas.

Wietor Bros. have finished planting the first half of their carnations in the field. They grow 250,000. Three new houses are now nearing completion and are ready to plant.

Mr. and Mrs. O. P. Bassett left for Detroit, Wednesday, and after spending a few days there will leave for New York and sail for Bremen on the 26th, on the Prince Frederick Wilhelm.

D. D. Johnson has received many encouraging letters from those who are giving the Evergreen fertilizers a trial. Mr. Johnson has tested these fertilizers at most of the Experiment Stations.

Much bedding stock is waiting for suitable weather for planting and the delay is likely to cause a rush at the last. The opinion that there is likely to be a shortage of this stock seems quite general.

While it looks now as if the supply of flowers for Decoration Day would be ample, a shortage may be felt when the time arrives, in which case it is predicted that the demand for blooming plants for bedding will be much greater than usual.

The large silver cup won by the D. D. Joyce Alco at the Floral Auto Parade, was on exhibition at Raske's flower store for several days. Mr.

Raske decorated this machine which won first prize in the class for natural flowers. He used 5000 American Beauties, the large vases on either side holding 500 long-stemmed Beauties.

H. S. Morton, now with E. R. Meserve, Los Angeles, Cal., will be home in a few weeks, for a visit and expects to take his mother back with him. The Mortons are a family of florists, the mother, Mrs. Eleanor Morton, being the first to start; Chas. E. Morton and H. S. Morton, her sons, followed and Mrs. Breaky and Mrs. Spencer, her daughters, are also florists.

Many favorable comments were heard upon the simple and effective decorations of the Auditorium stage at the memorial meeting for King Edward VII, on Sunday. A row of palms bordered the aisle on either side and ropes of smilax were gracefully but simply draped at the back of the stage below the Stars and Stripes and the Union Jack, which hung side by side. Smilax also was hung from the front of the flooring of the stage. There was just enough decoration to befit the occasion.

Our manufacturers of flower pots are having similar experiences of a serious nature. H. T. Klipfel scratched his finger five weeks ago and the wound was so slight he did not even know when it occurred. A few days later blood poisoning developed and Mr. Klipfel was taken to the hospital and his case was for some time considered a very serious one. G. Kellar, of the Kellar Bros., injured the ends of his fingers about the same time and with much the same result. Both men are now recovering after having lost several weeks at a very busy time.

Visitors—W. van Kleef, Boskoop, Holland; W. F. Duntemann, Bensonville, Ill.; A. Londenberg, Valparaiso, Ind.; H. A. Fischer, Kalamazoo, Mich.; E. Amerpohl, Janesville, Wis.; C. A. Brazee, Los Angeles, Cal.

Buena, N. J.—E. R. Raimbault has taken a partner in business and the firm name is now Raimbault & Bruzeand.

Dallas, Ore.—D. L. Thomas, formerly a florist at Salem, Ore., has moved his business to this city.

Alton, Ill.—The Alton Floral Co. has purchased of the Park Commissioners the greenhouses belonging to the city, located at Hot Springs Park.

FIRE RECORD.

Louisville, Ky.—The florist shop of H. G. Walker, 632-634 Fourth avenue, was damaged by fire to the extent of about \$500; believed to be of incendiary origin.

Washington, D. C.—It is reported that John Robertson is again preparing to move his store at 1510 H street, as changes are to be made in the building.

Flower Market Reports.

BOSTON In a general way it may be said without fear of contradiction that business is on the dull side at present writing. There have been times during the past few days when it has been exasperatingly quiet and when the dealer has been sorely puzzled as to how to find an outlet for a stock of no more than normal proportions and there is a feeling that should the prevailing cool weather, which has kept vegetation nearly at a standstill, give way to a period of high temperature the effect would be nothing short of disastrous at the present time. Everyone, of course, is speculating and guessing as to the Memorial Day outlook and many with "the wish father to the thought," have no difficulty in seeing a veritable famine ahead, which will put a premium on every available flower and bring about a little reminder of the good old times. The facts at time of writing, though, are that buyers are very particular and are not disposed to accept any but high-class goods, while the lower grades simply "go a' begging." This is especially true as to carnations. Roses are very plentiful and there is no prospect of scarcity ahead. Orchids, gardenias and lily of the valley are sluggish and will require the revivifying impulse from the bridal activities of June before they get back into line. It now looks as though the market would be well supplied with peonies for Memorial Day—something which rarely happens.

The weather has warmed up somewhat and stock is coming in more abundantly, especially carnations, which have not been overplentiful, and some excellent stock is still had, with prices holding well for the season of year. There are plenty of roses, with a good supply of White Killarney, which has been very popular with the trade this season and at times preferred to Bride or Kaiserin. Maryland and Pink Killarney are fine, as well as Kaiserin, Bridesmaid, cannot, Bride and Richmond, there having been good demand for the latter. Peas and lily of the valley, also daisies and lilies, have had a good call. Some excellent outdoor tulips, lilies, etc., are had and have sold readily. Greens are in better supply.

CHICAGO Business was very good during the week ending May 14th, and the closing days found stock pretty well cleaned up. Sunday and Monday found a good quality of stock and plenty of buyers, but Tuesday a cold rain turned the tide and a depression followed. The demand for flowers during the busy days was pretty evenly divided between carnations and roses and in most instances florists report the sales of colored flowers were in the lead. Peonies are not coming in as fast as had been expected. A few tulips is the only outdoor stock seen, but some snowballs are likely to be ready for Decoration Day. Roses are selling readily in the short-stemmed cuts, but the long ones go last. There has been no increase in the amount of mis-

(Reports continued on page 797)

BOXWOOD One of the P. M. Introductions FOR MEMORIAL DAY

The best lot we ever had to offer our customers, good, hard, dark, glossy green sprays, no chance to wilt, as all this stock was gathered before the spring growth started, put up in 50-lb. crates, at \$7 50 per crate.

CEDAR BARK.

Have you plenty of Cedar Bark? Bundles of about 25 square feet, \$1.00 each. Special price in quantity.

BOXWOODS, pot grown, imported stock, nice thrifty plants for window boxes and similar purposes, or for planting out, 35c, 75c, \$2.50 each.

DAGGER FERNS, new crop, northern grown, far superior to the staple southern stock, clean, fresh, perfect, put up in neat uniform packages of fifty, well worth a dollar per thousand more than any fern on the market. \$3.00 per 1000.

Flower Market Reports

(Continued from page 795)

cellaneous stock and the inference is that it is being held back for the holiday at hand. The lack of gladioli was particularly noticeable. Many of the wholesale florists express themselves as now certain that the supply of peonies will fall far short of an average crop owing to the frost. Very few are being put in cold storage as the number arriving are hardly adequate to supply present needs. An unusual number of advance orders are in for Decoration Day showing the probabilities of a shortage.

The outlook for a large DETROIT Decoration Day trade is very good, but it will be difficult to handle. Several severe frosts during last week have retarded planting out and spoiled a good many outdoor flowers which were always great helps in making up the cheaper class of bouquets.

The wholesale trade NEW YORK here are vehement and unanimous in their denunciation of prevailing conditions in the cut flower trade, which the old-timers pronounce to be the worst on record for this date. There can be no question that a surplus far beyond the digestive power of this market stands hopelessly in the way of anything like a revival of former trade opportunities and it is not easy to see how any such longed-for good fortune can come to the flower trade. Outdoor material is having its innings and helps to make the road a rough one for the indoor-grown goods. The lilacs are almost over already, but peonies are following closely on their heels and there will be enough and to spare of such things for Memorial Day in all probability. Strong figures are being quoted for some desirable things, notably for carnations. The dearth of wedding festivities in May always makes trouble for the orchids and choice white material, the expected influx of Southern outdoor grown gardenias also making the outlook for the hot-house product rather dubious, while garden lily of the valley is having a similar effect on its kind from under glass. Of roses there are loads and loads—enough for everybody without touching the culls.

FLOWER CROWER OR BUYER

Whichever you are, you are invited to call or write. I can be of service to you the entire season. WHOLESALE FLOWERS ONLY.

" " & Spren. (100 bchs).....	15.00	to 25.00	15.00	to 25.00

Flower market PHILADELPHIA conditions here may be tersely

summed up in a few words—they were good on Friday and Saturday, but very bad the rest of the week. American Beauty roses sold out well, but at only moderate figures. The shipments of these have slackened up considerably—the cool weather having had its effect on them, as on everything else. Richmond and Liberty roses did not sell quite so freely—red peonies seemed to be preferred by many people as a change. White and pink roses were in very good demand—white especially. The latter were largely used by young people in church processions which are usual at this time of year in some denominations. To many of the florists near these churches such events are as profitable and of as much importance as Christmas or Easter. Carnation prices are not high, but the stock moves off all right. The quality continues fine. Winsor, Beacon, White Perfection, and Bountiful, lead as to varieties. There are enough orchids to go around and a few over. Prices have dropped a little. Cattleya Mossiae and Dendrobium Jamesianum, are the most conspicuous varieties. The gardenia market still continues sluggish and overstocked. Fine, long-stemmed, sweet peas are coming in and meet with good sale. Lily of the valley fine and selling well. Home-

grown peonies are just beginning to show up, and they are certainly splendid this year—hard, well developed flowers, of fine substance, and splendid foliage. Other outdoor items, such as iris, weigela, deutzia, viburnum, etc., are also prominent and having their effect on the market; but they will not last very long. Another week will about wind them up. Some splendid dagger ferns are arriving from northern points—clean, fresh and perfect; far superior to the southern stock that has been the staple until lately. There is a good demand for boxwood for Memorial Day work—this material being now much used for wreaths and crosses. Smilax is still scarce. Plenty of plumosus and sprengerl.

Kansas City, Mo.—The firm name of the W. H. Humfeld Floral Co., which, Aug. 1, will move into a new store at 1010 E. 31st street, will be changed to Humfeld-Orear Floral Co. Leon Orear will be half owner in this new firm. They intend to build greenhouses to connect with the rear of the store and have rented a large piece of ground north of the store in which to plant their summer stock.

SOUTHERN WILD SMILAX
Fully Guaranteed.
LOUISVILLE FLORAL CO.
Louisville, Ala.

Buyer's Directory and Ready Reference Guide

Advertisements under this head, one cent a word. Initials count as words.

Display advertisers in this issue are also listed under this classification without charge. Reference to List of Advertisers will indicate the respective pages.

Little Ads Bring Big Returns

Little ads in our Classified Columns bring big returns to both advertiser and purchaser.

Anything that can be sold to florists, gardeners, park and cemetery superintendents, etc., can be sold through this medium in this department, and at very small cost.

Don't fail to read them each issue, for you will find one or more that will prove profitable to you.

They Cost Only One Cent a Word Undisplayed

FOR RENT

FOR RENT 27,000 ft. of glass in good condition and eight acres of land near Pittsburgh, Pa. Write at once if you mean business. Address C. K., care HORTICULTURE, Boston, Mass.

WINTER DECORATIVE SHRUBS.

Abstract of a paper read by George V. Nash at the January meeting of the Horticultural Society of New York.

People are inclined to think that when winter comes all is over in the line of decorative shrubs, but this is far from true. Each season has its shrubs—Forsythias and spiraeas in April and May—Roses and Rhododendrons in June with others for July and August—and then the gorgeous tints of our autumn foliage. Winter, too, has its charming shrubs, and while not as numerous as for the rest of the year, they are perhaps even more attractive, for they come at a time when all is grey and black, and when every little that brings to memory the greenness and brightness of summer is welcome. These winter shrubs of course cannot attract by their flowers, but there are other features which make them a delight to the eye, and these must be sought in the color of the bark, the beauty of the evergreen foliage, or in the brightness of their persistent fruit.

As examples of the first group, in which the color of the bark is the attractive character, *Kerria japonica* with its bright green twigs was referred to, *Cornus alba sibirica* and *Cornus stolonifera*, both with dark red bark, and the yellow-stemmed form of the latter, known as variety *flaviramea*. This variety is of a bright yellow and seems to carry a bit of the sunshine into the snowbanks.

The plants with evergreen foliage comprise two groups, those known as conifers and the others as broad-leaved evergreens. The dwarf forms of *retinisporas*, cedars, pines, and *thujas* are admirable subjects for winter decoration, being especially attractive when snow-laden. *Rhododendrons*, *mahonias*, *Leucothoe Catesbaei*, and especially *Ilex crenata*, with its thick dark-green leaves and graceful habit, were cited as examples of desirable broad-leaved evergreens.

Among the shrubs desirable on account of their persistent fruit were: *Aronia arbutifolia*, commonly known as *Pyrus arbutifolia*; *Rosa multiflora*, with its myriad of red fruits; *Ilex opaca*, attractive also for its foliage, in addition to its bright red berries; *Ilex verticillata*, and its Japanese relative, *Ilex serrata*, both with red fruit; *Symphoricarpos vulgaris*, the coral-berry, festooned with thousands of dark red berries which persist until nearly spring time; and last but not least the Japanese barberry, *Berberis Thunbergii*, which, if one were restricted to a single shrub, was perhaps best of all—possessing attractive features at all seasons of the year, yellow with its flowers in the early part of the season, clothed in an attractive green during the summer, decorative during the fall with its charming garb of color, and then its chief charm reserved for the winter months, when all is cold and grey, its bright red berries, borne in great profusion and retaining their color and plumpness until late in the spring, adding a glow of warmth to the bleakness around.

Hailstones Which Fell at Hillsboro, Ill., April 15, 1910. Note the Size as Compared with Hen's Eggs Shown in Picture.

PHILADELPHIA NOTES.

Chas. Sim, landscape gardener and contractor, Rosemont, will start on a trip for Europe shortly.

A new retail store has been opened at 3160 Frankford avenue by George Quinn, late of Camden, N. J.

Louis Burk, the orchid enthusiast, accompanied by his wife and daughter, will attend the orchid show in Boston.

W. E. McKissick and Bros. seem to have almost a monopoly of good blue centaurea the past two weeks, and have had a great run on same.

W. F. Bassett of Hammonton sent up a lot of *Xerophyllum* blooms recently which excited some favorable comment. The flowers are white but Charles E. Meehan stuck to his name of "Red Hot Poker"—he claimed the poker was at white heat—that was all.

A. Zirkman, of M. Rice & Co., has just returned from a very successful tour through New York state. Robert Schuck, of the same firm, has just started on a trip. Painters and polishers are busy priming up the Rice store preparatory for the new season's campaign.

One fine spring morning, years ago, the bard of Wingohocking sang praises to the Irish National Bird (the stork):

"When first to my poor roof he came,
How sweetly he was sung to!
I called him every dacent name
That I could lay my tongue to."

But after a few years the poet had to add a postscript, which ran something like this:

"But glory be! that praise from me
So pleased the simple crayture,
His visits here have come to be
A sort of second nature.
I'm glad to see him now and then,
But, glory be to Heaven!
If here he isn't back again
And this is number seven."

We commend these lines of Tom Daly's to our good friends the Faulkners with whom we all rejoice.

Visitors last week: The Stork—also Chas. H. Netsch, Buffalo, and F. J. Clark, Trenton.

AN INSECTICIDE FOR THE ORCHID HOUSE.

C. H. Totty of Madison, N. J., asserts that scale on *Cattleyas* and *Calanthes* treated with Aphine were annihilated, also that the ants working in the pots of *Calanthe* were also killed instantly, showing that florists in ant-infested sections will find this preparation a cheap and safe remedy to use for their removal.

PEACH LEAF CURL.

If this disease is on your trees it will soon become evident in the unfolding peach leaves. You should watch the leaves carefully for the next two or three weeks to determine how effective your spraying has been for its control. Remember that the effectiveness of the spray will depend largely upon two factors, first, whether it was applied before the buds begin to swell, and second, whether it was thoroughly done. Be slow to lay failure to the mixture used. It has been demonstrated beyond a question that Lime Sulfur, Bordeaux mixture, or Copper Sulphate will effectually control this disease. It is of course, too late to spray for the disease now, but with a careful examination of your trees, and a study of the disease in the light of your spraying operations of this year, should help you to more satisfactorily handle the proposition next year. Bulletin 276 on Peach Leaf Curl and its Control, is now ready for distribution. This bulletin gives a careful description of the disease and the habits of the fungus which causes it, together with the most modern methods of controlling the malady. You will be interested in comparing the data in this bulletin with the results which you have gotten on this disease. Full directions are given for the preparation of Lime Sulfur solutions, Bordeaux mixtures, etc., for the control of the Curl. This bulletin is free to growers in the State of New York. Drop a card to us at once, asking for a copy of the bulletin. If you do not get it upon first request write again. Your name will go on our list for further bulletins along the line of plant diseases. Address,

H. H. WHETZEL, Pathologist,
N. Y. State College of Agriculture,
Ithaca, N. Y.

WHEN TO STOP ADVERTISING.

When buyers forget to forget—when competition ceases to compete; when every actual and prospective customer has been convinced that your product is the best of its kind and nothing better can be produced, then, and only then, will it be safe to get along without advertising.—Baker's Helper.

Until that time comes, HORTICULTURE can take care of your interests. If you want to sell to the best buyers in any branch of horticultural industry HORTICULTURE is unquestionably in the front rank as an advertising medium.

HOME IMPROVEMENT AT SYRACUSE, N. Y.

Last year the Chamber of Commerce inaugurated the plan of offering money prizes to the occupants of small houses for the best kept lawns and surroundings, and general appearance of the place from June 1st to Oct. 1st. It was a great success, many entering the contest and the influence was so marked and so much good accomplished, that this year the prize list is greatly enlarged and is as follows: Three first prizes of twenty dollars, three second prizes of ten dollars and seven third prizes of five dollars in each class. Class A is for homes assessed at \$800 or less, class B for homes assessed at \$800 to \$1,200, and class C for homes assessed at \$1,200 to \$2,000.

The judges will consider appearances throughout the season, care taken, and the freedom of back yards from rubbish and unsightly buildings.

The committee is composed of Prof. J. A. Shea, chairman, W. P. Baker, P. A. Burton, G. H. Clark and E. M. Kotz. To Prof. Shea must be given the credit of starting the movement, he has done a great work, improving the homes in the neighborhood of Lincoln School, of which he is principal.

The Pierce Arrow Motor Car Co., of Buffalo, N. Y., are building new shops in that city, and are installing window-opening machinery throughout. The interesting part of this to the average grower is the comparison of the number of ventilator machines, fittings, etc., that go into this job, and in the ordinary sized greenhouse. There are 1490 sash that ventilate in this new automobile plant and it requires 2980 arms and rods, and 135 machines to operate them. One inch and 1 1/4-inch shafting is used throughout and, to support this shafting, 1940 hangers are required. A special gear box and driving device were designed for this job, but with a view toward greenhouse needs, however, and it has been suggested that we may see some of this new vent machinery in the mammoth houses of glass which the King Construction Company are building.

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

Hunt's Spiked Cemetery Vase

Beautiful Clear Crystal Glass, heavy to stand hard usage, 4 1/4 inch diameter and 9 inch deep. Each 20 cents, \$1.40 dozen, 5 dozen (1 bar.el) \$6 25. White Enamel Lawn or Cemetery Vase. Made of heavy Tin Sheetting, Enamelled White.

No. 1—4 1/4 x 6 3/4 inches, 20 cents each, \$2.00 per dozen
No. 2—3 3/4 x 6 3/4 " 15 " 1.60 per dozen

Elizabeth, N.J.

A FIFTY FOOTER

When a man comes to us and says: "I want to have you build a small greenhouse for me, and if all works out O. K., later on I'll build more"; we say to him, make it a fifty footer and have two compartments—like this one for instance.

Generally we make up for him a plan and sketch and often also send along photographs of a house similar to what it would seem best for his particular wants.

Sometimes when our estimate arrives he thinks the price a bit too high, but when he takes the time to go and see how thoroughly one of our houses are built, it is ten chances to one we get the order. When you come to think of it, when your houses recommend your houses, it's the strongest kind of a recommendation. All of which gets us to the point of asking you, how about that house you ought to have? Ready to have us call around?

WEDDING ROPE AND TASSELS

White Cotton Double Twisted Rope and Tassels to match for church work, to rope off the aisles.

Used in place of Ribbon.

Can be easily cleaned when soiled.

Made in four thicknesses — 18 yards to a piece. Sizes: 3/4 inch—1 inch—1 1/4 inches and 1 1/2 inches.

White Enamel Rings, No 1034.

These are used on the ends of the pews to drape the rope through.

See our Katalog page 8 for price, or write us

The Leading Florists' Supply House and Ribbon Specialists

TASSELS FOR CHURCH ROPE AND WHITE ENAMELED RING NO. 1034.

WE call special attention to our large stock of **FERNS**, in all the leading varieties. We particularly mention **NEPHROLEPIS SCHOLZELI** and **NEPHROLEPIS COMPACTA**, both of which are exceptionally fine varieties for growing on.

Neph. Scholzei	
2 1/4-in. pots, strong plants....	\$8.00 per 100; \$75.00 per 1000

Oncidium varicosum Rogersii

BODDINGTON'S TYPE

We are expecting an importation to arrive at an early date. We have imported this variety for many years from an experienced collector and it has proved all we claim for it both as to size of flowers and intense coloring.

This Orchid is one of the most popular and free-flowering types of the Oncidium family. Our past importations have come fully up to standard. *Oncidium varicosum Rogersii* throws 3-foot stems, bearing as many as 170 blossoms of an intensely rich golden yellow, 2 inches and over in diameter, and can be successfully grown either on blocks of wood, in pots or in baskets, and flowers in November and December in a night temperature of 55 to 60 degrees.

\$1.25 each, \$12 per doz., \$100 per 100; selected plants \$1.50, \$2, \$3, and \$5 each according to size.

A Unique Orchid

WINNER OF GOLD MEDAL AT BOSTON ORCHID SHOW.

The above illustration shows a flower spike of Lager & Hurrell's noteworthy acquisition, the only pure white *Cattleia gigas* ever found. Sepals and petals are abso-

lutely white, throat greenish yellow. Five thousand dollars is the value set upon this latest sensation in the orchid world.

Gladiolus Suggestions

My article in HORTICULTURE of Feb. 5 last, described the new French white gladiolus *Reine Blanche* which is now offered by all the leading growers and seedsmen in France and Germany. I wish to advise all who intend ordering this variety from European firms to get a few sample bulbs before placing orders of any large amount, for there is a great deal of diseased stock of this variety on the market. I bought four lots, and only one of these were healthy bulbs.

Growers have got to keep their eyes peeled continually or they will have serious trouble if certain diseases get a foothold in their fields.

Mr. Eirett Wallace is sending out some valuable suggestions regarding the treatment and control of various diseases to which the gladiolus is subject. A letter to him in care of the Agricultural Experiment Station, Cornell University, Ithaca, N. Y., will receive prompt attention.

No more gladiolus species can be obtained from

South Africa as the government has recently made a law forbidding the exporting of all plants, roots and bulbs, so if you have any of the valuable Cape species be sure to take good care of them for some kinds may soon be hard to secure.

I have good reports of the outlook for the proposed American Gladiolus Society to be organized at Horticultural Hall, Boston, on the 27th inst., and it looks as if there would be a substantial number of charter members enrolled. Let us all get together and make it a success in every way.

The orchid show opens

Just as this paper goes to the press the portals of Horticultural Hall swing open and the most beautiful and valuable collection of tropical flowers and plants ever assembled on this continent is unveiled to the public in all its radiant magnificence. Already many distin-

guished representatives of the profession whose art has made these lovely objects possible in our latitude are on the ground and still more are on the way from far and near, intensely interested in this event which marks a progressive step of extraordinary importance in American floriculture, and in the competition in which the giants of the profession are contesting for supremacy. We do not envy the judges. They have a difficult and delicate task to perform, with many embarrassing features. Whoever may win out or lose in the awards we hope the verdict will be accepted as fair and just by all concerned.

Foster the home garden movement

The excellent paper on garden competitions, by City Forester Prost of Chicago which appears in this issue, has been in type for several weeks, but we have held it back until now purposely that it might serve as an incentive to our trade readers at an opportune time when every well-balanced boy and girl as well as their elders are filled with the garden spirit and inspiration of the spring time—an incentive to the encouragement and promotion by every means at hand, of the interest in gardens, in trees and shrubs and flowers and lawns among the young. We are not advocating this course on the part of the florist, seedsman or nurseryman especially on the plea of philanthropy or because it will tend to the mental and moral advancement of the coming generation. Others are doing that and doing it well. Our appeal, for the time being, is solely on practical business grounds. As the matter looks to us it is inexplicable that the trade should continue so indifferent to the ultimate vast advantage that would accrue to their industry if they were all to support and actively advance every movement inaugurated in their respective districts for the purpose of civic and home improvement through garden competitions or other effectual means.

More folly

In the course of our work as newsgatherers we are in receipt of daily clippings on pertinent topics from newspapers published in all sections of the country. Just now Decoration Day and its prospects as to flower supply is the subject of much comment and, as often in the past, we find the majority of florists whose views are thus given publicity telling the people that flowers will be so scarce for that occasion that grave doubts exist as to securing enough material to decorate the graves of the departed heroes. And, of course, the closing word in each instance is to the effect that "prices will be very high." We must say that we do not share these forebodings. A flower famine at the end of May! There are plenty of "ifs" in the way and certain special flowers in certain restricted sections may command an enhanced price but it is a grave indiscretion to use the fact of this possibility for the purpose of creating a hysterical apprehension in the minds of the common people to whom this day and its peculiar observances mean so much. If the florist who makes use of such scare heads as some of the papers contain, should see his customers trooping into the woods and fields for wild blossoms, a little reflection should convince him of his folly. It is refreshing to read occasionally, by way of contrast, of a florist who announces that he will furnish free of charge the floral adornments of some monument or other object in which his townspeople are interested. With good business methods behind it that is the policy of a winner. Liberality at Decoration Day will go a long way toward effacing any sore spots held over from the Christmas exigencies or Easter default.

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Boronias.

These plants are forcing their way into popular favor by sheer merit. Very few plants are possessed of such delicate and exquisite fragrance as *Boronia megastigma*. If customers only knew that one small specimen would fill a large room with a delicious perfume for many weeks they would buy the plant more freely than they do. After flowering the plants should be cut back a little, and, when they break again, that is the proper time for potting. A word of caution as to over-potting. Boronias are far better off in small pots—a 6-inch pot is large enough. For potting use sound, fibrous peat with the fine particles excluded, adding some sand and fine charcoal, and be sure to pot firmly. They can with safety be put outside from June until the end of September. Plunge to the rim in coal ashes in some good open position, and pay strict attention to watering. These plants, while they don't like to become dry, will not stand excessive moisture at the root. In the point of merit, next to *Boronia megastigma* is *B. heterophylla*, a remarkably floriferous species, although the flowers are not so powerfully scented.

Carrying Roses Over.

This method of culture has become popular with quite a few growers. To derive full benefit preparations should commence in June, in order that the plants may be gradually dried off, by withholding water, the idea being to afford a short season of rest without injuring them, and that fact should be kept in mind. When the supply of water is gradually reduced, they will start to ripen their wood, and new growth will stop. While this drying and resting period is going on the house should be thoroughly ventilated, both day and night, and kept as cool as the season will permit. The syringing should go on as before, so as not to allow the foliage to become the prey of red spider, and the ripening process is benefited by a not too abrupt checking of root action. If the plants are in benches, ripening can be completed in ten days or two weeks. But if in solid beds it will require from two to four weeks. When growth has ceased, the loose soil on the surface should be removed, and replaced with a fresh compost that has been well enriched with cow or stable manure. Remove all thin or weak wood and cut back the stronger growths to about one-third of their height. Extreme care is necessary during the first two weeks after cutting back, as to watering; they should be watered only slightly, but syringing every day will prove very beneficial.

Cycas.

About this season, and until mid-summer, is time to get and start dormant sago palm stems. They are among the florists' most useful decorative plants. The nude stems, as they come from the far east, should be

placed in pots very little larger than is necessary to hold them. Any good fresh potting will suit them very well. The soil should be rammed down all around the space between pot and stem. A good method after potting is to plunge them in a mild hotbed. Some deep frame, with the sash heavily shaded, will make an ideal place for them. Give them plenty of air and as soon as growth starts nicely they can be removed to the greenhouse where they will make a fine crown of leaves. During their development a shading is always necessary. Syringing is most essential. A frequent wetting down of the benches and paths creates that moisture in the atmosphere so congenial to this subject.

Gardenias.

The popularity of the gardenia is growing fast. Planting can be done any time from now on and during June. A great deal of the success or failure in gardenia growing depends on how the soil is prepared. It likes a light, sandy, and well enriched soil. Select a soil that lets the water through freely, always avoiding a heavy soil. Adding one-third of well-rotted cow manure to two-thirds of the above soil will make a very good compost. See that the benches have a good layer of broken crocks laid evenly over the bottom, for it is important that there is good drainage. When the plants are in 4-inch and fairly well rooted they make good stock to plant out. After they have started to grow freely the leading shoots should be pinched during the summer in order to produce bushy plants. The chief essentials in growing gardenias are atmospheric moisture and abundance of water at the roots during the growing season. They should be syringed at least twice a day and a sharp lookout kept for insect pests, chief of which is the mealy bug. *Gardenia Veitchii* is the best variety for winter forcing.

Repairing and Cleaning House.

Unless an exceptionally good crop of flowers is in sight at this time on any of the benches carnations, mignonette, roses, snapdragons, or any cut flower stock that is becoming worthless, should be thrown out so as to get a new start. The first thing after completely cleaning the house is to examine the benches as to their soundness for another year. If you think it doubtful as to its lasting through the season, pull it down and build it anew. Instead of the old, unreliable, unsightly, fixed-up bench you will have a new one that cost no more than the everlasting repairing needed on old benches.

Sowing Hardy Perennials.

The florist who has a local trade should grow a number of the useful hardy perennials and biennials for cutting. In addition to their value for the cut flower trade you will be able to sell some plants to your customers, as they increase quickly. Plants from seed sown now, can be transferred to the border as soon as large enough to transplant, and if watered for a few days they will get well enough established to stand the winter. The seed can be sown in some light soil in rows about six inches apart in a cold frame.

The sashes should be shaded and kept moist and the seeds will soon appear. The following are all free blooming and perfectly hardy. *Aquilegias*, *campanulas*, *delphiniums*, *digitalis*, *hesperis*, *hibiscus*, *Malva moschata alba*.

JOHN J. M. FARRELL.

Mr. Farrell's next notes will be on the following: Bench Soil, Celestial Peppers, Lulias, Planting out Young Roses, Smilax, Stock plants.

A MOTHERS' DAY ECHO.

Our Philadelphia representative had an idea that the way to broaden the Mothers' Day movement from one flower only to all flowers was to lay the matter before the author of the movement. Hence the following correspondence:

"Dear Miss Jarvis:—In your great campaign please broaden the field next year. Mother loved all the flowers, and so long as it's flowers it will be all right. The commercial market gets jimmy-coggled if only one is an fait and that hurts instead of helping the love of the beautiful among the people, which, I am sure, we all have at heart in spreading—besides the beautiful sentiment for which you are sponsor. The two clippings I enclose herewith will help to explain my meaning. Supply and demand are not so easily regulated in the cut flower world as in a manufactory.

Yours very truly,

G. C. WATSON."

Miss Jarvis' Reply.

"Letter received. You florists should limit prices for which any carnation may be sold for Mothers' Day, and show a spirit the public will appreciate. Help the cause. Don't make the public sore on you for a little gain one day of year.

Very truly,

ANNA JARVIS."

"Dear Miss Jarvis:—I thank you for your courteous favor of the 23 inst., and beg to assure you that all florists are thoroughly in sympathy with the cause. It is the law of supply and demand that regulates prices of all commodities, flowers included, and those engaged in the raising or selling of flowers are quite powerless in regulating prices. That is the very reason I suggested you broaden your idea from one flower to any flower, and especially her favorite flower, whichever it may have been. This will do away with a run on any one thing and accomplish the object you have in view—no advance in price—because the demand would be spread over a larger field.

On second thought I feel sure you will recognize that I am trying to help instead of hinder.

Yours very truly,

G. C. WATSON."

THE FALLEN TREE.

There was a tree in Wister Wood
Last April's livery wore
Of emerald leaf and crimson bud,
But it is there no more.

There, earliest, on twig and bough,
I marked the spring's advance;
Of all who note its absence now
I only care, perchance.

Yet 'tis enough. For ne'er, for me,
Shall any spring come in
But all its trees shall lovelier be
Because this one hath been.

So may it be with me whose blood
Stirs ever when the spring
Calls out to me from Wister Wood
And bids me rise and sing.

Enough for me, if when I've gone
The way of man and tree,
Some spring be made more sweet for
one,
Through kindly thought of me.

T. A. Daly, *Standard and Times, Philadelphia*.

THE GREAT ORCHID SHOW

An Unprecedented Display

Julius Roehrs Company Wins the Big Prize

These lines will be in type hours before the orchid exhibition at Horticultural Hall, Boston, is opened to the public. As we write the staging and arrangement are not completed, names of exhibitors have not been placed on any of the groups and hence this must be only a partial preliminary report on the show. But we have gathered together sufficient notes to tell in a general way what is to be seen, and no doubt they will be interesting to our readers even if but fragmentary.

The main hall has never presented an appearance at once so brilliant and satisfactory to the eye. The centre spaces are occupied by the enormous specimen azaleas in bloom from Prof. C. S. Sargent's estate bedded in sod and encircled by gravel paths, and the massing of the colors is most effective, the white and light tints grouped in the two first beds and the bright reds massed at the farther end of the hall where they make a rich background. On the right, occupying nearly the entire east side of the hall, are the great orchid groups in competition for the premier prize, arranged by Lager & Hurrell and Julius Roehrs Company. Lager & Hurrell's arrangement represents a tropical jungle with trees overhanging a waterfall, with phalaenopses, oncidiums and Dendrobium thyrsiflorum swaying from the lofty branches. The whole conception is artistic in a high degree.

Julius Roehrs Company make a prodigious display of great variety and novelty. The central feature is a tall *Dicksonia antarctica* draped with odontoglossums. To right and left are cattleyas by thousands, dendrobiums, cypripediums, miltonias and phalaenopses and a host of other gems. Among some of the things shown now for the first time here are *Cattleya Disseldorffii* Undine, a white hybrid between *Intermedia alba* and *Mossiae Wagneri*, *Trichopelia Hennessi*, also pure white, *Dendrobium Regium*, beautiful pink, and four new *Odontiodas*. Beyond in the next alcove is the Roehrs' group of stove plants, sparkling with scarlet anthuriums. The far end of the hall, beyond the Sargent azalea group, is occupied by a group of 250 superb specimen *Cocos Weddelliana* from the Establishment Horticulturique Lyon of Ghent, Belgium.

On the west side of the main hall are seen a grand group of decorative foliage plants from Harvard Botanic Garden and the exhibits of W. A. Manda arranged with the unique boldness always characteristic of the arrangements by this master of decorative art. His orchids are suspended in profusion from branches and rough bark and moss receptacles and reflected in mirrors ingeniously placed to simulate water. There are also some gigantic rhododendrons in bloom in tubs, from the Hunnewell estate. Among the smaller groups in this hall is one of *Nephrolepis Milleri*

from Mt. Desert Nurseries, a new fern which is best described as a very dwarf form of *Whitmani*, with foliage even more finely divided and closely resembling the Lace Fern, *Cheilanthes elegans*.

In the lecture hall are located a number of very extensive groups. The central space is occupied by the big orchid group from the Roebbling conservatories at Trenton, N. J. This is a unique arrangement in the form of a vast double pagoda, the doors and arches adorned with suspended plants and the whole placed in a setting of ferns.

On the stage is an enormous collection of rare plants from R. & J. Farquhar & Co., comprising most of the Chinese introductions of E. H. Wilson, many of them in bloom and including probably more novelties than any group ever before staged in this country. A new iris, raised by James Farquhar, from a crossing of *Palida Dalmatica* with *Kaempferi* is exceedingly interesting, as are also some of Pfitzer's new ever blooming show pelargoniums and a superb seedling, zonal, raised by George Melvin and named Mrs. Chas. Pfaff by Mr. Farquhar. Splendid orchid groups are staged in this hall by J. T. Butterworth, showing cultural skill of the highest degree. Another magnificent group comes from Walter Hunnewell. Joseph Manda's group of orchids—mainly cut flowers—attracts much attention and admiration for its skillful, artistic effect, the orchid stems being inserted in great profusion between the leaves of a variety of bromeliads. Another collection of great extent and variety comes from the orchid houses of E. B. Dane. Geo. L. Freeman Company is on hand with a fine lot of freshly collected plants and the Macrorie-McLaren Co. have some fresh phalaenopses.

Among the most interesting and important plant groups from a commercial standpoint is that of hydrangeas in bloom from Thomas Roland. Particularly promising is a new sort which appeared in an importation from Japan two years ago and which Mr. Roland has got fixed in pink and in blue varieties. The flower bracts are cupped in a way closely resembling the flowers of some lilacs and have a hard, waxy character entirely unique in hydrangeas. The small exhibition hall is occupied by two mammoth groups of foliage and flowering plants from Ed. MacMulkin and W. A. Riggs respectively. Both are exceedingly brilliant, the MacMulkin group displaying especially fine taste in arrangement. A glowing border of yellow calceolarias on the Riggs group is very effective. Here also is a large display of specimen *Fuchsia Black Prince* from Walter Hunnewell. M. J. Pope is on hand with a group of healthy well-flowered orchids, including an enormous specimen of *Oncidium sphacelatum*.

In cut flowers the entries are not many but all are superlatively good. An arrangement of parrot and Rembrandt tulips by W. W. Rawson Co., on a dark green velvet background is stunning. William Sim shows an array of sweet peas of the well-known Sim quality and H. A. Dreer is represented by a collection of hybrid teas, outdoor grown, fine blooms, some of them new varieties. Harry Turner staged vases of three varieties of *Malmaison* carnations viz., *Calypso*, Mrs. Trelawney and Lord Welby, flowers of prodigious size.

Just as we close the forms the news reaches us that the \$1,000 prize and gold medal for display of orchids filling 400 sq. ft. of space has been won. Second prize, \$500 and silver medal, goes to C. J. Roebbling, and third prize, \$250 and bronze medal, to Lager & Hurrell. Lager & Hurrell win the gold medal for best recently introduced orchid plant not previously exhibited in the United States, and Roehrs wins the gold medal for best new seedling orchid plant not previously exhibited in the United States.

LIST OF VISITORS.

The list of visitors in Boston up to Thursday afternoon includes the following:—De Forest W. Ludwig, Pittsburgh, Pa.; Theodore Outerbridge, Bermuda; P. T. Barnes, Harrisburg, Pa.; Julius Roehrs, Ed. H. Roehrs, J. A. Muller, Max Richter and Chas. Maynard, all of Rutherford, N. J.; Henry Hurrell and G. W. Strange, Summit, N. J.; Louis Burk, wife and daughter, Phila., Pa.; I. Rosnosky, representing H. F. Michell Co., Phila., Pa.; Robert Craig, George C. Watson and A. Pericat, Phila., Pa.; F. R. Pierson, Tarrytown, N. Y.; Paul de Nave, Fall River, Mass.; M. J. Pope, Naugatuck, Conn.; J. A. Newsham, New Orleans, La.; S. R. Lundy, representative of W. A. Manda, San Francisco, Cal.; W. A. Manda and R. Karlstrom, South Orange, N. J.; A. G. Handel and Peter Duff, Orange, N. J.; Joseph Manda and J. Murray, East Orange, N. J.; Jas. Goodier and Mr. Keeling, Trenton, N. J.; Alex McDonald, Somerville, N. J.; C. H. Totty, A. Herrington and Wm. Duckham, Madison, N. J.; Winfried Rolker, George F. Struck, James McManus and A. F. Faulkner, New York City; H. A. Barnard, of Stuart Low & Co., London, England; Adolph Saxe, Dresden, Germany; J. S. Hay, representing H. A. Dreer; Harry Turner, Castle Gould; D. F. Roy, Marion, Mass.; Timothy McCarthy, Fred. C. Green and James Hamilton, Providence, R. I.; Vernon L. Sherwood, Bar Harbor, Me.; A. J. Loveless, Lenox, Mass. These are only the advance guard. Friday and Saturday will see a much greater influx, which would be far more so if it were not for Memorial Day business which will keep many away who would otherwise be here.

NATIONAL FLOWER SHOW.

Mechanics' Building, Boston, Where National Flower Show Will Be Held.

The committee on National Flower Show met at Horticultural Hall, Boston, on Wednesday, May 25, with President F. R. Pierson and a very full representation of the local membership present. On account of some uncertainty as to contemplated alterations in its interior architecture, Horticultural Hall was eliminated from consideration as a location for the show and the matter of choice was narrowed down to the new Boston Arena, with

a central floor space of about 50,000 sq. ft., and Mechanics' Building with more than double that space. The former was decided to be too small for the expected exhibits and the latter was finally decided upon, and, although costing considerably more, its well-established popularity as a place of public entertainment is expected to offset this drawback, and President Pierson was authorized to contract for the occupancy of the entire building, the show to open on Saturday, March 18, 1911, and close on Sunday night,

March 25, thus giving the advantage of two Sunday attendances. Provision will be made for a mammoth trade exhibition on the lower floors of the building, but the trades' department will be closed on Sundays. Chester I. Campbell was selected as general manager and secretary of the entire enterprise on terms considered very favorable by the committee. The next meeting will be called for some day in the second week of June, when details will be considered and a period of general activity inaugurated.

PEONY EXHIBITION.

The schedule of prizes for the joint exhibition by the Massachusetts Horticultural Society and the American Peony Society to be held at Horticultural Hall, Boston, on Thursday and Friday, June 9 and 10, 1910, is as follows:

Prizes Offered by the American Peony Society.

HERBACEOUS PEONIES—DOUBLE.

Commercial Classes.

1. Largest and best collections of named varieties, one flower of each. \$15, \$10, \$5
2. Fifty blooms, one variety, named, white. \$10, \$5
3. Fifty blooms, one variety, named, dark pink or rose. \$10, \$5
4. Fifty blooms, one variety, named, flesh or salmon-pink. \$10, \$5
5. Fifty blooms, one variety, named, crimson. \$10, \$5
- Amateurs and private growers' classes.
6. Collection of not less than twelve varieties, named, one of each variety. \$10, \$5
7. Collection of not less than twelve varieties, named, one of each variety, open only to exhibitors not residing within the State of Massachusetts. \$10, \$5
8. Collection of white varieties, named, one bloom of each. \$5, \$3

9. Collection of dark pink or rose varieties, named one bloom of each. \$5, \$3
10. Collection of salmon and flesh pink varieties, named, one bloom of each. \$5, \$3
11. Collection of tricolor varieties, named, one bloom of each. \$5, \$3
12. Collection of crimson varieties, named, one bloom of each. \$5, \$3
13. Six blooms of any one variety, named. \$3, \$2

Prizes Offered by the Massachusetts Horticultural Society.

HERBACEOUS PEONIES.

14. Collection of thirty or more varieties, double, one flower of each. \$12, \$8, \$6, \$4
15. Collection of twelve named varieties, double, three flowers of each. \$12, \$8, \$6
16. Specimen bloom, double. \$2, \$1
17. Collection of twelve or more named varieties, Japanese single; including all single varieties destitute of pollen. \$4, \$3, \$2
18. Vase of blooms on long stems, arranged for effect in the Society's large China vases. \$10, \$6, \$4
19. Collection of six named double varieties, white, one flower of each. \$3, \$2, \$1
20. Collection of six named double varieties, rose pink, one flower of each. \$3, \$2, \$1
21. Collection of six named double varieties, salmon pink, one flower of each. \$3, \$2, \$1
22. Collection of six named double varieties, red or crimson, one flower of each. \$3, \$2, \$1

23. Collection of six named double varieties, any other color, one flower of each. \$3, \$2, \$1
24. Vase of twenty-five blooms, double, white or bluish. \$5, \$3, \$2
25. Vase of twenty-five blooms, double, pink or rose. \$5, \$3, \$2
26. Vase of twenty-five blooms, double, red or crimson. \$5, \$3, \$2
27. Vase of twenty-five blooms, double, any other color. \$5, \$3, \$2
28. Collection of twelve named varieties, double, one flower of each, for non-commercial growers only. \$6, \$4, \$3
29. Display of peonies, arranged for decorative effect, to occupy a space not exceeding one hundred square feet: 1st. Silver Medal and \$10; 2d. Bronze Medal and \$5; 3d. \$5.
30. Best new peony not in commerce or introduced since 1906. Silver Medal

Flowers intended for competition must be shipped so as to reach the exhibition not later than ten o'clock A.M. on Thursday.

Express charges on all exhibits must be prepaid, and should be so marked on the boxes, as no charges will be paid by the manager of the exhibition.

The usual rules governing previous exhibitions of both societies will be in force. All packages must be addressed in care of William P. Rich, Secretary, Horticultural Hall, 300 Massachusetts Ave., Boston, Mass.

A DETROIT CHARITY.

Tuberculosis Flower Day under the auspices of Detroit's society, was a splendid success and John Breitmeyer's

Sons' establishment was crowded with purchasers from all stations of life. All were anxious to buy a flower to help the good cause, the entire receipts

of the afternoon's sales being for that purpose. These ladies carried off several hundred dollars. The accompanying illustrations show some of Detroit's society belles as they appeared selling

flowers on this occasion and the ever present, genial smile of Mayor Phil Breitmeyer is well brought out. The great success attained suggests that the event be made an annual affair.

"MORE THAN \$1.00 IN ONE COPY."

Please find enclosed one dollar to renew subscription for your valuable paper, HORTICULTURE, which every person interested in plants should read and they will find more than one dollar of information in any one copy.

JOHN GERARD.

New Britain, Conn.

"VERY HELPFUL."

Berlin, N. H., May 20, 1910.

We have been favored with sample copies of HORTICULTURE at different times and have found it very helpful in many respects. Please find check enclosed for \$1.00 which pays for one year's subscription to HORTICULTURE.

T. G.

Worth Reading

San Francisco, Cal., May 13, 1910.

"This will advise you that I have thoroughly tested out your product Aphine, and can highly recommend same for exterminating Aphids. Our outside roses in Golden Gate Park were badly infested with Aphids. With the first application of Aphine the pest was entirely destroyed."

(Signed),
John McLaren Supt. Golden Gate Park.

"Uplands" San Mateo, Calif.,

May 10, 1910.

"The Aphine you sold me I have used on orchard trees and ornamental plants infested with scale, green and white fly, thrip, mealy bug, etc., and found, in every case, that it completely destroyed the pests in question with not the slightest harm to the subjects treated. It is without doubt the finest insecticide I have ever used."

(Signed),
William Munro, Supt. to
C. T. Crocker, Esq.

Miami, Biscayne Bay, Fla.,

April 26, 1910.

"The sample of Aphine you kindly sent me was used on a lot of palms which were infested with Mealy Bugs and I am glad to say it entirely destroyed them without injury to plants. I shall include Aphine in my next order for supplies."

(Signed),
E. J. Andrews Gardener, Hotel
Royal Palm.

Hill Crest, Purchase, N. Y.,

May 14, 1910.

"Replying to your letter of March 31st, I wish to say that we have given your Aphine a thorough test, and have come to the conclusion that it is one of the best insecticides ever sent out."

(Signed),
A. Underwood, Supt.

Morristown, N. J., April 25, 1910.

"It gives me great satisfaction to tell you that Aphine has entirely cleaned my Gardenias of Mealy Bug. I used it one part to 35 water. I have tried many things with more or less success but this was the first complete success. There was no injury to buds or foliage."

(Signed),
Edward Reagan.

Concord, N. H., May 8, 1910.

"Received the Aphine and gave it a good test. As I wrote you before, my 'mums' were literally covered with lice, but that is a thing of the past. I regard Aphine practically as an insurance against insects and I shall not be without it in the future."

(Signed),
H. D. Whitney, Prop.
Fern-Croft Farm.

Pasadena, Cal., April 11, 1910.

"It may interest you to know that of the three fluid insecticides which I have tested Aphine proved to be the best. First—It did not disfigure foliage or flower. Second It mixed with water perfectly, and last, but not least of its merits, it is less expensive than any of the others considering the work accomplished."

(Signed),
P. D. Barnhart,
Editor of Pacific Garden.

We will supply many reports, equally as praiseworthy of the merits of Aphine as those submitted above, or any other particulars you may like to obtain.

WHAT ARE YOU DOING

to make June, the month of Brides and Graduations a busy and Profitable One for You?

Boxes and Crates

are being shipped from our warehouses every day to florists all over the country, containing just the goods that the public are eager for at this season. Are any of them billed to you? If not you are neglecting your opportunity. There's as good money in them for you as for the other man who is stocking up and getting ready and knows why.

Behind These Goods

stands the name and guarantee of the oldest, largest and best-known Florists' Supply House in America. **Quality, Freshness, Servicability and Price are Unrivalled.** Send for price list and suggestions on seasonable standard goods and novelties and mention Horticulture when writing.

H. BAYERSDORFER & CO.,
1129 Arch Street, Philadelphia, Pa.

THE AMERICAN SEED TRADE ASSOCIATION.

The 28th Annual Convention will be held June 21-23 at Atlantic City, with HEADQUARTERS AT THE HOTEL STRAND on the beach at the foot of Pennsylvania Ave.

RATES—Single room, without bath, for one, \$3.50. Double room, without bath, for two, \$7.00. Single room, with bath, for one, \$5.00. Double room, with bath, for two, \$9.00. Including all meals.

Extract of letter received by the secretary:

"These rates will be given to your Association regardless of locations. In other words, rooms facing Pennsylvania Avenue and Ocean front will be the same price as land side rooms, and persons engaging accommodations in advance will have the preference."

The program should appeal to members who are interested in the welfare of the Seed Trade and are desirous of keeping pace with the latest developments relating to the business.

SPECIAL NOTICE.—Notice is hereby given to offer an amendment to the By-Laws, Article 1, Sec. 4, raising the dues to twenty dollars.

C. E. KENDEL, Sec'y.

2010 Ontario St., Cleveland, O.

THE PROGRAM.

Officers 1909-1910.

President, J. C. Robinson, Waterloo, Neb.

First Vice-President, M. H. Duryea, New York.

Second Vice-President, F. W. Bolgi-
 ano, Washington, D. C.

Secretary-Treasurer, C. E. Kendel,
 Cleveland, O.

Assistant Secretary, Leonard H.
 Vaughan, Chicago.

Order of Business.

Reports of the secretary and treasurer; election of members; reports of committees; reading of communications; unfinished business; new business; general discussions; annual election and installation of officers.

**Opening Session, Tuesday, June 21,
 10 A. M.**

Recent Science in Plant and Animal Breeding. Hon. W. M. Hays. (Assistant Secretary of Agriculture, Washington, D. C.)

Methods and Apparatus for Seed Testing by Seed Merchants. George H. Clark. (Department of Agriculture, Ottawa, Ont.)

The Spencer Type of Sweet peas. W. Atlee Burpee, Philadelphia, Pa.

State Legislation—Present and Future. Prof. Charles D. Woods, Orono, Maine.

The Advancement and Protection of the Interests of the Seed Trade. Curtis Nye Smith. (Counsel for the American Seed Trade Association, Boston.)

Past, Present and Prospective of the Seed Trade of America. Francis Brill, Hempstead, N. Y.

**Wednesday Evening—Annual Banquet.
 Friday.**

All members and their families are

cordially invited to spend Friday at Fordhook Farms.

Special trains will stop at the entrance, and luncheon will be served at 1.00 o'clock.

Mr. Burpee and Mr. Earl will be back from California in time to welcome their guests.

List of Committees:

Executive Committee—W. S. Woodruff, Orange, Conn.; Geo. S. Green, Chicago; Alex. Forbes, New York; Chas. N. Page, Des Moines, Ia.; S. F. Willard, Wethersfield, Conn.

Membership Committee—Albert McCullough, Cincinnati, O.; E. L. Page, Greene, N. Y.; J. C. Vaughan, Chicago.

NEW ORLEANS HORTICULTURAL SOCIETY.

Although there was a fair attendance of members at the regular monthly meeting of this society very little but routine business was transacted. Two new members, J. C. Quinette and George Thomas were elected. After much discussion the date and place for the annual outing were left to be decided at next meeting. The Society set the date to accept of the hospitality of Mr. Theard, president of the Dixie Brewing Co., immediately after the next monthly meeting on June 17th. U. J. Virgin had a nice vase of Iris Kaempferii on the exhibition table.

A. E. Marr, son of the late Thomas E. Marr, will continue the photographing business of Thos. E. Marr & Son, at the same address as heretofore, 180 Tremont street, Boston.

ORCHID PEAT

Osmunda Fibre

Either the black or brown grade, in chunks or handpicked, in bags or barrels, ready for the orchid grower.

LIVE SPHAGNUM MOSS, ROTTED or AZALEA PEAT, LEAF MOLD, BALED SPHAGNUM MOSS, all of fine quality.

Our Exhibit at the Boston Orchid Show will interest you as a demonstration of the quality of our goods.

The C. W. BROWNELL CO.

Walden, N. Y.

A TALK ON GARDENS.

By J. H. Prost, City Forester of Chicago,
Before the South End Women's Club.

Municipal gardens, such as back and front yard gardens, children's gardens, vacant-lot gardens, porch and window effect, together with streets properly ornamented with trees and shrubs, really are the fundamental features of a beautiful city. Gardens not only help to beautify the city, by beautifying the home surroundings, they are also of great importance as educational factors, improve sanitary conditions, increase the value of real estate, strengthen home ties and stimulate civic pride.

It seems to me that every one must realize the influence for good which the cultivation of plants exercises upon a community. It is those citizens, having gardens of their own, who most appreciate and respect our parks. The planting, cultivation and handling of plants in their own little gardens, gives them a better understanding of the plants in our parks and they grow to realize that each flower, each tree, each shrub and all the beautiful scenery is for them to admire and enjoy, if only they will make their acquaintance and visit with them now and then.

Nothing gives a family more satisfaction during the warm summer days than a well kept lawn, fringed with perennials, flowering shrubs and trees; a quiet, peaceful and beautiful retreat as it were, where they can feel as though they had retired from the city into their own little private park. Whenever you find a home where grass, flowers, trees and shrubs have taken the place of cinders, tin cans

and rubbish, there you will find a happy family, a successful father, a contented mother and well behaved children. Here, in their own little garden, they all have a common interest, each has his favorite flower, vegetable or tree, and while each contributes a part of his or her time to its care, all receive the benefits of the whole. Here the children may play and have their garden parties; the mother may entertain her friends and in the cooling shade of the garden trees serve her afternoon tea; while in the evening the family may sit out in the open air and gaze at the "twinkling stars through the sighing leaves."

A child brought up in surroundings such as these, where it may watch the tiny seedling plants break through the ground in early spring, cultivate and study their growth during the summer, pick the flowers and carry them to a sick schoolmate, and in the fall harvest the vegetables and fruits,—such a child surely gets more out of life and is making better preparations for the future than those who are spending their youth in useless or idle play.

All this is even more practical than poetic; it is simple rather than difficult, and intensely fascinating to those who have gotten started in the work. What our people need is more missionary work along these lines, such work as the Improvement clubs have been doing; more definite instruction as to just what, how and when to plant and how to care for their gardens. The United States Department of Agriculture has published several bulletins on vegetable and flower gardens, which may be had for the asking.

As a result of these garden contests, home garden making has taken a firmer hold upon our people. Every improvement association could well afford to put forth especial effort to induce citizens to do more to beautify their front and rear yards and to grow vegetables upon vacant lots. What a grand annual garden festival we might have and what an influence it would have toward civic betterment, if each improvement association in the city could be induced to have an annual garden contest in its district, give prizes for the best gardens and then enter these local prize gardens in a contest to be conducted by the League of Improvement Associations, an organization comprising all of the improvement associations of the city. This final contest would bring out the best gardens in the city, and by awarding the prizes at some suitable time and place, with each improvement association participating, better ideas and new ambitions could be aroused, which would stimulate the interest in garden making throughout the city.

These contests ought to take into consideration all the different kinds of municipal gardens and might be considered missionary work in home garden making and civic betterment; no effort need be made to give large prizes.

The vacant lot gardens would of course be either children's gardens or purely vegetable gardens. The property usually being rented, may at any time be utilized for building or other purposes; for this reason, persons doing the gardening cannot afford to pay a big rental, and should get as much for their efforts as possible. These gardens would be judged upon the

Orchids

We are strictly specialists in **ORCHIDS**. Our extensive collection comprises **Everything Worth Growing** in this line, from tiny botanical orchids to the large and showy kinds for amateurs and florists.

If you do not have our catalogue of established orchids, a postal card from you will bring it to you.

Of **freshly imported Orchids** we have large quantities in fine condition and at low prices, such as

Cattleya Trianae, C. Mossiae, C. Gaskelliana, C. Schroederæ, C. Speciosissima, Dendrobium formosum, Oncidium varicosum, etc., etc.

Send for special list of Imported Orchids.

"When in Philadelphia Be Sure to Look Us Up"

Joseph Heacock Company, Wyncote, Pa.

choice and number of varieties growing, cleanliness and scarcity of weeds, quality as well as quantity of vegetables. Children's gardens should be located near public schools, where they may be readily reached by the children after school hours, and when possible, one of the teachers should remain with them to see that they conduct themselves properly. In planting, arranging and cultivating the gardens, the children should be allowed absolute freedom, also to plant varieties of their own choice. In this way, they become more interested, take great pride in working out new ideas, they will study the plants more closely, learn their economic value, purpose for which they are used and will compare them to their description in the seed catalogues. By giving them this freedom, it becomes a matter of personal judgment and responsibility, with the element of speculation and experimentation entering into their play.

Window boxes may be bought ready made and after fastening them to the window sills, should be filled with good, black loam and this soil should be renewed each spring, after the bulbs have ceased blooming and have been taken out and put in a dry place for fall planting. These boxes should be planted with alyssums, alternanthera, or ageratums at the edge of the box, with periwinkle, wandering Jew, nasturtium, sweet pea, English ivy, or similar vines hanging over the sides and umbrella palms, marguerites, geraniums, petunias, coleus, begonias, etc., planted in the center. Such planting gives a pleasing effect and these boxes are judged as to arrangement

of the plants, color effect in massing and general conditions.

Porch gardens will be planted with almost the same plants as recommended for the window boxes, (these porch boxes should be fastened to the railings of the porch and stairway) but more hardy, such as the morning glory, wild cucumber, moon flowers, scarlet runner, Dutchman's pipe, etc., should be used. For permanent effect, Hall's honeysuckle, bitter sweet and Virginia creeper should be used; they may be planted in the ground and trained up along the porch to its roof.

Front yards should be planted so as to harmonize with the general treatment along the street. Vine covered fences or clipped hedges planted on the property line to divide neighbors is very poor taste; such planting destroys the street effect, looks unneighborly and makes one think the owners feared their yard would be stolen. With all the front lawns along the street opened into one another, you get a harmonious treatment along the street that gives it a boulevard appearance.

I have often seen pleasing effects as the result of planting castor beans against the house or porch with caladiums, cannas, coleus or geraniums in front of them, but the best results are gotten by planting such shrubs as lilacs, mock oranges, highbush cranberries, althaea and Spiraea Van Houttei against the house and porch corners, with lower growing shrubs such as weigela, Japan quince, California privet, snowberries, Indian currants, Thunberg barberries, Deutzias gracilis and Lemoinei, or Spiraeas Anthony Waterer, tomentosa or Bumalda plant-

ed in front of the high growing ones, forming a bank of foliage rising from the lawn, up and against the house. The shrubby effects are permanent in character and are almost as interesting when the twigs are covered with snow as when in bloom.

The back yard gardens may be entirely ornamental and are often considered the most desirable; they may be entirely given up to growing vegetables, thus bringing the largest financial return, or they may be planted to combine both the ornamental and vegetable, which garden is undoubtedly the best suited for the average city home.

The ornamental back yard gardens may be considered of two types, the formal or geometric garden and the informal or naturalistic garden. In formal gardens such plants as the castor bean, caladiums, cannas, geraniums, alternantheras, yuccas, asters, stocks, balsams, salvias, four-o'clock, alyssums, etc., are used with the low growing plants, planted as borders around individual masses of the higher growing ones and these arranged in circles, squares and other geometric figures, with heavy grass lawns stretched between these beds and straight hedges of privet or Thunberg barberries bordering the lawn and walks. The informal gardens should have as much open lawn left intact as possible, and no beds of flowers or shrubs should be planted in the center of the open space. These would minimize the size of the lawn and their patchy appearance detracts from the composition of the whole.

Naturalistic gardens require the least attention as almost all plants

Rutherford, N. J.

used will be perennial, they cost the least to maintain and also give a pleasing winter effect. In these gardens all the unsightly features as garbage boxes, sheds, poultry houses, house foundation and porch should be screened from view by proper arrangement of high growing shrubs, such varieties as mentioned for front yard planting. These shrubs should also be planted at the corners of the yard, with the lower shrubs mentioned, planted in front of and between the masses of high ones. This planting scheme forms a bank of foliage against the borders of the yard and the perennial flowers, such as hollyhocks, anemones, columbines, asters, campanulas, hardy chrysanthemums, coreopsis, larkspurs, delphiniums, sunflowers, day lilies, peonies, phlox, goldenrod, etc., should be planted in masses along in front of the shrubbery beds. This massing of flowers against the green foliage of the shrubs makes this sort of gardening intensely fascinating and it affords excellent opportunities to study color effects by rearranging the flowers from year to year, to suit the taste and fancies of the gardener. These informal gardens should also have one or two trees, planted where it will form a canopy of green, under which a rustic bench or hammock may be placed. The trees best suited for this purpose are the Norway, sugar or silver maple, mulberry, honey locust, American linden or sycamore.

Where the mixed garden is desired the back yard should be divided by a vine covered trellis or privet hedge, so that the rear half will be vegetables and the remainder open lawn, with flowers and shrubs at the borders and one good tree for shade, near the center. The vegetables in the garden should be planted in straight rows and plenty of fertilizer should be added to the soil in the fall or spring, if good results are desired. Very often, perennial flowers are planted along the walks and against the edges of the vegetable garden and these add greatly to its appearance.

I have seen a great variety of ornamental features introduced into gardens, such as summer houses, arbors, pergolas, rockery work, ferneries, rustic seats, etc., and these are the results of hobbies, fancies, individualities or experience in gardening and give the greatest enjoyment to those who make them.

These front and rear gardens should

be judged according to the age, experience and occupation of the person responsible for the garden; the original design or purpose and adherence to it; choice of varieties and harmony of planting; and the thrift, cleanliness and general appearance of the whole.

NEW ORLEANS NOTES.

J. A. Newsham is attending the Orchid Show held at Boston this week. He will take in New York, Philadelphia and Washington before returning.

Hermann Doescher and his partner, Morris Jones, both young men, are hustlers. They are enlarging their nursery and intend carrying a big stock of shade and ornamental trees, shrubs, privet, roses, etc.

E. A. Baker, manager for the new Parking Commission, has had a strenuous winter. Given a piece of swampy uncleared land, he has performed miracles in clearing, grading and draining and now has thousands of seedling trees, shrubs, etc., growing on for use in the public thoroughfares.

NEWS NOTES.

Woodville, Pa.—P. Maier has purchased the greenhouse he has been running here.

Menlo Park, Cal.—Frank Roach of this place has purchased the Lynch Nursery, owned by the late Mr. Lynch.

Pittsfield, Mass., May 23.—When President Charles S. Mellen of the New Haven road went out for his morning walk in his gardens at Council Grove, Stockbridge, today he discovered that the men employed under William Donaldson in the gardens were working only nine hours and getting \$1.75 a day. Mr. Mellen protested against these hours, saying he had supposed they were working ten hours for that pay.

The result was that Mr. Mellen told Mr. Donaldson to quit at once, and likewise the others. Working under Gardener Donaldson were ten men. The men claim that they have been working for the past three years nine hours a day and they say that Mr. Mellen was apparently perfectly satisfied. They are looking for other jobs, and Mr. Mellen is looking for a new foreman.—*Boston Journal*.

GODFREY ASCHMANN

Is more active than ever

LOOK! BARGAINS!

I am ready to execute every order in bedding plants promptly; having 10 houses and an equal number of hotbeds, with every hole and crack full of bedding plants alone

Geraniums, double white, pink and red, in 4-in. pots, \$7.00 per 100.

Asters, Queen Victoria and other good varieties, 5 or 6 separate colors, 2½ to 2½-in. pots, \$3.00 per 100.

Canna Eisele, 4-in., \$7.00 per 100. Alphonse Bouvier, Bismark, Patty Gray, 2 to 4-in., \$7.00 per 100.

English Ivy, 4-in., 10c.

Lemon Verbenas, 4-in., \$7.00 per 100.

Begonia Erfordil, our well-known improved strain (5000 now ready), 4-in., \$8.00 per 100.

Begonia Vernon, dark and light red. Our so well-known improved strain from Zurich, Switzerland, introduced by us 4 years ago, which has given so much satisfaction all over America. Always in bloom. Stand the sun and all the dry weather. A bed of this novelty plant, once seen grown and same will speak for itself. When we plant our Begonias we plant 4 to 8 small seedlings in one pot and they are now grown big and bloom in 4-inch pots, at \$8.00 per 100.

Clara Bedman or Bonfire, in bloom (Scarlet Sage), 4-in., \$7.00 per 100.

Ageratum, dwarf blue, best variety, 4-in., \$7.00 per 100.

Fuchsias, assorted colors, 4-in., \$7.00 per 100.

Seed Trade

The Convention.

For several months it has been generally understood by the seed trade that the St. Charles Hotel, Atlantic City, N. J., had been selected as headquarters for the seedsmen at their convention to be held there June 21st, next. For some reason, however, which we have not ascertained, the hotel people cancelled the engagement they had made with the Seedsmen's Association, and the latter were compelled to cast about for new quarters. The Rudolf was recommended, and it was understood that several had engaged accommodations there; but while we do not wish to discredit the house in any respect, we would simply say to those who contemplate engaging quarters there, DON'T. There are reasons, chief of which is that it would be best for the trade so far as practicable to be at the Headquarters hotel and this new headquarters will be the Hotel Strand, as indicated by Secretary Kendel's communication which appears on page 819.

Wisconsin Pea Crop.

For the past two weeks, rumors have been on the wing to the effect that the pea crop of Wisconsin was in a very bad way. Some of these rumors are of a very sensational character, one stating that from 50 to 75 per cent of the crop of the state was a failure and that unless immediate replanting on a very extensive scale were resorted to, the pea pack of the state would be very short. In order to ascertain the exact facts, several telegrams were sent to leading packers of the state representing all sections, and their answers are herewith given:

Columbus, Wis., May 19, 1910.

Alaskas fair; some damage by frosts, late varieties show good stand but it is too early to make predictions; no replanting necessary in this vicinity. Columbus Canning Co.

Eau Claire, Wis., May 19, 1910.

Pea crop very backward account drought; do not look for much of a crop on about one third of our acreage. Had fine rain Monday and with favorable conditions should get fair crop on balance acreage; have fair stand; will not replant; conditions, sweets, Alaskas about same, cannot estimate yield.—Lange Canning Co.

Sturgeon Bay, Wis., May 19, 1910.

All peas in this section backward about coming up are now showing strong healthy growth; nothing damaged either by frost or wet weather. Alaska peas up about three inches. Sweet peas not yet out of the ground; do not know anything about conditions outside of our county.—Reynolds Presv. Co.

Wausau, Wis., May 19, 1910.

Present condition of pea crop is excellent; no replanting necessary or thought of anywhere in state to my knowledge. We only plant ten per cent. sweets; present outlook is for large yield but season will be short making poor quality.—Geo. Chatham.

They show very conclusively that there was absolutely no foundation for the sensational reports, and that, as a matter of fact, conditions are exceedingly favorable. There is only one feature which is unsatisfactory to the canner, and that is that owing to the cold, backward weather, the early plantings made very slow growth and instead of maturing for canning in about the order in which they were planted, many of the later plantings will come in at the same time as the earlier ones, thus cutting short the season and quite possibly the total pack, as it will be impossible for the canners to take care of the peas as fast as they mature under such conditions. Another factor is, there is likely to be a large percentage of the larger sizes or as it might be termed, a pack of poor quality.

What has been said about the canners of peas, no doubt applies equally to those planted for seed purposes. Thus, altogether we may consider that the pea crop both in Michigan and Wisconsin, whether for canning or for seed purposes, is in very excellent condition and unless some calamity overtakes it before maturity, there is every indication of a large pack of canned

peas as well as a large crop of seed peas.

Other Crop Notes.

The planting of sugar corn is now proceeding both East and West. In fact, we are informed that considerable seed has already been planted and some of it is up. But it cannot be said that the weather, up to within the past few days, has been very favorable for corn. Since the latter part of last week, however, weather conditions had been much more favorable for corn and beans, and it may be added here that the latter are also being planted to a considerable extent.

No important crop news has been received from Europe within the past two weeks and matters may be accepted as being in about the same condition as when last reports were made.

Counter trade continues remarkably active and will no doubt last well into June, and the predictions made early in the winter that this would be a banner year for the trade, we think will be fully realized.

Price Advances Abroad.

The following will prove of interest to a number of your readers and will give them a clearer insight why crops may run short and reasons for price advances abroad. Under date of May 7th, 1910, Messrs. Wm. Fromow & Sons, Windlesham, Surrey, England, write us: "So very much depends upon the weather obtaining here during the summer months as to what progress the plants themselves make; at the present time the outlook is not very favorable, although we are hoping for better times.

"The spring has been thus far very cold and wet and we are experiencing frost almost every night, which may very considerably diminish our stocks, and we gather that this kind of weather is obtaining all over the country, and this will to a very large extent influence the prices."

Messrs. Fromow & Sons are very ex-

tensive growers of roses and nursery stocks. Very truly yours,
AUGUST ROLKER & SONS.
New York.

Notes.

Henry Nungesser, Hoboken, N. J., returned from Europe last week on the S. S. Kronprinzessin Cecelie in his usual good health, after a pleasant trip.

It is given as the opinion of onion set growers in the vicinity of Chicago that the acreage is larger than usual and that if there are no further severe frosts the crop will be a large one.

"Buds," the new seed and supply store lately established on Barclay Street, New York, seems to be getting a substantial share of the local trade for which their stand is favorably located and Mr. Gloeckner is very well pleased with results thus far.

PERSONAL.

Herman Weiss is now with Chas. Millang, New York, N. Y., having left A. L. Young.

James J. Curran has taken charge of the growing for John Reck & Son, Bridgeport, Conn.

R. Kapling, retail florist on Massachusetts avenue, Boston, was married on May 9th to Miss Rose Pearlstein.

Winfield Seaman is now foreman and decorator for M. J. Leach & Sons, 20 Broad street, Pawtucket, R. I. He was formerly with J. H. Cushing of Quindnick.

Earl Bavier is now in charge of the flower department of the department store of L. Dimmond & Son, Providence, R. I. He was formerly with J. H. Cushing of Quindnick.

Carl Ulander, who has been employed at the Swinbank Greenhouses, Sycamore, Ill., is planning to leave for a trip to Sweden about the first of June. He may conclude to again make his permanent residence in his native country.

Thomas F. Galvin of Boston, will sail for Europe on June 15, and will visit the chief cities in Great Britain and on the Continent. Mr. Galvin is much interested in M. A. Patten's new variegated seedling carnation, Mrs. Clarence W. Barron, which he considers the best ever introduced in its class and while abroad expects to arrange for its dissemination in the principal centres.

A STRIKING WINDOW.

The accompanying illustration shows a clever use of the sensation of the hour to attract attention to the flower window of W. J. Palmer & Son, on Main street, Buffalo. The display drew

a crowd continuously. The interest was heightened by changing the position of comet and earth from day to day in accordance with the movements of the originals as reported in the daily papers.

WASHINGTON PERSONALS.

John Robertson has moved his effects from 1510 H. St., N. W., to 2010 P St., N. W., and seems much pleased at his present location.

Leapley & Meyer have opened a retail flower store at 907 G St., N. W., and report themselves as well pleased with their outlook. Both gentlemen have been in the employ of F. H. Kramer for several years and should be well fitted for their undertaking.

G. E. Anderson of Ballston, Ia., has been engaged to succeed Peter Bisset at Twin Oaks, the estate of the late Mrs. Hubbard.

OBITUARY.**F. Lincoln Chandler.**

F. Lincoln Chandler of South Lancaster, Mass., died at the Insane Hospital, Worcester, Mass., on May 22, aged 47 years, of neuritis. "Link," as he was companionably known, succeeded to the florist business established by his father, G. F. Chandler, in the 40's, after the death of the latter two years ago. Three sisters are the only survivors and the business will be discontinued after Memorial Day.

NEWS NOTES.

Farmington, Conn.—Mrs. Keep has purchased the greenhouses and business of George D. Mason on Canal street.

Catonsville, Md.—Lawrence Kinder has sold his place and taken a position with Mrs. Mary Johnston, it is rumored.

Hackensack, N. J.—H. Kuhnert &

Son, florists, located in the Hamilton Building, suffered a considerable loss when that building was burned to the ground recently.

Cambridge, Mass.—Bert Connell, who has had charge of the Harvard Square floral business, has bought out Mr. Delay and will continue the business; also the store at Mt. Auburn street car station.

Flower Market Reports.

BOSTON The market four days before Memorial Day is badly congested with badly blown and unsalable flowers which the hot weather of the past 48 hours has forced into bloom. Much of it bears unmistakable signs of age and undoubtedly has spent more or less time in the cellar in a futile effort to make it hold over for the holiday demand. Anything cut or ready to be cut up to present time is put out of commission entirely. Among the debris are roses, carnations and tulips especially. Peonies are coming in strong from points south of here and will be a great help in the peculiar emergency which the florist has to face this year in his Memorial Day work, although the local supply will not be ready for several days yet. Reports from all sides indicate that, with both wholesalers and retailers, the amount of advance orders is larger than ever before.

On Monday, May 16, **BUFFALO** trade opened up bright, but only continued for a day. From Tuesday to Saturday the weather turned hot and an enormous supply of stock came in, especially roses and outdoor material, lilac, both pink and white, tulips of fine quality and narcissi, single and double, but everything had to be forced and prices are on decline. Saturday was looked as clean-up day, but threatening weather kept away the cemetery florists and consequently a good portion was carried over. Carnations came in more plentifully, peonies were to be had but with no demand, peas were an over-supply with no outlet, roses a flood and with a summer heat to contend with, the wholesalers looked everything but pleasant. Monday opened with a red hot day and stock coming in heavy. Trade inactive, though orders are coming in and a good general house cleaning is looked for by the end of week.

The opening days of **CHICAGO** the week ending May 22nd, were good ones and stock went lively but after this the market was dull, and the last of the week found the refrigerators too well filled. A rainy Monday beginning the new week did not tend to improve the situation. Flowers will not be of the best of quality on account of the hot weather followed by rain and there will be considerable stock to be placed on the market at cheap prices. At this writing, May 24th, the market is full and business slow. The weather is going to have much to do with the quantity of good stock, and the forecast is not favorable. Quite a difference of opinion prevails regarding carnations, some growers thinking the supply will be far short of the demand for good stock. Peonies are barely in sufficient supply for present needs, Gladioli are more plentiful and the beautiful red Frances King is king of the market this week. Among the miscellaneous stock the corn flower is very prominent. W. A. Reiman of Vincennes, Ind., is sending in some of the best peonies that are coming into the market.

Business is moving along **DETROIT** at a rapid gait with prices firm, even though supply is greatly enhanced in quantity

For the June Girls' Bouquet

Luxury and exclusiveness in Florists' Ribbons are a special feature of the P. M. business. For weddings and commencements we call special attention to the

Satin Taffetas

which we carry in many grades and patterns such as: 701, 697, orchid, Beauty, 697, 721, 639, etc., but the finest and most appropriate for the above is

Pattern 1805

	Price
Width No. 22.....	\$1.30
Width No. 40.....	1.60
Width No. 60.....	2.25
Width No. 80.....	2.65
Width No. 150.....	2.90

We are also strong on Patterns Killarney, American Beauty, Maryland and orchid and call particular attention to our

Chiffons

in various patterns. Send for complete catalogue.

as compared with a few weeks back. There is a good deal of complaint about Spanish iris which do not seem to bloom very evenly; some growers estimate only 70 per cent. of the bulbs bearing flowers.

Very little business is being done in the **NEW ORLEANS** stores at present. Gladioli and sweet peas are both good and plentiful and enjoy a fair demand. Roses and car-

nations have still to be carried in stock, but the demand for them is light. Nearly every householder has Easter lilies in bloom in his own yard, consequently the call for these at the stores is light. There are plenty of Cattleya Gaskelliana to be had and not many go to waste. The trade in cemetery bunches continues pretty nearly up to the mark.

Flower Market Reports

(Continued from page 831)

This market is in a NEW YORK state of congestion, consequent, in part, upon the sudden hot term, following a protracted period of cool weather. As to the quality of the material in sight not much can be said that is favorable. On some things which are in over-stock at present writing stiff prices are quoted for later delivery, but there is very little of the stock which is now ready that can be held back until it is needed. The peony is in the height of its glory and easily leads the procession as to quantity and quality. Stocks and lilies are also very fine.

Contrary to pre-
PHILADELPHIA vailing conditions for many weeks past, last week had a poor wind-up—consequent on a few warm days, and the influx of both greenhouse and outdoor stock. Much of both was rather soft and that accentuated the unfavorable situation. Carnations were probably the worst sufferers of all from the sudden change. Outside of this, the volume of business for the week was a fair average. That is, there was as much business as last year; but at lower prices. This, of course, is a sure index that production is more than keeping pace with consumption. And it would have been much worse if we had not been favored by Providence with cool weather during three-quarters of May. The American Beauty market held its own about as well as any one item, but we hear of several good-sized accumulations that were sold very cheap by Saturday. Richmonds and Liberties both showed up in good shape—the former especially. Good authorities claim that Richmonds have never before been seen on this market in such fine condition at this season of the year. Among the white roses there is nothing at present that can beat Kaiserin. Being treated as a H. P. gives this variety a big advantage in strong shoots and grand substance. Sweet peas came in in strong force; but held their own fairly well as to price. This good showing will be of short duration, however, as we hear of outdoor stock already, and another week or so will make these latter a big factor. Peonies are opening up fast and will be a strong factor for Memorial Day orders. The last few days have seen a big transformation in the forwardness of this crop. Locally (May 23), they are all coming with a rush. Orchids very good, demand rather slow. Principal offerings: Mossiae, Gaskelliana, Jamesianum. Lily of the valley market in excellent shape and no over-stock. Gardenias are very good, but for some reason the demand for same does not seem to be at all lively at present. Gladioli a good, strong feature—America in the Gandavensis and Blushing Bride and Peach Blossom in the miniature type.

The unusually cold WASHINGTON spell that has prevailed for about ten days was succeeded by several heated days. On the afternoon of the 24th of May a very severe rain and wind storm swept over Washington, doing a great deal of damage to trees, both large and small. Business is very sluggish, there being a small demand for anything but cheap grade of flowers. Peonies are over-plentiful, likewise carnations.

PHILADELPHIA NOTES.

The rose and peony show of the Pennsylvania Horticultural Society has been finally scheduled for Wednesday, June 1st, opening at 2 p. m.

George Craig, Pennock Bros., and M. C. Dunn had the principal floral pieces at the King Edward memorial services on the 20th at Saint Mark's. The floral offerings were not quite so lavish as on the occasion of the Victoria services, some nine years ago. Nevertheless, they were very well done, appropriate and in good taste.

Chas. Pappas, who succeeded N. B. Gachor at the Broad St. Station flower stand, about middle of last April, reports improved and increasing business right along. Mr. Pappas is an enterprising retailer and not afraid to carry good stock and plenty of it. That latter feature alone is a strong factor in the success of a business of this kind.

Commodore Westcott announces the date of the annual opening of the Waretown Rod and Gun Club on Barnegat Bay, as June 24th. The club house has been newly painted and renovated, and everything put in order for the send-off. The Commodore himself is in good health and ready to welcome his guests with all his old-time heartiness and simplicity. Gold and silver and fine linen and sport are good things, but where would their savor be without the Commodore—and the glorious and distinguished company he can gather around him to enjoy them?

Visitors: Ira G. Marvin, Wilkesbarre, Pa.; John Cook, Beverly, N. J.; De Forest Ludwig, Allegheny, Pa.

MORRIS COUNTY GARDENERS' AND FLORISTS' SOCIETY.

This society is hard at work on Fall Flower Show to be held in the Whippany River Club building, Morristown, N. J. This building has a capacity equal to Madison Square Garden, New York City, and a supreme effort is being made to fill it. If all the societies that have signified their willingness to show with us should come up, we will be able to do it.

A move is now on to have the seedsmen and nurserymen make trade exhibits, such as garden tools, seeds and bulbs, designs, etc., evergreens in tubs, bay trees, box, etc. Someone might say the place is not central enough, but when one takes into consideration that the Whippany River Club is composed of several hundred of the best buyers in the country, and that every member stands sponsor for the success of the show and promise to bring their friends from a distance, it will be seen that an effort on the part of the seed and nursery trades to show their goods ought to bring results. Twenty of the leading people of Morris county have accepted appointments as honorary vice-presidents, and over two hundred have signified a willingness to be chosen honorary members. All this indicates the feeling towards our society and towards floriculture and horticulture in general. These people have liberally put up money for prizes and now it is up to us to give them a Flower Show in return. The Whippany River Club has chosen from its membership D. Hunter McAlpin, Dr. Leslie D. Ward, and Mr. Otto H. Kahn as a Flower Show Committee, to co-operate with the Gardeners' and Florists' Committee. This has already proved of great advantage all around.

At the last regular meeting of the society the rose growers had it all to themselves. They arranged the rose section for the final schedule. Harold B. Vyse exhibited some well done specimens of *Saxifraga pyramidalis*, for which he was awarded cultural certificate. John E. Lager of Summit lectured before the society on June 8 on "Orchid Culture."

E. R.

NEWPORT HORTICULTURAL SOCIETY.

The regular meeting of this society which was held on the evening of May 24 was of more than usual interest on account of the Executive Committee's presenting its recommendations in connection with the Fall Exhibition. These recommendations include many changes that experience from other years had shown need for, so that the report was favorably received and adopted with few alterations. Chief among the changes is the limiting of space or number of samples in collections of vegetables and cut flower classes that used to be unlimited. This exhibition is to be held Sept. 17, 18 and 19, and it is very gratifying to see that there is a disposition on the part of the members to prepare to uphold the fame of the exhibitions of this society.

This meeting was made still more interesting by two fine specimens calceolaria plants in flower on the exhibition table. The larger one, which was of the well known Golden Gem variety was unusually well finished and was awarded the society's certificate of merit for superior culture. The other plant which was also well grown was the hybrid C. Stewartii, which has beautiful clear yellow flowers, similar in shade to the Golden Gem, but much larger. This was its first appearance before this society and it was awarded a first class certificate of merit. The exhibitors of both plants was James Bond, gardener for Mrs. H. M. Brooks.

Mr. Bond has at present a batch of the Stewartii variety which he rooted in February and which promised to be fine plants in full flower about the middle of June, and as other varieties of calceolarias may easily be brought into their prime about that time, why not have more of them about Memorial Day?

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTI- CULTURISTS.

Registration of Fern.

Public notice is hereby given that the American Rose & Plant Co. of Springfield, Ohio, offers for registration the Fern described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Raiser's Description.

A sport from *Nephrolepis Bostoniensis* that is a great improvement over that variety, being of the same habit, but of somewhat more vigorous growth. Fronds six to eight inches in width. The edges of each pinnae are decidedly ruffled in wave-like undulation that is very distinctive. As the fronds mature the undulations become more pronounced, giving the individual fronds and the plant as a whole a marked wavy effect. Does not run back, the type being fixed.

Name, "Nephrolepis Roosevelt."

As no objections have been filed, public notice is hereby given that the registration of the Violet, "Marie Elise," by Thomas DeVoy's Son of Poughkeepsie, New York, becomes complete.

H. B. DORNER,

May 19, 1910.

Secretary.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

HELP WANTED

WANTED—An experienced man for general greenhouse work, must be a sober and industrious man, or do not apply. State lowest wages for the summer, also where last employed. Address, Box 2925, Boston, Mass.

WANTED—A man of experience as a seedsman. A technical and practical knowledge are required, and good administrative ability is an absolute essential. Applications with recommendation of late employer may be addressed to T. J., care HORTICULTURE, Boston, Mass.

WANTED—Young man who thoroughly understands Orchids, and with experience with Sweet Peas, Carnations and Garden Stuff. Write giving full particulars as to experience to the Altimo Culture Co., Canfield, Ohio.

WANTED—An experienced man to work in greenhouses where a large part of the product is carnations. Will pay good wages to the right man. Give references. Address Box 1092, Lowell, Mass.

WANTED—Experienced grower of hot-house fruit and plants. Apply with testimonials, HORTICULTURE OFFICE, 11 Hamilton Place, Boston, Mass.

WANTED—At once, a young man for general greenhouse work; must be a good willing worker; state wages expected. P. M. Olm, Bath, Maine.

WANTED—An assistant foreman in rose and carnation houses \$70.00 per month. Y. Y., care HORTICULTURE.

SITUATIONS WANTED

SITUATION WANTED—By rose grower of long experience in commercial line. Capable of taking charge of a fair-sized place. Excellent references from good establishments. Understand grafting and propagating, also carnations, chrysanthemums and all work connected with management of up-to-date place. J. E. S., care HORTICULTURE.

WANTED—Position as a gardener and general superintendent on estate. Seven years in last position. Highest references. W. B. Jackson, care HORTICULTURE, 11 Hamilton Place, Boston.

FOR SALE

Opportunity of a Lifetime

FOR SALE—A well established money-making up-to-date wholesale commission company in Denver, Colo., dealing in Cut-flowers and Florists' Supplies. No competition. Only small amount of cash required.

Address communications to N. A. BENSON, 1360 So. Sherman Street, Denver, Colo.

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSHESKY BROTHERS, INC., 50 Montrose Ave., Brooklyn, N. Y.

FOR RENT

FOR RENT—27,000 ft. of glass in good condition and eight acres of land near Pittsburgh, Pa. Write at once if you mean business. Address C. K., care HORTICULTURE, Boston, Mass.

WHEN TO STOP ADVERTISING.

When buyers forget to forget—when competition ceases to compete; when every actual and prospective customer has been convinced that your product is the best of its kind and nothing better can be produced, then, and only then, will it be safe to get along without advertising.—Baker's Helper.

Until that time comes, HORTICULTURE can take care of your interests. If you want to sell to the best buyers in any branch of horticultural industry HORTICULTURE is unquestionably in the front rank as an advertising medium. Following are some fresh proofs:

"ALL SOLD OUT."

Horticulture Publishing Company, Boston, Mass.

Please take out our advertisement of roses. We are all sold out.

Landscape Gardening

PROF. CRAIG

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Batchelor, of Cornell University.

Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

250 page catalogue free. Write to-day.

The Home Correspondence School

Dept. H, Springfield, Mass.

BRUSSELS INTERNATIONAL EXHIBITION.

In connection with this great exhibition there have been arranged by the organizing committee a permanent horticultural exhibition and three temporary ones. The first of the latter was held on April 30 to May 3, in one of the large buildings in the exhibition grounds. The jury consisted of about 90 gentlemen of all nationalities; M. A. Truffaut of Versailles being President General, with W. Watson of Kew and A. de Smet as Vice-Presidents.

Although a very imposing schedule had been provided containing upwards of 600 classes, many were not filled, and the exhibitors numbered in all about 120. Many of those, of course, showed in a large number of classes, and although the exhibition was smaller in extent than we expected, it was bright and very well arranged in its general aspect.

Some of the miscellaneous groups were extensive and imposing. Tables were used sparingly, most of the exhibits being placed on the ground level with turf edgings intersected with wide winding gravel paths. We can only give a brief, superficial survey of the show, owing to the variety of the exhibits. One of the most effective was a semi-circular group of hydrangeas, staged by M. de Bievre, in which a succession of semi-circular rows of schizanthus, cinerarias of various colors, Begonia Gloire de Lorraine and celsia were conspicuous. Messrs. Vilmorin, Andrieux & Co. had a bright bed of large dimensions consisting of cinerarias in shaped panels filled in with giant daisies and an edging of golden pyrethrum.

Specially striking was F. Shepman's immense group of lilacs about 90 feet in length, with a rounding front set off here and there with just a few clumps of hydrangeas, begonias, etc. Several large exhibits of greenhouse flowering plants came from Firmin de Smet.

Several handsome groups of palms, ferns and ornamental foliage plants were sent by local growers.

Vriesias were shown by Leon Pollman and A. Dalliere, large and varied collections. We noted V. Rex, V. Pollmani, V. flammea, V. rex nigra, and many more.

Carnations were good and in great quantity. The British exhibits were unquestionably the best, those from the French growers being a long way behind in culture. An imposing lot came from Mr. Engleman of Saffron Walden, Eng. A few of the varieties were Carola, Helen M. Gould, Superior, Mrs. T. W. Lawson, Beacon, Robt. Craig, Red Lawson, Winsor, Sarah Hill, Afterglow, Mrs. H. Bennett, and other well known show varieties.

Stuart Low & Co. had a good lot, surprisingly many of those already mentioned, also Princess of Wales, Brittannia, White Perfection, Rival, Royal Purple, etc. The Societe Anonyme Horticole Yproise staged carnations, mostly English and American, well grown and artistically staged by the Director M. Bouckennooghe. L. Ferard also exhibited in the same section.

Azaleas from a number of well known growers made a brilliant display and occupied a number of large spaces which made some fine sheets

of color at intervals. Calceolarias, cinerarias, zonals, clivias, rhododendrons, gloxinias and other bright displays played an important part in the show and we must not omit a special mention of M. Adner's hybrid gerberas, a prettily arranged little collection of various colors set up with the aid of Asparagus plumosus. Anthuriums were sent from several well known cultivators. We note specially Ch. Dietrich's lot containing Roi Albert I, Abel Chatenay, Expansion Belge, M. A. A. Peeters, Sec. Ch. Pynaert, Baron Lahuze, Jules de Cock, etc. Another lot came from the Societe Horticole Gantoise, in which Baron Claeys, Perfection, M. J. Vacherot, Roseum Longiflorum, Leon Grosjean were fine examples. The same exhibitors had another fine group in which amaryllis figured largely; with the addition of other fine foliage plants.

Of orchids there were good representative exhibits. There were some excellent displays of amaryllis, the well known English firm, Ker & Son, of Liverpool, showing a truly representative collection. Louis Van Houtte also had a good lot arranged with asparagus.

Floral art, represented by dinner table decorations, vases, baskets, etc., was well exemplified by several exhibitors. Among other interesting exhibits was a Japanese garden set up in quite a realistic style.

The remaining temporary horticultural shows will be held as follows, 24th to 27th September for fruit, 29th October to 2nd November chrysanthemums and autumn flowers.

C. HARMAN PAYNE.

CHICAGO NOTES.

Trade and Miscellaneous Notes.

There is a decided shortage of Boston ferns in the smaller sizes.

Frank Oechslein predicts a shortage in bedding plant stock. He contemplates building again soon.

The Rock Island R. R. is turning its attention to making its grounds around the stations artistic all along the line. Trees and shrubbery will be used profusely.

The usual blue Monday prevailed when the rain came down, following its usual custom this month. Only the bravest could smile when they thought of Memorial Day only one week off.

Hail stones from one to two inches in diameter fell in the West Side district on Saturday. They were not of the usual round construction, but rather a mass of ice. No damage is reported.

News has been received here that E. G. Hill, of Richmond, Ind., will manage the R. T. Graves place in addition to his own. Mr. Graves is the introducer of May Day carnation and retires from business on account of the illness of Mrs. Graves.

Chas. F. Rohr of Naperville, Ill., says that aster plants that were in the field during the big storm a month ago are coming out in fairly good shape, rather better, in fact, than those planted since. The proportion which will have to be replanted is not greater than the usual average.

The weather has not yet ceased its pranks. Sunday the thermometer reg-

istered 86 degrees at 2 p. m., and within ten minutes fell twelve degrees. The change also was quickly made from sunshine to rain and Monday was about as cold and disagreeable a day as wind and rain could make it.

Leesley Bros. report the frost of last week to have been of more injury to the young onions than the earlier and more severe freeze, because the plants were further developed. This firm has sixty acres of onions for sets and think the long cold rains are doing the crop a serious injury.

At Kennicott Bros.' where are handled more peonies than at any other one place in Chicago, Mr. Peiser says that at the present time there are coming in peonies which are such in name only and others of as fine quality as any he ever had, and orders are booked now for 20 per cent more than they have in storage.

The usual number of June weddings are giving the retailers a chance to do some decorating. A. Lange is the lucky florist on June 1st, when the auditorium parlors will be decorated for a pink and white wedding. The electric lights on the sidewalk will be surrounded with peonies, and a large canopy of smilax studded with electric lights will occupy one end. Austrian vases of lily of the valley and roses are to be used on the twelve tables.

Peony growers close to Chicago are finding their first opinion as to the damage done by the frost more correct than the later estimates. The snow seemed to have taken out the frost so gradually that the buds appeared uninjured and great hope was entertained. The buds began to grow again but soon became soft and now that they are opening the black ring can be plainly seen in them. One of the largest growers at Elmhurst said last week that out of a prospective 15,000 dozen he would not cut more than 100 dozen. Other growers seem to have fared a little better, but few think at this time that the crop in general will exceed one-tenth of its normal size.

Personal.

Frank Gabler is the latest addition to the force at Kennicott's.

Philip Eichling of Harry Rowe's, has been ill and out of the store.

F. A. Johnson, of the A. L. Randall Co., is home from a Southern trip.

E. B. Washburn and wife are expected home from California on Friday.

A. F. Longren and bride are expected home in time for Memorial Day.

Miss Frances Brundage, of E. H. Hunt's, spends Memorial Day in Burlington, Ia.

Fred Munzing, of Frank Oechslein's, sails on the 6th of June for England, where he will pass the summer.

The Sunday Record-Herald contains an account of the remarkable work being done by little Daphne Hilmers, daughter of H. Hilmers, florist, 3915 Cottage Grove avenue, at Berlin, where she is studying music.

Frank Church was struck by an automobile and severely injured last Wednesday. The accident occurred on Michigan avenue near Strail & Hahn's new store. Mr. Strail, who saw that

the injury was a serious one, had the veteran florist removed to a hospital.

Chas. Wiffin, sweet pea specialist of Desplaines, has just returned from a western trip. His son Arthur went out with him and took out a homestead claim of 160 acres in S. Dakota. Mr. Wiffin was so pleased with the West that he may make it his home also some day.

Visitors: Wm. Breitmeyer, Mount Clemens, Mich.; A. C. Brown, Springfield, Ill.; Chas. F. Rohr, Naperville, Ill.; John Bertermann, Indianapolis, Ind.; B. Eldredge, Belvedere, Ill.; Joe Smeley, Aurora, Ill.; F. A. Thompson, of Detroit Nicotine Co., Detroit, Mich.

Strokum Stops Caterpillars Anyone Can Put It On

Simply band it around your trees. No need to cut bark down smooth before applying, as Strokum fills up the bark chinks, and the caterpillars or tussock moths can't crawl under it, and won't crawl over it.

The second crop will soon be going up the trunks, now is the time to put on Strokum. It lasts an entire season, but does not stick to the bark all winter as do the unsightly smeared-on tar preparations.

Does not dry up as does fly paper. Is not carried off by the birds as is cotton.

Strokum is a purely vegetable product that we guarantee to be perfectly harmless.

Send \$3.00 at once for a sample package of 15 pounds, which is enough to band 15 trees, 3 feet around. Delivered free anywhere East of the Mississippi. 50c. extra West of it.

Let us mail you our illustrated booklet.

George Stratford Oakum Co.

164 Cornelison Avenue. JERSEY CITY, N. J.

Immediately Available Plant Food EVERGREEN BRAND FLOWER FERTILIZER

It permanently enriches the soil. It prevents the onslaught of plant disease or insect pests.

Can be used at any time during the growing season.

Put up in 12 pound cans, price \$2.00

Co., one house, 28 x 56 feet, King Construction Co. material.

Watertown, Mass.—J. W. Stone, vegetable forcing house, 43 x 230 and one 46 x 100 feet; A. T. Stearns Lumber Co. construction.

NEWS NOTES.

Halifax, Mass.—J. L. Parker's greenhouse at his summer place, Monoponsett Lake, was burned recently.

Florence, S. C.—Mr. De Witt House informs us that owing to ill health he will not be able to build this season as was recently reported.

Monroe, Mich.—The Greening Nursery Co., 304 Monroe street, contemplates the construction of cement cellars, one about 400 feet long and one about 100 feet.

Maywood, Ill.—Paul E. Weiss of Milwaukee has bought two acres of land adjoining W. H. Amling's property and intends to build a number of greenhouses in the near future.

Albany, N. Y.—It was reported recently that Edw. S. Yauch was to build a greenhouse. Mr. Yauch now informs us that this report is erroneous, that for the present he will do no building.

Spokane, Wash.—The Rose Floral Co., which was recently incorporated, will have in its new greenhouses one full acre under glass and 40 acres of flower beds and shrubbery outside. They have just purchased a large tract of land near the northwest limits of the city. Construction of the greenhouses will begin immediately.

CATALOGUES RECEIVED.

H. Austin Co., Felton, Del.—Wholesale Price List of Vegetable Plants and Seeds, Season of 1910.

King Construction Company, North Tonawanda, N. Y., Bulletin No. 34, issued May 1, 1910, tells all about the King Semi Iron Frame Greenhouse Construction. Diagrams of the various types and widths of houses constructed by this company are given together with drawings and descriptions of the various sash bars, benches, ventilators, etc., which are peculiar to these houses.

That Hitchings Corrugated

It's the boiler with the hump, but it's the hump that makes the small coal bills. If it wasn't for the hump, it wouldn't have its long fire travel, and the longer the fire travel, the more economical the boiler.

The corrugation on the fire box increases the fire surface 50 per. cent., and the greater the fire surface, the more heat absorbed. Send for circular.

More Flowers in the Garden

The taste of the public in the furnishing of the garden and pleasure grounds, and the effects at which we aim in the present day are the beauty of the flowers and the manner in which they are employed. Carpet beds in more or less ornamental patterns were for many years running considered the acme of bedding out, and such styles of flower gardening are even now to be found in famous gardens in this and other lands. But I will repress the scornful epithets applied to these by the moderns. Then came the taste for angular beds, oval and round beds, cut out in the turf and provided with a central mass of one kind or variety of plant with one or several kinds of edging plants. This kind of planting is still the reigning mode, and the gardener endeavors by means of his various edgings to impart the greatest possible amount of variety to the designs by means of the sharpest contrasts; and in the middle stands a yucca, a dracæna or a phoenix. But another mode of planting is come into vogue for the flower bed—started by a Dutch lady, Mrs. deLow, who advises the planting in harmonious tones of one color. That which she advocates in this style is hardly better than that she desires to replace. She makes use of kidney or bladder shaped beds instead of the geometrical shapes, and forms these without any kind of order on the lawn or grass plot.

Another kind of arrangement may be found in the "color" garden at Darmstadt, and this is a surprise to all who have observed it. This, however, will not have, any more than carpet bedding, an enduring popularity owing to the natural beauty of the individual plants being lost in making the combinations of colors, fine as these are. The mixed flower and foliage bed now favored by many is in reality a going back to the ancient flower border with its great simplicity. Such beds possess a certain charm and pass very well in the ordinary country garden, but they are not suited to public gardens, being too variegated in effect, however well cared for.

After all it appears probable that in the gardens of the future a far greater number of hardy perennials and biennials will find their employment in the foreground of flowering and evergreen shrubs, naturally arranged as borders and groups. Good examples of this method are found in Regents, Battersea and Kensington Gardens. The cry is always for more flowering plants, and these must be planted so that each individual shall display its natural beauty in color, as in habit of growth.

Frederick Moore

British Horticulture

SOME GARDEN LEAVES

"I have always believed that the happiness of mankind may be increased by encouraging that love of a garden,—that love of the beautiful which is innate in us all." Thus wrote the cheery Dean Hole, who did more than anyone else to popularize gardening, and whose informative, gossipy books have gained a world-wide reputation. The theory of promoting happiness by a love of gardening was carried into practise. The Dean's best known work, "Book About Roses," has become an English classic, and has been translated into

nearly every European tongue. British gardening is extremely fortunate in the wealth of literature which has been bestowed upon it by devoted enthusiasts, who have found the hobby "the purest of human pleasures, the greatest refreshment to the spirit of man." Rose literature appears to have an irresistible fascination for clerical writers. The Rev. J. H. Pemberton has made a valuable contribution to this department. Skilled as a grower and prize winner at the leading shows, Mr. Pemberton is eminently qualified to act as an historian of "the Queen of Flowers." His book, "Roses: their history, development, and cultivation," is well fitted to take its place with the older work of the illustrious Dean of Rochester. The volume is a reliable guide to all phases of rose culture.

A USEFUL SELECTION

"Roses for Amateurs" is a well written book of invaluable instruction from the pen of the late Rev. H. D'Ombraïn, who was for many years Secretary to the National Rose Society; the work has lately reached its third edition. Another manual on the same subject has been written by the Rev. A. Foster Melliard, M. A. Wm. Paul, a leading trade exhibitor, has incorporated his many years' experience in an elaborately illustrated work, "The Rose Garden."

Coming to the wide range of books dealing generally with horticultural subjects, one need not be an expert to gain many delightful hours from a perusal of Alfred Austin's "The Garden that I Love." Charming descriptions enhance an appreciation of the garden's illimitable interests, whilst the townsman cannot fail to be infected with a yearning for a wholesome communion with "Mother Nature." Even if one's garden is the restricted area of a villa plot, a wider purview is obtained from the closely observed changes recorded in Rider Haggard's "A Gardener's Year," which transports one to the entrancing and ever-changing attractions of cut-door life. Word pictures of old world gardens make one of Eden Phillpotts's later works a pleasant companion for the country lover. "Pot-Pourri from a Surrey Garden," Mrs. E. W. Earle's clever work, has caused many zealous admirers to take up a horticultural hobby.

ITEMS OF INTEREST

The death of King Edward brought a large amount of business to the florists. The day before the funeral over 6,000 wreaths had been received, many of these being magnificent specimens of the florists' art.—A well arranged model of a French garden has been shown at Warley Park, Birmingham, by Messrs. Sutton & Sons. The garden covers some 1500 ft. and demonstrates the latest methods of raising crops by the intensive system.—The National Dahlia Society is conducting a trial of single dahlias in connection with Messrs. J. Cheal & Sons.—A movement for the formation of a trades union of gardeners in Scotland has been set on foot.—The Rev. E. Arkwright, of Telemly, Algiers, announces that he has succeeded in introducing the Spencer wave into the Telemly strain of winter-flowering sweet peas.—Several British firms exhibited at a flower show recently held at the Brussels International Exhibition.—The death has recently taken place of Mr. Wilson Ker, a well known and esteemed North Country horticulturist.

sey was the star performer in this dazzling spectacle and her gardening and floral fraternity have the right to feel proud and elated over the splendid demonstration made by the representative growers of their state. Massachusetts shares with New Jersey the glory and honor of this occasion which was made possible only through the equipment, enterprise and munificence of her honored Horticultural Society, and the public in its generous attendance and enthusiasm has certainly shown a proper appreciation of this notable and praiseworthy exploit.

An addition
to the family

Another national society has been auspiciously launched. HORTICULTURE wishes all success to the American Gladiolus Society and we have no doubt it has before it a useful career. Wise judgment is apparent in the personality and circumstances of the officers chosen at the initial meeting. Among them are men already well and widely known in the horticultural world, whose experience and ardor afford assurance that the work undertaken by the young organization will be of the sort that will bear good fruit. In another way the new society has started right—that is, by setting the time and place for their next meeting, co-incident with the Society of American Florists' Convention. The advantage will be shared by both organizations. "Meet me at Rochester" is a motto which any society may safely inscribe on its banner.

To extend
the flowering
period

In the advancement of the orchid towards a position of importance in the commercial flower market which has been going on for a number of years, one of the most discouraging conditions confronting the worker has been the uncertain character of the supply. No sooner did the dealer get an avenue of demand opened up than the supply came to an end—sometimes so abruptly as to cause serious embarrassment through inability to fulfil agreements made in good faith. This drawback has been overcome, in a measure, by the increasing number of sorts which are gradually finding their place among the standard commercial favorites and which, with their varying time of flowering, help to fill in the barren places, but even now with the vastly improved service there is much exasperating irregularity in the supply, taken the season through. It is interesting to note and gratifying to find a reasonable probability in the practical observations of Mr. Orpet, as presented in our Special Orchid Number, in which he sets forth the interesting fact that varieties home-raised by cross-fertilization show such great variability in time of flowering that the progeny from two kinds, of fixed blooming period, will be in bloom every week during the year. Mr. Orpet, with apparent good reason, pronounces this to be the greatest triumph of the operator. It suggests the eventual elimination of what has been one of the most perplexing obstacles in the path of those seeking to popularize the orchid as a conservatory adornment or for cut flower purposes.

A happy combination
The orchid show at Boston which closed on Monday night, May 30, passes into history as a colossal success, unequalled by any previous floral event in this country in the boldness of its conception and the variety, beauty and richness of the displays. New Jer-

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Bench Soil.

Turfy soil that has been thrown over once or twice and is easily breakable but not in a fine or powdery state will suit nearly all crops cultivated on benches under glass. Don't neglect this all-important requisite of your business until the actual time arrives when you must have it. It is well to have it ready as soon as possible, mixing and adding manure—more or less as the case may require. It would be better to retard planting for two weeks than attempt to use the soil in an unfit condition. Good soil, well mixed and uniform in character is the very foundation that makes success in all crops that florists have to grow.

Celestial Peppers.

These plants are much in favor for holiday trade. All solanums are badly checked by being lifted. Those grown under continuous pot-culture will do finely in a frame during the summer. They should be repotted as they may need it until the latter part of August when they should be in their selling size, either 6 inch or 7 inch. Neglect in the matter of timely repotting when they are growing is sure to be of great injury. Solanums should never be allowed to become thoroughly pot-bound before full bearing size has been attained, if you want first class plants. The pots should be plunged in order to guard against frequent and severe drying out. During the hottest hours of the day a little shade is good for them. Some prefer to grow them in the open ground during the summer and then lift them, but I find they lose much of the fine growth in the transfer from the field to the pot. A fine lot of these plants is ready money for next winter.

Laelias.

When well grown, laelias always find a ready sale in most of our large cities. Many of these orchids thrive best in suspended baskets or on blocks of hard wood. As to compost they like a material composed of clean peat, live sphagnum and some charcoal. As the season advances and the temperature gets higher they will have to be given more air, and consequently more frequent damping of the floors and benches to provide the moisture during the hot dry weather, which will insure good growth for next winter's flowering. As the new growth matures the quantity of water must be lessened, but syringing overhead in bright weather will be found very beneficial. Laelias such as *anceps*, *albida*, *autumnalis*, etc., when in spike, can be held back with safety by placing them in a temperature of about 50 degrees, and then bringing them forward as desired by shifting into a temperature of from 60 to 65 degrees. By this means a longer season of bloom can be kept up. The plants must be carefully looked over for white scale.

Planting Out Young Roses.

Progressive growers now favor earlier planting because they can produce more blooms per plant during the season, and of a higher grade, than from later planted stock. The houses should have a thorough cleaning after being emptied as cleanliness is essential to health of the young plants. Select and plant only the very best stock, discarding any that appear sickly. See that the plants are firmly planted with-

out damaging the ball. When the bench has been planted water carefully around each plant without soaking the whole bench. Careful watering is of the greatest importance at all stages of their growth. When evaporation is rapid because of a dry atmosphere the plants can hardly be over-watered, but watering must be done very carefully if the atmosphere is moist. Much of the success or failure of this crop can be attributed to care taken of young roses. Healthy, stocky growth can only be had by timely cultivation, ventilating and watering. When time can be spared the plants should be staked and tied so that the light and air can have free access among them.

Smilax.

From now on up to the middle of July smilax can be planted with success, but I prefer as early as possible. Without question it is still the most useful as well as the most easily grown of decorative greens. It may be grown in either solid beds or raised benches, the former giving the most satisfactory results. Vigorous plants from 3 to 4-inch pots make the best size for planting out. Allow at least from 12 to 15 inches between the rows and from 9 to 12 inches between the plants. You will need anywhere from 8 to 10 feet of headroom. After they are planted Silkaline strings should be run up for the young plants to twine on. The soil should be composed of two parts of strong fibrous loam to one of cow manure. Syringe once a day to prevent red spider from securing a foothold.

Stock Plants.

Plants that are needed for future increase of stock will now need the fullest attention. Some will be improved as bearers of cuttings for propagation by a judicious pinching or cutting back in order to make a sturdy growth during the summer, which will give abundant crop of strong cuttings. Plants such as *abutilons*, *begonias*, *daisies*, *geraniums*, *fuchsias*, *lemon verbenas*, *lantanas* and many others will with ordinary care and constant indoor culture produce cuttings much to be preferred to outdoor-grown stock. See that the different varieties are not allowed to intermingle, thus causing a mix-up, a source of considerable annoyance every spring.

JOHN J. M. FARRELL.

Mr. Farrell's next notes will be on the following: *Asparagus plumosus*, *Chrysanthemums* For Cut Bloom, *Begonias*, *Draenas*, *Hydrangeas*, *Solanum capscas*.

BALTIMORE NOTES.

Park Management.

There is a ripple of excitement in our Park Board. Citizens have protested the manner of trimming trees in parks, and the general neglect prominently observable in the parks. Work commenced over two years ago is in a chaotic state seemingly abandoned. Mr. Manning, Superintendent of the Parks, has been put on the defensive by sharp letters in the press criticising existing methods. One park official has made charges which a member of city council has taken up and presented to the Park Board, and in consequence the Park Board are now "investigating themselves." The Park Board of Baltimore are not appointed on account of anything they know about parks, trees, landscape gardening, the floral kingdom or anything of that nature; but just because

they are good prominent citizens. If a civil service examination was required the Board could not tell a dandelion from a daisy except they know one should be yellow; nor an oak from a chestnut tree—yet they pose as experts and do not hesitate to put up a bluff against the knowledge of men who have served a score or more of years and whose work proclaims their practical knowledge. Shoemakers and laboring men after a few months' work as laborers in the parks were promoted to be superintendents. The two most proficient and recognized experts connected with the parks, the Board is making strenuous efforts to get rid of. Knowledge regarding park work, floriculture, etc., is not required.

Club Doings.

The Gardeners' and Florists' Club at its last meeting gave a very interesting entertainment. The club concludes "Mothers' Day" is something that should be encouraged, but that the white carnation should be worn for departed mothers, and bright colored ones for the living mothers. The club donated a lot of plants for the Endowment Hospital patients. Mr. Richard Vincent, Jr., who has been abroad, wrote some very interesting letters to a member who read them to the club. One describing a 400-acre bulb farm was of unusual interest.

The Flower Market.

This week the flower market is overstocked with carnations, peonies and other seasonable blooms. Wet weather has also lessened the general excellence.

OBITUARY.

Mrs. E. A. Riehl.

Mrs. E. A. Riehl, wife of E. A. Riehl of Evergreen Heights, Alton, Ill., died May 20th, aged about 70 years. She is survived by a husband, two sons and a daughter.

William E. Kelley.

Wm. E. Kelley, former president of the Horticultural Society of Chicago, died at his summer home at Oconomowoc, Wis., May 30, after an illness of a year. A special train left Chicago bearing his friends and business associates to Oconomowoc May 31st, and they will accompany his remains to Chicago, where interment will take place at Graceland. The Horticultural Society of Chicago sent a large wreath of orchids and asparagus.

Jason Sexton.

Jason Sexton died suddenly, aged 76, on Memorial Day while making a patriotic speech at North Wales, Pa. He had already joined in a G. A. R. parade and made a speech at Lonsdale. He was not only an agriculturist of note in the great farm of the late William M. Singerly, but was closely in touch with horticulture in the institute work of the state—especially in connection with Edwin Lonsdale's good work in that direction during the last twenty years. He made many good addresses, which were always characterized by breadth of view and a progressive spirit. Also was a member of the state legislature and of the state agricultural department. He was a fine, big, broad man in every department of human endeavor near the soil—and that is the ultimate measure of all men.

G. C. W.

THE GREAT ORCHID SHOW

Supplementary Report

The main facts concerning this memorable event have already been pretty well covered in our issue last week, HORTICULTURE'S advantage in location giving this paper the distinction of being the only horticultural journal giving any account of the show in the issue of last week.

We add a few more observations on the various displays as they impressed us but feel sure that our readers will get a better idea from the illustrations which we are now enabled to present, than from any words of ours. The full list of awards also appears herewith. Read in connection with last week's account, the following notes complete our report on this notable occasion in American floriculture.

The Roehrs *Cattleya gigas* which won the gold medal as the best specimen orchid in the hall, bore 250 flowers and made a magnificent show in itself. *C. Mossiae Reineckiana* var. Mrs. Julius Roehrs, was a beauty. This and practically every other unique plant in the exhibition was marked "sold" early in the game. *C. Dessel-dorfi Undine* well deserved the gold medal which it won. Messrs. Roehrs won in all five gold, three silver and several bronze medals.

Most noticeable throughout most of the orchid groups was the large number of *Odontoglossums* of the *vexillaria* and *Pescatorei* types, of unusual vigor and finish, showing that this lovely genus has no longer any terrors for the culturist and that within a short time we may look for it to take its place with the *cattleya*, *oncidium* and *den-drobium* as a standard commercial florists' flower.

Of the large groups one was impressed variously as to the special points of excellence. The massing of colors in the Roebing display was very effectively done. The Roehrs group was unprecedentedly rich in new, rare and striking species and hybrids and very fine taste was displayed in the

A SECTION OF LAGER & HURRELL'S DISPLAY.

THE SARGENT AZALEAS AS SEEN FROM THE LOGGIA.

grouping. The *odontoglossums* were simply superb. The photograph of a section of the Lager & Hurrell exhibit tells better than words can the delicate gracefulness of the arrangement put up by these gentlemen. W. A. Manda found plenty of admirers for the unique effects he produced in his grouping with mirror accessories. J. T. Butterworth astonished everyone with his fine *Cattleyas* and *Miltonias*. J. T. B. is a wizard in orchid culture. *Odontoglossum Rolfei* in the Walter Hunnewell group was a gem of the first water. M. J. Pope's *Oncidium sphacelatum* was as well-flowered as it was huge.

Among the particularly interesting items may be mentioned the six-year-old Cedars of Lebanon, raised at the Arnold Arboretum from seed collected in the most northern and coldest region inhabited by this historic species. The plants have gone through six winters without any protection and their hardiness in the vicinity of Boston seems assured. C. W. Brownell from Walden, N. Y., found many interested

H. BAYERSDORFER & CO.,
1129 Arch Street, Philadelphia, Pa.

growers ready to examine his samples of osmunda fibre for orchid potting material. This he showed in natural and cleaned condition.

W. A. Manda's sterile form of *Poly-podium aureum glaucum* was one of the most impressive things among the novelties. He also had an unidentified tree fern from Africa with noble frond development and a new juniper from the snow-clad mountains of Africa, which, should it prove hardy, will be a great acquisition. The latter was the winner of the gold medal.

I. S. Hendrickson from the J. L. Childs establishment, showed pardonable pride in the new variety of *Gladiolus Childsii*, which has been named after himself. It is a very striking flower.

List of Awards.

Display of Orchid plants in bloom, arranged for effect, embracing at least 20 genera: 1st, Julius Roehrs Co., gold medal and \$1000; 2d, C. G. Roebeling, silver medal and \$500; 3d, Lager & Hurrell, bronze medal and \$250. Display of Orchid plants in bloom, arranged for effect, embracing at least 10 genera: 1st, E. B. Dane; 2d, Walter Hunnewell. Best recently introduced Orchid plant not previously exhibited in the United States: Lager & Hurrell, white *Cattleya gigas*, gold medal. Best new seedling Orchid plant not previously exhibited in the United States: Julius Roehrs Co., *Cattleya Deesseldorffii*, Undine, gold medal. Largest and best display of cut Orchid blooms arranged with ferns or other foliage: 1st, Joseph Manda, gold medal and \$100; 2d, W. A. Manda, silver medal and \$50. Collection of cut Orchids of new varieties not before exhibited in the United States: W. A. Manda, gold medal. Group of flowering and foliage stove or greenhouse plants arranged for effect: 1st, Julius Roehrs Co., gold medal and \$100; 2d, Edward MacMuklin, silver medal and \$50. Best species of stove or greenhouse plant in bloom not previously exhibited in the United States: Thomas Roland, gold medal. Best species of com-

ferous plant, not yet disseminated, likely to be hardy in Massachusetts: W. A. Manda, *Juniperus* species, gold medal. Six Orchid plants, distinct genera: 1st, Julius Roehrs Co., silver medal and \$50; 2d, Mrs. B. B. Tuttle (M. J. Pope, gard.), bronze medal and \$15. Three Orchid plants, distinct genera: 1st, W. A. Manda; 2d, J. T. Butterworth. Three *Cattleyas*, distinct species: 1st, W. A. Manda. Specimen *Cattleya*, any species: 1st, J. T. Butterworth, C. Mossiae *Reineckiana* silver medal; 2d, the same for C. Mossiae, Mrs. Butterworth, bronze medal. Specimen *Cymbidium*: 1st, Weld Garden, silver medal; 2d, W. A. Manda, bronze medal. Three

Cypripediums, distinct species: 1st, Julius Roehrs Co., Specimen *Cypripedium*: 1st, Dr. C. G. Weld, silver medal. Specimen *Dendrobium*: 1st, Weld Garden, silver medal; 2d, Julius Roehrs Co., bronze medal. Six *Miltonias*: 1st, Walter Hunnewell, silver medal and \$25; 2d, J. T. Butterworth bronze medal and \$15. Specimen *Miltonia*: 1st, J. T. Butterworth, silver medal; 2d, Walter Hunnewell, bronze medal. Six *Odontoglossums*, not less than three species: 1st, Julius Roehrs Co., silver medal and \$25. Specimen *Odontoglossum*: 1st, Walter Hunnewell, silver medal; 2d, J. T. Butterworth, bronze medal. Specimen *Oncidium*: 1st, Mrs. B. B. Tuttle,

THE ROEBLING GROUP. WINNER OF SECOND PRIZE

AT AUCTION

Every Tuesday and Friday at Noon

PHILADELPHIA MAIN LINE FLOWER SHOW.

The first exhibition of the Gardeners' Club and the Weeders' Club, combined, was held at the Merion Cricket Club, Haverford, Pa., on Saturday May 28th, and proved a great success. These clubs are composed entirely of ladies

of select social standing, and all the exhibits were grown by them without the assistance of a skilled gardener. There were 65 exhibitors, the exhibits being divided into 53 classes, all for outdoor-grown flowers. The largest exhibits were of peonies, iris, dianthus, delphiniums, and collections of perennials. The show was very largely attended, society turning out in large numbers. The proceeds go towards providing a teacher in Horticulture, for the public schools in Lower Merion. These ladies' clubs are doing an excellent work, creating great enthusiasm and, from this small start, it is anticipated a new Horticultural Society will be formed, several prominent gentlemen already agreeing to put up a building. Two large pieces of ground have been donated for the purpose of teaching the children of the schools how to grow plants and flowers.

THE NEW ENGLAND NURSERIES, Inc.
BEDFORD, MASS.

Oncidium varicosum Rogersii

BODDINGTON'S TYPE

We are expecting an importation to arrive at an early date. We have imported this variety for many years from an experienced collector and it has proved all we claim for it both as to size of flowers and intense coloring.

This Orchid is one of the most popular and free-flowering types of the Oncidium family. Our past importations have come fully up to standard. *Oncidium varicosum Rogersii* throws 3-foot stems, bearing as many as 170 blossoms of an intensely rich golden yellow, 2 inches and over in diameter, and can be successfully grown either on blocks of wood, in pots or in baskets, and flowers in November and December in a night temperature of 55 to 60 degrees.

\$1.25 each, \$12 per doz., \$100 per 100; selected plants \$1.50, \$2, \$3, and \$5 each according to size.

ARTHUR T. BODDINGTON

TARRYTOWN HORTICULTURAL SOCIETY.

The regular monthly meeting of the Tarrytown (N. Y.) Horticultural Society was held in its rooms on Friday evening, May 27th, 1910, a good number of members being present. The monthly prize, donated by Wm. Scott, for twelve vases of hardy outdoor flowers was won by Robert Angus, gardener for Joseph Eastman. The exhibit consisted of six lots in all and made a nice display.

The finishing touches were put on the schedules for the June and Fall Flower Shows. It was decided to hold the June show on June 14th, 1910. These schedules are now ready, and may be had upon application to the Secretary, E. W. Neubrand.

The matter of the annual outing was taken up and discussed, and the old committee, John Brunner, James Smith, and William Scott, were again appointed with power to make all necessary arrangements.

Samuel C. Horn, Superintendent for James Speyer of Scarborough, was elected to membership.

WM. SCOTT, Cor. Sec.

AMERICAN ROSE SOCIETY.

The A. N. Pierson Co., Inc., of Cromwell, Conn., have filed with the American Rose Society notice of registration of a new sport of Killarney originating with them in 1908. It is identical with the Killarney, excepting in color, which is much brighter, showing a strong tendency to red, some blooms having been as dark in color as the Richmond and the average of the crop for the entire year of 1909 was only a shade lighter.

The question has been addressed to the Secretary, whether the American Rose Society will have a June Show, but up to this writing there has been no step taken toward such an exhibition.

The Minnesota State Rose Society have applied for a bronze medal to be offered at their summer exhibition to the best exhibit by an amateur. The definition which the society gives of an amateur is, "One who grows the plants himself or herself, but does not regularly employ a gardener to grow them, and one who does not grow or sell plants as a business." Last year the American Rose Society offered its bronze medal and this was awarded to Mrs. F. H. Gibbs, St. Paul, Minn.

HERE TO STAY

You know the Comet is a Tale of the past.

Not so with Aphine, which has come to stay to the last.

APHINE

Has proved its efficiency for destroying the insect pests that infest the garden, field and orchard, to be equal to its effectiveness in the greenhouse, where it has already gained wide recognition as the leading insecticide on the market for general use.

It may not be the cheapest, but it is the best.

Aphine destroys green, black and white fly, red spider, thrip, scale, slugs, ants, and many other species of plant insects.

It will not injure the tenderest foliage, in fact it invigorates plant life.

These statements may appear as bold assertions, but we can furnish you with many expert endorsements to substantiate all we claim for Aphine, if you are interested.

CHARLES H. TOTTY
Madison, New Jersey

CONNECTICUT HORTICULTURAL SOCIETY.

Pansy Night was observed by our Society on the 27th of May, though a little late in the season. When any one among us speaks of pansies, John Gerard, our pansy specialist, of New Britain, comes into view as an inseparable concomitant. Hence, we had the pleasure of listening to an able address by Mr. Gerard on "The Merits of the Different Pansy Strains." Thirty-eight years ago, he began the cultivation of his favorite flower; and he has tested nearly all the novelties since produced, and has found only about a dozen to be of special merit. He traced the history of the classifications of the pansy, commencing in 1840, when they were first divided into French, English, and German strains; the first five-blotched type having originated in Switzerland. He illustrated his descriptions of the various strains by picking out specimens from a beautiful collection of blooms brought for this occasion, and not for competition. In the advancement in the production of beautiful colors in pansies, he stated that scarlet is the only color missing to complete the red shades, and that prominent growers in Europe had offered a reward for the origination of a pansy of that color. At the close, Mr. Gerard answered many questions regarding the culture of this flower, and emphasized heat as being its greatest enemy. A fitting vote of thanks was expressed to the speaker for giving us the benefit of his long and intelligent study of the subject. President Huss introduced him as being one of the highest authorities in the country in all matters pertaining to the pansy.

Oscar F. Gritzmacher of New Britain, and Wm. W. Myers of Hartford, brought handsome collections of pansies for competition; and the judges, Messrs. Alex. Cumming, Jr., James P. Ralph, and Howard A. Pinney awarded a certificate of merit to Mr. Gritzmacher, and recommended that a vote of thanks be given to Mr. Myers. The latter also exhibited a specimen lemon, grown in his greenhouse, on a tree three years old and two feet high; the lemon weighing twelve ounces.

Our schedule for the two fall exhibitions is now about completed; and we are thankful for two premium con-

NEPHROLEPIS

Bostoniensis. We have a splendid lot of large specimens in 12-inch pots at from \$5.00 to \$7.50 each—according to size; 6-inch at 50c each.

Elegantissima Improved. This is the finest of this type, never reverting to the Boston type. With us it has not yet shown a single Boston frond. Fine plants, 2 1/4-inch pots, \$10.00 per 100; 4-inch, 25c each; 6-inch, 50c each.

Superbissima. Extra heavy plants, 4-inch pots, 25c each; 6-inch, 50c each; 8-inch, \$1.00 each.

F. R. PIERSON CO.,

TARRYTOWN-ON-HUDSON,

tributions by seedsmen, one of \$25 by Arthur T. Boddington of New York, for vegetables; and one of \$5 by Henry A. Dreer of Philadelphia, for his new "Susan" dahlia. All such gratuities tend to the betterment of our exhibitions, and also increase the friendly rivalry among exhibitors. We hope to receive other similar offerings.

The recent lecture by Prof. John J. Ruegg, of Clifton, N. J., on "The New Science of Fertilization and Insectization," was much appreciated by a large audience; and some that hitherto have looked upon the lava fertilizer question as unworthy of attention, have expressed much interest in the subject, and a desire to see this idea experimentally tested.

Our next meeting, June 10th, will probably be Hardy Rose Night, provided these flowers are far enough along to warrant their exhibition.

GEORGE W. SMITH, Secretary.

Committee on "Moffat Trip"—Entertainment and Local Committees.

General Reception Committee—The Western Nurserymen.

Entertainment Program.

June 7th—Receiving delegates by Local Committee.

June 8th—2 p. m., Ladies will be given "Sight Seeing" Trip through City of Denver—in automobiles as guests of the Denver Convention League, in connection with the Western Nurserymen.

June 9th—2 p. m., Ladies will be given Matinee party at the Broadway Theatre, as guests of the Denver Convention League, in connection with the Western Nurserymen.

June 10th 9 a. m., Trip over the Moffat Route to Corona, and intermediate points of interest by "Special Train." Luncheon and Refreshments will be served on train by a leading Denver Caterer, returning to Denver about 7 p. m., as guest of the "Western Nurserymen."

The Entertainment Committee is planning other features, which will be announced on the first day of meeting.

AMERICAN GLADIOLUS SOCIETY.

At Horticultural Hall, Boston, Mass., on Friday afternoon, May 27th, the American Gladiolus Society was formed.

A permanent organization was effected with 75 charter members, and a Constitution and By-Laws were adopted. There was great enthusiasm manifest from beginning to end, and the new society starts in with very brilliant prospects.

The meeting was called to order by Maurice Fuld of Boston, who by his voluntary efforts deserves great credit for bringing the gladiolus people together. Mr. Fuld stated the purpose of the meeting, and then introduced Professor G. E. Stone of Amherst College, who presided over the meeting. Professor Stone gave a very interesting talk on floriculture, and its relation to the farm and home, and received hearty applause. A paper by H. Youell of Syracuse, N. Y., giving the history of the first varieties of Gladiolus Gandavensis hybrids was listened to with evident appreciation and interest.

The society has accepted an invitation to meet with the Society of American Florists at their annual exhibition at Rochester, N. Y., in August.

The Department of Horticulture of Cornell University, Ithaca, N. Y., has tendered the use of their trial grounds for the growing and testing of varieties of gladioli, and the offer was accepted with a lively vote of thanks. A sincere vote of thanks was also extended to the Massachusetts Horticultural Society for the use of their hall, to Professor Stone for the able manner in which he presided, to Mr. H. Youell for his most interesting essay, and to the Society of American Florists for their kind invitation to meet with them at Rochester.

The meeting was enlivened by spirited but friendly discussion in which the following gentlemen took part: Arthur Cowee, Berlin, N. Y.; Arthur T. Bod-dington, New York City; Montague Chamberlain, Boston; Maurice Fuld Boston; J. K. Alexander, East Bridgewater, Mass.; Robert Cameron of Harvard Botanic Gardens; Eugene Fischer, Jamaica Plain, Mass.; I. S. Hendrickson, Floral Park, N. Y.; Professor L. B. Judson of Cornell University; Carl Cropp, Chicago; and L. Merton Gage, Orange, Mass. The fol-

Wholesale Grower, Importer and Shipper of Pot Plants

Seed Trade

Counter Trade.

Counter trade, while it has slackened materially is still surprisingly active, and each day finds something "running out," making substitutes very necessary, but as a rule these substitutions are in small quantities, and do no one any serious injustice. In fact, superior varieties are more often than not substituted, hence even moral ethics are only very slightly fractured.

League Prices and Estimates.

The latest pronouncement of the Wholesale Seedsmen's League makes one hold his breath in surprise. Prices on turnips and spinach are pretty high, but one is taken up into a sure-enough high mountain when it comes to beets and cabbages. These prices may prove justifiable, but it certainly looks like anticipating a famine, and while we do not assume to criticise, we may remark in passing that the tide of high prices seems to have been checked along general lines, and it may not be wise to boost seeds to unnecessary high levels at such a time.

Speaking on the subject of prices, it is only fair to remark that general contracting prices on crop of 1910 are the highest in a quarter of a century on the lines of peas and beans, while corn and most other lines are higher than the average for the past ten or fifteen years, and this of course justifies some advances on the part of the wholesalers, but it must be assumed that deliveries on biennial root crops will be very light to justify some of the advances made. However, it will not be long before we shall be getting estimates more generally based on actual conditions than for the past few months, then we shall know better how near a correct guess are the recent prices of the League, for it must be remembered they are only guesses based on the best obtainable information and they do not want to guess too low.

No tidings of woe have thus far come from California—at least nothing of an alarming character. No news is surely good news from that land, as our friends of the Golden State never fail to take the seedsmen into their confidence when they are having any hard luck.

The Onion Seed Situation.

A liberal shortage in onion seed would be an unmasked blessing, as this is surely one item of which all of the larger houses will have a considerable carry-over. Still there is another point of view. It is common knowledge that sales of onion seed were very unsatisfactory to the trade in general, and the whys and wherefore have been subjects of lively discussion. Months ago we ventured the opinion that it was due in great measure to the large quantities of local grown seed in all of the large onion growing sections. We still believe this accounts largely for the light demand the past season. There is a very general belief that the home-grown seed is better, and until the local growing is made unprofitable by low prices it will continue, and the seedsmen will have reason to complain of poor demand. We may cite one instance in support of our theory. A certain

prominent wholesaler sold annually for a number of years between 2000 and 3000 lbs. of onion seed to a local dealer, but for the past three years their sales to this dealer have been decreasing, until this year they sold him only 300 lbs., composed wholly of Red and White Southport Globes, and this entirely because these varieties were not locally grown. Of the Danvers types and the Red Wethersfield he was able to secure all he wanted at prices as low, or lower than the seedsman cared to sell, of the "home-grown" seed, and his customers preferred it. This is only one instance; others could be cited if necessary, hence we firmly believe this explains to a considerable extent the disappointing sales by the trade.

Ferry & Co. Doings.

The report that D. M. Ferry & Co. were going to add two stories to one of their large Detroit warehouses has been confirmed. It is also understood that they will rebuild their warehouse at Windsor, Ontario, which was destroyed by fire last winter. The growth of this firm's commission business has been remarkable, and it is said they now have nearly 250,000 merchant customers. We learn that they are about to send out a new and very handsome seed packet, and they will not use transparent paper. It is also rumored that they are getting out a new type of seed box or seed cabinet. They are certainly alive to the needs of the hour.

Speaking of seed packets, have you seen those of the Jerome B. Rice Seed Co.? If their chief competitor excels them, they will surely have to go some. Please also take note of the magnificent new seed cabinet which the J. B. R. S. Co. is sending out.

NEWS NOTES.

Enid, Okla.—The business of Kester & Tarr is now conducted by G. G. Tarr.

Augusta, Ga.—The N. L. Willett Seed Co. are now in their new quarters at 849 Broad street.

Pascoag, R. I.—Wm. Doel has taken possession of the Slade Greenhouses and is now ready for business.

Grand Rapids, Mich.—Nick Luth has four greenhouses 30 x 100 feet here and has started growing vegetables.

Kalispell, Mont.—The King-Thurman Nursery Co. has increased its capital stock from \$10,000 to \$50,000.

Newville, Pa.—The greenhouses formerly conducted by David Nailor are

now owned and operated by D. E. Leckey.

Mobile, Ala.—F. B. Feasell has purchased the Sinclair place at Ocean Springs and intends to build greenhouses.

Wellsville, N. Y.—Mrs. Jennie McEwen has purchased the greenhouse on West street formerly owned by W. F. Yewdall.

Dorchester, Mass.—The Rosemere Conservatories, 38 King street, are under new management, W. H. Tomlinson being the lessee.

Northboro, Mass.—Alfred Thomas of Worcester has purchased the estate of the late Daniel Wesson with its greenhouses, equipment, etc.

Hartford, Conn.—The contract for beautifying the grounds around the 8th district school building has been awarded to C. R. Burr & Co.

Seattle, Wash.—E. C. Flohr is now with F. S. Stimson, florist. He formerly conducted the Benton Junction Nursery near Georgetown, Wash.

Gainesville, Texas.—The greenhouse of Henry Bertram was damaged by fire to the extent of \$2500 recently. The loss is covered by insurance.

Des Moines, Ia.—The Grant Park Greenhouses, East 25th and Walnut streets, have been sold to George Brandtman who is now located at 2406 Logan avenue.

East Sudbury, Mass.—The greenhouses now run by Chester Williams and which were formerly owned by Coolidge Bros., pass into other hands June 1st. The control will be assumed by one of the former owners it is reported.

Hiawatha, Kans.—In our last issue we reported Miss Susan Margrave as building an addition. She now informs us that she intends to build one house 20 x 60 and a lean-to 12 x 110 feet. This will give her about 6,000 feet of glass of modern construction.

Memphis, Tenn.—Messrs. Otto Schwill & Co. inform us that they are not to build greenhouses as has been reported. They do, however, intend to build a large seed warehouse this summer and ground has already been broken for the building. They expect to spend between \$75,000 and \$85,000 on this building and will be 100 x 180 feet, five stories in height and will contain all the modern improvements in seed cleaning machinery.

Cedar Rapids, Ia.—Grant Newport informs us that in addition to the houses he intends to build, which we reported in our last issue, he will build two pits 11 x 100 for lettuce. He now has 7 houses containing 18,000

Of Interest to Retail Florists

Decoration Day this
WASHINGTON year has broken all
records as far as
prices were concerned. There was a
marked scarcity in all kinds of flow-
ers, particularly the outside ones. The
rains and cold weather had almost en-
tirely destroyed all garden roses and
persons had to fall back on greenhouse
blossoms, which sent prices soaring up.
Crimson Rambler roses which are usu-
ally about done for by Decoration Day
were in most cases just showing color
this year. They will be in full force
for the Confederate Decoration on June
5th. The usual tribute was paid to the

sailors who perished at sea, viz., the
launching of a flower laden boat near
the Barracks. The beautiful floral offer-
ing drifted down, down with the
stream until it became water logged
and the relentless waters claimed it as
it had the unfortunate sailors before.
At the present writing the weather is
as cold as the early spring should be.
Nothing can grow; the bedding stock
planted weeks ago is at a perfect
standstill. The law of compensation
still holds good, however, for green-
house stock is still in good demand.

Winchester, Mass.—J. Newman & Sons have decided to give up the greenhouse end of their business, supplying their store in Boston by purchase in the wholesale markets exclusively. The greenhouses, contents and land which they have occupied for so many years in this town are to be sold.

A NEW FAD.

Are Things Beginning to Come Our Way?

JOHN I. RAYNOR RETIRES FROM BUSINESS.

On June 6, John I. Raynor retires from the wholesale flower trade and the business carried on by him for so many years at 49 West 28th street, New York City, will be conducted thereafter by Patrick Smith, who has served as foreman with Mr. Raynor during the entire period.

The business at 49 West 28th street was established by Burns & Raynor, this firm being the first to open in the block destined to eventually become the greatest wholesale flower centre in the world, and the business was a great success from the start. When Alexander Burns withdrew from the firm Mr. Raynor continued the business under his own name and the extraordinary prosperity which it enjoyed has continued up to the present time, with a record of business ability and integrity which has never been assailed. We extend to Mr. Raynor our sincerest wishes for health and happiness in the well-earned rest and retirement from business cares which he seeks, but 28th street will never seem natural without him.

Mr. Smith has been a faithful, industrious employe and will undoubtedly carry on the business with the same methods and principles as have prevailed heretofore. He has our heartiest good-will and we hope to see him retain in the fullest degree the eminent position occupied thus far by the establishment over which he now assumes full control.

NEWS NOTES.

Pittsburg, Pa.—J. J. Fuchs has closed his Bloomfield store.

St. Johns, N. B.—The store of W. & K. Pedersen, florists, has been moved from 31 to 49 Charlotte street.

Kansas City, Kans.—The business of James Brough, 812 Minnesota avenue has been purchased by J. F. Ephraim-

son. Miss Maud Ferguson will assist him.

Rogers, Ark.—R. O. Ball, formerly of Coffeyville, Kans., has purchased and will conduct the business of Mrs. E. D. Phelps.

St. Louis, Mo.—The Foster Floral Co., now in the Century Bldg., has leased number 505 Olive street for three years.

Toronto, Ont., Can.—Aten & Moreland is the name of the firm formerly known as Aten & Wilson. Mr. Wilson has retired.

Flower Market Reports.

BOSTON The greatest day in the year from the viewpoint of the growing and wholesale florist trade in Boston is Decoration Day. The Christmas and Easter holidays are second to this great annual event and the fact that flowers are always abundant and reasonable in price and the market is ready to assimilate everything of moderate value makes this a very profitable occasion for many florists to whom the fancy high-class trade enjoyed at certain seasons in the year is unknown. This year was exceptional in the conditions prevailing previous to the holiday and there was more or less apprehension among the consumers as to whether the supply would be sufficient and naturally more or less disposition among the producers to place an exceptional value on their stock, in consequence. It turned out that there was an abundance of desirable material at the disposal of all and as heretofore, the lower priced material had the right of way. Roses were in full supply, the demand running strongly toward the \$2.00 to \$4.00 grades and shunning the select stock. This was true of all varieties. American Beauty included, choice grades being left behind. The local trade was not heavy but the shipping call was the biggest on record and much embarrassment was experienced by the wholesalers in getting transportation for their goods Saturday night with an assurance of delivery on Sunday. In many instances baggage-masters had to be impressed into service at an additional cost to which telephones and telegraph expenses had to be added. The only thing in the list which showed a material advance in market value over normal prices was the carnation. This staple practically doubled in value and it managed to maintain the advance till the windup, something unprecedented and, in a way, inexplicable. Among the things which did not sell readily, or were left unsold were gardenias, lily of the valley, single stocks, poeticus, sweet peas and southern grown peonies. The latter failed because they were received in very bad condition. Sweet peas sold well when of good quality but there was a large proportion of low grade stock, showing signs of storage, and this could not be moved. Astilbe was superb and sold very satisfactorily. Deutzia, which has in previous years been a prominent factor in the Decoration Day trade, was conspicuously absent. Altogether the general comment is that the celebration, from a florists' viewpoint, was a magnificent success.

Since last report there has been a decided change in the flower market and for the better side. Up to Thursday a week ago there was little or no business, but it gradually brightened as Memorial Day drew near and on Friday and Saturday everybody was on the hustle. The days being cool and ideal weather for shipping stock kept in much better condition than heretofore. There was plenty of stock, but much more could have been disposed of had it been had at the right time. Peonies were a great help-out and excellent stock was had which sold

For the June Girls' Bouquet

Luxury and exclusiveness in Florists' Ribbons are a special feature of the P. M. business. For weddings and commencements we call special attention to the

Satin Taffetas

which we carry in many grades and patterns such as:—701, 697, orchid, Beauty, 697, 721, 639, etc., but the finest and most appropriate for the above is

Pattern 1805

readily. Other outdoor stock was not plentiful as tulips, iris, lilac and lily of the valley were about over and narcissus were had only in small quantities, which made carnations in better demand. The supply was somewhat decreased on account of a few days of cold weather and many more could have been used to advantage. The quality was good, the colored being in best demand, though anything and everything moved and vasing up was out of the question. The coolers were

relieved of a good portion of roses and other material which had been carried along from day to day. Giganteum lilies were in good supply and sold with the rest, also peas, daisies, pansies, and anything that looked like a flower was sure to exit. Trade would have been much heavier had the Sunday and Monday rainstorms held off, but all in all the trade is satisfied with the volume of business had the last few days.

Flower Market Reports

(Continued from page 863)

CHICAGO Another Memorial Day is over and florists generally are pleased with the outcome. In a general way conditions were very satisfactory. Stock was not so abundant that prices were low nor yet so high as to be prohibitive. Carnations ranged from four to six dollars and on Friday and Saturday were about equal to the demand, but on Sunday there was a shortage. Monday morning brought plenty but the demand was over. It was a Decoration Day trade devoted to indoor stock mostly. Cape jasmines from the south and peonies from any possible source were the only flowers from outside. Some of the jasmine experienced warm weather in transit and was poor in consequence, but the most of it was of good grade. Peonies were short and prices usually high. The keeping qualities of the stock are said by many to be rather poor. Roses were sufficient in number except Richmonds and Beauties. The retail florists report the injury to the peonies to be very apparent in their keeping qualities. That the crop is decidedly short is now admitted by all.

NEW YORK New York City florists' customers don't make much trouble on Decoration Day. There is a big consumption of flowers in the outlying districts and throughout the Long Island cemetery section and florists catering to that element have their hands more than full. Consequently the wholesale markets are overrun with demand for moderate priced material, for the moment, but the regular trade which must be looked to for support three hundred and sixty-five days in the year make no particular demonstration on Memorial Day and the goods which must look to this element for appreciation enjoy no special privileges on this occasion. Moderate priced flowers sold out good, if of acceptable quality, on the day's preceding Memorial Day. Carnations, if good, brought fine prices throughout and roses of medium grade were in excellent demand. Otherwise, the normal serenity of the wholesale section was not disturbed in any noticeable degree by the Memorial Day sentiment.

We Beg to Announce

that on and after July 1st, 1910, the premises on the first floor of the Coogan Bldg. will be under the management of A. MOLTZ & COMPANY, who will sell at wholesale only, all flowers in season in addition to roses.

" " & Sprea. (too bchs).....	15.00 to 25.00	15.00 to 25.00

Decoration Day found the **ST. LOUIS** market surprisingly high in prices, much more than the trade expected to pay, especially with the big amount of stock on the market. The demand was not so great with the retailers on Decoration Day as was the day before with orders for shipments to small nearby towns. The florists near the cemeteries did a big business with plants, cut flowers being too high in price. The wholesalers were asking for carnations as high as \$6 per 100 for fancy stock, and \$1 to \$5 for first grades. Roses brought

from \$5 to \$8; Beauties, \$35 to \$50 for long fancy; sweet peas, all the way from 35 to 75 cents; lily of the valley, \$3 to \$4. Peonies were not overplentiful at \$5 to \$8; lilies and gladioli, \$10 to \$12.50; gladioli, \$6 to \$8. All sorts of greens sold well and there was plenty of it for all.

Flower Market Reports.

(Continued from page 865)

PHILADELPHIA

While Memorial week prices this year were rather under those of last year on the average, the volume of business in this market was bigger than ever and, as one authority in the wholesale center stated it—"best Memorial Day week we ever had!" The outside demand was excellent, and in the suburban and cemetery localities all the retailers did an excellent business. The weather was fine—and in an outside festival like Decoration Day the weather is "The" important factor. The big retail stores in the center of the city hardly felt any difference to speak of. We presume such a condition is common to any big metropolitan city, but does not accentuate in the smaller cities and towns. The shipping orders came of course from eastern, northern and western points, Memorial Day not being a southern festival. The most popular sellers of the week were peonies and carnations. In the latter the colored sold as well as any; but in peonies the white and light were most in demand. Roses went fairly well—especially in the medium grades. Quality in roses keeps up in good shape all along the line. Orchids are still plentiful and very good. Gigas cattleyas are now arriving and they are certainly magnificent flowers. Mossiae is also good. Indoor sweet peas have improved with the cool weather and are now holding their own in substance and color with the outdoor product. Blue centaurea is now to be had in quantity everywhere, instead of in spots as in the past few weeks. Mignonette about done. Yellow chrysanthemums and red dahlias are abnormal and temporary features of the market.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The Rose and Peony Show was held on June 1st. As far as the roses were concerned this was undoubtedly the best show of outdoor roses seen here in years and good authorities think the peonies were also better than usual. In the hybrid perpetuals the honors went to Wm. Robertson. His vase of Captain Hayward was the gem of his collection and he was also well ahead in the tea section. The best collection of hybrid teas was staged by Samuel Batchelor.

A noticeable feature of all the hybrid tea exhibits was the prominence of Killarney. Another very fine variety that showed up well was Mrs. Jardine, exhibited by Wm. Robertson, who also sent in a fine vase of the new variety Dean Hole, which is evidently a very good outdoor rose with a fine pink long pointed bud. Walter Scott, gardener for W. W. Frazier, a new exhibitor, was in the winning list with a fine lot of hybrid teas.

The competition was very keen in all the peony classes, and the quality and variety much better than has been seen here for many years. In the class for the best collection there were four exhibitors, John McCleary taking premier honors. Thomas A. Archfield, gardener for Clement A. Griscom, was also a successful prize winner. The best vase of pink peonies in the show was from Richard

Williams, gardener to E. B. Morris, Ardmore.

In the class for hardy perennials best display not less than twelve species, Herman Van Gloeden of Newbold's got first with a magnificent display of 60 or 70 vases of rare and beautiful varieties.

ST. LOUIS NOTES.

Florists' Club.

The St. Louis Florist Club will on Thursday afternoon, June 9th, at 2 o'clock, celebrate their twenty-third anniversary with a smoker in their meeting room in Odd Fellows' Building. Secretary Beneke says the club has met each month for the past 23 years and the meetings are much better attended now than ever before.

Retail Florists' Association.

The Retail Florists' Association will hold a meeting on Monday, June 6th, in the K. of C. Hall, Grand and Olive streets, at 8 p. m. F. C. Weber, Jr., has notified each member to be present as matters of great importance will come before it. C. C. Sanders is president of the Association.

Park Notes.

Park Commissioner Phil. Scanlan has arranged for 140 band concerts in all the public parks this summer. A fund of \$15,000 has been established for this purpose. Acting Superintendent Ernest S. Thrall has all the park planting completed and they never looked any better than they do this season.

The Ladies' Circle.

The Ladies' Florists Home Circle will hold its meeting this month at Chautauqua, Ill. Miss Meinhardt, Secretary, has sent out notices that the ladies are to meet at the Union Station at the gate of the C. P. & St. L., 5 p. m., Wednesday, June 18th. They will spend the night at Chautauqua and hold their meeting the next day, returning home in the evening. Mrs. John Steidle is president.

Shaw's Garden.

The first Sunday opening at Shaw's Garden for this year will take place on Sunday, June 5th. There are only two Sunday openings in the year—June and September. Supt. H. C. Irish says everything will be ready to receive the visitors. Should the weather be fine a record-breaking attendance is looked for.

Building Operations.

Robert Thompson, the local greenhouse builder, has his hands full building new greenhouses for the Kirkwood florists. J. Cahill will furnish the boilers and piping for same.

Personal.

Visitors in town recently were: A. Reising of L. Baumann Co., Chicago; W. C. Johnson of E. H. Hunt Co., Chicago; E. W. Guy, Belleville, Ill.

A CORRECTION.

In our last issue, through a typographical error, the capital stock of the Alvin Japanese Nursery Co., Houston, Texas, recently incorporated, was given as \$225,000. This should have been \$22,500. This concern plant 300 acres of land and employ from 40 to 50 hands and a general line of nursery stock is grown.

A letter received by Prof. C. S. Sargent at the Arnold Arboretum announces the arrival of E. H. Wilson at Ichang, China.

GREENHOUSES BUILDING OR CON- TEMPLATED.

Ocean Springs, Ala.—F. B. Feasell, range of houses.

East Burke, Vt.—E. A. Darling, range of houses.

Oregon, Ill.—Oregon Greenhouses, one additional house.

Berkeley, Cal.—J. A. Carbone, two 110 foot orchid houses.

San Mateo, Cal.—MacRorie-McLaren Co., range of houses.

Attleboro, Mass.—W. H. Oldenburg, Maple street, addition.

Red Oak, Ia.—Red Oak Greenhouses, rose house 40 x 66 feet.

St. Laurent, Montreal, Can.—Camille Gratton, rose house, 20 x 100 feet.

Cote St. Paul, Montreal, Can.—E. Hayward, two general purpose houses, 20 x 80 feet.

Greenwich, Conn.—R. A. C. Smith, Field Point Park, range of houses, one a palm house.

Sedalia, Mo.—Chas. Gelven, four houses 14 x 75 feet, also building 16 x 75 to include boiler and packing rooms and office. Expects to add five houses, each 14 x 75 feet, next fall or spring.

The Aphine Manufacturing Company have received the following interesting letter on the results attending the trials of the new insecticide at the Massachusetts Agricultural College, Division of Horticulture, Amherst:

Gentlemen:—It may interest you to know the results of the tests I have made of the samples of Aphine you furnished me about April 27th. I am satisfied that it will kill the insects that you claim it will and I believe it to be a valuable addition to the insecticides for greenhouse work. But the results: Used as a dip at the rate of 1 oz. Aphine to 13½ oz. water, it killed brown, white scale and the Belgium long scale in every test and mealy bug in every test but one, and in that test a few of the older insects showed faint traces of life about five hours after dipping. Used as a spray, it killed brown, white and the Belgium long scale. About one hour after spraying, I syringed the plants thoroughly and the scales were easily removed and dead.

Used as a dip at the rate of 1 oz. Aphine to 22½ oz. water, it kills red spider and thrips. As a spray, very successful for spider, but difficult to reach thrip, but where it strikes it will kill. I had a very limited amount of thrip, so my tests were not as thorough as I could wish.

I suppose it is needless for me to tell you it kills black, green and white fly at the rate of 1 oz. Aphine to 37½ oz. water, used as a dip and as a spray it is equally successful if care is used in spraying.

In short, I can honestly recommend Aphine to kill green fly, black fly, white fly, brown scale, white scale, Belgium scale, red spider, thrip and mealy bug, if the directions are followed carefully and the spraying or dipping done thoroughly and as far as I can tell does not injure the tenderest foliage.

Yours truly,

(Signed) JAMES WHITING.

HELP WANTED

WANTED

Experienced man to grow small Ferns, on large commercial place near Boston. Wages \$12.00 to \$15.00 per week. Address, stating experience, nationality, etc., H. T., care of HORTICULTURE, 11 Hamilton Place, Boston, Mass.

WANTED—An experienced decorator and maker up of designs and sprays. Must be strictly sober and polite to customers. A permanent situation for one who can fill the place and is well recommended. Please state wages expected. Address, A. B. C., care of HORTICULTURE OFFICE, 11 Hamilton Place.

WANTED—An experienced man to work in greenhouses where a large part of the product is carnations. Will pay good wages to the right man. Give references. Address Box 1092, Lowell, Mass.

WANTED—Experienced grower of hot-house fruit and plants. Apply with testimonials, HORTICULTURE OFFICE, 11 Hamilton Place, Boston, Mass.

WANTED—At once, a young man for general greenhouse work; must be a good willing worker; state wages expected. P. M. Olm, Bath, Maine.

WANTED—An assistant foreman in rose and carnation houses. \$70.00 per month. Y. Y., care HORTICULTURE.

EXPERIENCED man in retail flower store. Must be designer and good all around man. F. Williams, 35 East Randolph St., Chicago, Ill.

SITUATIONS WANTED

WANTED—Position as a gardener and general superintendent on estate. Seven years in last position. Highest references. W. B. Jackson, care HORTICULTURE, 11 Hamilton Place, Boston.

WORKING FOREMAN wants position in charge. Has long experience in growing plants and flowers for Boston market. First class references from present employers. Address J. S., care HORTICULTURE.

FOR SALE

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSHESKY BROTHERS, INC., 50 Montrose Ave., Brooklyn, N. Y.

FOR RENT

FOR RENT—27,000 ft. of glass in good condition and eight acres of land near Pittsburgh, Pa. Write at once if you mean business. Address C. K., care HORTICULTURE, Boston, Mass.

CHICAGO NOTES.

Trade and Personal Items.

Otto Freeze has resigned his position with the Poehlmann Bros. Co.

Charles Zapfe of the Budlong force is back again fairly recovered from an operation for appendicitis.

Mangel reports that magnolia wreaths were especially in demand for Memorial Day purposes.

Among the new things at Hunt's are automobile vases, and they are very attractive and sell readily.

Kennicott Bros. report their sales for the week to have exceeded those of last December, including all of the holiday sales.

A. F. Longren and bride have returned from their wedding trip. Mr. Longren is traveling salesman for the E. H. Hunt supply house.

The tin cemetery vases, the patent for which was bought by W. F. Kastling of Buffalo, are selling well here, being more nearly indestructible than the glass ones.

Michael Fink of Kennicott's while dozing on an "L" car Sunday night awoke to find a man relieving him of his watch and money. Mike seized his valuables and with the help of the guard threw the fellow down the elevated stairs.

Mr. Peiser of Kennicott's says that if growers had only brought into the market on Sunday the carnations they held over until Monday they would have received \$50 per 1000 for the stock that sold on the latter day for a small fraction of that sum.

Strail & Hahn, the newest florist firm in the downtown retail district, are rapidly getting settled in their new store, 27 Jackson Boul. A good business for Decoration Day was an auspicious beginning. A new Blitz ice box will be installed Sunday.

Among the notable June weddings will be the Rycroft-Byfort, at the South Shore Club, Wednesday. Friedman will decorate with Killarneys and asparagus, using the usual canopy effect. Over sixty tables will be set and Killarney will be used for the whole scheme.

As we predicted, the freezing of the early blooming shrubbery and the cold backward spring has caused an unusual demand for bedding stock and there was not enough to go round. Many large growers were looking for opportunities to buy stock two weeks before Decoration Day.

Something different will be used in the decorations of the dining room at the Blackstone Hotel. Boxes of large size, some twelve feet in length, are filled with English ivy and geraniums and will be placed around the room eight feet from the floor. They will get no natural light. It was no easy task to handle these boxes, which were filled at the greenhouses of F. Oechslein, six miles away.

Daisy Brooks, 12 years old, is probably the youngest member of the trade in Chicago. She is the daughter of J. P. Brooks of Morton Grove, and when her father was asked to supply plants and flowers to one of the cemeteries he said he was unable to take on the additional work. Miss Daisy promptly closed the contract on her own responsibility and drives four miles with her stock and sells it to good advantage, too.

PHILADELPHIA NOTES.

George D. Clark of Dreer's leaves June 1st on a crop inspection tour in western territories and will extend his journey as far as the Pacific coast. He expects to return in about a month.

M. Rice and Mrs. Rice arrived home on the S. S. "President Grant," June 1st, and were met at the wharf in New York by a good sized delegation of friends and relatives. Among the Philadelphians were B. Eschner and Eugene Weiss.

Leo Niessen is justly proud of a fine lot of *Cattleya gigas* he is now receiving. A visitor to the great orchid show in Boston last week stated that he had seen no finer blooms on exhibition. A limited supply of yellow chrysanthemums are to be seen here and are expected to last for the next few weeks. First time they have ever had them at this season. The variety is Golden Glow.

David Rust, in addition to his duties as secretary of the P. H. S. and the Florists' Club will, dating from June 1st, act as Philadelphia representative

DAVID RUST.

of the David Landreth Seed Co., Bristol, Pa. Mr. Rust has had long training in the horticultural world, both as a gardener in England and the United States, and as a commercial man with Dreer. We wish him all prosperity in this new connection and bespeak the courtesy and favorable consideration of all our readers.

During June, July and August M. Rice & Co. will close their establishment at 5 p. m., and on Saturdays at 1 p. m. This firm believes in doing as it would be done by and thinks that humane treatment of employes really pays in the long run. They are thoroughly in touch with the modern humane sentiment of shorter hours which has become a marked feature of American civilization.

Joseph Heacock, Robert Craig, Alphonse Pericat, Parker Thayer Barnes, Thomas Long, Theodore Shober, and many others of our local people have arrived home from the Boston Orchid Show and all are loud in their praise of the magnificent exhibition. They are glad they went to this epoch-mak-

CLAY'S

For Fertilizing the Soil

WM. ELLIOTT & SONS,
42 Vesey St., New York.

ing event and D. V. will be at the next one scheduled for three years hence. But they all sincerely hope the date will be either before or after Memorial week.

David Rust reports that the amateur show of the Main Line residents at the Marion Cricket Club, May 28th, was a great success, and that a permanent Horticultural Society is likely to result from same. A brief account of the show from the pen of Mr. Rust—who was one of the chief chefs in this floral menu—appears in another column, HORTICULTURE'S regular Philadelphia correspondent being in Boston at the Orchid Show on the 28th.

The silver medal for cut roses awarded to the Dreer display at Boston was well deserved and a duplicate of the same exhibit is attracting much attention this week in their Chestnut Street windows—as is also a fine collection of the higher class peonies which are now becoming so popular. Crowds are to be seen, pencil in hand, all day long taking notes of the finer sorts and a good harvest of orders is bound to result later on. This is an exhibit which is really as educational to the general public as the average flower show—the more so as all the varieties are correctly labeled and the labels correctly spelled.

Visitors: T. W. Duggan, son and foreman; Brampton, Ontario; E. G. Hill, en route for Europe via Riverton.

NEWS NOTES.

A. Y. Scofield has started in business on his own account at Akin, a suburb of Amsterdam, N. Y. He was formerly with Frank Hotaling.

Sumner, Wash.—The Sumner Floral Co. is progressing rapidly in the construction of its greenhouses. The manager expects to have the work done by summer.

Rockford, Ill.—The greenhouses in this vicinity were considerably damaged by the recent hail storm. The greatest damage was done to the Buckbee house on 14th avenue. The hail smashed much of the roof and side glass and the house was flooded with water. Falling glass destroyed some of the stock. In the house of C. H. Woolsey about 150 lights of glass were broken, but the damage is not considered serious. N. S. Sade-water lost about 250 lights of glass which in falling did much damage to his stock. J. W. Ingalls lost about 100 lights of glass. S. Shearer and E. H. Johanson lost some glass; no damage was done to the Soper greenhouses.

1170 Broadway, N.Y. Elizabeth, N.J.

The Cockcroft Range at Saugatuck, Conn.

A Model Little Range

Where two connected houses are desired for locating in some certain square of ground, a parallel layout like this one works out to splendid advantage.

It happens that this particular one is located in the very midst of a walled-in garden, and was laid out to occupy the space between the garden drive and main walk. The result is certainly charming.

The small house connecting the larger ones, gives additional valuable space, and makes it possible to place the houses wide enough apart, so one will not shade the other, which is a mighty important consideration in successful greenhouse results.

So much for its plan—now a word about its construction. It is Sectional Iron Frame throughout. Not a stick of wood used in it, where iron or steel could be employed. It is not the kind of construction that answers to the question how cheap, but how good.

If you want such a thoroughly good, practical, every way enduring and best growing house built, then you want us to build it.

If you are interested, we will be glad to send you a large size photo of this house along with a sketch plan and a more detailed description.

Oncidium varicosum Rogersii

BODDINGTON'S TYPE

We are expecting an importation to arrive at an early date. We have imported this variety for many years from an experienced collector and it has proved all we claim for it both as to size of flowers and intense coloring.

This Orchid is one of the most popular and free-flowering types of the Oncidium family. Our past importations have come fully up to standard. *Oncidium varicosum Rogersii* throws 3-foot stems, bearing as many as 170 blossoms of an intensely rich golden yellow, 2 inches and over in diameter, and can be successfully grown either on blocks of wood, in pots or in baskets, and flowers in November and December in a night temperature of 55 to 60 degrees.

\$1.25 each, \$12 per doz., \$100 per 100; selected plants \$1.50, \$2, \$3, and \$5 each according to size.

Rhododendrons at Holm Lea

Holm Lea! The name alone is full of poetry. And when last Sunday afternoon I walked through the shady lanes of Brookline with Holm Lea as my object I thought of how often there is lack of harmony between the name and the place. But Holm Lea holds what it promises and more.

Professor Charles S. Sargent's beautiful estate was graciously thrown open to the public for two days, and having heard so much about its attractions I used this opportunity to visit it.

This fine estate is a revelation to the foreigner and to the plant lover. The Rhododendrons were in their prime and with their masses of flowers offered a sight worth crossing the ocean to see. They are framed in exquisite surroundings of velvety lawns and shady trees.

Of all the many charms of these lovely grounds the trees undoubtedly take the first place. One finds here the most perfect specimens of the noblest kinds and it was a rare pleasure indeed to admire them in this season, when the foliage has still its spring-like freshness and so many floral effects all around serve to enhance the individual beauty of each tree.

The view from the slope across the pond is one of great beauty, harmony and taste, and it was difficult to tear one's self away from this fairyland and return to the city's masses of stone and brick.

Holm Lea leaves an impression of natural beauty, trained and increased by the influence of refined taste.

Ture Mellstrom

Trans-Atlantic Notes

THE WITHERING OF LILACS

It is an unusual happening that some varieties of lilac used in the decoration of apartments flag or fall when brought out of the plant forcing house and afforded a brief period of time in another—a cooler house—say one of 45 degrees Fah. Well rooted plants in the best condition are liable to this malady, and that in spite of light overhead spraying. One way of avoiding the fading is to remove, as much as possible, the leaves from the flowering shoots and from the non-flowering ones without making the plant bare. With this kind of treatment the plants remain in good, presentable condition for a fortnight and longer; but they must be afforded plenty of water at the root.

HYDRANGEA HORTENSE

There were exhibited at the meeting of the Royal Horticultural Society on the 3rd inst. by Messrs. J. Veitch & Sons, two varieties of Hydrangea Hortense, one being raised by M. Lemoine, and the other by M. E. Mouillere. The name of the first variety is Ornament and it was put into commerce in 1908. It is a showy flower, forming a large truss of a bluish tint, the sterile blooms toothed at the edges, a feature due probably to the influence of an old garden variety, H. stellata, one of the parents. M. E. Mouillere's variety has the name of Mme. E. Mouillere, and is nearly white, having a small pink centre. The petals are serrated, but to a smaller degree than those of Ornament. These novelties received an award of merit at the R. H. S. meeting.

Fredrick Moore

GOOD NEWS

Beginning with our next issue Mr. Alfred Rehder will resume his valuable contributions to our columns and all who are interested in hardy outdoor material may now look forward to the pleasure of reading up-to-date news of new and useful trees and shrubs as tested at the Arnold Arboretum and elsewhere. Mr. Rehder is a recognized authority on these subjects.

Defending
the championship

The Los Angeles Herald coyly admits that "more progress has been made in floriculture in California than in any other State in the Union or any other country in the world" and lest some

one should cherish doubts regarding this proposition proceeds to instance, as proof, the discovery by the park superintendent at Long Beach of the secret of inducing roses to wear colors to order and the assertion by that gentleman that he "can produce a patriotic rose, colored red, white and blue." We hope our horticultural friends across the Atlantic who would come under the classification of "any other country in the world" will not feel hurt or regard this timid reminder of California's supremacy in the realm of floriculture as evidence of an inclination to boast. Indeed, it is all due to Georgia's vainglory over the recent exploit of one of her sons in discovering the long-sought black rose. We didn't think California would stand it long. There is a limit to human endurance and we realized when Georgia's defy came out that our friends in California would be compelled to notice it, much as they would prefer to "do good by stealth and blush to find it fame."

Culture and horticulture

Baltimore is learning some things and from her experience the people of other communities besides Baltimore might acquire some timely wisdom. Baltimore is not the only city where park boards are appointed "not on account of anything they know about parks, trees, landscape gardening, the floral kingdom or anything of that nature, but just because they are good prominent citizens." Boston has had a rude awakening very recently, not only to the unwisdom of placing her public parks under the absolute control of highly respected but horticulturally ignorant citizens, but also to the difficulty of overcoming the very evident disinclination of the officials having the appointing power, to replace gentlemen of this class with those who have the needed knowledge but who lack in certain qualifications which politicians set a high value on. To find among the leisure classes here, as is the case abroad, men who are well versed in horticulture—such men, for instance, as the late H. H. Hunnewell—is not always easy. As we have repeatedly urged in these columns, we think there should be on every park board at least one member practically experienced in the work of constructing and planting. To bring this about will require some time and hard work, but it is a duty the craft owes to itself as well as to the public.

Back to outdoor life

The horticultural industries generally will respond with a hearty Amen to the sentiments expressed by Chancellor Day in his remarks before the graduating class at Syracuse, N. Y., last Sunday, calling attention to the enormous amount of money absorbed by the automobile infatuation, which is held responsible for the withdrawal of many millions of dollars from the productive capital of the country, the mortgaging of homes and many other disturbing things which invariably follow in the train of a luxury over-indulged in. Mr. E. H. Gary, chairman of the executive board of the U. S. Steel Corporation in an interview this week is reported as having said that "we are now in the centre of one of the greatest harvests of prosperity the country has ever witnessed." We think those engaged in the horticultural industries will be disposed to question Mr. Gary's assertion. The halt in the growth of many branches of this business has been evident to every observer and a valid explanation for this otherwise unaccountable fact is possibly suggested in Chancellor Day's "broad and apparent" illustration. "Back to out-door life" is a motto which we have had reason to believe would make for the direct benefit of the plant and planting interests and allied industries. Unfortunately the realization seems to have taken an unforeseen course.

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Asparagus plumosus.

This is the proper time to think about planting this highly appreciated decorative green. They will need considerable more head room than smilax, also more depth of soil, and this should be heavily enriched as they are very greedy feeders. Mix in equal parts a rather heavy loam and some old cow manure which is well decomposed. A depth of at least 9 to 12 inches of this compost is none too much for plumosus. The plants can be set from 10 to 12 inches apart in the rows, and about 15 to 18 inches between the rows. In replanting any old beds the soil should be renewed to the depth of about 6 inches, and the lower layer deeply dug before the new compost is placed on top. Stock out of 4-inch pots, if sturdy and thrifty, is the right sort to use. Beds thus planted should yield good returns for at least four to six years. As soon as the new growth assumes the character of a climber, silkline strings can be supplied. Keep the surface of the soil loose and free of weeds. To old and well established beds a mulch of some well enriched compost and occasionally a dose of liquid manure will be of great benefit. Syringe every day in order to keep the foliage fresh and bright.

Chrysanthemums for Cut Bloom.

The first two weeks in June is considered the best time to plant out for cut bloom. There is a wide difference of opinion as to the best method of growing for cutting. Some prefer and others condemn solid beds. The majority seem to favor the raised bench, and yet there are some that uphold the pot or box system. The finest of blooms have been produced by each of the above methods. I think that more depends upon careful handling of the plants and the soil than upon the question of solid beds or benches. I choose the raised bench because it gives the plants better drainage and allows the use of more liquid manure at the proper time in order to finish up the bloom and, besides, there is less tendency to produce a heavy growth of foliage at the expense of the bloom on a bench than with solid beds. Soil with lots of fibre in it in proportion of one part good manure to three parts of the soil will produce good chrysanthemums. If growing to one flower they can be planted from six to eight inches apart, if two to four blooms to a plant, then 10 to 12 inches would be about right. The distance apart will have to be governed by the quality of the blooms wanted. Stir the surface of the soil regularly, and fumigate once a week if weather permits, and on all bright days syringe freely twice a day.

Begonias.

Flowering begonias can be rooted now with ease and will grow into most desirable size for various kinds of make-up holiday work. Those that were propagated in the spring and which are now in 4-inch pots should be plunged in a frame where a light shade can be used in the brightest part of the day. The greatest care

should be exercised in watering, as they are very susceptible to over-watering. It will pay to look them over three or four times daily during bright, hot weather. To grow the best plants a hose should never be allowed in watering them. Rex begonias, to be at their best, should be grown in pans, any good rich loam with a third of leaf mold and an addition of some sand suiting them. The latter like a more humid atmosphere than most begonias. Guard against any sudden changes in temperature and draught so as not to induce rust.

Dracaenas.

These extremely useful decorative plants such as *Dracaena fragrans*, *terminalis*, *Massangeana*, and *Lindenii*, are in reasonably good demand. Young plants that were rooted and potted up early in the spring should be shifted as required, using coarser soil as the pots become larger. *Dracaenas* like a good loam with some leaf mold—about a fourth—and a little old cow manure. They require but a moderate amount of pot room, in comparison to the size of the plant. Plenty of heat and moisture are requisites so as to encourage a vigorous growth. *Dracaena indivisa* can be raised after they are a year old into good-sized stock by open field culture, planting in rows just far enough apart to permit good cultivation. In the fall they can be lifted and potted into 4-inch or 5-inch pots, and by next spring they will be good stock for vases or veranda boxes.

Hydrangeas.

The young stock that was propagated last winter or spring should now be planted out, and with a judicious pinching they will develop into a compactly formed and shapely lot of plants. By the middle of July all stopping should be discontinued for the season. When resorting to pot culture altogether, repot as they may require it, using some good soil and cow manure, and assign them to a sunny place in the open, giving water in plentiful measure. Plunge the pots to the rims so as to keep the roots cool and by fall you will have nice plants with an abundance of good wood that will give fine bloom next season. They should be kept out as long as the weather will allow so as to ripen their wood, after which they can be put in a cold frame.

Solanum Capsicastrum.

This plant is one of the best decorative berried plant that we have. The old plants that were cut back in May and repotted into new soil will set an abundance of fruit in an ordinary soil. Don't use very rich compost, as then the foliage will be luxuriant but the berries few. The pots can be sunk into some frame outside, which will be a good place for any potted solanums. Young plants can be treated in the same way. They will want great quantities of water during the summer. When the pots get filled with roots an occasional feeding with liquid manure will be of good value to them. This plant is certainly easy to grow, and where a little special pains are taken you will be rewarded by having a fine lot of holiday stock which will find rapid sales.

JOHN J. M. FARRELL.

Mr. Farrell's next notes will be on the following: *Callas*, *Fuchsias*, *Lycastes*, *Palms*, *Perennial Candytuft*, *Sowing Fern Spores*.

LILIUM KRAMERI.

The lily shown in the accompanying illustration is one of the prettiest and most desirable of the Japanese species. It is perfectly hardy and blooms in July and August. The flower is pale to deep pink, the color varying accord-

ing to stock and exposure to sun. It is very fragrant and the perianth is 6 to 7 inches long. This is a lily that deserves a place in every garden, but it is not over-plentiful. We are indebted to R. M. Ward & Co. for the photograph.

E. O. ORPET GOES WEST.

E. O. Orpet, the well-known orchid expert and writer on horticultural topics, will close his term as gardener in charge of the Thayer estate and conservatories at South Lancaster, Mass., on July 1, 1910, thus completing to a day twenty years of work, he having come to South Lancaster on July 1, 1890.

Mr. Orpet will at once assume the superintendency of the estate of Cyrus H. McCormick at Lake Forest, Ill., and that growing community of expert exponents of the gardeners' art will be enriched by the addition to their number of one who is the peer of any gardener in this country in his chosen sphere. The McCormick estate is to be developed along natural lines under the direction of Warren H. Manning, the landscape artist. Mr. Orpet's successor on the Thayer estate is John Booth, recently of Newport, R. I.

Many friends and acquaintances of Mr. Orpet in the New England territory will regret the loss locally sustained in the departure of so skillful a representative of their craft, but will wish him the fullest measure of success and honor in his new home.

Fitchburg, Mass.—The property occupied by W. H. Ritter on Vine street has been sold and Mr. Ritter will make a change in December. He plans to erect two or three large growing houses in West Fitchburg on land off Westminster Hill Road which he purchased some time ago. A small greenhouse on Woods Hill will also be erected. The store he now maintains at 70 Main street will be continued.

AMERICAN ASSOCIATION OF NURSERYMEN.

The thirty-fifth annual convention of this influential organization was opened at Denver, Colo., on Wednesday, June 8, with an attendance of about one hundred and fifty members, among whom the eastern section of the country was well represented, the majority having come on a special train. After the opening exercises, reports of officers, committees on transportation legislation, publicity, forestry, etc., were read and accepted or assigned for consideration later. The reports of secretary and treasurer were as follows:

Financial report of John Hall, secretary, Rochester, N. Y.:

Receipts.

Nov. 11, 1909 -Balance from Geo. C. Seager.....	\$26.75
Memberships for 1910.....	1,695.00
Advs. in Badge Book.....	596.60
Extra Badges and Books.....	17.50
Exchange on checks.....	3.95
Sales of Codes.....	.50
	\$2,340.30

Disbursements.

June 1, 1910—C. L. Yates, treas...\$2,340.30

There will be other receipts for memberships and advertisements as soon as all are collected.

Treasurer's Report.

The treasurer, C. L. Yates, submitted his annual report from June 10, 1909, to June 4, 1910, as follows:

Receipts.

1909.			
June 10.	To cash on hand.....		\$3,853.79
30.	Interest, bank account.....	\$32.62	
July 2.	Geo. C. Seager.....	290.00	
Dec. 31.	Interest, bank account.....	53.37

			4,153.60

F. H. STANNARD

President American Association of Nurserymen.

Papers were read as follows:

"The Part Nurserymen Have Taken In the Development of the Nation," J. B. Morey, New York.

"Co-operation Between Nurserymen and Fruit Growers," W. L. Howard, Missouri.

"Commercial Side of the Nursery Business," H. W. Marshall, Nebraska.

"Effect of Tree Planting in the Middle West," George H. Whiting, South Dakota.

"Resultant Evils of the Replace Policy," J. W. Mayhew, Texas.

"Magnifying Our Craft," E. W. Kirkpatrick, Texas.

"The Influence of California's Horticultural Development on the Nursery Business," George C. Roeding, California.

The outlook is for a grand convention socially and in a business way. Fuller reports will appear in our issue of next week.

We cannot refrain from saying a few words of strongest praise of the enterprise and good taste displayed in the beautiful souvenir Program and Album distributed by The National Nurseryman with the compliments of that journal to the members of the Association. An illustrated contribution on "Denver, the Convention City," by A. W. Sowers, and a statistical paper on "Horticulture in The West," by John S. Gallagher, will prove interesting reading to those concerned in the development westward of the

FLORISTS' CLUB OF PHILADELPHIA.

Alphonse Pericat gave an excellent talk before the above club at its monthly meeting held on the 6th inst. His subject was "The Orchid as a Commercial Proposition," which he handled in excellent style. The discussion which followed was animated, interesting and instructive. Nearly all the speakers had something to say about the great orchid show in Boston and it was generally agreed that the orchid had a great future commercially. Adolph Farenwald made one of his characteristic off-hand addresses, full of wit and wisdom, and other things. He said as a windup to his oration that the loveliest orchid in the show to him was a vase of white Killarney rose. Harry Gould, manager of the orchid department at Heacock's, made a good speech, comparing the exhibits professionally and as to culture, etc., with what he had seen abroad. A collection of eight varieties of well grown cattleyas was staged by Al-

F. A. WEBER

Chairman, Entertainment Committee, American Association of Nurserymen.

phonse Pericat. Nephrolepis Milleri from Bar Harbor was also on exhibition.

This being orchid night very little else was talked about. Convention matters were discussed slightly, and a commencement was made in committee appointments in that direction. John Westcott is head of the committee to look up transportation matters. Comment was made on the absence of the S. A. F. name on the trunk line rate list to date. Considered serious—like last year.

TARRYTOWN HORTICULTURAL SOCIETY.

The annual June exhibition of roses, strawberries and hardy flowers will be held at Young's Lyceum, Tarrytown, N. Y., on Tuesday, June 14th, 1910, from 3 until 10 p. m. Admission free. There are 26 classes in the schedule, the prizes for which are all specially donated by members and friends of the Society. Copies of the prize list may be had on application to E. W. Neubrand, secretary. George Wittlinger is manager of the exhibition.

JOHN HALL

Secretary, American Association of Nurserymen.

YONKERS HORTICULTURAL SOCIETY.

At the regular meeting of the Society which was held on June 3rd, the president appointed as judges of the peony exhibits, L. Whitman, J. Goff and Knapper, who awarded first to R. Cochrane; second, J. Campbell; third, W. Halbach. W. H. Waite had some very fine musk melons on exhibit and was awarded a cultural certificate.

There was a discussion on growing peonies and H. Nichols read a very able paper on calceolarias.

The Executive committee reported on the June show and said all arrangements were now made to hold it on June 17 afternoon and evening in Hollywood Inn Hall.

Louis Melilot has been appointed show manager and will make a good one. The secretary of the committee is W. H. Waite, superintendent of the Greystone Gardens and anyone wishing schedules or entry blanks can get them by applying to him.

LEE WHITMAN, Cor. Sec.

C. L. YATES

Treasurer, American Association of Nurserymen.

AMERICAN ASSOCIATION OF PARK SUPERINTENDENTS.

The next annual meeting of this Association will be held in Harrisburg, Pa., August 9, 10, 11, 1910. The provisional program is:

Tuesday, August 9th.

8.30 A. M. Meeting of Executive Committee.

9.30 to 12.30. Annual business meeting, followed by the reading of papers.

2 P. M. Visit to the State Capitol.

4 P. M. Inspection of River Front Parks, Island Playgrounds, Park Nursery and City Filtration Plant.

7 P. M. Sunset on the river.

8 P. M. Papers and discussions.

Wednesday, August 10th.

8.30 A. M. Tour of parks. Mulberry Street Viaduct, Twelfth Street Playgrounds, Wildwood Park and Lake, Rockville Bridge, The River Drive, Pumping Station, Front Street Parks, Cameron Parkway, State Street and Reservoir Park.

1 P. M. Lunch in Reservoir Park.

E. P. BERNARDIN

Chairman of Exhibits Committee, American Association of Nurserymen.

2.30 to 5 P. M. Business meeting.

7.15 P. M. Take train for Gettysburg.

Thursday, August 11th.

Tour of the Gettysburg Battlefield with competent guides.

F. L. MULFORD, Sec.-Treas.

NATIONAL FLOWER SHOW.

Today, Thursday, June 9, the committee on National Flower Show is in session at Horticultural Hall, Boston, President F. R. Pierson in the chair. The local members together with President Pierson and Manager Campbell have been busy getting ready to report on the principal preliminary details, and after the doings of the local members have been duly validated by the full committee active preparations for the big event will begin at once. The date for the show will be the week beginning March 27, 1911. It has not yet been decided whether the exhibition will open Monday or on the previous Saturday evening, March 25.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTI- CULTURISTS.

Registration of Rose.

Public notice is hereby given that A. N. Pierson, Inc., of Cromwell, Connecticut, offers for registration the Rose described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the Secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Raiser's Description.

A sport of Killarney, originating with A. N. Pierson, Inc., in 1908. It is identical with Killarney except in color, which is much brighter, showing a strong tendency to red, some blooms having been as dark as Richmond, the average the entire year a shade lighter than Richmond.

Name, "Red Killarney."

H. B. DORNER, Secretary.

June 2, 1910.

THE ROCHESTER CONVENTION.

We have received from Superintendent Charles H. Vick of the big trade exhibit to be held in connection with the S. A. F. Convention, at Rochester, N. Y., next August, a diagram of the floor space and assignments up to date. It appears from the diagram that fully sixty to seventy per cent of the available space in the great convention hall has already been reserved and there are many large growers, manufacturers and dealers who have been accustomed to exhibit at these annual trade displays who have not yet been heard from. We would earnestly advise all parties contemplating making an exhibit to apply at once for the necessary space, stating number of square feet required. First comers will, of course, get the choicest locations, so promptness in applying will pay and it also will greatly help the hard working committees at Rochester and facilitate the work of preparing to make this the greatest convention and exhibition in the history of the National Society. Any who have not received a copy of the diagram can procure one by applying to Charles H. Vick, Supt., Rochester, N. Y.

The Souvenir Album on which the local committee is working will certainly be a work of art. They expect to have it out about the first of July. It will contain one hundred pages, with many original views of the streets, parks, private gardens, residences and public buildings of Rochester, river and lake, etc., also several interesting articles as follows:

"Rochester Florists," Geo. B. Hart.
"Rochester from the Nurseryman's Viewpoint," William C. Barry.
"The Seed Industry," Charles W. Crosman.

"Rochester Florists' Association," Fred W. Vick.

"Rochester," Sec'y Chamber of Commerce.

Every member of the S. A. F. will receive a copy. It will be so attractive and interesting it will be retained for a long time as a memento, and for this reason will be well worth the cost of advertising space. Send in copy for advertisements at once to Chas. H. Vick.

ELBERON HORTICULTURAL SO- CIETY.

This Society held a monthly meeting on June 6th, at which it was decided to hold a Rose and Strawberry Show on the evening of the 16th of June, in the Elberon Fire Engine Hall, where we hope to have a nice collection of roses. The awards in the point competition were as follows: E. Duncan, lettuce, 80; A. Bauer, roses, 78; A. Bauer was awarded a preliminary certificate of merit for a new hybrid peunia, which is a fine, dark blue color.

ALEX. FLEMING, Rec. Sec.

ISAAC S. HENDRICKSON.

We present herewith the portrait of the president of the newly organized American Gladiolus Society. Mr. Hendrickson, as will be seen, is a young man, having been born at Floral Park, N. Y., Sept. 6, 1875. He first went to work for John Lewis Childs in 1887 and finally worked up to the position of manager of the wholesale department of the Childs business, which he has now held for about eight years.

ISAAC S. HENDRICKSON

Mr. Hendrickson will make an ideal president for the young Society. He is energetic, popular with the trade, is a director of the Floral Park Bank, and has had exceptional opportunities to acquire valuable knowledge regarding the gladiolus which, as is well-known, has been one of the leading specialties of John Lewis Childs for many years.

AMERICAN PEONY SOCIETY.

Owing to the continued cool weather it has been found necessary to postpone the meeting of the American Peony Society to Tuesday and Wednesday, June 14-15, 1910.

A. H. FEWKES, Sec'y.

Newton Highlands, Mass.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The annual picnic of this club will be held at Pine Banks Park, Malden, July 27. The club will hold a Ladies' Night with an interesting and varied program on June 21.

W. N. CRAIG, Sec'y.

HORTICULTURAL SOCIETY OF NEW YORK.

A meeting of the Horticultural Society of New York was held at the Museum building, New York Botanical Garden, on Saturday, June 4th. At this meeting 26 new members were elected, 7 of which were life members, the remainder annual members. This is most encouraging progress, and it is hoped that the increase in membership may be kept up. All that is needed is a large membership to make horticulture an important element in New York. The meeting was followed by a lecture by Dr. N. L. Britton, on "Summer Flowers." The lecture was illustrated with colored lantern slides.

The important feature of the meeting, however, was the summer exhibition given in connection with it. This was open on Saturday afternoon, from 2 to 6, and on Sunday, from 10 to 3. There was a large attendance on both days, in spite of the inclemency of the weather. The exhibitions of the Society are becoming more and more popular and well known, and the feature of holding them on Sunday seems to be fully appreciated by flower lovers. The following list of premiums was awarded.

Peonies.

Three white, 6 flowers of each, Geo. H. Peterson, first; F. R. Pierson Co., second.

Three light pink, 6 flowers of each, Geo. H. Peterson, first; T. A. Havemeyer, gardener, Albert Lahodny, second.

Three rose, 6 flowers of each, Geo. H. Peterson, first; F. R. Pierson Co., second.

Three crimson, 6 flowers of each, Geo. H. Peterson.

Collection of singles, 3 flowers of each kind, T. A. Havemeyer.

Largest and finest collection, not less than 6 flowers of each variety, Geo. H. Peterson, first; F. R. Pierson Co., second.

Miscellaneous.

Collection of hardy roses, Mrs. F. A. Constable, gardener, James Stuart, first; F. R. Pierson Co., second.

Collection of hardy flowering shrubs and trees, E. H. Weatherbee, gardener, Francis Milne, first; T. A. Havemeyer, second.

Collection of hardy rhododendrons and azaleas, or either, T. A. Havemeyer, first; F. R. Pierson Co., second.

Collection of hardy herbaceous plants, Bobbink & Atkins, first; E. H. Weatherbee, second.

Collection of irises, Bobbink & Atkins, first; T. A. Havemeyer, second.

Six orchid plants in bloom, 6 varieties, Clement Moore, gardener, Jas. F. Dyer.

Collection of cut orchids, Jos. A. Manda.

Special.

Campanulas and sweet peas, Miss Blanche Potter, gardener, George Wittling.

Ismenes, gladioli and miscellaneous flowers, John Lewis Childs, honorable mention.

Collection of vegetables, Mrs. J. B. Trevor, gardener, Howard Nichols.

Cattleya Gaskelliana, var. Helen Roebeling, J. A. Manda, certificate of merit.

CLUB AND SOCIETY NOTES.

The Massachusetts Horticultural Society will undoubtedly decide to make the orchid show a triennial event, and the year 1913 will see a greater display by far than that of the present year, unprecedented as it was.

At the regular meeting of the Chicago Florists' Club, Harry Philpott presided in the absence of Pres. Asmus. The principal business transacted was the arranging for a dinner at the next regular meeting at which guests may be taken by the club members. Tickets one dollar per plate.

The next regular monthly meeting

GARDENERS' AND FLORISTS' CLUB OF BOSTON, GUESTS OF WM. SIM, CLIFTONDALE, MASS.

of the Cincinnati Florist Society will be held in the club rooms at the Jabez Elliott Flower Market, Monday, June 13th, at 8 p. m. Nomination of officers for the ensuing year will take place at this meeting.

On Friday, June 3, A. E. Thatcher, of the Arnold Arboretum read an instructive paper before the North Shore Horticultural Society on "Newer Flowering Shrubs." Mr. Thatcher has a wide knowledge of this subject and his work at the Arnold Arboretum has given him especial facilities for making the acquaintance of the new Chinese trees and shrubs collected by E. H. Wilson. His paper, which we hope to find room for in an early issue of HORTICULTURE, gave particular prominence to these new introductions and the large audience present were deeply interested.

The Grand River Valley Horticultural Society of Grand Rapids, Mich., were entertained at the May meeting by Mr. and Mrs. Edward Lowe at their country place, May 24th. The program was in charge of H. E. Sargent of Kent Scientific Museum. It was announced that a carload of Michigan's finest fruit was to be sent east this summer with the purpose in view of encouraging experienced eastern growers to locate in Michigan. It was asserted that the recent damage to the fruit crop in Michigan was 25 per cent. The June meeting of the society will be held at the fruit farm of H. O. Braman.

"I take pleasure at all times in recommending HORTICULTURE, as it is worth double its price."

J. G.,
New Britain, Conn.

A VISIT TO WM. SIM.

The invitation to visit the greenhouse establishment of William Sim at Cliftondale, Mass., on Saturday afternoon, June 4, was eagerly accepted by the members of the Gardeners' and Florists' Club of Boston, 125 members and friends including a number of ladies taking advantage of the opportunity to visit this noted place and enjoy the hospitality of the proprietor. We have described these houses so often in the past that it will suffice in this instance to say that they have been increased in capacity by the addition of a splendid new house, 43 x 500 and the crops now in them are of the high grade for which Mr. Sim is noted. The sweet peas are still producing heavily and picking has already begun on the tomatoes of which there are no less than 50,000 plants of unprecedented vigor and productiveness.

The company were entertained on the broad piazzas and lawn of Mr. Sim's new residence, completed last fall. After the collation a few words of welcome were spoken by a gentleman representing the Board of Trade of Saugus of which town Cliftondale is a part. Responses were made by M. H. Norton, T. J. Grey, E. Allan Peirce, M. A. Patten, Vice-president Miller and others all duly appreciative of the delightful occasion.

INCORPORATED.

Hamilton, Mont.—Nassau Orchard Co., capital stock \$10,000. Incorporators, J. H. Sapiro, A. J. Higgins and L. M. Brown, all of Hamilton.

Williamsport, Pa.—The Newberry Artificial Ice, Cold Storage and Greenhouse Co., capital stock \$30,000. Incorporators Frank W. Hill, F. M. Hill and others.

GREENHOUSES BUILDING OR CONTEMPLATED.

Bristol, Ind.—H. W. Kantz, one house.

Scranton, Pa.—Ira G. Marvin, one house.

Secaucus, N. J.—Kessler Bros., range of houses.

Allentown, Pa.—John H. Sykes, one house, next season.

Youngstown, Ohio.—Idora Floral & Landscape Co., one house.

Berkeley, Cal.—J. M. Holland, Peralta Park, house 20 x 100 feet.

Philadelphia, Pa.—Huntingdon Reformatory, palm house 42 x 51 feet.

Brampton, Ont., Can.—The Dale Estate, three houses each 850 feet long.

Chicago, Ill.—J. Bombenger, Woodlawn and 64th street, range of houses.

Fond Du Lac, Wis.—A. L. Bush & Co., Oak ave., four houses, 16 x 100 feet.

Manchester, Mass.—Estate of Mrs. James McMillan, palm house 30 x 90 feet.

Wichita, Kans.—Carter Bros., Pearce street and Central avenue, four houses, each 30 x 150 feet.

Detroit, Mich.—John Breitmeyer's Sons, Mack avenue, two houses, each 50 x 150 feet; also office building.

Chicago, Ill.—John Assa, 5350 Bowmanville avenue, two houses 20 x 250 feet. He expects to erect two additional houses when these are completed.

"Kindly discontinue our ad. for the present as our stock is about all sold out."

R. R. DAVIS & CO.,
Morrison, Ill.

NEWS NOTES.

Southington, Conn.—Olson & Lunden, florists, have sold their Buckland street greenhouse to Wm. Fischer.

Secaucus, N. J.—Kessler Bros. of New York have purchased five acres of land upon which they will erect a range of houses.

Saginaw, Mich.—Eleven acres of land on Mackinaw street has been purchased by J. B. Goetz & Sons and will be used in connection with their florist business.

London, Ohio.—A new concrete building constructed expressly for the flower business has been erected on Main street by E. J. Gould & Sons and will be used as a sales room for their products.

Lake City, Minn.—Owing to greatly increased business the Jewell Nursery Co. find it necessary to enlarge and have plans under way for the erection of a building which will about double their present capacity.

Milwaukee, Wis.—The Edelfsen-Leidiger florist corporation now occupy two stores, 347 and 349 Third street and 782 Third street. Wm. Edelfsen is president, R. Semier, vice-president, A. R. Leidiger, secretary and treasurer.

Youngstown, Ohio.—The Idora Floral & Landscape Co. has been organized by Wm. Bakody and Frank Amant to engage in the nursery business. Five acres of land will be utilized at the Idora farm and ground has been broken for a hot house.

Minneapolis, Minn.—Frank Hays, formerly employed by the Will Bros., florists at 19th avenue and 35th street N., is alleged to have entered the greenhouse and destroyed 25,000 carnations. It was charged that he did this because he was discharged and refused his pay before the regular pay day. A warrant was sworn out for his arrest. He pleaded not guilty in the police court, May 20th, and was bound over to the grand jury under \$1,000 bail.

Bloomington, Ill.—Plans for the reorganization of the Lilly Orchard Co. were recently made. This reorganization, it is hoped, will carry forward the work of the orchard until another period of good crops which will enable the stockholders to reimburse their losses caused by the partial failure of fruit crops culminating in the big freeze of this year. This company owns a large tract of fruit land in Tazewell County and a pecan orchard in the South. It has been conducted partly to cultivate the growth of fine fruit in this section and secondly for the profit of the stockholders. The officers are: President, Dr. C. M. Noble; vice-president, Thomas W. Evans; secretary, C. J. Northrup; treasurer and manager, Prof. R. O. Graham. H. W. Funk of Normal and Walter Boswell of Pittsburgh.

The annual trade sale which has come to be recognized as an institution of unusual importance in the plant business of New York City, will take place at Wm. Elliott & Sons' auction rooms on Tuesday, June 21. W. J. Elliott will officiate as usual with hammer and will dispense wit and wisdom with his customary ability.

PERSONAL.

Charles Endriss is now with Hoerber Bros., 51 Wabash avenue, Chicago, Ill.

John Barnard is now with the Bentzen Floral Co., 4029 Marcus avenue, St. Louis, Mo. He was formerly with Grimm & Gorly.

David Welch of Welch Bros., wholesale florists, Boston, is booked to sail for a brief European visit, on the Lusitania, June 29.

J. F. Huss, superintendent of the Goodwin estate at Hartford, Conn., will sail July 7 for a visit to his native country, Switzerland.

Mrs. W. W. Edgar of Waverly, Mass., is at the Waltham Hospital, recovering nicely from an operation for appendicitis which took place on Thursday of last week.

Joseph Samuel Willoughby, of Maryland, and Miss Alice Galvin, daughter of Mr. and Mrs. Thomas F. Galvin, of Boston, were married at the Church of the Assumption, June 4th. The bride carried a shower bouquet of lily of the valley. The bridesmaids carried baskets of Killarney roses. Nearly three hundred guests attended the ceremony at the church and the reception at the home of the bride's parents.

We learn with much regret and sympathy that E. S. Miller, of Wading River, N. Y., met with a very painful accident on Sunday morning while riding his bicycle. The forks broke at the head, throwing him heavily to the ground, and cutting his face and nose badly. Several stitches were taken in each lip and the nose. Besides the cuts he was bruised and generally shaken up, so that he will be confined to the house for some time to come.

CINCINNATI PERSONALS.

Miss Ada H. Kresken left last Thursday for a three months' tour of Europe.

Peter Olinger has purchased the interest of Peter Weiland, of the firm of Weiland & Olinger at New Castle and Cincinnati.

E. R. Bushley, formerly with Fred Gear, 1113 Vine street, Cincinnati, has purchased the Norwood Floral Co. at 4625 Main avenue, Norwood, Ohio.

OBITUARY.

Joseph W. Hulsizer.

Joseph W. Hulsizer of the Hulsizer Co., Des Moines, Ia., died May 23rd at his home, 1609 Center street, aged 60 years. He had been engaged in the manufacture and sale of floral decorations for the past eight years in Des Moines, moving to this city from Grinnell. He leaves a wife and one son.

John Crimmins.

John Crimmins, a gardener employed on the estate of Mrs. C. D. Prescott at Newton, Mass., was burned to death on the night of June 7, when he rushed into the burning stable on the estate to save the four-year-old child of another gardener, whom he supposed was still in the building. His age was 22 years.

PHILADELPHIA NOTES.

Charles Sim sails on the S. S. "California," of the Allan Line for Glasgow, June 11th.

A. E. Brown, of W. Atlee Burpee & Co., will sail on the S. S. "Lapland," of the Red Star Line, for Antwerp, on July 16th. He will spend most of his two months vacation in Switzerland. We trust our friend will not be rash with the Alps. We can't afford to lose him.

William H. McMurray, of 15th and Market streets is contemplating opening a branch store in the neighborhood of 40th and Market street in the fall. This will not only prove a valuable adjunct and outlet for the cut flower business, but also very handy for the large amount of outside gardening done by this concern in West Philadelphia.

European trips are so common now that it is out of the question to keep track of them all. But we must not overlook that of C. J. Rainear, the man who can give the florists pipe that won't go to pieces in twelve months. He is booked for the S. S. Kroonland, June 25th for Antwerp. We wish him the best of good company. He can't help himself this time—Bride, of course. What else did you suppose we wrote such a long paragraph for?

An exhibit of the new crested Scotti fern (*Nephrolepis Milleri*) from the Boston Orchid Show arrived here a day late for the Rose and Peony Show of the P. H. S. They were held over for the club meeting on the 7th inst. and received much favorable attention from the members. We understand the exhibit then went to Riverton for testing purposes. Mr. Miller evidently has a good thing in this and it will be in demand when he gets ready to put it on the market.

Pennock-Meehan Co. had an exhibit this week of two new climbing roses from Hoopes, Bro. & Thomas, of West Chester. Catherine Wright is a light pink cluster rose with individual flowers reaching up to 4 inches diameter. Wichuraiana and Testout are the parents. Climbing American Beauty is a hybrid between Beauty and an unnamed seedling; grows in clusters, with large, individual flowers of a brighter color than Beauty and very fragrant. Both are fine varieties and apparently of great promise. *Nephrolepis Milleri* was also on exhibition here from Bar Harbor, Maine. Mrs. Alphonse Pericat and family of Collingdale leave for Europe shortly on an extended holiday.

We had a pleasant visit the other day from that enthusiastic representative of the U-Bar—Mr. De Forest—who hob-nobbed with such building experts as George Anderson, John Westcott, John Burton, and others, and apparently succeeded in convincing them that the U-Bar was "the only, only!" Mr. De Forest also stated that, thanks to its merits and the good publicity HORTICULTURE gave to same, they had more orders on hand than they could fill. The present writer is a pronounced and habitual unbeliever, but with all his ingenuity was unable to find a flaw in the argument. But if he finds the faintest crack anywhere he will joyfully tell. He hates to get the worst of a discussion.

SPECIAL ANNOUNCEMENT

To the Growers and Retailers of Flowers :

Having succeeded **John I. Raynor** in his very large and old established Wholesale Florist Business at 49 W. 28th St., New York City, after having been his General Manager for the past seventeen years, I wish to assure all the old patrons of this well-known reliable concern that a continuation of their patronage is respectfully solicited. I am prepared to take care of all new patrons, who will find on first trial that I have only their best interests in view. I can furnish the finest quality of Flowers of every variety obtainable in market and an early call will be appreciated. Mail, telephone, or telegraph orders will receive prompt and personal attention.

Consignors solicited. Prompt returns and best market prices

P. J. SMITH

49 West 28th Street,

New York City

Telephone, 1998 Mad.

ST. LOUIS NOTES.

Sunday at Shaw's Garden.

Shaw's Garden's first Sunday opening of the year had a beautiful day, and the garden was packed with visitors all day long. At the close it was announced by the directors that 17,406 had passed through the gates. G. H. Pring, who has charge of the big orchid houses, had his hands full; also Mr. Thompson of the cacti houses. Supt. H. C. Irish says it was a well behaved crowd and all were taken care of and shown all points of interest by the big force of students.

Visiting Nurserymen.

Delegations of nurserymen from Alabama, Georgia and Rochester, N. Y., en route to the Denver convention, assembled here last Monday and were taken in hand by Mr. Frank Weber and entertained until noon when they, with the local delegation, left on a special. Delegations were taken on at Kansas City and Omaha. The majority of the visitors expressed themselves in favor of St. Louis for next year's meeting.

Personal.

William C. Young, of C. Young & Sons Co., is visiting all the large plant growers in Illinois, Indiana and Michigan this week.

Miss Francis Kling, stenographer at Young's Greenhouses, will leave this week for a two weeks' vacation at Atlantic City, N. J.

John Barnard is now in the employ of The Bentzen Floral Co., and Miss May Burns has taken a position with the New Paris Floral Co.

W. J. Vesey, of Fort Wayne, Ind.,

was a visitor last Sunday. He was accompanied by his oldest daughter, who was entertained by Miss Tillie Meinhardt.

DURING RECESS.

Ball Game at Madbury.

An exciting 12-inning game was played at Madbury, N. H. between the Park Street Market (Boston) team and the team from Wm. H. Elliott's. Final score was 9 to 10 in favor of the Elliott's and the game was very close throughout. In the 9th inning the score was tied 8 to 8, the 10th and 11th innings neither side scored and in the 12th the Park Street Market team made one run and the Elliotts two. Ten men and a few "rooters" from the Market went up and considering that they played the well outfitted Elliott team on their home grounds, feel that they did well to keep the score so close. Saturday the 11th the Park Street Market team plays the Landscape Architects on the Reservoir grounds, Brookline, and the following Saturday play the team from Thomas Roland's at Nahant. Both of these games look like exciting contests, especially the latter.

Chicago Bowling.

Asmus	159		

DETROIT NOTES.

The Weather and Crops.

Not long ago we were jubilant about the advance of vegetation as compared with former years but now we are over three weeks behind. Everybody is complaining because outdoor operations are so much delayed and such plants as have been planted out do not show any progress. An idea of the weather conditions can be gained from the fact that on June 1st coleus were badly hurt by frost and not one local peony has come to our markets yet. This last feature will work great embarrassment in the coming Commencement season. Business is generally very good.

A Clever Thief.

Many peculiar thieves develop but the newest of them all was a neatly executed theft by a young man, Wm. Tucker, who took 7 colonial centre pieces from the banquet table and tried to sell them in local flower shops. Hugo Schroeter who had proved himself a good detective several times before discovered the culprit and was instrumental in landing the fellow in jail and the goods where they belonged.

Notes.

Breitmeyer's had the decoration for the Board of Commerce which turned out over 800 strong to feast with Pres. Taft, who by the by was welcomed by Mayor Breitmeyer in a very neat speech.

All local florists sympathize with friend Pautke at Grosse Point who mourns the loss of his 4-year-old baby girl.

FRANK DANZER.

A Prominent Florist Recently Came to Wyncote and Looked Over Our Palm Houses, Including This One

He has purchased heavily from us before, and came several hundred miles to personally place his order again this year.

Before he left, he assured us that he wouldn't have any more imported palms. "Heacock Quality" had convinced him, and had made him a "repeat" customer.

We have on our books scores of others like him—customers who stay with us year after year because

our stock has "made good" with them and their trade and enabled them to build up a Palm department showing a steady profit.

Have YOU learned the advantages of handling our Palms? If not, you cannot select a better time to commence than this summer; we have an unusually fine stock just now, and can ship on short notice. Look over the list and get in touch with us by next mail.

Trade

he... Convention.

ing to the coming Convention having been the next thing in order for members to attend, and it is hoped that there will be a liberal attendance. Those who have been looking forward to a dip in the surf may be disappointed unless they are prepared to take it in pretty chilly water. The cold weather has continued for so long, or in other words, there has been so little really warm weather that the sea water will undoubtedly be too cold to suit the average bather.

Losses on Onion Sets and Potatoes.

We are informed that a good many onion sets have been dumped during the past week or ten days, dealers having become convinced that there will be no market for them this season. The total loss from this source is not believed to be heavy. The loss due to the slump in the price of seed potatoes has, no doubt, been heavier than on the onion sets although potatoes of course are not a total loss as are the onion sets.

Low Prices on Canning Peas.

The canning of peas is proceeding under pressure throughout Delaware and Maryland and reports are that the crop is rather light. The price of peas in the pod in Baltimore city is reported to be rather disappointing, and in Washington it is even lower. We are informed that in the latter city the small-podded varieties are bringing only \$1.50 per barrel of two and one-half bushels, and when the cost of picking, which is seventy-five cents per barrel, is deducted there is little or nothing left for the truck farmer. Large-podded peas, such as Amer and Gradus, are bringing from \$2.50 to \$3.00 per barrel, but even this price is not a very paying one.

The Next Cannners' Convention.

We are informed that a serious hitch has occurred in the plans for the Cannners' Convention of next winter. It was generally supposed that Milwaukee had been settled on as the place after a committee representing the allied associations had conferred with a committee of the business men's association of Milwaukee, and after the said allied committee had appointed a sub-committee which visited Milwaukee to look over their convention hall and decided that everything was acceptable. The only matter which was not definitely settled at the time was certain concessions asked of the hotel men's association. The business men's committee undertook to speak for the hotel men, and while they did not have authority, assumed that what they accepted would be approved by the hotel men. It seems, however, that the latter are not disposed to sanction what the business men's committee promised and there is therefore a hitch, which, unless it is speedily adjusted will result in another city being named for the next Cannners' Convention. Doubtless the matter will be given earnest attention by the cannners and allied associations as the matter should be settled

Henry F. Michell Co., 518-1018 Market St. PHILADELPHIA

at as early a date as practicable. We shall be in a position to give definite information of this just as soon as the matter is finally decided upon whether Milwaukee is accepted or some other city.

A Canning Company in Trouble.

It is, no doubt, generally known that the Waukesha Canning Co. are in the hands of receivers, but it is also given out by the receivers that they intend to operate the Company's plants and fill all orders for future delivery accepted by the firm. As this concern was a very large user of pea seed, it is assumed that they must be owing a number of pea growers for seed shipped them last winter. We have not received definite information about this, but will probably get such information in the near future. Undoubtedly all accounts will be paid pro rata. The indebtedness of the concern is said to be between five and six hundred thousand dollars, the nominal assets being several hundred thousand more, but as a matter of fact it is not believed that the assets are anywhere equal to the liabilities, and the creditors must be prepared to accept a substantial cut in their claims when the same are finally adjusted.

Another Frost.

A severe frost in northern Michigan and Wisconsin at the close of the past week has done considerable damage to tender crops, but full information is not at hand. We should be able to make a more complete report on this matter in our next issue.

Notes.

We are informed that I. N. Simon & Son have closed their Newark, N. J., store, but it is reported that another party has his eye on it and may decide finally to open a store somewhere in the vicinity of that occupied by Simon & Son.

J. F. Noll & Son, Inc., report a very excellent trade this season, the total showing a very gratifying increase over last year. It is generally believed that their experience has been a common experience of the trade as a whole and we have heard very few complaints from seedmen this year.

Howard M. Earl arrived at Los Angeles on 29th ult. and spent part of the day looking over the Bodger sweet pea farms at that point. On the 30th the start was made for the Burpee farm, "Floradale," near Lompoc. Straw is short in the sweet pea fields so far as yet seen, which means a light crop if the condition is general.

Washington, D. C.—F. W. Bolgiano & Co. have recently moved into a five-story warehouse, 1009 B street N. W. The general sales room will be on the first floor, fertilizers on the second, seeds on the third and implements on the fourth and fifth. The move was made on the twenty-first anniversary of their senior's starting in business.

PUBLICATIONS RECEIVED.

"Soils and Manures," by J. Alan Murray, B. Sc., has just been published as one of the "Westminster Series," by D. Van Nostrand Company, New York City. This volume of over 350 elegantly printed pages will be found invaluable to anyone whose interest centers in the intelligent cultivation of land and the conservation of soil fertility. That the author thoroughly understands the all-important subject of plant needs and soil enrichment and has the rare ability to treat it in an exhaustive manner from a scientific standpoint and yet make his pages interesting and intelligible to the layman is the first impression one gleans from a glimpse of its pages. Under the main divisions of "The origin of soils," "Physical properties of soils," "Chemistry of soils," "Biology of soils," "Fertility," "Principles of manuring," "Phosphate manures," "Phospho-nitrogenous manures," "Nitrogenous manures," "Potash manures," "Compound and miscellaneous manures," "General manures," and "Farm yard manure," the author has covered nearly 300 sub-topics and there is an appendix giving instructions for valuing manures, as issued by the Highland and Agricultural Society of Scotland and a series of tables on the composition and manurial value of various farm food, calculated by Dr. Charles Crowther.

It would be very difficult to ask a question on any phase of the great sub-

Of Interest to Retail Florists

PHILADELPHIA RETAIL HAPPEN- INGS.

Two or three carloads of plants and flowers have already been shipped down to the "million dollar pier" at Atlantic City this week by the Habermehls for the annual convention of the Railway Supply Manufacturers' Association. In addition to their general contract, Messrs. Habermehl have supplementary orders from the exhibitors at two or three hundred stalls and pagodas. The extent and importance of the decorative work has compelled the opening of a temporary office for the firm at Atlantic City, and the chief of the decorating department—Wm. Graham—backed up by the head of the

firm, John Habermehl, are having one of the liveliest times of their lives.

While on the subject of Habermehl I must not forget to mention a most unique dinner decoration they got up recently at the old Geo. W. Childs mansion. Ceiling, walls and floor were at the bottom of the sea! Waves on all sides, old anchors, sea anemones, hulks, mermaids—then some moving pictures to make the scene perfect. The occasion was the departure for a sea trip to Europe of a wealthy department store proprietor

If it's true it can be told more than once—to infinity in fact. That is my excuse for again saying that to sit on your chair and expect business to come is—you all know the proper adjectives. I talked to a retailer today. He had a magnificent window display, a corner store right in the heart of the city, and he couldn't understand why the public were not rushing in to buy. "If I mark them down from 50 to 10," said he, "I know it wouldn't make the slightest difference." Perhaps he was right; but how about another retailer

of my acquaintance not in the center, but away outside and with no corner store? How does he go about it that he can have crowds all day long? I know but I'm not going to tell you this trip. As Sam Weller said, "Make your love letters short, so she'll wish there was more."

NEWS NOTES.

Chicago, Ill.—The Chicago Rose Co. has moved to the basement of number 6 Wabash Ave.

The old established florist business of James Bolling, Montgomery street and West Side avenue, Jersey City, N. J., will hereafter be carried on by Mr. Bolling's son Charles.

Detroit, Mich.—John Breitmeyer's Sons are giving their Mack avenue plant a thorough overhauling and will erect two new houses 50 x 150 feet and also an office building. Their neighborhood has been so thoroughly built up with first-class residences that it became a necessity to open that place for general business. Formerly nothing whatsoever was being sold at the greenhouses.

Our advertising columns announce the removal of Phil. F. Kessler from the premises which he has occupied for a number of years in the Coogan Building, New York City, to the second floor above, in the same building. We are always glad to note evidences of growing prosperity in the case of such worthy representatives of the wholesale florist trade as Mr. Kessler. His popularity with the trade of New York has been achieved in the right way and, in his new and commodious quarters, his business will undoubtedly continue to grow and prosper.

CHICAGO NOTES.

A Wedding Decoration.

A canopy of a new type was made by A. Lange for the Rice-Greenfelder wedding at the Congress Hotel. Instead of the one centre support which takes up the room needed for the wedding party this canopy was supported on either side, leaving the center clear. It was studded with electric lights and occupied one end of the Florentine parlor, while the other end of the room was used for the tables, being separated by a partition of palms. The table of the bridal party was of heart shape with Killarney roses and lily of the valley in Austrian vases, and the six guest tables surrounded it, each one having a basket of Killarney in the center. The large fountain, with its electric lights, was surrounded with ferns. Boston ferns also hung from the balconies. A model shower bouquet of white sweet peas attracted much attention in Mr. Lange's window.

An Advertising Retailer.

H. R. Hughes, who has won fame as an advertiser of unusual ability and unique methods, has now installed a stereopticon which from an opening in the roof of his store throws pictures upon the side of an adjoining building which can be seen for a long distance in several directions. Last month a hundred children danced in the spacious windows of his store and various calcium lights were thrown upon the scene, making a sight never to be forgotten. Mr. Hughes plans all his attractions and writes his own stories which accompany them, and says that financially the publicity pays well.

Trade and Personal Notes.

A cablegram from O. P. Bassett and bride announces their safe arrival on the other side.

Fred Munzing sailed for England on the Lusitania on the 7th. He will spend the summer there.

It is rumored that F. Fuhrmann of 3166 N. Clark street will soon open a new place on Evanston avenue.

D. Papatorry has taken a five years' lease at 53 Randolph in the Masonic Temple. He will run this in addition to his store in the Briggs Hotel.

June 2nd made a record for the coldest June day in many years. Hail fell in many parts of the city and masses of ice four inches deep that accumulated between houses were unmelted the following afternoon.

The Killarney rose is exceedingly popular this week. A beautiful table was arranged at the Blackstone by Harry Rowe. The center piece was a mass of the roses with long streamers of Asparagus plumosus, overlaid with roses. The corsage bouquets were pink sweet peas.

Visitors:—G. W. Stumpner, Argos, Indiana; W. A. Harkett, Dubuque, Iowa; August Casper, Rochelle, Ill.; Mr. Anderson, gardener at Deere Estate, Moline, Ill., en route to Sweden for a summer outing in his native land; J. G. Crozier and son Milo Crozier of Dubuque, Ia.; C. L. W. Snelder, El Paso, Ill.; W. Young, St. Louis, Mo.; A. L. Glasser, Dubuque, Ia.; E. Kirschner, Winona, Wis.; Chas. Cannon, St. Louis, Mo.; C. Currie, Toledo, O.

Flower Market Reports.

BOSTON There are evidences of a mild slump in prospect in this market. All that has kept it intact thus far has been the continued cool weather, and it only requires a spell of high temperature such as always comes sometime in June to bring in an avalanche of retarded stock. The market has been greatly favored in another sense by the cool weather and the resultant sturdy petalled flowers, in that it has made shipping a pleasure for those engaged in it and has elicited compliments and gratitude from out-of-town buyers generally, for the splendid condition in which goods arrived for Memorial Day. Roses have been moving very satisfactorily and quality is good throughout the entire line. Carnations have sold well, also, up to the middle of this week, but they are now showing decided weakness. Lily of the valley is scarce, much in demand, and higher in price than for a long time past. Lilies are very draggy and peonies are discouragingly slow. Sweet peas are over-stocked and values are on the downward trend. Heavy shipments of stocks are coming in every day—stocks intended for Memorial Day but which did not mature in time, and the prices which they now realize are entirely inadequate to recompense the grower. Very fine Jack Rose dahlias are in this market and are a very pleasing and acceptable novelty, so early in the season. They are grown by W. C. Ward, of Quincy. Five transatlantic steamers have sailed from Boston this week, carrying over 3000 passengers and the local flower business has experienced a boost of no small value in consequence.

June is recognized as **BUFFALO** the month of weddings. Everything centers about the weddings and commencements now and the trade is looking forward for a busy ending of spring business. Bridal flowers are gradually being in demand, Bride roses, White Killarney, lily of the valley, orchids, paeonies, etc. The past week left the market in good condition and trade was very active on some lines. Stock has been scarce, though a good deal more could have been used, especially in the sweet pea line. Other stock such as carnations, roses, lilies, daisies, etc., was in good supply and everything seemed to clean up satisfactory. Home grown paeonies are slow in coming in, only a few of the early red being had. Greens of all kinds are in good supply.

That an unusual amount of business was done during the week following Memorial Day is conceded by both wholesalers and retailers, and this refers to both local and shipping trade. Scarcely a shrub is in bloom anywhere in this vicinity and pansies are almost the only out-of-door flowers, so the florists are called upon whenever there is an occasion that demands the use of flowers. The result is that prices are almost as high as before Memorial Day, in fact, there is no change in the price of roses. Carnations, of course, bring less, but the demand is steady and all good stock sells readily at good prices. Beauties

“ “ & Spreng. (100 bchs.)	20.00	to 30.00	25.00	to 40.00	25.00	to 50.00	25.00	to 50.00

are still scarce, especially long ones, and there are many cripples among all lengths. The only real good Beauties to be had are those just beginning to come from the plants grown purposely for summer blooming. Peas of the Spencer type are fine and sell readily at from \$1.00 to \$1.50 per 100, but the old time sweet peas, with the short stems, do not sell quickly at fifty cents. Local growers of peonies report from one fourth to one third of a crop, the qual-

ity of the old red being only fair, and no one can say yet what the quality of the later varieties will prove to be. As the season for callas closes the demand increases and lilies are very scarce. Asparagus plumosus and Sprengeri are both selling about as fast as obtainable and in general this can be said of all kinds of good stock, owing to a stronger demand than usual at this season of the year. Another week will bring commencements.

Flower Market Reports

(Continued from page 895)

Plenty of stock of all
NEW YORK kinds is being received. Business is gradually dropping off and it begins to look as if the end was in sight for this season. It has not been at all satisfactory from the standpoint of the wholesale trade. Market conditions have been favorable to the retail trade all through the season, but even they are not enthusiastic, as a rule, and many are expressing dissatisfaction with the season's outcome. No fault can be found with the quality of the flowers supplied. Especially during the past month has the average quality excelled anything in past seasons for corresponding date, the cool weather proving a God-send in this respect. As our quotations show, prices are dropping and will soon reach summer basis. Small roses are unloaded at any sort of sacrifice.

Demand last week
PHILADELPHIA ran mostly on sweet peas, lily of the valley and roses. Peonies also went off in good shape—there being some big orders for these every day. On the whole it was a satisfactory market; there being a lot of wedding and commencement work around, which stirred up quite a little business in wholesale centers. On account of rainy, cold weather, outdoor sweet peas, on which nearly everybody was depending, proved quite a disappointment. The indoor stock came back to their own again in consequence. The latter are, of course, not so easily af-

ected by cold or wet weather. American Beauty roses were plentiful and the demand was about normal. There are very few Liberties arriving; but plenty of very good Richmonds. The quality of Killarney and Maryland keeps up excellently, as does that of all other roses—exceptional for June. White roses have been in better demand as a general thing than many of the colored. Carnations had their in-ning Memorial week, and naturally, receded to a more modest seat the past few days. The "June girl" evidently sorely needed lily of the valley, to judge from the briskness of that market. Happily her needs were all attended to in good shape—plenty of fragrant stock and mostly high grade. Gardenia growers are anxiously looking for some improvement in their market and some is certainly coming to them. Things in that line were the faintest trifle better. Orchids fairly plenty and quality very good. In outside material in addition to peonies and sweet peas, the most important new items are Gladiolus Shakespeare (and other choice varieties from Southern points), lychnis and coreopsis. Peonies will probably be available for a couple of weeks yet; but the local cut is about over—with the exception of a few of the very late varieties.

Flower Market Reports.

(Continued from page 894)

Business for Memorial Day was excellent and since then has been very brisk. Everything on the market, including prices, has improved, and present conditions give great promise. Wholesalers are well supplied with stocks of all sorts with the exception of carnations and sweet peas, the demand for the former having had the effect of inflating prices considerably and in many instances carnations have been practically unobtainable. The market was short of sweet peas for which there was an excellent demand. Both Beauties and tea roses were in better supply and bringing good prices. Callas are to be had and selling well. Harrisii lilies are on the short side of the market. Hardy phlox and Spanish iris are moving nicely. The supply of lily of the valley is limited, with a good call. Peonies are arriving in large quantities with only a fair demand. Green goods of all kinds plentiful with the possible exception of smilax.

ST. LOUIS its level this week.

Prices have come down to almost half what they were on Decoration Day of which the majority in the trade say it was a good business day local as well as in shipping to near-by towns. Dealers in plants say their trade was the largest they ever had. There is plenty of good stock in the market for this week when a great deal of business is expected from weddings, school closings and dinner parties to vacationists who are about to depart for the summer. Prices for this week run as follows: Roses lowest, \$2 to \$6 per 100; carnations, lowest \$1.50, top \$3; lily of the valley, \$4; sweet peas, 35c. to 50c.; lilies, \$8 to \$10; gladioli, \$6 to \$8; extra fancy long Beauties, \$3 to \$4 per dozen, medium, \$1.50 to \$3 per dozen, and shorts \$4 to \$10 per 100. All greens are plentiful except fancy ferns which are away up in price.

Landscape Gardening

PROF. CRAIG

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Bachelor, of Cornell University.

Gardeners who understand up-to-date methods and practice are in demand for the best positions. A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

Here It Is

As told in last week's issue of HORTICULTURE this little machine played an important part in the culture of the plants which, composed the Superb Orchid Group which won the \$1000 prize at Boston.

It is the Castle Automatic Circulator

It controls, equalizes and distributes the heat and is recognized by leading growers as an indispensable factor in successful hot water heating.

Ask the winners

The
Julius
Roehrs Co.

Or send to us for a list of the many Prominent Plant and Flower Growers who have installed this device and will gladly commend it to you.

Whatever troubles you may have had with your heating circulation can be completely overcome by installing this machine. It works automatically and requires no attention.

Send for descriptive circulars and testimonials. **DO IT NOW!**

Greenhouse Thoughts To Think Over

WHEN you selected your site for your outdoors garden you didn't dig up the ground in any old spot and plant things any old way and expect good results. You saw to it that the conditions were the very best possible. You would be inclined to call a man a "wee bit nutty" who didn't. Then tell us why do you suppose it is, that some men when it comes to building their interior garden—the greenhouse—do not give it an equally careful consideration?

Wouldn't you think that the best house that the best concern could put up would be none too good? Wouldn't you think that only the house giving the plants the greatest amount of light and costing the least for repairs would be the natural thing to consider?

Isn't it only logical that the experience greenhouse builder knows his business better than **just a builder**? Isn't it reasonable that with our modern plant combined with our over twenty-five years of experience, that we should have a superior house to offer you? Then by all that is reasonable reasoning, isn't it reasonable that you should build either our Half Iron Frame or Iron Frame house?

Hitchings & Company

Designing & Sales Offices
1170 Broadway, N.Y.

General Offices & Factory
Elizabeth, N.J.

A SUGGESTION

Suppose you should want your greenhouse located where it will be rather prominent, necessitating its being ornamental—you couldn't do better than build one of our Curvilinear houses something like this one.

There is an undeniable beauty and attractiveness in the long sweeping curve of the roof lines, and you well know they are splendid growing houses.

As for the endurance of the Sectional Iron Frame Construction, all we can say is, that we haven't lived long enough yet to know how long they will last. Those erected over thirty years ago are still looking decidedly youthful.

By the way, have you the 1910 edition of our Handy Hand Book? Shan't we send you one?

We are expecting an importation to arrive at an early date. We have imported this variety for many years from an experienced collector and it has proved all we claim for it both as to size of flowers and intense coloring.

This Orchid is one of the most popular and free-flowering types of the Oncidium family. Our past importations have come fully up to standard. *Oncidium varicosum Rogersii* throws 3-foot stems, bearing as many as 170 blossoms of an intensely rich golden yellow, 2 inches and over in diameter, and can be successfully grown either on blocks of wood, in pots or in baskets, and flowers in November and December in a night temperature of 55 to 60 degrees.

\$1.25 each, \$12 per doz., \$100 per 100; selected plants \$1.50, \$2, \$3, and \$5 each according to size.

Notes From the Arnold Arboretum

The great mass of visitors to the Orchid Show held a few weeks ago here at Boston did not perhaps pay much attention to the extensive and interesting collection of trees and shrubs introduced from China by the Arnold Arboretum and shown by R. & J. Farquhar & Co. These plants mostly in a young state and not or only imperfectly in bloom could of course not compete with the gorgeous flowers of the orchids, but to the initiated they promise more for the future and will be of greater value to the nurseryman and florist than these splendid orchids, for many of them will finally find their way in every park and garden. Apparently the most attention was directed to some of the vines and particularly *Ampelopsis* or *Parthenocissus Henryana* with its beautifully marked foliage. In habit and foliage this plant much resembles the Virginia creeper but in regard to the color of its foliage it may be compared with the favorite greenhouse climber *Cissus discolor*. The leaves are dark velvety green on the upper surface with silvery markings along the midrib and the veins, the under side being more or less purple, particularly while the leaves are still young; in autumn the foliage changes to various shades of red with the silvery markings still preserved. It may also be used as a basket plant in the greenhouse or conservatory, as the Boston Ivy sometimes is, than which it is doubtless much more beautiful with its handsomely colored foliage.

Of another valuable new climber, *Clematis Armandi*, unfortunately only an inferior form was shown in bloom in the same exhibit and it should be understood that the species ought not be judged by that plant. A much finer form was exhibited early in spring, also by Messrs. Farquhar, at one of the smaller shows at Horticultural Hall. *Clematis Armandi* varies greatly in the size of its flowers which may attain two and a half inches in diameter and resemble in color, shape and time of flowering those of *C. montana*, but the foliage is evergreen, a new feature among our hardy *Clematis*, which makes *C. Armandi* a very desirable introduction. An illustration of this *Clematis* will be found in the issue of HORTICULTURE, March 12, on page 368.

Another exhibit at the Orchid Show which probably did not attract the attention it deserved, was the Cedars of Lebanon of which two fine plants about six feet high were shown by the Arnold Arboretum. These plants were raised from seed procured about six years ago by the Arnold Arboretum from the high mountains of Asia Minor, snow-clad during a large part of the year, the highest altitude where *Cedrus Libani* is known to exist. The plants have now stood without the slightest injury the last five winters in various exposures at the Arboretum, which gives us the assurance that we at last possess a race of that famous tree hardy in this latitude. Before this introduction, for which we are indebted to Prof. Sargent, *Cedrus Libani* could not be grown successfully in the northern Atlantic States. Every one who has admired the stately old Cedars in England or the climatically more favored regions of continental Europe, will rejoice in the thought that we shall in future be able to see this beautiful tree, to which its historic and religious associations lend an additional charm, growing in our parks.

A broad-leaved evergreen which ought to be better known is the Japanese Box-tree, *Buxus japonica*. It

has proved perfectly hardy at the Arboretum, hardier than the common Box and has the advantage of a handsomer foliage. The leaves are broader and of a bright pleasing green. As we have not too many broad-leaved evergreens hardy in this latitude and the shrub is easily propagated by cuttings, there is no reason why it should not be found in trade where it is at present hardly known.

It did not need a very trained eye to pick out among the Bush Honeysuckles flowering at the Arboretum the *Lonicera amoena* var. *Arnoldiana* as one of the handsomest and most graceful of all. It is a hybrid of *L. tatarica* and *L. Korolkowii* and originated only a few years ago at the Arboretum. When the slender branches, clothed with bluish green, rather small and narrow foliage, are covered with a multitude of light pink flowers borne on slender stalks well above the foliage, the shrub presents an exceedingly light and graceful appearance, which will make it one of the most favorite Honeysuckles when it is better known.

Alfred Rehder

Trans-Atlantic Notes

THE NETHERLANDS UNION FOR BULB GROWERS IN HAARLEM

Certificates of merit were awarded at the last meeting of the committees for narcissus and tulips to the following, viz.: Narcissus Glory of Wassenaar, a large yellow flower, wide when fully expanded, the perianth pale yellow, and darker corona; Narcissus Glory of Haarlem, having an erect golden yellow corona; Narcissus Chanticleer with a large citron corona of a light tint; and single flowering Tulip Oranjeboven, an early flowering variety of a deep reddish orange color, resembling Prince von Oesterreich.

HAEMANTHUS LESCRAUWAETHII

This bulbous plant, obtained by the Botanic Garden at Brussels from the Congo region a few years ago is one of the easiest to cultivate and flower. Even the smallest bulbs produce flowers. The color of the latter, their form and flower shaft have a similarity to *H. Katherinae*—a Natal species. From the readiness of the species to produce its flowers it is probable that by crossings with other species which flower but rarely under cultivation, varieties that flower with greater freedom will be obtained. To cultivate the plant, which does not become leafless, in the resting period, it will require a strong, rich soil, and a place in the temperate house. Thus writes B. Vogtlander in "Die Gartenwelt" for May 21st last.

Dr. R. Thiele who has recently returned from a scientific visit to East Africa of considerable duration, has succeeded Prof. Fesca in the school for Tropical plant culture at Witzenhausen on the Werra.

LIEGNITZ

A great Rose Show is to be held from June 25 to 28, at this town, and the Society of Rose Amateurs has issued the program for the sections, "Cut Blooms of Roses," and "Florists' Art with the Rose." One flower only of a variety may be shown in an exhibit, and it must be shown with its leaves. There are 46 competitive classes.

A rose festival

Portland, Oregon, has just concluded a week of rose carnival. It is estimated that no less than 100,000 visitors flocked to the city and gave themselves over to the enjoyment of the spectacular event. The festival spirit was dominant everywhere. There were floats, electrical parades and pageants symbolical of the growth of the city and of the magnificent resources of the great "Golden West." There were naturally many features not even remotely connected with roses but the roses were there, too, and the advertising value of it all to the Queen of Flowers cannot be overestimated. It is asserted that since the Rose Festival movement was started three years ago there have been planted in Oregon gardens more than five million roses. That sounds good and we congratulate the people of Oregon on the fact. Developing a popular interest in gardening means refinement and does more for the advancement of horticulture than a lifetime of the black roses and other freak gimcracks which some communities are being taught to look upon as the standard of horticultural progress.

The orchid's future

The English correspondent of our New York contemporary writes of the waning of interest in orchids and is authority for the assertion that orchids over there "are done." The sale of the entire Rochford stock is put in evidence as proving the truth of the statement. This is certainly disquieting news, if true, but from what we have been told by a well informed English authority—one not in any way connected with the orchid business—we conclude that it is not borne out by the general facts. On the contrary, we are assured that there are not only no signs of diminution in orchid interest but that their culture continues to increase in all parts of that country. That the giving up of their orchid business by the Rochfords does not necessarily indicate a general decadence any more than the abandonment of rose culture as a specialty by any one of our large rose growers here would prove that the rose is losing caste in America, is something we like to believe. The orchid is possessed of qualities which assure it a unique and unassailable position in the floral kingdom for all time and we submit that our American horticulturists can with entire safety continue to extend its culture as a commercial proposition.

Where is the hitch?

Reading the oft-repeated tale of congested markets, over-production and slaughter prices in the wholesale flower markets of some of the most populous centres the question must suggest itself as to what is being done or can be done to provide a remedy for this unfortunate state of affairs. The regular retail distributors in these districts, it must be confessed, have proved entirely incapable of providing any adequate outlet for the product now at their disposal. The retailer naturally views with disapprobation the advent of the department store into the field of operation but suggests nothing in the way of an alternative promising a plausible remedy for the conditions existing. In the meantime the situation becomes worse each succeeding year. The great object to be sought is to get the big daily floral product effectually and inexpensively into the hands of the people. The man who must be the heaviest loser every day until this problem has been solved is the grower and he is the man who will have to tackle it eventually, beyond a doubt. Flowers need be a luxury no longer—they are plentiful enough at all seasons of the year and, *provided all are sold*, can be sold at a price within the reach of the humblest classes. The department store seems to be doing a good work in that it is calling the attention of the public to this fact.

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Callas.

By this time the flowering period of this useful plant should be at an end. It is very important that the bulbs should be treated to a good period of rest, that they may have time to recuperate for another period of flowering. This can be done by laying the pots on their sides in some warm sunny position, and letting them rest until the end of July or up to the middle of August. If you want to increase your stock you can plant out a quantity of the small offsets or bulblets in some rich soil and they will increase surprisingly in size by the fall, when they can be carefully lifted so as not to injure the roots. If they are watered and shaded for a few days, they will grow quite fast and make good stock in time.

Fuchsias.

If you have not already selected some plants of all the varieties that are most desirable, you should lose no time in doing so. You can grow them on either under glass or outside so as to produce large plants for next winter's propagation. If grown on vigorously you will have fine wood matured by September. Then give them a rest of about six weeks in some cool house, and withhold water, that is to say, give them only enough to keep the wood from shriveling, and then you can start growth in a good brisk heat and you will have cuttings that will grow into fine flowering plants. But if you don't have well ripened wood to produce cuttings in the winter time you will never be successful in having good salable plants.

Lycastes.

Of the easily grown orchids none are more admired for their beauty than the lycastes. When growth begins they should have abundance of water. Even during its season of rest they should never be allowed to become too dry at the roots. They do well in pots or pans half-filled with clean pieces of broken crocks. They like a compost of live sphagnum and good fibrous peat and some broken charcoal. As with the greater number of epiphytes, moisture and heat afford all or nearly all the nourishment they require. The cool orchid house that is set apart for the accommodation of the many lovely mountain species from South America, will suit this genus. Among the numerous varieties *Lycaste Skinnerii* is undoubtedly the best bloomer. It lasts a long time in perfection if care is taken to keep the flowers from getting damp. *Lycaste cruenta* and *Harrisonia* are also very good.

Palms.

This is the season when palms make their best growth and the growers' chief aim now should be to have his palms which are used in decorations for various festive occasions in the best possible condition. Don't keep the glass too densely shaded, and guard against an over-stagnant humidity, which is only likely to occur at this season of the year and is bound to produce a soft and flabby growth. They should have on all favorable opportunities an abundance of ventilation. All bug or scale-ridden plants

EXHIBIT OF CUT ORCHIDS BY JOSEPH A. MANDA AT BOSTON ORCHID SHOW

should be given a thorough cleaning and if possible kept by themselves. Syringing should now be in order to prevent bug and scale from gaining a firm foothold. Palms that are excessively pot-bound should now be repotted—those of advanced age and young stock that may require it, thinning and spreading out the different sizes and grades so as to expose them to the wholesome available light and air. They should not be crowded into closely packed quarters now, while vegetation is so active. By frequent spreading out at intervals from now up to the fall, you will have your palms in good condition to meet any demand that may come your way.

Perennial Candytuft.

Iberis sempervirens and its varieties merit a place in all collections. They have an excellent constitution with free flowering qualities, surpassed by but a few border plants for covering spaces or planting on the front of a flower border. They are of easy cultivation and will grow in almost any soil. The flowers of *Iberis* Snowflake are individually large, of the purest white, and produced with the greatest freedom. When they have become well established a fine lot of bloom is the result. Now is a good time to increase your stock by taking cuttings, which root very easily if taken off at any time during the summer, and put in some frame where they can be kept close for a few days. Where there is trade for effective spring bedding, this plant will prove of a great value to any florist.

Sowing Fern Spores.

This is a very good time to make a beginning to replenish your fern stock, as ferns sell good in all sizes. It is remarkable how rapidly nearly all species grow into nice salable plants from spores. Most of all the popular ferns are usually thus increased. The spores should be sown in well-drained seed pans on the surface of a mixture of fibrous sifted

peat, loam, leaf mold and some sand. This soil should be firmly pressed and well watered, and then the spores should be scattered evenly over the soil and at once covered with a glass so as to prevent water or the dry air getting to the surface. When watering the pans they should be placed up to near the rim in a tub of water and left there till they absorb it to the surface. They should be placed in some desirable shady place. When the young plants can be handled, or rather lifted with the end of a pointed flat stick, they should be pricked out into well-drained pans filled with similar soil. What they will need then is a sufficient amount of moisture at their roots and the atmosphere should be kept moist also. As they become large enough, they can be potted into thumb or 2-inch pots.

JOHN J. M. FARRELL.

Mr. Farrell's next notes will be on the following: *Asparagus Sprengeri*, *Bougainvilleas*, *Care of Planted and Plunged-Out Stock*, *Cinerarias*, *Pelargoniums*, *Poinsettias*.

WELL-KNOWN ESTATE CHANGES HANDS.

The estate of John H. Taylor at Bayside, New York, has been sold to the Draper Realty Co., a syndicate of which George O. Draper, cousin of Governor Draper of Massachusetts, is president, and Wm. McConnell, secretary. Mr. Taylor retains an interest as the second largest stockholder. It is the intention to develop the property as a high class residential district on the same lines as Tuxedo, under the supervision of Alfred S. G. Taylor, who is a graduate of Harvard and Columbia and Beaux Arts of Paris in landscape and general architecture. The well-known rose houses will be continued and will be remodelled and brought thoroughly up-to-date.

The property comprises over 300 acres. It has been in the hands of John H. Taylor since 1881 and of his family since 1863. Mr. Taylor and family sailed for an extended European tour, June 11, on S. S. Vaterland.

AMERICAN PEONY SOCIETY

Annual Meeting.

The annual meeting of the American Peony Society was held in the Trustees' Room, at Horticultural Hall, Boston, at 3 P. M., on June 14. President B. H. Farr opened the meeting with a few words of greeting and Secretary Fewkes followed with his report and that of the nomenclature committee by Pres. Farr. The officers of the present year were all re-elected to serve for another term and it was voted to meet next year at Philadelphia.

(The President's Address and report of nomenclature committee are in type and will appear shortly.—Ed.)

Secretary's Report.

The present membership of the Society includes fifty-two active and five honorary members. During the year we have lost one member by death, Thomas C. Thurlow of West Newbury, Mass., who passed away July 2, 1909. He was a charter member of the Society, taking great interest in all that pertained to it, and was one of the first to make a specialty of the peony in this country. In his death the Society has lost a valuable member and those of us who were privileged to know him intimately have lost an esteemed friend. Since the organization of the Society in 1903, we have lost by death three members and by withdrawals and those who have dropped out, twelve.

Starting with a mere handful of signers in 1902, the membership had increased to thirty-six during the year of organization, and notwithstanding these losses, has steadily grown to its present numbers. It is very encouraging to note that at least two of the members who dropped out have this year reinstated themselves, showing that the work accomplished by the Society has a substantial value; and that although they have been a long time in maturing the fruits of our labors are beginning to be available and all honor is due to those who have stood by and made it possible to accomplish these results. The way has not been altogether a smooth one and many obstacles have presented themselves, the most embarrassing of which has been the comparative smallness of our membership, which has necessarily limited our available funds, both for carrying on the nomenclature work and the payment of prize money to successful exhibitors.

The original membership was very largely composed of commercial men and included the greater part of the large dealers of the country. The number of these latter must necessarily be limited, and it is to the amateur class that we must look for future members and to which the commercial men must look for his most profitable business. The field is a large one and every member should feel it incumbent upon himself to use what influence he may have with such of these as he may come in contact with to interest them in our work and secure them as members. The circular sent out a short time ago was a move in this direction and was intended to help present the matter to the public. From the inception of our Society the interest has centered almost entirely upon the her-

baceous class of peonies—particularly the albiflora varieties. This in itself is not surprising as this class is by far the most common and easiest of cultivation, but the time must come when more thought will be given to the Moutan class, or tree peonies. In them we find an entirely different range of color, many of them being exquisitely beautiful in shade and texture. Preceding in their time of flowering as they do, the albiflora class, they widen the peony season very materially and add a peculiar charm to the garden. Undoubtedly the great reason for their scarcity is the impression which has gone forth that they are very difficult to cultivate. It is true they are slow in coming to perfection and that grafting must be resorted to to perpetuate the varieties, but where love and skill are bestowed upon them these difficulties fade away and the reward is a ravishing display of beauty that will repay all the time and care

B. H. FARR

President American Peony Society.

given them. Without doubt many will take exception to these statements, but in reply to them I would say, that to be convinced that what I have said is true they should visit the gardens of Prof. C. S. Sargent at Brookline, Mass., and see what can be done with the Moutan when its culture is made a specialty as it has been done there under the management of Mr. Charles Sander.

The exhibition in connection with the meeting at Queens last June was a fairly good one, and did much credit to the exhibitors who, though few in number, staged a large quantity of fine flowers. B. H. Farr, Geo. H. Peterson, S. G. Harris, T. A. Havemeyer and John Lewis Childs were the exhibitors.

Although the exhibition of cut blooms was a good one, the display in the fields proved the greater attraction, for it is seldom that such a magnificent display of flowers is to be seen. They were growing on perfectly level land in one immense block of about seven acres with rows five hundred

feet in length and offering an unusual opportunity for studying the individual characteristics of the varieties as well as the color effects in masses. The visiting members and friends feel deeply indebted to the Cottage Gardens Co. for the many courtesies shown them during the two days of the meeting, which was marred only by the unavoidable absence of Mr. Ward, our ex-president, and head of the Cottage Gardens establishment.

The Exhibition.

The exhibition in connection with that of the Massachusetts Horticultural Society comfortably filled the two large halls in Horticultural Building, the larger half of the show, however, being contributed by R. & J. Farquhar & Co., who had thousands of peonies effectively arranged, besides a miniature forest of foxgloves and other showy things. Outside of the Massachusetts displays, the only exhibits were from points in New York, Pennsylvania and New Jersey. E. J. Shaylor's group of peonies was excellent but not in competition. Taken all together the show was a splendid one in quantity and variety but the weather had interfered with the quality of the blooms which was not up to that of former exhibitions in this hall.

Following is the list of awards by the Massachusetts Horticultural Society.

Herbaceous Peonies.—Collection of thirty or more varieties, double, one flower of each: 1st, Mrs. James McKissock; 2nd, T. C. Thurlow's Sons Co. Collection of twelve named varieties, double, three flowers of each: 1st, G. H. Peterson; 2nd, Wm. Whitman; 3rd, Mrs. J. L. Gardner. Specimen bloom: G. H. Peterson, Mme. de Galban. Vase of blooms on long stems, arranged for effect in the society's large China vases: 2nd, Mrs. J. L. Gardner. Collection of six named double varieties, white, one flower of each: 3rd, T. C. Thurlow's Sons Co. Rose pink: 2nd, T. C. Thurlow's Sons Co. Red or crimson: 2nd, T. C. Thurlow's Sons Co. Vase of twenty-five blooms, double, white or blush: 1st, S. G. Harris; 2nd, Mrs. E. M. Gill; 3rd, B. H. Farr. Vase of twenty-five blooms, pink or rose: 1st, G. H. Peterson; 2nd, ditto; 3rd, Wm. Whitman. Vase of twenty-five blooms, red or crimson: 1st, G. H. Peterson; 2nd, ditto; 3rd, T. C. Thurlow's Sons Co. Vase of twenty-five blooms, any other color: 1st, T. C. Thurlow's Sons Co.; 2nd, Wm. Whitman. Collection of twelve named varieties, double, one flower of each, for non-commercial growers only: 1st, Wm. Whitman; 2nd, T. A. Havemeyer, gardener A. Lahodny; 3rd, Mrs. J. L. Gardner. Best display of peonies, arranged for decorative effect, to occupy a space not exceeding 100 sq. ft.: 1st, R. & J. Farquhar & Co.

Gratuities.—T. C. Thurlow's Sons Co., display of single peonies; Wm. Whitman, display of foxgloves, iris and peonies; Mrs. E. M. Gill, display of roses and peonies; Mrs. Frederick Ayer, Begonia Rex; Eastern Nurseries, display of herbaceous flowers; Blue Hill Nurseries, display of pyrethrums.

Silver Medals.—Mrs. Frederick Ayer, display of fuchsias; R. & J. Farquhar & Co., display of peonies and foxgloves; Walter Hunnewell, display of rhododendron blooms. 40 varieties; E. J. Shaylor, display of peonies.

Vote of Thanks.—Old Town Nurseries, iris Snow Queen; Joseph S. Chase, seedling peony.

ENGELMANN BOTANICAL CLUB.

The Engelmann Botanical Club held an important meeting on June 13 at the Missouri Botanical Gardens, St. Louis. The feature of the meeting was a paper by Dr. H. Von Schrenk, chairman of the Missouri Forestry Commission on Forestry in Missouri.

NEWS OF THE CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

The announcement that the June meeting would be the last until next September, and that, in addition to business of immediate importance, Geo. V. Nash, of the N. Y. Botanical Garden, would give a talk on his travels in Hayti, with lantern slide illustrations induced a very creditable attendance at the Club meeting last Monday evening, there being no less than 85 members present.

The first business after the routine proceedings was the report on the proposed plant market by attorney Seibrecht, who stated that the committee had met the municipal committee that afternoon and that the case of the florists had been duly presented in remarks by himself and Messrs. Schultheis, Donaldson and Steinhoff, and arrangements had been made for a public hearing on Monday, June 20, at 3 p. m., in the Aldermanic Chamber at City Hall, to which everyone connected with the trade is invited to come and thus make a strong impression.

Transportation matters in connection with the Rochester Convention were discussed at length with the result that a preference, by a large majority, was recorded for the Lehigh Valley R. R. as the official route. A special train will be put on if 100 participants can be secured and a stop will be made at Glen Summit for lunch. A substantial sum was placed at the disposal of the transportation committee for refreshments on the way.

The committee on summer outing, July 28, was represented by its indefatigable and efficient chairman, Harry A. Bunyard, who sat at a special table and did a "land-office business." He informed the meeting that over \$350 has been contributed in special prizes for the occasion and a full schedule would shortly be issued.

President Miller called attention to the fact that the majority of the big prizes at the Boston Orchid Show were captured by members of the N. Y. Florists' Club. Mr. Schultheis remarked that it would be eminently proper to open the New York Flower Market with a big show. T. Mellstrom, a new member, being called upon made a fine speech and promised to be a faithful and industrious member. Committees were appointed as follows:—Advisory to Cornell Experiment Station, Messrs. James Dean, I. S. Hendrickson, J. H. Pepper, W. A. Manda and Benj. Hammond. Nominations:—C. B. Weathered, W. F. Sheridan, Patrick O'Mara, John Birnie, F. R. Pierson, Robt. E. Berry, F. H. Traendly. On proposed greenhouse at Cornell:—Messrs. O'Mara, Langjahr, Shaw, Weber, Dailedouze and Marshall. Vice-president Joseph Manda was given full charge of the Club's part in the Rochester bowling tournament.

Mr. Nash then proceeded to deliver his lecture on, "A Trip Through Hayti on Horseback." He gave much entertaining and instructive information concerning this "black republic," its scenery and products, its people and their customs, illustrated with numerous lantern slides and at its close was accorded a hearty vote of thanks.

The exhibits of the evening comprised some very fine *Cattleya Mendelii*, *gigas*, *Mossiae* and *Gaskelliana*, and *Vanda cœrulea* from Harry Turner, Castle Gould; *Gladiolus Compacta*, *Irene*, *Fantastic*, *Wm. Falconer*, *Little Blush* and *Dr. Hogg*, from J. Lewis Childs and *Gardenia Veitchii* from A. J. Manda.

AMERICAN ROSE SOCIETY.

The time fixed by the by-laws for the annual change of officers of the American Rose Society is July 1st, but in practice it has been found advisable to make the formal change during the annual convention of the Society of American Florists and this year this will be held in Rochester at which time a regular meeting of the American Rose Society will be held. We at that time desire to start a list of special prizes for the coming great National Show at Boston.

Every special prize has been distributed. The man who carried off the largest number of prizes at the New York Show held in the American Museum of Natural History was H. C. Steinhoff, of West Hoboken, N. J. He took Mayor Breitmeyer's prize among other honors. The Dorrance trophy has been won only three times in ten years, first by Robert Simpson, of Clifton, N. J.; second by Poehlmann Bros. Co., of Morton Grove, Ill., and third by Benjamin Dorrance, of Dorranceton, Pa.

Among the school children who visited the last exhibition, after viewing the splendid showing of blooms in the vases, a group of lads came to the writer and asked this question, "Don't roses have roots?" "Why, yes," was the reply. "Well, none of these have any." This was a child born in New York City. A few days ago, two small girls had a bunch of sweet briars, and being asked where they got them, gave answer, "Over in your lot. Don't they smell sweet! Why don't tame roses smell as nice?" This is simply a bit of child life history, along the line of a—

"Rose for every home,
And a bush for every garden."

BENJAMIN HAMMOND, Sec'y.

GARDENERS' AND FLORISTS' CLUB OF BALTIMORE.

At the last meeting of this club, Mr. Thos. H. White of the State Agricultural College gave an interesting talk on fertilizers. He had a score of small bottles containing samples of various chemicals, labeled, showing the percentage each contained of different fertilizing elements, etc. Considerable discussion followed, in which the gardeners proved conclusively that they were somewhat wise regarding fertilizers. Richard Vincent, Jr., gave an informal idea of the program of the Maryland Horticultural Society for the summer outing meeting to be held at Berlin, Md., where the members will be entertained by Orlando Harrison on Thursday, July 28. In the evening of same date members will go to Ocean City, Md., and on morning of 29th an executive meeting of society will be held. The society is preparing for the best horticultural show ever had in the state.

AMERICAN GLADIOLUS SOCIETY.

The executive committee of the American Gladiolus Society have decided to keep the charter list open until the time of the Rochester meeting in August. Applications and inquiries are coming in daily and this will afford all ample opportunity to join in time for the Society's first exhibit which will take place at that time in connection with the Society of American Florists' annual exhibition. Already there has been contributed the following prizes to be contested for at our first show:

From W. W. Rawson & Co., Boston: Silver gilt medal for the best American seedling of gladiolus never before exhibited nor yet disseminated. This prize can be awarded if there is only one exhibit, but the exhibit must possess special merits.

Silver medal for the best collection of twenty-five varieties of gladioli, each variety to be represented by three spikes, size of flower, openness of form, color and number of flowers on a spike to be considered.

Silver medal for the most artistic basket of gladiolus America, judged for arrangement only.

Silver medal for ten spikes of the purest white gladioli.

Bronze medal for ten spikes of the best scarlet gladioli.

Peter Henderson & Co., New York City, have offered \$10 in gold for the best collection of twelve new gladioli not yet on the market; three spikes each to be exhibited.

Vaughan's Seed Store offer a silver medal for the best twenty-five spikes of gladiolus Mrs. Francis King.

To Gladiolus Exhibitors.

Will all who wish to exhibit at the American Gladiolus Society's first show in connection with the annual exhibition of the Society of American Florists, please communicate with me at once so that adequate space can be secured.

L. MERTON GAGE, Cor. Sec.

NATIONAL SWEET PEA SOCIETY OF AMERICA.

The following additional prizes have been offered for the annual exhibition of our Society to be held in July:

Stumpp & Walter Co.'s Prize; for three vases of sweet peas, Spencer type. First prize, \$5.00; second, \$3.00; third, \$2.00.

J. M. Thorburn Co.'s Prize; for vase of pink sweet peas. First prize, \$5.00; second, \$3.00; third, \$2.00.

John Lewis Childs' Prize; for vase of white sweet peas. First prize, \$5.00; second, \$3.00; third, \$2.00.

Sutton & Sons' Prize (Reading, England). Cup, value \$25.00; for the best table of sweet peas to be arranged on a space 3 by 4 feet and not to exceed 3 feet in height.

We are now working on the final schedule and hope to have same ready in about two weeks. Concerns or individuals wishing to offer prizes for this exhibition, should immediately notify the secretary, Harry A. Bunyard, 342 W. 14th St., New York.

NEW JERSEY FLORICULTURAL SOCIETY.

The regular monthly meeting of the New Jersey Floricultural Society was held on June 10. The orchids from Lager & Hurrell, Joseph A. Manda and Wm. Runkle, gardener Dederich Kindsgrob were especially fine. Rose night was also observed, there being a grand display from the private estates in the Oranges. Mr. John R. Le Coent of Maplewood, N. J., donated to the Society a handsome silver cup. It will be competed for at their chrysanthemum show in November. A hearty vote of thanks was extended Mr. Le Coent. During the evening we were honored by a visit from Mayor Arthur B. Seymour, who complimented the Society upon the excellence of their exhibits. The Society is proud of the fact that five of their members carried off the principal prizes at the Boston Orchid Show. A standing vote of thanks was extended to them for the courage they displayed in going to Boston and cleaning up the boards. Henry Hurrell responded, saying: "I don't see why it is necessary for us to go to Boston for an orchid show; why can't we have one here in New York or New Jersey? There is a tremendous loss realized from shipping the flowers for so great a distance."

Joseph A. Manda replied in like manner and said there was no reason why the idea could not be successfully carried out. Ninety-five per cent of the exhibitors were Jerseymen and 90 per cent of the prizes were carried off by the growers from this state.

John J. Dervan, gardener for A. C. Von Gaasbeck, read a paper on "Growing Roses Under Glass," which was well received. He is a very successful rose grower. He recommended propagating about January 15th, using heel cuttings for that purpose, and when rooted using a mixture of one part manure to eight parts loam, potting them into 2-inch pots. For the next shift he uses 3-inch pots with a mixture of one part manure to six parts loam, finally putting them into 4-inch pots using one part manure to four parts loam. He advised planting about June 15th on raised benches, one part cow manure to three parts of good fresh loam, filling the benches two-thirds full and pressing same down hard. Before planting in benches he advised giving the houses a thorough cleaning and a good fumigating with hydro-cyanaic gas.

The awards in competition for points were as follows:

Roses, S. M. and A. Colgate, gardener Wm. Reid, 95; A. B. Jenkins, gardener Albert F. Larson, 85; A. C. Von Gaasbeck, gardener John J. Dervan, 83; Thos. Edison, gardener Frank Drew, 80. Carnations, Chas. Hathaway, gardener Max Schneider, 85; Wm. Reid, Sec. John J. Dervan, 78. Flowering plant, William Reid, 95; John J. Dervan, 60. Foliage plant, William Reid, 85. Orchids, Lager & Hurrell, 98, Dederich Kindsgrob, 95.

Certificates were awarded as follows to exhibits not in competition for points: Certificates of merit to Joseph A. Manda for orchids, John J. Dervan and D. Kindsgrob for roses. Cultural certificates to Wm. Reid for roses, Chas. Ashmead for strawberries, Max Schneider for strawberries and cauliflower.

Fritz Beuglund, gardener for the Essex County Country Club showed gladioli and carnations.

The Society will not meet again until September.

WM. REID, Sec.

AMERICAN ASSOCIATION OF NURSERYMEN.

The 35th annual meeting of the American Association of Nurserymen, was held in Denver, June 8th to 10th. This was a notable meeting of the horticultural clans gathered from the different parts of the United States—some from California. The place of meeting was so far from the great nurseries that the exhibits were not as large as they would have been in the heart of things, yet there was quite a show. J. F. Rosenfield, of Nebraska, exhibited some of his peonies. The Select Nursery, of York, Neb., showed some thirty sorts, also about twenty-five kinds of seedlings of very superior merit and very rich in colors, some showing exquisite tasselled centers. There was quite an exhibit of nursery stock also.

The forenoon of the 8th, was given to addresses of welcome and a happy response by Col. Watrous, of Iowa. Reports of various committees followed.

One of the most important topics was, "Crown Gall on Apple Tree

C. S. HARRISON.

The Grand Old Man of Nebraska.

Roots." Some states have legislated against such trees. They must not be received or planted. Peter Youngers, of Geneva, Nebraska, gave the results of his experience. Quite a number of those present had selected entire rows in orchards of trees, every one of them having knots, some of them of large size. Some of those present had selected entire orchards of these trees from rejected stock and they bore and grew as well as any. Specimens were shown of trees which had large knots when planted which had borne heavy crops. These were dug up and were exhibited at the meeting, the knots all eliminated. In short, these knots were often called warts, which is the proper name for them for they are no more contagious or deadly than those on the human body. One speaker suggested that it would be just as reasonable to kill a boy who had great warts on his hand, as to kill a tree because it had warts on its roots.

The program had been widely printed and was carried out with hardly a

miss. The writer gave his paper on "Herbaceous Plants," receiving a flattering ovation for it. (This paper is in type and will appear next week.—Ed.)

The meeting was called one of the best of the series. Friday was play day. The whole company were invited to an excursion up the Moffit R. R., and were hoisted up into an altitude of 11,060 feet above sea level, among the banks of perpetual snow.

The next convention is to be held in St. Louis. The following officers were selected for the coming year:

W. P. Stark, Louisiana, Mo., president; E. S. Walsh, Shenandoah, Iowa, vice-president; John Hall, Rochester, N. Y., secretary; C. L. Yates, of Rochester, treasurer. The executive committee: J. H. Dayton, Painesville, Ohio, chairman; H. B. Chase, Huntsville, Ala.; E. M. Sherman, Charles City, Iowa.

C. S. HARRISON, York, Neb.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The annual summer show of this Society was held at Pembroke Hall, Glen Cove, Wednesday, June 8th. Considering the season, the hall was well filled up and visitors were unanimous in their praises for the fine display. Messrs. Henry Turner, Walter Shaw and D. McFarlane acted as judges. Next meeting will be sweet pea night and several prizes are offered for best exhibits. List of awards was as follows:

Collection of T. and H. T. roses, G. Wilson Roslyn. Twelve distinct H. P. roses, G. Ashworth, Glen Cove. Second G. Wilson. Vase of H. P. roses, R. Marshall, Glen Cove. Vase of T. and H. T. roses, H. Gaut, Glen Cove.

Collection of Ramblers, H. Gaut. Collection of herbaceous flowers, J. Hallway, Glen Cove, with a very fine display of 59 var.; his exhibit of pinks, composing about 20 distinct varieties, made a most gorgeous display. Three vases of peonies, H. Gaut, 2d, J. Elmslee. Vase of peonies H. Gaut. Vase of snapdragons, H. Gaut. Vase delphiniums, J. Elmslee, Glen Cove. Collection of vegetables, 12 varieties, Fr. Petroccia, Glen Cove, 2d, I. McDonald; 3rd, G. Wilson. In the other vegetable and fruit classes, F. Petroccia, J. Reidenbach, G. Ashworth, D. Westerbe, O. E. Addor, G. Wilson, J. McDonald, V. Cleres, J. Dumbrosky and R. Marshall were severally the winners.

Cultural certificates was awarded to F. O. Johnson for roses, best blooms in the show, also to Julius Roehrs Co., for a splendid exhibit of orchids and to H. Fleishauer, Glen Cove, for roses, sweet peas and strawberries. Honorable mention to W. Ross, gardener to H. S. Phips, Jr., Roslyn, for two beautiful ferns, also vote of thanks for display of roses not entered for competition. Vote of thanks to V. Cleres for campanulas, E. Westerbe and Paul Reul for roses. The winners of the monthly prizes were G. Wilson for best Pteris, also for best Adiantum, J. McDonald for best Nephrolepis.

O. E. ADDOR, Cor. Secy.

CINCINNATI FLORISTS' SOCIETY.

A large and enthusiastic meeting of the Cincinnati Florists' Society was held at the Jabez Elliot Flower Market Monday, June 13. An outing committee was appointed, consisting of Max Rudolph, Wm. Murphy, Frank Dellar, C. E. Critchell and Gus Adrian; also nomination of officers took place at this meeting with the following result: C. E. Critchell and Gus Adrian were nominated as president, Wm. Murphy and Max Rudolph as vice-president, Albert Sunderbruch and Ed. Forter as treasurer, Henry Schwarz and Alex. Ostendarp as secretary.

CONNECTICUT HORTICULTURAL SOCIETY.

June 10th, the night for our regular meeting, proved to be too early for the exhibition of hardy roses, and hence the meeting was largely given up to the subject of peonies. Treasurer W. W. Hunt brought a splendid collection of blooms of twenty-four varieties, mostly of the Chinese type. The following varieties were represented: *Triomphe du Nord*, *Francois Ortegat*, *Mathilde*, *Queen Perfection*, *Louis Van Houtte*, *Rivitor*, *Albert Crousse*, *Marquis de Lory*, *Onivera*, *Victor Modeste*, *Deloioes*, *Plutarch*, *Grandiflora carnea plena*, *Artemise*, *Rubicanda*, *Caroline Mathieu*, *Queen Victoria*, *Canary Yellow*, *Madame Brion*, *Festiva Maxima*, *Single Pink Emma*, *Liliana*, *Perfection*, and *Humei*.

Mr. Hunt classes the above as among the best. Much valuable information was elicited from Mr. Hunt and President Huss regarding this popular and valuable flower. The latter spoke of its growing favor with the public, its freedom from disease and insects, and the usefulness of the leaves, after blooming time, in making up bouquets. Mr. Hunt was asked to name the best twelve varieties of peonies for a succession for home use; and he replied that it is difficult to do so because there are so many good varieties; but he promised to try to furnish such a list at a later date. The judges, Messrs. T. B. Brown of Windsor, John Gerard of New Britain, and Carl Peterson of West Hartford, awarded Mr. Hunt a diploma.

Our plans are rapidly being made for the two fall exhibitions at Hartford, one in September for dahlias, and one in early November for chrysanthemums. President Huss expects to leave us on July 7th for a visit of several months at his old home in Switzerland. Our best wishes will go with him for a safe, pleasant, and profitable journey.

Our next meeting, which will fall on the 24th inst., will be "Hardy Rose Night," and an address is expected from our former efficient secretary and now superintendent of Elizabeth Park, Hartford, Alex. Cumming, Jr.

GEORGE W. SMITH, Sec'y.

HUNTINGTON HORTICULTURAL AND AGRICULTURAL SOCIETY.

The June Rose and Strawberry exhibition of the Huntington (N. Y.) Horticultural and Agricultural Society was held June 9th. In number of entries this show exceeded former ones. The quality of exhibits was also excellent.

Besides strawberries and roses there were peonies, hardy herbaceous flowers and early vegetables.

The following won first prizes:

Robert Kelley, two for strawberries, two for roses, one for peonies; Miss Cornelia Prime, for strawberries; R. R. Conklin, gardener E. S. Smith, two for strawberries, two for roses, one for hardy flowers; John Andrews, for roses; Emmett Hawkins, for roses; Huntington Nursery Co., for climbing and moss roses and vase of hardy flowers; Mrs. Robert Stafford, collection early vegetables. The Huntington prize of five dollars for best rose in the show was won by R. R. Conklin, E. S. Smith gardener.

A. H. FUNNELL, Secretary.

PEONIES IN NEBRASKA.

Herewith appears a view of one corner of the peony fields of J. F. Rosenfield, at West Point, Neb. Mr. Rosenfield has ten acres devoted to peonies and has done much to popularize them in Nebraska and to impress upon the people of that section that the inclemency of their winters has no terrors for the peony. Between the 12th and 15th of April, this year, Mr. Ros-

enfield tells us there occurred the worst freezing spell ever seen there after April 1. Some of the peonies were then knee high, but most of them recovered from the shock and bloomed fine, as the picture shows. Nurserymen and florists should talk peonies incessantly to the public and especially in the colder sections, dwell upon this important quality of hardiness.

ST. LOUIS FLORISTS' CLUB.

The twenty-third anniversary meeting of the St. Louis Florists' Club was held last Thursday afternoon, June 9th. President Windler and his staff of officers succeeded in rounding up 50 members to attend the meeting and the trustees had arranged for a smoker and short talks.

The trustees reported that they had arranged to hold the annual picnic this year at Romona Park, on Thursday, July 21st. This is where the Club held their last year's outing and a more beautiful place could not have been selected. The sum of \$50 was donated for prizes. The Committee on Florists' Bulletin asked for more time, which was granted. It seems as though the members are becoming more enthused with the idea of a local bulletin and the chances are bright for an early issue of the Florists' Monthly Bulletin. The next talk was on S. A. F. convention transportation, and J. J. Beneke was appointed to look after this matter and report at the next meeting. Mr. Beneke read a paper on "Brotherly Love Among Florists," which caused much amusement during its reading, as did also the discussion that followed.

S. S. Skidelsky of Philadelphia, who was a visitor, followed with a good line of talk. Harry Balsley of Detroit, also a visitor, said he hoped the next S. A. F. convention would come to Detroit while Phil. Breitmeyer was still mayor. Others who spoke were J. F. Ammann, W. C. Young, E. W. Guy, H. S. Halsted, Frank Fillmore and Chas. Juengel—all ex-presidents.

A long discussion followed on the question of high prices for cut flowers

on Decoration Day. Retailer, wholesaler and grower each had their say. This will be continued in the July meeting. H. S. Halsted of Belleville showed some extra fine seedlings of zonal pelargonium *Queen of the West*, and W. J. Pilcher showed several vases of fine new varieties of sweet peas.

ST. LOUIS RETAIL FLORISTS' ASSOCIATION.

This association held its meeting on Monday, June 6, with a fairly good attendance, with President Sanders in the chair. The officers gave out nothing for publication, only that there was a discussion of the high prices at the wholesale houses at holidays and the alleged retailing of cut flowers by some of our wholesalers. A special meeting will be called shortly when some of these matters will be further considered.

CLUB AND SOCIETY NOTES.

At the regular meeting of the Florists' Club of Washington, which was held on June 7th, it was decided that the annual outing which generally takes place in July will not be given till August this year. The club had hoped to have it in June, but owing to the commencement rush it could not be. The matter will be taken up at the next meeting.

The Lady Florists' Home Circle of St. Louis enjoyed a visit to Chautauqua, Ill., on June 8th and 9th. Matters pertaining to the Ladies' Society of the S. A. F. were talked over. Mrs. Fred H. Meinhardt read a paper on "Wild Flowers." Mrs. John Steidle, president of the Circle, invited the members to hold their next meeting at her place in Central, Missouri, which was accepted.

ROYAL HORTICULTURAL SOCIETY

This society held its annual exhibition on May 24-26 in the gardens of the Inner Temple, London. The quality of the orchids was uniformly high, better, I take it, than on any previous occasion, and numerous departures in coloring and form, were remarked among the hybrids. In the collection of orchids shown by F. Mentieth Ogelvie, there were many conspicuously fine plants. A much admired specimen was the *Brasso-Laelio-Cattleya Veitchii*; another resplendent plant noted was *Brasso-Cattleya-Digbiano Mossiae*; and *Brasso-Cattleya Queen Alexandra*. There were many choice *Odontiodas*; the white flowered *Cattleya Dusseldorffii* Undine.

The Duke of Marlborough, gard. Mr. Hunter, exhibited many fine *Phalaenopsis*, *Cattleyas* *Empress Frederick*, L. C. Lord Rothschild, and various hybrids.

Sir Jeremiah Colman showed one of the best lots. I would mention *Stanhopea saccata*, *Odontoglossum Thomsonianum*, with dark purple flowers, some hybrid *odontoglossums*, including *O. Astarto* and *O. Duke of Cornwall*, etc. *Vandas*, *aerides* and *phalaenopsis*, were notable in a group sent by J. Talbot Clifton; especially fine being *Phalaenopsis Sumatrana*—a rare species with creamy white blooms. *Laelio-Cattleya Aphrodite* var *Mark Hambourg*, a large flowered variety with white petals and sepals, and bright crimson lip; *Cattleya Mossiae Reineckiana*—Hardy's variety, and *C. Lady Doorington* of the *Mendelii* section.

Sander & Sons had a large group, showing excellent quality, more especially *odontoglossums* and *miltonias*. Some rare and new Peruvian orchids were remarked, and among them a *Gongora*, a greenish *Mormodes* and *Lycaste Peruviana*. Great novelties of merit were observed in *Miltonia vexillaria Memoria Baron Schroeder*, and *Odontoglossum Memoria King Edward VII*.

Stuart Low & Co., showed a fine group in which were noted *cattleyas* and *dendrobiums* chiefly: *Phalaenopsis Rimestadiana*, *Cattleya Mossiae la Vierge*, and *C. M. Bush Hill* var, both white, and were of fine quality. There were likewise observed in this exhibit *Cattleya Dusseldorffii Undine*, *Cattleya intermedia coerulea*, *Brassia brachiata major*, *Cymbidium Schroederi*, *Pleurothallis Birchenallii*, *Masdevallia O'Brieniana*, etc. Mansell & Hatcher had also a showy group. J. Veitch & Sons, Chelsea, showed their beautiful *Brasso-Laelio-Cattleya Veitchii*, one of the finest hybrids. The same may be said of L. C. Dominiana Langleyensis, etc.

First Class Certificates other than those named above, were awarded to *Cattleya Lawrenceana Mary Regina*, shown by Messrs. Charlesworth & Co., and the first pure white variety of this species. This firm received a like award for *Sobralia Charlesworthii*. M. Chas. Vuylsteke was awarded a first class certificate for *Odontioda King George V* (*Odontioda Vuylstekeae* X *Odontoglossum laudatum*). This remarkable hybrid was raised in Mr. Vuylsteke's nursery in Ghent. *Odontoglossum eximium Empress of India* (*O. crispum* X *O. ardensissimum*) and *Cattleya Mendelii Princess Vic-*

toria, shown by Messrs Mansell & Hatcher received like honors.

Sander & Sons were awarded botanical certificates for *Lycaste Peruviana* and for *Bifrenaria bicornaria*.

Roses were extra good at this show. Messrs. Paul & Son made a marvelous display in the big marque with potted plants. I may specify the following, viz.: Paula, a yellow Tea, Mme. Segond-Weber, Mildred Grant, Harum, Jenny Gillemot, and Chateau de Clas Von Gerb, a dark, odoriferous flower. Hobbies, Ltd., made a good display with climbing varieties, and among them I observed the novel *Veitchenblau*; B. R. Cant & Sons, and F. Cant & Co., both exhibited *Ramblers* in quantity, the majority being of American origin, and but few that were new. G. Mount & Son, Canterbury, well maintained their reputation for good quality in roses.

Amaryllis (*Hippeastrum*) were finely shown by Robert Ker & Sons, in self crimsons and reds, also in feathered blooms with white grounds. Space admits of mention of but a few of the rare pink color, viz.: Pink Pearl and Rosy Belle. *Cinerarias* in many colors, *Streptocarpus*, *Schizanthus* and *Gloxinias* were ably shown by J. Carter & Co. J. Veitch & Sons showed numbers of *Streptocarpus* in heliotrope, rose pink, and white varieties; *Gerberas*, and a group of *Senecio auriculatissima* and *Notonia Grantii*. *Phyllocactus* were shown by H. Cannel & Sons, including P. German Empress, a flesh-colored variety. Messrs. W. Bull & Sons showed *Amaryllis*—nearly 100 plants—of which Norah, Queen Mary, Sunbeam and Beryl were of beautiful form and fine color. Hardy plants, Alpines, etc., were shown in abundance, sweet peas and tulips likewise; and the exhibits out of doors, such as azaleas, rhododendrons, ivies, vitis, *metrosideros*, pygmy trees, violas, and numerous examples of garden rockeries of very good design, were worthy of the occasion. F. MOORE.

PARIS SPRING SHOW.

We have in type a very interesting description of this great annual horticultural event from the pen of C. Harman Payne, for which we have not room this week, but which we hope to publish in our next issue. Floral Art was well exemplified in the department allotted to this work, in which the Parisian florists lead the world. Our cover illustration shows the exhibit of one of the most noted artists in France.

NEWS NOTES.

Hartford, Conn.—Mrs. Keep has purchased the greenhouses of Charles Mason.

Cleveland, Ohio.—A 100 foot greenhouse, to supplant the hotbeds now in use, will be built in Gordon Park.

Shawano, Wis.—Ed. Lenger has purchased a greenhouse here and expects to be ready for business in a short time.

Indianapolis, Ind.—Lester F. Benson has purchased the stock and fixtures of The Beecher Floral Co., at Cincinnati, and has moved same to Indianapolis.

Cincinnati, O.—Fred Bruegman has disposed of his interest in the firm of Edwards & Co., Newport, Ky., to his sister, Mrs. Edwards, and has accepted a position as salesman with Peter Olinger, 128 E. 3rd street.

SOME NOTABLE VISITORS.

We had the pleasure of meeting, on the evening previous to their departure for home, Dr. Frederick Keeble, editor of "The Gardeners' Chronicle" of England, and Mr. Leonard Sutton, of the firm of Sutton & Sons, Reading, England. These gentlemen have been visiting America as members of the Deputation to Universities of Canada and the United States, appointed by the Council of University College, Reading, England, to visit centres of agricultural education and research in America with the object of collecting information to be used in developing the efficiency of agricultural and horticultural education in Britain. The other members of the Deputation were Messrs. E. D. Mansfield of Trinity College, Oxford; W. M. Childs, Principal of Keeble College, Oxford; and R. V. O. Hart-Synnot, director of Department of Agriculture and Horticulture of University College, Reading. After meeting and talking with Dr. Keeble one can readily understand how under its present editorial control the time-honored Gardeners' Chronicle still retains its pre-eminence among the horticultural publications of the world. He is a young man of most engaging personality and convincing sincerity. We regret that the circumstances of this visit prevented him from any opportunity to inspect the great horticultural establishments of our country and make the acquaintance of our leading commercial men in the florist, nursery and seed trade and hope that he may, in the near future, be enabled to carry out his expressed intention to again visit us with this end in view. Mr. Sutton also expressed much pleasure regarding what he had been able to see in this, his second visit to America—the first having been some twenty years ago. He talks very entertainingly regarding the development in primula, chrysanthemums, cineraria and other florists' seeds for which his house has enjoyed a world-wide repute for so many years. Two older brothers, with Mr. Leonard Sutton and two younger members of the family constitute the firm of Sutton & Sons. The visitors sailed for England, Saturday, June 11, on the St. Louis.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Registration.

As no objections have been filed, public notice is hereby given that the registration of the fern, "Nephrolepis Roosevelt," by The American Rose & Plant Co. of Springfield, Ohio, becomes complete. H. B. DORNER, Secretary. June 9, 1910.

NATIONAL FLOWER SHOW.

Contracts have been completed, approved by the general committee of the S. A. F. and duly signed for the lease of Mechanics Building, Boston, and installing Chester I. Campbell as general manager for the National Flower Show in March, 1911, under the direction of a Committee of Control consisting of the following members: F. R. Pierson, chairman; J. K. M. L. Farquhar, Patrick Welch, E. Allan Pierce and Thomas Roland. It was voted to issue at once a call for twenty per cent. payment on the guarantee fund.

Obituary.

M. Ernest Calvat.

American lovers of the chrysanthemum will learn with great regret of the sudden death of the most eminent of all the European seedling growers, M. Ernest Calvat, of Grenoble. We were made acquainted with the sad fact while away in Paris at the International Spring Show there, and it was unanimously agreed by chrysanthemum men and others alike, that European horticulture has suffered an irreparable loss.

Calvat was beyond doubt the greatest chrysanthemum seedling raiser that ever lived. He practically in a few years eclipsed every living rival by the extraordinary success that his novelties met with, which is all the more surprising when we remember that he began as a pure amateur. He literally burst upon the chrysanthemum world without warning, astonished all the old growers by his novelties which were an entirely new race and for many years held his own on the show tables of our exhibitions, from which his seedlings swept everything that had been grown a few years previously. His phenomenal success was without a record. It was sharp, decisive and revolutionary to a degree, and his fame is written in letters of gold in the annals of the chrysanthemum for all time. His first seedlings were sent out in 1891, in which year he exhibited them at a floral meeting of the National Chrysanthemum Society of London.

We well remember the intense curiosity with which the products of this then unknown grower were examined by the visitors and members of the committee and the cordial reception they met with. Mrs. C. Harman Payne and Comtesse de Galbert were both awarded first-class certificates and another called Exposition de Grenoble was commended. Then followed a grand rush for his novelties as they were sent out year by year, until they were almost universally grown the wide world over.

It would take up too much space to enumerate a list of his most famous flowers, but turning to his catalogues we are reminded of some of the most important. In 1892 he sent out *L'ami Etienne*, *L'Isere*, *Louise*, *Mme. Ed. Rey*, *Mlle. Therese Rey*, *Mrs. C. Harman Payne*, *Prefet Robert*, *President Borrel*, a fine lot out of many others. In 1893, his collection included, *Commandant Blusset*, *Mlle. Therese Panckoucke*, *M. Panckoucke*, *Souvenir de Petite Amie*, etc. The 1894 collection contained *Amiral Avelan*, *Le Meije*, *Le Colosse Grenoblois*, the famous *Mme. Carnot*, and others not now so well known. Among the best of 1895, there were *Boule d'Or*, *Le Mouchetotte*, *M. Chenon de Leche*, *Reine d'Angleterre*, *Surprise*. The year 1896 saw the distribution of what he termed the "*Jubilee Set*," as a compliment to the English N. C. S., which in that year celebrated the 50th anniversary of its existence. Calvat's *Australian Gold*, *Mme. Gustave Henry*, *Mrs. J. Lewis*, *Ma Perfection*, were among them. The next year his famous green variety *Mme. Ed. Roger*, *Mme. Ferlat*, N. C. S.

Jubilee, *Topase Orientale*, *Mlle. Lucie Faure*, *Pres't Nonin*, and others, made their appearance and so we might go on enumerating flowers that have won high positions for themselves and redounded to the credit and renown of their raiser.

As we had the privilege of a personal acquaintance with our old and esteemed friend for many years, his loss comes with an unexpected blow. He was a most genial, courteous and agreeable French gentleman of the best type. He was partly educated in England and then returned to France, where he entered the glove making establishment of his father, a former mayor of Grenoble. On his father's retirement the subject of our notice became head of the firm and in his spare moments amused himself with gardening, roses being his first favorites. It was not till 1887 that the chrysanthemum attracted his attention, and then

M. EARNEST CALVAT.

everything else was discarded with the view of practicing a systematic cross-fertilization with the then known largest varieties, so as to obtain a new race of high-class show flowers. How he succeeded the world already knows.

On the Continent of Europe he was a frequent exhibitor at all the leading shows and received honors and awards innumerable. His groups of blooms were all composed of big, solid, massive Japanese or incurving Japanese, denoting high culture and were usually the sight of the show. We ourselves have seen them at places as widely apart as Lille, Paris, Tours, Caen, Lyons and elsewhere. In his own country he was *facile princeps* and only the last time we met him his kindly disposition manifested itself towards us in an unexpected way when our youngest boy at Vouvray made a childish remark that caused a hearty ripple of undisguised laughter from M. Calvat, who said, "I will name one of my new chrysanthemums after your little

son." And true to his word Alec Payne figures in this year's list of his novelties as a remembrance and in recognition of an amusing observation by a little English boy of five years of age when on a visit to France.

Calvat was only 58 years of age and might, had he been spared, still have accomplished much useful work. Personally and from a horticultural point of view we deplore his untimely end, for many years will come and go before the world shall see another to take his place. He was an Honorary Fellow of the N. C. S., a vice-president of the French Chrysanthemum Society, and president of the Grenoble Horticultural Society. He had received several honorary distinctions, viz., Commander of the *Merite Agricole*, Knight of the Order of the Crown of Italy. He was the holder also of a Tunisian order and officer of the French Academy.

We are sure that many of our readers will join with us in offering to his bereaved family the assurance of our profound sympathy and condolence with them in the great loss they have so unexpectedly sustained.

C. HARMAN PAYNE.

Frank De Witt.

Frank De Witt, a florist and gardener of 2285 Pitkin avenue, Brooklyn, N. Y., was drowned in the Bay near Freeport, L. I., June 9th.

James McNab.

James McNab, florist, of Catonsville, Md., a member of the Gardeners' and Florists' Club of Baltimore, died at Atlantic City, N. J., on June 13.

H. J. Billings.

H. J. Billings, florist, of Rockland, Me., died suddenly Sunday, June 5th. He had been ill but a few days and his death was a severe blow to his family, and caused deep sorrow to his many friends.

Frank Linowski.

Frank Linowski died at Bay City, Mich., Saturday, June 4th. Up to the time of his illness he had been employed for a long period of years by Boehringer Bros., florists, and had a large circle of acquaintances. He is survived by two brothers and one sister at whose home he died.

NEWS NOTES.

The Fernwood Nursery Co., of Stamford, Conn., have given up their office and salesroom at 50 W. 30 street, New York City.

Seitaro Aria, with five of his staff, have gone to the Loochoo Islands to inspect the bulb fields there. Loochoo longiflorums turned out very fine last year.

The hail and wind storm of Thursday, June 9th, did considerable damage to glass in the vicinity of St. Louis. Richard Frow and the Eggeling Floral Co., suffered most and some of the parks lost a few fine large trees.

Abington, Mass.—The selectmen have offered a reward for the apprehension of the person who destroyed a large amount of valuable shrubbery at the Bay State Nurseries, in the hope that the offender will be caught. Private citizens also stand ready to add to the reward.

CHICAGO NOTES.

Park Notes.

The severe frost and the backward spring have made it necessary to give the trees in the South Side parks some assistance, and an appropriation of \$20,000 was recently made to redress the top soil of the park. All over the city the trees show the injury done, and though most of them put out new leaves they are not as hardy as in other seasons and are constantly dropping.

Trade Items.

D. D. Johnson Co., manufacturers of the Evergreen Brand Fertilizers, are sending out a very attractive circular and will mail it upon request.

One of the Wittbold Watering Systems was recently installed in Ocoee, Fla. Mr. Nehrling, the owner of the greenhouses, writes that he is greatly pleased with its working. Sales of this system have been unusually heavy this year.

Among the Retailers.

Strail & Hahn had a simple and dainty decoration for a home wedding this week. A bank of palms and ferns furnished the background and two tall vases of Easter lilies marked the spot where the bridal party stood. The tables were done in white peas and corn flower, and the effect was very striking as well as beautiful.

Some of the retailers are reporting business as rather quiet this week. It is looked upon as the lull before the storm—of commencement orders. The first and the last weeks of June now seem to be preferred for weddings. A. Lange states that he has been in the florists' business twenty-nine years in various capacities, but that he never knew so busy a June before.

Mangel's window was made attractive last week by means of a sloping moss-covered bank, at the foot of which was a pool of water in which a dozen ducklings were playing among ferns. The construction of the window is particularly adapted to the arrangement as it brings the ducks very near the feet of the passers-by. A 20-foot dinner table, laid for forty guests at Hinsdale, Ill., was done by Mangel in an exceedingly attractive manner. The work required the use of 1000 Killarney roses and asparagus. A 4-foot vase of roses occupied the center and from it extended long graceful garlands supported by hidden rods fastened to the top of the vase, and the result was very unique and effective.

Personal.

Mrs. E. H. Hunt left June 17th for a two months' stay in the Catskill's.

August Dressel, of Crown Point, Ind., an old-time Chicago florist, is calling on his friends and reports a good season's business.

O. C. Chambers, as assistant bookkeeper, has been added to E. H. Hunt's office force, made necessary by the extra heavy rush of business in the supply department. Their orders this spring have included points in Mexico, the Philippines and Germany.

Among the visitors this week are Sam and William Graff, old-time Chicagoans. The former is now operating two retail stores in Seattle, Wash., which city he thinks has a great future, and the latter is located in Columbus, Ohio.

A great surprise was in store for

JULIUS ROEHRS CO.

RUTHERFORD, N. J.

Offer special inducements to those stocking greenhouses and conservatories. The most varied and carefully selected stock of ornamental flowering and foliage stove and greenhouse plants on the American continent. Crop Notes on Corn, Peas and Beans.

Reports concerning crops, while not alarming, are not altogether satisfactory. The corn crop in the West is said to be in an unsatisfactory condition and a large percentage of re-planting will be necessary. Anyone can appreciate that corn planted at this late date will have a hard struggle to mature before frost overtakes it. This applies to sugar corn equally with field corn. Conditions are somewhat better in the East, but not wholly satisfactory. Doubtless within the next two weeks the situation will develop to a point where we can get something of a line on the probable crop. Peas at this time are looking fairly well, excepting on low ground, where they are turning yellow, due to the excessive rain. No very serious damage has yet been done, however, and should conditions be favorable from now until harvest, there is no reason why we should not have a good pea crop. Beans are being planted rather late as it was impracticable to get on the ground earlier, on account of the rain. Those which were planted early have not fared well, excepting where the ground was high and gravelly. It has been rather cold and germination has not been of the best. However, little or nothing can be said as to the probable bean crop. This will develop later.

Market Prices of Cannery Peas.

In last week's issue, it was stated that peas were selling at a rather low figure in Baltimore and Washington, but we learn that this information was not altogether correct, and that within the past ten days there has been a decided improvement in prices as many of the Maryland-grown peas have been shipped to Chicago and Pittsburgh because of the scarcity in sections tributary to these markets. It is reported that the canning of peas in Baltimore is proceeding under difficulties due to the high price of the materials, and that the pack there will be light. It is generally believed that the total pack in both Maryland and Delaware this year will be rather below normal. This will be appreciated by our canning friends, as it will help to make the price more satisfactory to them than it has been for the last two or three years. According to reports, which are generally believed to be reliable, some twenty pea packing concerns throughout the country will not operate this year, which will doubtless have a material effect on the volume of goods packed.

European Seed Crops.

Such information affecting European seed crops as has come to hand, does not show any improvement over conditions previously reported, and it now looks as if a number of varieties of cabbage will be very short, particularly the Danish Ballhead and Hollander. A considerable crop of these varieties was expected from Long Island this year, but reports from that district indicate that the crop of these varieties will be almost a failure, and as it was known that the European crops would be very short, this simply aggravates a bad condition. It looks

Henry F. Michell Co., 518-1018 Market St.
PHILADELPHIA

very much as if the high prices of last year would be duplicated, if indeed they are not higher. Taken altogether, the present crop situation is not very satisfactory from the seedsmen's point of view, but as indicated, there is time for a very material improvement in annuals; as to biennials, however, there is not much chance for any great improvement over present conditions.

The Convention.

Before the next issue of HORTICULTURE, the Seedsmen's Convention of 1910 will be a thing of the past, and we hope that we shall be able to chronicle good things about it. If the weather is favorable and the attendance what it is hoped it will be, there seems no reason why this convention should not be one of the best, if not the best, ever held. Certainly there can be few more attractive spots for the seedsmen after a strenuous season than Atlantic City, and it is generally believed that they will turn out in liberal numbers. Doubtless there will be a number of applications for membership in the Association this year, and it is hoped that the committees on membership will decide each case strictly on its merits. Personal prejudice should not be permitted to have any influence here.

Grass Seed Prospects in Europe.

Messrs. Barenburg, Burgers & Co. report under date of June 7, that weather so far has been nearly perfect for all the varieties of fancy grasses, and that everything is looking splendid. If this condition continues until harvesting time there will be bumper crops—and the high prices of the last three seasons will disappear. This will be welcomed by the seedsmen who make a specialty of lawn and pasture mixtures—allowing their profits to get back to normal level.

Notes.

Brady, Tex.—The large seed house of the Brady Cotton Oil Co. was blown down on the night of June 5th by the heavy wind storm which affected telegraph and telephone wires all through this section.

Mr. and Mrs. Watson S. Woodruff have sailed for Europe, as has also S. F. Willard and Walter P. Stokes.

These three gentlemen will be missed at the convention, but their many friends will wish them a pleasant, and, we may add, profitable trip.

Edward Chas. Dungan, formerly with Wm. Henry Maule, and now president of J. F. Noll & Co., Inc., of Newark, N. J., was married on the 15th to Miss Jennie M. Perry at Philadelphia, and the pair are now on their honeymoon. We welcome Mr. Dungan to the ancient and more or less honorable order of benedicts and believe that a gentleman of his quiet domestic tastes will find married life very much to his liking. Mr. Dungan has given this matter several years of careful thought, and it therefore cannot be said that it was a marriage in haste. Let us wish him well, as well as his charming bride, with many years of happiness, and as a recent saying is, "May their troubles be mainly little ones."

Of Interest to Retail Florists

A miniature pond, in which a number of ducklings sport about among the pond lilies, is a center of attraction this month in the show window of J. H. Small & Sons, on Broadway, New York.

Satisfactory June business up to the present time is reported from the Hartford (Conn.) florists and local stock is of good quality all along the line. P. F. Potter's delivery boys are out with handsome blue uniforms—a good business advertisement.

With the passing of a
DETROIT very busy week in wedding and commencement work, we look back to some very pretty decorations which have been produced at some of these occasions. Only during the last few days has been a dangerous accumulation of carnations. Iris and gladioli are not in the

favored class at all, but many orders are lost for the lack of peonies, and it will be a week yet before they are plentiful. Cape flowers appear to be greater favorites than in former years and large quantities are used as corsages and in wreaths. The annual excursion of the Board of Commerce called for several hundred Beauties and a couple of loads of plants which were used to decorate the boat and some staterooms.

NEW FLOWER STORES.

Chicago, Ill.—Jesselson & Wiener, 623 West 63rd street.

Youngstown, O.—William A. Wittmann, 47 Phelps street.

Greenfield, Mass.—F. J. Yettes, florist, will occupy the store in Sheldon Block on Main street, which is now being remodeled.

Richmond, Va.—Ratliffe & Tanner are remodelling their store, 25 West Broad street and are occupying 23 West Broad street temporarily. It is expected that their store will be completed about September 1st.

THE RESUSCITATION OF OTTO.

Horticulture Publishing Co.,
Boston, Mass.,

Gentlemen:—Under Chicago Notes in the HORTICULTURE, page 872, we read that Otto Freeze has resigned his position with the Poehlmann Bros. Co. This is incorrect. You can enter the following statement in the next week's issue:

Owing to the large number and size of orders which came into Poehlmann Bros., Decoration Day week, Otto Freeze got nervous, and when John Poehlmann issued orders to buy all the good carnations in the market, he collapsed and had to go home, this bringing August Poehlmann into action at the store. It kept twenty-three men busy at the store to look after and attend to the cut-flower shipments, telegrams coming in bunches of six at a time. Otto is back with his coat off, hustling as usual.

Kindly give this your attention, and oblige,

Yours truly,

POEHLMANN BROS. CO.

NEWS NOTES.

Spokane, Wash.—The Rose Floral Co. has gone out of business.

East Palestine, O.—J. Faulkner is starting a florist business here.

Newport, R. I.—Joseph Leikens has opened his store on Bellevue avenue for the season.

Providence, R. I.—John M. Green has given up the branch store at 218 Cranston street which he opened recently.

Terre Haute, Ind.—N. B. Stover has recently severed his connection with the Grand Rapids Greenhouse Co. of Grand Rapids, Mich., and purchased the store business of Otto Heinl, Terre Haute, taking possession July 1st. Mr. Stover has had many years' experience in Grand Rapids and also at Youngstown, O., and Richmond, Ind. His new venture will be conducted under the name of N. B. & C. Stover Co.

NEWS NOTES.

Providence, R. I.—Otto Hassert, formerly employed by T. O'Connor, has purchased the business of James Crawshaw, Plainfield street, and will carry on a wholesale business in florists' supplies, making a specialty of all kinds of greens.

Houston, Tex.—The florist business of Wm. Kutschbach has been purchased by Henry Kuhlman. The store, 913 Main street, two blocks at 2526 Washington street and 20 acres of land at Houston Heights are all included in this purchase. Mr. Kuhlman plans to organize a company and combine his business at 1703 McGowen avenue and his recent purchases under one management. The business will be known temporarily as the Kutschbach Floral Co.

Flower Market Reports.

A fair business is being **BOSTON** done and with the coming of warmer weather and clear atmosphere, roses especially are improved. There is an over-supply of sweet peas, lilies and stocks and peonies are hard to move at any price. Lily of the valley which was scarce last week, is again plentiful. Orchids go slowly but better than they did earlier in the month. Carnations are, on the average, indifferent in quality, but probably as good as at this date in any previous year.

Trade continues to be **BUFFALO** active, though the past week found the market in heavy supply on most lines, especially carnations of ordinary quality. Also roses were in heavy supply. Saturday was looked forward to as clean-up day, but it opened with a pouring rain and continued throughout the day and Sunday morning, consequently the stock was carried over. Peony, peas and lily of the valley are having the call, though white roses have sold well. Kaiserin and White Killarney were in good supply and no shortage in the white rose line. Carnot roses are excellent, also Richmond. There was an over-supply on Beauties and only normal demand. Beginning next Monday school commencements are on and a busy week is looked for.

A few warm days have **CHICAGO** made stock more plentiful and also lowered the quality. Sunday was the first really warm day since March and the stock under glass quickly felt the change. Carnations are too plentiful, and the prices have dropped too low to suit the growers, and only the best stock can be moved at anything like a good figure. Roses, too, are much more abundant and only extra fine stock brings the top price, while there is plenty of fairly good stock sold at a very low figure. The first new Beauties are seen in a few places, while the supply of old ones is abundant in all lengths. Peonies are not satisfactory to the trade in general and the conditions do not improve as the season advances; good white brings the highest price. Gladioli are coming in freely, but the demand is light. Daisies are scarce, but there are many from the fields brought in. Cal-las are still in and quality fairly good for the season. Green stuff is in good demand. Sweet peas of the Spencer type are among the most popular, if not the flowers most in demand this month. One of our large retailers says the man who can give us a winter-blooming crop with the same characteristics will confer a great favor upon the people as well as reap a reward for himself.

The warm weather **CINCINNATI** of the past week has brought in an abundance of stock of nearly all kinds. Carnations, which were scarce last week, are more plentiful and show the effects of the warm weather, consequently have come down a shade in price. American Beauties appeared plentiful and of good quality for the season. Brides and Bridesmaids are

also showing the effects of the warm weather, although there are some excellent Kaiserin, Killarney, Taft, and Maryland to be had. Lily of the valley and sweet peas are an important item, with very little of the former to be had, while with the latter the call is mostly for white and lavender colors. Arrivals of peonies have slackened up considerably. Green goods of all kinds are in good supply.

(Reports continued on page 931)

NEWS NOTES.

Extensive alterations are in progress in the building, 127 W. 28th street, New York, to which George Cotsonas & Co. have recently moved.

George Saltford has begun operations on the remodeling of the premises at 129 W. 28th street, New York, to which he will remove in a few weeks.

Flower Market Reports

(Continued from page 929)

NEW YORK Although it cannot be said that the quantity of floral produce coming in for the past few days has been extraordinarily large, it is yet true that the market is choked with material for which there is little or no outlet. This applies to practically every item on the list, but especially to roses, peonies, sweet peas, lilies, daisies and lily of the valley. In addition to being overstocked, quality runs low on many of the above named, roses, carnations and sweet peas plainly showing the bad effects of the several consecutive days of drizzle and downpour through which we have just passed, and should this be succeeded by a period of bright sun and high temperature it will not be long before the end is reached for several things. Outdoor Jacq's are now pouring in at about \$3 a thousand and Richmond is unsalable for the time being. Lily of the valley is excellent as to quality, but the "frame" crop has given it a big jolt. Thousands of long stemmed gardenias are received daily from the South, the returns from sales being scarcely sufficient to defray the express charges, which are very high. Peonies vary greatly; there are heaps of spindly rags and there are great luscious Festiva Maximas such as are rarely seen outside of the exhibitions, and all gradations between.

PHILADELPHIA The second week in June could hardly be expected to be as good from a business standpoint as the first week in June—and it so proved. The market sagged off quite a bit and the general average was distinctly under last week's record. This was particularly true as to local business, and had it not been for a welcome fillip from the shipping trade things would have been much worse. This shows the reflex importance of the wide-awake firms to the general welfare. By advertising, circularizing and traveling, they develop business with the outside—thus benefiting indirectly the "timid sisters" and those "grasping growers" who never do anything to help develop business. But with all that there was an immense lot of stock in the Saturday "clean-up"—and it was almost given away. It wasn't business—it was charity! American Beauty roses are holding their own as to quality all right and moving off as well as could be expected. All roses are better than usual for the season—the Brides and 'Maids at the end

" " & Spreu. (100 bchs).....	15.00	to 25.00	15.00	to 25.00

of the procession. My Maryland is beginning to show its usual superiority as a summer rose—and this feature will be still more pronounced as the days go by. Carnations are still fine but prices realized are altogether too low, and very disheartening to the grower. Orchids are a little off crop for the time being, and as the demand is fair there is a tendency upwards in prices. Lily of the valley is, of course, one of the best sellers in June, and might also be said to be on the short side. The better grades of sweet peas went very well, but it was almost impossible to realize at all on anything that was not top notch. Peonies are still in evidence and while not in brisk demand there is a fairly good market for them in limited quantities. Snapdragon is running down—the high water quality heretofore shown having distinctly abated. Gladioli are becoming more plentiful and the demand for same is excellent.

PHILADELPHIA NOTES.

Dating from the 18th inst., the closing hour at Niessen's will be 6 p. m. instead of 8 p. m.

Messrs. Burpee and Earl arrived home from their Pacific trip on the 14th inst., looking brown and hearty. They were enthusiastic over the good work already accomplished by Edwin Lonsdale at Floradale—their California ranch near Lompoc.

F. W. Rohland, of Dreer's, calls attention to the exhibit in the firm's Chestnut Street window, of the ex-

haustive trials of all the latest roses at the Riverton grounds. The tests are of course, to determine hardiness and general good qualities for outdoor culture.

Messrs. Scott & Son say in regard to their new yellow rose: "The name is not yet decided; but we think the Dicksons will call it 'Irish Melody.' While this rose is not particularly good with us in summer, yet in the fall, winter and spring, it is a good one, and it flowered as freely last season as My Maryland did with us during the summer months; therefore we think very highly of it and hope to introduce it next year."

Regarding Duchess of Westminster rose, recently certificated at the Temple Show in London, Messrs. Dickson's American agents (Robert Scott & Son) report: "We do not know it under that name as we only get the Dickson seedlings under number, and while we may have tested it we do not know which it is. We can tell you more about it when our Alexander B. Scott returns from Ireland in August. He sails for there July 9th, and expects to return latter part of August."

Don't miss Elliott's trade auction sale, scheduled for Tuesday, June 21, at noon. See his advt. in this paper.

During Recess

New York Florists' Club Outing.

Chairman H. A. Bunyard of the Outing Committee of the New York Florists Club has issued a circular asking members and friends to secure their tickets in advance and thus help the committee in their endeavor to adequately provide for the pleasure and comfort of all who attend. The picnic will take place on Tuesday, June 28. More donations for prizes for the games are needed and generously disposed members—those who propose to attend and those who do not—have here an opportunity to help out on a very commendable undertaking.

WELCOME!

Once again we join together to gambol on the green. Thrice welcome to the annual frolicke! "Let joy be unconfined!"

Every member of our Club should be present with his family and extend the glad hand of fellowship and comradeship; let us forget our differences and business for the day and meet upon a common ground for a common cause, and mutual friendship and entertainment.

Let employer and employee mingle and exchange friendly greetings, remembering that we all have souls, are dependent one upon the other and are not "mere tools to make things;" let us all be children on this glorious day, aye, men and women too, but with the heart of a child, guileless and with the smile and happiness of youth, eager for the game and the sport of the hour and the gladness of it all.

And so we repeat—Thrice welcome, come one and all. Leave dull care behind and enter into the spirit of this joyous occasion. Let the members of The New York Florists' Club be proud of their committee and the committee be proud of the members, and the whole trade be proud of one of the greatest organizations for the advancement of horticulture and good fellowship.

All hail, and again thrice welcome. H. A. B.

CAMBRIDGE, MASS.

NEWS NOTES.

South Sudbury, Mass.—Fred N. Eaton has purchased the greenhouses of Howard C. Burr and will take them down and rebuild near his present house.

Bryantville, Mass.—The storm of Tuesday, June 7th, was the worst on record in this town. Considerable glass in the Halifax Garden Company's plant was broken.

Larned, Kans.—Joel Smith has purchased the Tyra Montgomery place and a greenhouse will be erected. There are about four acres in this tract, which will be used for the growing of hardy stock.

Raspeburg, Md.—John G. Kilian is preparing to go into the florist business. He was formerly strictly a vegetable and truck gardener with one house 25 x 100 feet. He now expects to build an addition.

Van Wert, Ohio.—The greenhouse of Ernsberger & Moses was considerably damaged by the severe hail storm recently. Ed. Moses, the managing proprietor, states that many lights of glass were broken which will cause a loss of at least a hundred dollars.

Woburn, Mass.—Eleven and one-half acres of land here have been purchased by Arthur Griffin, formerly gardener for Commodore Elbridge T. Gerry of Newport, R. I., and he intends to take up the cultivation of carnations for the wholesale market. A propagating house will be added to the glass already on the place as well as several new houses.

Detroit, Mich.—Two large additions to the City Greenhouses at Belle Isle will shortly be started. It is the intention to have these ready for occupancy by September and the Council and Board of Estimates have allowed \$6800 for the purpose. These will be each 50 x 100 feet and the architectural design is intended to add considerably to the beauty of the Island. Approximately 750,000 plants are raised in the present greenhouse in Belle Isle and the new houses will allow a considerable increase in this number.

PATENTS GRANTED.

A Curved Eave Lesson

Not that a curved eave house is so difficult to build, but that one combining extreme lightness and a guaranteed durability is! Reduction in both the size and number of structural members without endangering the safety of the house was our problem. We successfully solved it, because its basic principles are founded on our time tried Sectional Iron Frame Construction, which placed it out of the experimental class at the very start.

The frame work is the same rigid enduring skeleton of steel, with such modifications as were necessary for the curved eave.

The detail of just how this eave is constructed is now the important thing to you. If you are contemplating building, let us tell you all about it.

Oncidium varicosum Rogersii

BODDINGTON'S TYPE

We are expecting an importation to arrive at an early date. We have imported this variety for many years from an experienced collector and it has proved all we claim for it both as to size of flowers and intense coloring.

This Orchid is one of the most popular and free-flowering types of the Oncidium family. Our past importations have come fully up to standard. *Oncidium varicosum Rogersii* throws 3-foot stems, bearing as many as 170 blossoms of an intensely rich golden yellow, 2 inches and over in diameter, and can be successfully grown either on blocks of wood, in pots or in baskets, and flowers in November and December in a night temperature of 55 to 60 degrees.

\$1.25 each, \$12 per doz., \$100 per 100; selected plants \$1.50, \$2, \$3, and \$5 each according to size.

Notes From the Arnold Arboretum *Eucharis grandiflora* (Amazonica)

The *Rhododendrons* and *Kalmias* are now in full bloom and present a splendid picture,—their masses of bright flowers set off effectively by the dark background of the hemlocks. To the already large collection of *Rhododendrons* new additions are made every year and among those recently acquired *Prometheus* is one of the finest on account of the rich color of its flowers hardly equalled by any other hardy *Rhododendron*; the flowers are deep scarlet marked with nearly black spots and are borne in large clusters. Also *Baroness Schroeder* with large clusters of nearly white finely spotted flowers is very beautiful. Among the *Kalmias* a very fine form with deep red flowers attracts attention; this is *Kalmia latifolia* var. *rubra*, in French nurseries also known as var. *Pavarii* and in England as var. *splendens*. Even without flowers it can be told from the common form by the darker and more lustrous green of its foliage. Between this and var. *alba*, the form with white flowers, almost all shades of pink are represented. Very distinct is var. *polypetala* (var. *monstruosa*); in this the corolla is not cup-shaped as in the normal form, but is divided into five narrow petals which gives the whole flower-cluster a feathery appearance. For borders of groups of *Kalmias* and other broad-leaved evergreens var. *myrtifolia*, a low and slow growing form, may be recommended; it forms a dense mass of narrow and small dark green leaves, but flowers only sparingly. Another low form is var. *obtusata*; this has rather large leaves rounded at both ends and resembling those of *Rhododendron catawbiense*, but they are smaller. These forms are usually propagated by side grafting on seedlings of the common form.

Among the Chinese *Deutzias* recently introduced by Wilson one of the best seems to be *Deutzia discolor*, particularly as it has proved fairly hardy. It has pure white flowers borne in large clusters along the slender arching branches; the individual flowers are star-shaped and about three-quarters of an inch across. The leaves are lanceolate or oblong-lanceolate, two to three inches long, serrate and bright green on the upper and whitish on the under side. A variety of it which is better known is *D. discolor* var. *purpurascens* with purplish flowers; this, however, is not hardy in this latitude.

In some instances plants raised from seed introduced recently from the higher mountains of western China are hardier than the plants of the same species now in cultivation. This is the case with *Idesia polycarpa* of which the plants raised from seed sent by Wilson have stood the last two winters without injury, while the plants introduced twenty or thirty years ago from southern Japan can not be grown successfully north of Philadelphia. It is a handsome round-headed tree attaining forty to fifty feet in height with fine foliage, but inconspicuous flowers in large racemes followed by orange-colored berries of about the size of small cherries. The broadly ovate or ovate leaves are serrate on the margin, dark green and lustrous above and whitish on the under side and are borne on slender peduncles three to five inches long. The tree is dioecious. It can be propagated besides by seeds, by green-wood cuttings and by root cuttings. It is now sometimes planted in southern Europe as an ornamental tree and may possibly make a good street tree. In China there occurs a form with the leaves pubescent on the under side; this is *I. polycarpa* var. *vestita* and has also been introduced by Wilson.

Eucharis grandiflora belongs to a small genus of warm greenhouse bulbous plants, and for grace and refinement when in flower, has few peers. The trade, however, has been a little shy of attempting to grow these beautiful white flowers thinking that they are hard to manage, but if a few simple requirements are attended to, success will be sure to follow. Lest this talk should sound rather optimistic, I will tell of a plant that I saw in an ordinary sitting room, in which it had grown for years—a remarkably well flowered specimen in a 10-inch pot, having 56 open flowers. My friend told me that a friend of the family, who was a missionary, had sent home three bulbs thirty-two years before my visit. The bulbs had increased in number so that two pots were filled with them, the plant in flower having the stronger bulbs. Two years before the time I speak of the plant had been repotted, with a compost obtained from a nearby florist and at intervals watered with cold tea, and soapy water such as one would wash their hands in, the leaves also being washed occasionally. The bulbs had flowered, more or less, every year.

A steady temperature is essential for the successful culture of *Eucharis*, and right here I will quote what an expert grower says about the disease that affects these plants.

"I had two fine pots of *Eucharis grandiflora* in flower. My employers insisted on their being taken to the conservatory in which a temperature of as near 50 degrees as possible was maintained. To this I strongly objected, but in it they were placed until they had finished flowering, when they were gradually brought back to the temperature I had grown them in. But from that day they got weaker and weaker, no matter what was done for them. I turned them out of their pots and washed them in the following mixture: Fir tree oil one-eighth of a pint to a gallon of warm rain water, adding about a pint of tobacco water and allowed them to lie on a bench about an hour before potting them, after which I placed them in the stove. They very soon after were growing as vigorously as ever, and I attributed the mischief to their being placed in the conservatory. I am convinced that a temperature of 65 degrees should be maintained where they are growing."

I have seen *Eucharis grandiflora* grown on a bench, but never with the same success as in pots, but I don't say that it can't be done successfully. I would advise placing seven good bulbs to a ten-inch pot, in a mixture of two parts fibry loam, one of flaky leaves, and one of dried cow manure, adding enough charcoal and sand to keep the whole porous. If large specimens are wanted for exhibition purposes the number of bulbs may be increased. For successful culture as near sixty-five degrees as possible should be maintained at night. Manure water and Clay's fertilizer may be given (weak, and often) when the plants are growing vigorously, especially when the flower-scapes appear. After the plants have flowered rest slightly by withholding water but never to the point of severe drying. I have known vigorous plants to flower three times a year, but they should never be forced to do so. Top-dress the plants annually, repotting only when the bulbs get over-crowded.

Alfred Rehder.

With this issue Vol. XI of HORTICULTURE comes to a close. In the corresponding issue one year ago we spoke appreciatively of the fact that through the kind patronage of the advertising houses in horticultural lines our six months' volume then closing comprised 920 pages, 48 pages more than the corresponding volume the year before. We now call attention to HORTICULTURE's continued growth in size and, inferentially, in the estimation of the advertising trade, which is again in evidence, this volume extending to 970 pages, a gain of 52 pages over last year or exactly 100 pages over the record of two years ago. Increased advertising patronage supplies the wherewithal for increased reading space and just as fast as our advertising support grows we shall continue to present a proportionally greater amount of good literature. Thousands of intelligent readers

eagerly scan the pages of HORTICULTURE as it comes to hand from week to week and that fact is primarily the source of the recognized sterling value of this paper to the advertising trade. The principle of quality rather than quantity of reading matter has proved a good investment for HORTICULTURE.

We have before us clippings from two Milwaukee daily papers, date June 10, enlarging upon the dire effects of the blighting frosts and gloomy weather of the past six weeks or more, and the suffering which the June brides and June graduates must endure for lack of flowers. "Even twice the customary prices for the June season are being asked"—we are told, and, "Milwaukee brides and graduates must pay high prices for the few roses and carnations left or go without." As we have often remarked, the men who inspire the publication of this sort of stuff in the daily papers are no friends of the florist trade, although they are not infrequently engaged in that industry. For every individual that they frighten into paying an extortionate price they scare away scores who might, with tactful handling, be induced to become frequent purchasers. As to whether there is any acceptable justification for the agitation, let the flower market columns of our Chicago contemporaries answer. According to what they tell us the wholesale dealers of that city have had enough and more than enough for all, and there is nothing in the local trade reports from Milwaukee to indicate any famine. This being so why should not the flower industry of that section "read the riot act" to the parties who are so stupid as to send into thousands of homes unfounded statements calculated to repel and discourage the public from the use of flowers?

Our lines in last week's issue commenting on the unequal distribution of the flower product in certain trade centres and resultant inequality of market values have elicited responses from several correspondents acquiescing, on the whole, with the deductions therein drawn. One retailer, however, while acknowledging the facts as presented, roundly denounces the department store as a competitor and pleads that the legitimate florists' store has already enough opposition to meet, in the speculative element which depends upon the wholesale markets for bargain lots and peddles same at street stands at ruinous prices, and believes that the wholesale growers and dealers should be censured for the favor extended to these people and to the department stores and for the alleged consequent injury to the retail florists' interests. We must say that we cannot see it quite as our correspondent sees it and would here remark that the tendency which he deprecates seems practically inevitable and will, in all probability, continue and spread, just as sure as the years roll around. The retail florist had a great advantage until the time when a surplus of choice material became a permanent feature of the wholesale market. The supply as it increased brought him the benefit of a wider choice and the opportunity to command quality and price. Now that it has increased far beyond his ability to control it he will find the critical public looking to him to give them a quality of service that the department store cannot give—something beyond the very simple process of carrying a stock of nice flowers and doling them out, grocer fashion, at so much a dozen. Artistic ability and advanced knowledge of the higher phases of his art must consequently come to the front as essential qualifications of the florist of the future and his working force.

"Tis not in mortals to command success,
 But we'll do more, Sempronius; we'll deserve it."

PEONY NOVELTIES AT SHAYLOR'S

At this particular time of the year when peonies are mentioned in and around Boston, one instinctively thinks of Shaylor. Shaylor and peonies are synonymous and the piquant aroma from the radiant fields on the hill-top beyond the winding Charles which permeates the country air is a seductive advertisement of no small influence. Of course we couldn't stay away.

At the time of our visit, foliage and lawns were everywhere of vivid green, all verdure sparkling in the bright sunlight as it only does after a protracted rain in June. The road to the peony fields is well worn with the procession of automobiles and other vehicles which bring many visitors from far and near to see this annual outburst of June glory. All are made welcome and none go away without a gift of blooms as a souvenir of the visit. To the specialist in peony growing, a trip to such a place is full of instructive interest, for Mr. Shaylor has made it his practice for years to buy every new sort as it came out from the leading foreign growers and, as his interest is not wholly a commercial one, he has given much time and study to the reduction of confusion in nomenclature and the proper identification of varieties of merit, thus giving all the advantages of a trial ground, the results of which he is at all times ready to impart freely to the trade.

We find Mr. Shaylor in the midst of the flowers, of course, intent on the developing buds of the novelties which are now making their first acquaintance with an American grower. There are beauties from Lemoine, Dessert and other renowned peony specialists and none of their good or bad qualities escape the scrutinizing eye of this keen critic. The flower exhibited as No. 201 in Mr. Shaylor's collection at the Peony Show in Boston, is none other than the celebrated Lady Alexander Duff. That is, it is presumed to be the true one, although it is the ninth variety received by Mr. Shaylor as Lady Duff. This particular one, however, is well worthy of the distinction and of Kelway's description as "the loveliest peony in existence."

Marie Jacquin is doubling up each year in number of petals. This came to America from Kelway under the name of Bridesmaid and of Lady Helen Vincent, but Marie Jacquin is the original and correct name. The lateral flowers and those that open first are thus far only semi-double, but the stronger blooms are very beautiful in build. The buds are pink flush at time of opening but soon fade to white. Among Lemoine's new varieties

PEONY GEORGIANA SHAYLOR

Solange is sure to attract attention. It is a superb broad-petalled deep-built bloom. The half-opened buds are dull greenish white and give little suggestion of the rich shining salmon-pink of the full opened flower. Mignon, another Lemoine, 1908, is not yet showing its full size and character, but its color is a lovely fresh and pure soft pink, unlike any other in the field. Primevere, an introduction one year earlier promises well. The centre is sulphur yellow and guard petals pink flushed. Le Sygne is a beauty—white with a greenish luminosity in the heart.

Among Dessert's new introductions, Odette is somewhat of a sensation. Between the guard petals and the broad centre petals is seen a circle of finely lacinated petals which make a striking appearance quite different from any other variety. The color is soft flush, outside petals a little deeper. Mme. Jules Dessert, introduced last fall, gives every promise of being a winner. There are four plants here of this variety. The flowers come, of course, in an unde-

veloped shape the first season after importation, but the color is sufficiently indicated to show a pearly shell pink of unrivalled charm, somewhat on the order of Aurore. A new red one—also of 1909—is Francois Rousseau. It is brighter than the old Adolph Rousseau, the petals not glazed but velvety rather on the surface. Pomponette and Mme. Rignoux are two other introductions of last season but there is so far nothing to indicate what they will be. Rosa Bonheur was only partially opened at the time of our visit. It is a decidedly short and stocky grower and the blooms are radiant pink. Theresa is little short of perfection—a pink flower of noble proportions and build.

Among the new varieties from Millet & Son is Mme. Gaudichau, a most distinct novelty. The flower is a glowing dark red with handsome, regular, cupped petals. It is as yet only semi-double but the process of doubling up is well under way. It is unique as to color of stems and leaf stalks which are uniformly dark red in the manner of dark beet foliage.

Mr. Shaylor has but one plant of it, which is presumably the only one in this country at present.

And now a few words about Eugene Verdier, a variety always referred to as a most charming peony. Mr. Shaylor has stock—over 100 plants—as supplied to him under this name by at least three of the most prominent nursery firms. He also has what has been proven to be the true Eugene Verdier. It is absolutely distinct and no one who has had an opportunity to make comparisons will ever again have any difficulty in recognizing it. It is an exceedingly stocky grower, the stems very stout, short, upright and noticeably uniform as to height, the foliage extending close up to the flowers. Mr. Shaylor has Mr. Dessert as authority for the assertion that there is no question but that this is the original variety obtained by Mr. Mechin in 1867 or '68 from Eugene Verdier himself who was then a nurseryman at Paris. Between it and the others which have been traveling under its name, there is no comparison as to foliage, bud, quality or behavior, its superiority in all these respects, being unquestionable. The spurious variety lacks in all these qualities and, further, 20 to 33 per cent. of the buds "break"—that is, one side bursts out while the other remains undeveloped and frequently rots. Some growers, it is said, have pronounced the latter to be *Eugenia Verdier*, but Mr. Shaylor declares that *Eugenia* is also quite different. By some it has been sold under the name of *Potsi Alba*, which is also manifestly wrong.

Georgianna Shaylor, a portrait of which appears on preceding page, holds well up to its previous reputation as an American production of distinct merit. After the heavy rains its thick stem stands perfectly erect, carrying the big blooms well above the foliage and in texture, uniformity and purity of color and thickness and breadth of foliage it has no superior in sight. The only time this variety was shown at Boston it received a first class certificate of merit. It is the only one of Mr. Shaylor's seedlings which he has ever named. He says that he doesn't believe in giving a name to a variety unless he feels pretty sure it will live and be cultivated after he dies.

These notes are intended to be limited to comment on new varieties, but we cannot resist a brief reference, in passing, to that standard peony, *Avalanche*, with its majestic white globes, the inner petals daintly edged here and there with crimson purple; to *Aurore*, with large loose petals of beautiful soft blush (this must not be confused with an American variety called *Aurora*); *Marguerite Gerard*, a pink of noble proportions; *Mme. Galhau*, the star of the recent exhibition; *Baroness Schroder*, which is a model in build and satiny texture, color faint flush deepening towards the centre, than which there is nothing finer. And there are others.

"WE NEED IT."

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Asparagus Sprengeri.

This is such a tremendous feeder that a great depth of soil is necessary—not less than a foot deep for its roots to grow in, using a very rich compost. As they have a tendency to work downward a method in favor with some good growers is to grow this asparagus in deep narrow boxes, from 3 to 6 feet long, 12 to 18 inches deep, and about 1 foot wide. These boxes can be placed at the side or end of a house, and this method of culture also makes a change of position at any time possible. The boxes should be raised up to full light so as to give a superb grade of finely developed deep green sprays. Watch for indications of stagnant moisture at the roots, which shows itself by the foliage taking on a yellowish color all over. The remedy is to withhold water for a time. When the boxes or beds get filled with roots, encouragement must be given in the form of liquid manure. Give a night temperature of from 56 to 60 degrees in winter.

Bougainvilleas.

The plants that were rooted in March or April should now be nice strong plants growing vigorously in 4 or 5-inch pots. Shift as they may need until September when they should be in their flowering size, say 6 or 7-inch pots. They like the fullest light possible and delight in a high temperature, providing the atmosphere is not kept too moist during the summer, which would interfere with the wood getting well matured. Without well-ripened wood you will not succeed in having good blooms. Care should be taken that the soil does not get too dry, otherwise many of the shoots will receive a check which will cause them to set a few bracts of flowers prematurely in place of producing a full crop. If plunged in some material on the benches the pots will not dry so often, thereby saving much labor and the plants will thrive better as the pots will be kept cooler. When the growth shows signs of ripening in October a slight drying off can be practiced, but be careful not to dry them off too suddenly.

Care of Planted and Plunged Out Stock.

A large part of the florists' stock is raised into salable or flowering size by field culture. Good cultivation is essential to all glass-house plants. It helps to give them vigor and size during their few months' sojourn in the field. Keep the ground clear of weeds by frequent hoeing, with proper care as to trimming, stopping and tying where needed. Being now fully exposed to the sun and air, plants that are plunged will require a constant supply of water. It would be impossible to say how much or often as the weather, the constitution and habits of the plants, and also the size of the pots, will make a material difference in that respect. Crotons, dracaenas, ficus, hydrangeas, roses, vincas and other plants in a dry season require plenty of watering and are also benefited by a spraying after every hot and sunny day. Pots that are plunged should be turned full around in their seats at least once a week to prevent

the roots from striking through the bottom of the pots into the outside soil.

Cinerarias.

It is well to make three sowings—one early in July, another about the middle of August, and the last sowing the middle of September. The two last dates are the best for most growers as they will have them from February on to Easter, which will be late next year, April 16. Be sure and obtain your seed from some reliable firm as it is an unpardonable mistake to invest in a cheap and poor grade of seed. Prepare well-drained flats or pans of soil, three parts loam to two parts leaf mould, with one-sixth of sand. Press the surface smooth, plunge the pan or flat in a tub of water till the water appears over the top, and then sow the seed evenly on the surface. Cover with a piece of glass, then shade the glass with paper and place in cold frame. When the seedlings are large enough to handle, prick out into flats of similar soil. Give frequent shifts, using a stronger soil each time. Keep moderately moist at the roots and under a heavy shade to be made lighter as the fall advances. Keep them out as long into the fall as possible, guarding, however, against frosts. Fumigate often as they are liable to green-fly. Give plenty of fresh air.

Pelargoniums.

Those who grow pelargoniums should now prepare the plants to produce cuttings to be taken in August. They should be kept rather dry for the next six or eight weeks. Then cut them back hard and moderately water until they have broken. The top growth can be cut off with three or four eyes which will root readily with a slight shade and moderate amount of moisture. They will not root as quickly as most plants, but in five or six weeks will be ready for 2½ inch pots. Grow them on in very light and airy house well up to the glass. Due attention should be paid to pinching to keep the plants symmetrical. Strong and fine plants can be grown from these if they are repotted as required and should be flowering by next April or May.

Poinsettias.

You should be getting ready to propagate your stock of poinsettias now, rooting cuttings for benches or pots. It is too early yet to propagate for pans intended for Christmas sales. About July 10th is a good date to propagate for pan culture. Any ordinary greenhouse or frame can be used for propagating purposes. Never let them wilt for the want of water. If you do they will shrivel up and perish in the sand. It is also necessary to keep them shaded from the sunshine. Guard against sunshine and draughts and see that bed is kept saturated and you will have no trouble in rooting a high per cent. The best cuttings are those rubbed off with a heel. See that the leaves are trimmed off fairly close before inserting the cuttings.

JOHN J. M. FARRELL.

Mr. Farrell's next notes will be on the following: Hollyhocks; Housing Carnations; Ivies; Nepenthes; Primulas; Oxidiums.

PARIS SPRING SHOW

This year the Spring Show of Fruit, Flowers and Vegetables held by the National Horticultural Society of France was announced as an international one, and in conjunction with it there was a Rose Growers' Conference. Of the latter we have but little to say in our account of the show, which was attended by a large number of visitors from almost every country in Europe.

The show opened on the 25th of May and closed on the 31st, and was indeed one of those horticultural treats that seldom fall to the lot of the ardent lover of gardening. American visitors to the great 1900 Paris Universal Exposition will remember the two large greenhouses that were erected on the Cours la Reine, just between the Champs Elysees and the river Seine, in which several grand displays were held during that year and which remained for some few years after. But the time came when the Municipal Council deemed them dangerous and they were consequently removed. The site, however, remained and the National Horticultural Society in their place have erected what they call a tent, but which is in reality an immense exhibition hall, 400 yards in length, constructed of a light framework of wood and iron girders, the whole being covered in with canvas and here the May show was held.

On one side of the hall was a long promenade, on the other a walk reached by a flight of steps leading down to the river side. In the rear of the building there was another promenade leading to the back entrance. This one was laid out with four alleys, each having a border of some 6 or 7 feet in width running the whole length of the promenade to the exit side. Tastefully placed at intervals were groups of decorative shrubs and conifers by A. Brochet, Paul Lecollier, Croux & Son and Marcel Picquefen. The borders were filled with some grand examples of trained fruit trees, such as one sees only in France. The two other promenades mentioned formed admirable sites for numerous displays of garden sundries.

We entered the show by the principal entrance near the Pont des Invalides, passing a large circular basin with a fountain playing and right and left a showy group of rhododendrons by Derudder, an outside taste of the many floral joys within. Along each side of the show hall are borders going from one end to the other. In the middle are many artistically shaped beds edged with green turf and gravel paths intervening.

The color scheme is well devised. We compliment our friend Vacherot on his never-failing artistic taste. Two grand banks of rhododendrons greet us right and left, Croux & Sons being the exhibitors. At the far end Moser & Son have set up an enormous bank of the same plant in a winding fronted group. Azaleas also make a glowing display.

On account of the International Rose Conference there are of course many large and important exhibits of the Queen of Flowers. The space at our command will not allow more than the briefest mention. Geo. Boucher had two borders right and left filled. Honore Defresne had four or five collections. Te Niklaus showed a long

bed of roses, standards at back with small bush plants in front. The famous rose growers, Leveque & Sons, made a big display with numerous beds. But of all the exhibits Auguste Nonin certainly put up the most attractive. He had a rose garden with a central path; at each end an arch of rambler roses. Between these standard, bush and pillar roses the varieties being Tarsendschon, Dorothy Perkins, Mrs. Flight, Hiawatha, White Dorothy Perkins, Phyllis, Lady Gay, etc. At one end some fine plants of *Authemis Perfection Rose*, and *A. Etoile Blanche*; at the other, *Hydrangeas La Lorraine*, *Avalanche*, *La Fraicheur*, and others.

The room devoted to orchids, after our experience a few days before at the Temple Show, appeared almost insignificant both in extent and in arrangement. We should, however, mention Maron & Sons' collection of cattleyas and *laelio-cattleyas*, etc., and M. Graire's *odontoglossums*. M. Bérane had also a very artistic and rather large display flanked at each end with anthuriums and ornamental foliage plants. M. Bert also staged cattleyas, *laelio-cattleyas*, etc. Across the hall Geo. Boucher's collection of clematis commands admiration.

A great show like this cannot have justice done to it in a few short paragraphs. One house alone—Vilmorin-Andrieux & Co.—sent such a mass of material that it would have made a big exhibition by itself. As we turn to descend the steps leading to the lower promenade by the river side we stand and gaze with admiration at the extraordinary variation of the products on view. The immense collection of annual, hardy, herbaceous and other flowers in veritable sheets of color was divided into two portions through which the visitors passed to the steps. A water scene fed from a rock-work construction in the back continued till it came to the slope by the steps and then terminated in a mass of rock-work to the bottom of the steps, the nooks and crannies of which were filled in with numberless Alpine plants in flower.

We return to the middle of the hall and admire a large collection of water lilies in a circular pond exhibited by M. Laugrange, and then pass a large mixed collection of amaryllis and other flowers of the season in several distinct lots, all shown on the ground level by Cayeux & LeClerc, Parisian seedsmen of considerable repute.

A similar exhibit comes from C. Angel & Son, in which iris, *eremurus*, peonies, tulips, anemones, gladioli, etc., predominate; also fine collections from M. Ferard.

Among the miscellaneous groups from many prominent specialty firms were violas, hydrangeas, lilacs, irises, cannas, begonias, etc., and a new ivy-zonal pelargonium, semi-double, pale blush and spotted rose, called *President Desseine*, was shown by Le Cou-teulx & Son. M. Foucard showed a new calceolaria, "*Soleil*." There were many imposing groups of pelargoniums from well-known firms. The most dazzling display of zonals was made by E. Poirier, who had two large beds with single-flowered kinds massed in colors separate by themselves. The form was each color in separate panels, the

trusses packed close up together, with the consequence that being below the visitor's eye the whole was a perfect blaze. This style is peculiar to the French show and is striking in its effect. Peonies from Aug. Dessert, a grower not unknown to American admirers, were shown in endless numbers. Collections also came from Benoïse Riviere and A. Brochet. Ferns and foliage groups were in fine form, many of them of great extent and variety. A lovely display of stove species was made by Chantrier Bros. Louis Dahl set up a huge bank of palms, enlivened with dracaenas. Dere Desmond's foliage begonias and M. Vazon's graceful arrangement of decorative foliage plants were superb.

Among carnations there was an attractive display of C. Engelmann's new crimson, "*Carola*." Another English firm, G. & A. Clark of Dover, sent a very pretty general display of sweet peas arranged in vases in a kind of arch, beneath which were garden flowers in dazzling array with succulents and ivy pelargoniums, making one of the prettiest lots in the show.

In the section for Floral Art there was a large number of admirable compositions such as only the Paris florist can set up. M. Lachaume, the eminent floral decorator of the rue Royale, had quite an important series—one of them was a bower within a trellis of rambler roses. A breakfast table set and ornamented with numerous orchids and roses formed a conspicuous feature in the centre. (See cover illustration, HORTICULTURE, June 18.)

Lachaume's designs were all more or less of a piece, and occupied much space. One was a window overlooking a balcony decorated with blue and pink hydrangeas; on the pedestals of the balcony were basket draped vases of the same and below a mixed border of flowers. Quite effective and original was an entire sitting room furnished with Louis XIV furniture and decorated with rich floral compositions in vases, bowls, etc., standing about the room. A trellis alcove decorated with climbing roses, smilax, clematis, herbaceous calceolarias and a corner containing many samples of less pretentious floral art work, but all of the choicest characters, were only some of the extensive displays made by Lachaume.

Ed. Debrie, another noted man in this line, had table decorations of the choicest kind. One huge upstanding basket on a pedestal filled with white lilies and white lilac, was a sight not easily forgotten. Roses in various shaped vases, table decorations, and stands filled with flowers in every conceivable way drew forth the admiration of many visitors who are not by any means unaccustomed to see fine floral artistic work.

Very choice was a neat little lot of Japanese richly colored maples staged by Lecomte and Martin.

Fruit, almost wholly forced, was displayed in handsome plate glass cases, each kind being arranged in neat little boxes or baskets, in the daintiest of styles, and in quality and variety that beggars description, and which made a remarkable sight.

Vilmorin-Andrieux & Co. had several most comprehensive lots of vegetables which as usual contained every con-

ceivable thing in season. Only those who have once seen an exhibit from this famous house can imagine the variety, the extent and the excellence of these groups, and there were many other notable exhibitors whom we should like to mention if space would permit.

In conclusion we may mention that there was the Retrospective Rose Show about which we may have something to say later. There was also a literary department for gardening books and journals, and an exhibition of the fine art section in which there was a very extensive collection of pictures of fruit and flowers in oil and water colors by well-known artists connected with the Society. An original feature was M. Geo. Truffaut's scientific exhibition. This comprised in small glass cases, worms, moths and other insect pests at work, a most life like and instructive collection. An art gallery of paintings of fruit, flowers, etc., formed another important feature and there was also a large array of books and literary matter from the various French horticultural publishers. In all there were no fewer than 317 exhibitors in the show, some of them appearing in several classes. The winners of the chief prizes were: First grand prize of honor to Vilmorin Andrieux & Co.; second grand prize of honor to Croux & Son; prizes of honor to Leveque & Son, Cordonnier & Son, Debrie-Lachaume, Graire, Page, Ferard, Maron & Son, Moser & Son, Geo. Truffaut, Nombrot-Bruneau, etc.

Altogether a grand display of garden produce arranged with great taste as a whole and producing a general spectacular effect unequalled in the British Isles. At Paris the individual lots are subordinated to the general effect and the result reflects the greatest credit on those who design the show plan.

(Signature) C. HARMAN PAYNE.

WHERE THE S. A. F. HAS MET.

To please an interested subscriber, kindly give a list of the yearly meeting places of the S. A. F. since its foundation to the present time and oblige

BEN STARKEY.

Care Pennock Bros., Philadelphia.

The S. A. F. has held annual conventions as follows:

1885, Cincinnati, O.; 1886, Philadelphia, Pa.; 1887, Chicago, Ill.; 1888, New York City; 1889, Buffalo, N. Y.; 1890, Boston, Mass.; 1891, Toronto, Ont.; 1892, Washington, D. C.; 1893, St. Louis, Mo.; 1894, Atlantic City, N. J.; 1895, Pittsburgh, Pa.; 1896, Cleveland, O.; 1897, Providence, R. I.; 1898, Omaha, Neb.; 1899, Detroit, Mich.; 1900, New York, N. Y.; 1901, Buffalo, N. Y.; 1902, Asheville, N. C.; 1903, Milwaukee, Wis.; 1904, St. Louis, Mo.; 1905, Washington, D. C.; 1906, Dayton, O.; 1907, Philadelphia, Pa.; 1908, Niagara Falls, N. Y.; 1909, Cincinnati, O.; 1910 will be Rochester, N. Y.

The Van Houtte Centenary Celebration at Geudbrugge promises to be of an impressive character, and attended by an immense number of people. The festivities on the first day will conclude with a banquet at the Casino of the Societe Royal d' Agriculture et de Botanique, and it will be attended by numerous admirers of Louis Van Houtte, horticulturists and others.

ORCHID DISPLAY OF W. A. MANDA
at Boston Orchid Show

Photo. by Geo. E. Dow.

OBITUARY.

Charles Eissner.

Charles Eissner, a well known florist in the East End, Pittsburg, Pa., died at his home 224 Emerson St., recently. He conducted stores at 6103 Penn Ave., Pittsburg and 827 Wood St., Wilkesburg. He leaves one sister and one brother.

Mabel R. Gordon.

Our deepest sympathy goes out to our esteemed old gardener friend, George Gordon, of Beverly, Mass., in the sudden bereavement and sorrow which has come upon him in the death by drowning of his daughter, Miss Mabel Gordon. Miss Gordon was 29 years of age and a graduate of Wellesley College. She had been in rather poor health for the past two years, due to a nervous breakdown, and had been for some time at the Nervine Hospital in Jamaica Plain.

Gottlieb Graul.

Gottlieb Graul, aged 107½ years, the oldest person in Cincinnati and one of the oldest in the entire country, died peacefully in the German Altenheim on Burnet avenue, Cincinnati, Saturday morning at 12.30.

Graul's extreme age, his fund of information concerning early Cincinnati and his droll humor made him one of the unique characters of the city. He was known and esteemed highly by thousands of Cincinnatians, especially Germans. He was born in Nordhausen, Germany, on December 26, 1802. His father was chief gardener to the King and young Graul was placed by his father on the royal estates to become a forester. But he quit his position, preferring to become a landscape artist and gardener. In this capacity he served the royal house. For a time, about eighty years ago, he served at Weimar on a beautiful estate where the great German poet, Goethe, lived.

Graul came to America and was in

the employ of the German official at Orange, N. J., when Nicholas Longworth, grandfather of Congressman Longworth, sent for him to take charge of his large vineyard where Eden Park is now situated. He afterwards served with a number of prominent families in the capacity of landscape gardener, retiring a few years ago.

PRIZE LISTS RECEIVED.

Horticultural Society of Chicago.—Preliminary Premium List for the Annual Fall Exhibition to be held at the Coliseum, Chicago, Ill., in November, 1910. Secretary, J. H. Burdett, 1620 West 104th Place, Chicago.

New Haven County Horticultural Society.—Preliminary Schedule of the Tenth Annual Exhibition to be held in Music Hall, New Haven, Conn., on November 1st, 2nd and 3rd, 1910. Secretary, Frederick H. Wirtz, 86 Nicoll St., New Haven, Conn.

New Bedford Horticultural Society.—Schedule for the Eighth Annual Fall Exhibition of Plants, Fruits, Flowers and Vegetables to be held in Odd Fellows Hall, New Bedford, Mass., September 15, 16, 17, 1910. Secretary Wm. H. Richardson, New Bedford.

NEWS NOTES.

Dallas, Tex.—A certificate of dissolution was filed by the East Texas Nursery Co., of Tyler.

Louisville, Ky.—A three-story warehouse on the farm of H. F. Hillenmeyer was burned recently with a loss on building, machinery and nursery supplies of about \$2,500, with no insurance.

San Francisco, Cal.—The MacRorie-McLaren Co. inform us that their five greenhouses of steel construction are about completed and they are commencing to erect a lath-house 75 x 300 feet. Five more houses will be put up this coming spring. The present houses will be filled chiefly with orchids.

NEWS OF THE CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The announcement that the June meeting—the last until September—would be Ladies' Night, sufficed to draw an attendance of considerably over two hundred to Horticultural Hall on a very hot night—Tuesday evening, June 21.

Routine business was expedited as much as possible. William Downs reported progress on the part of the Executive Committee in its preparations for the entertainment of the many distinguished ladies and gentlemen who are expected to attend the National Flower Show next spring. A rousing letter was read from E. Allan Peirce, who was unavoidably absent, urging the importance of the proposed show and the necessity of getting together a representative attendance from Boston at the Rochester convention in August. Secretary Craig warmly endorsed the sentiment of Messrs. Downs and Peirce, and asks all New Englanders who propose to make the Rochester trip to communicate with him so that arrangements for mutual advantage and comfort may be made.

Our report of the previous meeting of this club mentioned that it was the first meeting in over five years in which there was no applicant for membership. The secretary informs us that before the close of the meeting a name was proposed and accepted, so that, up to present date inclusive, when several additions were made, the line remains unbroken. It was announced that the oldest member of the club, Mrs. E. M. Gill, would celebrate her eightieth birthday anniversary on next Wednesday and the secretary was instructed by a unanimous standing vote to extend to Mrs. Gill the congratulations and good wishes of the club.

On the exhibition tables were *Catleya gigas*, a well-flowered plant from Wm. Downs, *Lupinus polyphyllus* Moerheimi from Blue Hill Nurseries, both of which received honorable mention; *Dahlia* Jack Rose from W. C. Ward, and strawberries from Wilfrid Wheeler, each of which received a vote of thanks.

The proceedings were then turned over to the entertainment committee. Songs were rendered by Hugh Miller, bass, sea songs; Gus. Collins, Harry Lauder songs; John Miller, tenor, love songs; Miss Margaret Alexander, Scotch songs; two little misses gave dances in costume; between each of these, all of which, by the way, were vigorously encored, brief speeches were made by E. O. Orpet, who is soon to leave Boston to locate in the West, ex-President James Wheeler, ex-President T. H. Westwood, ex-President Wm. Downs, ex-President Wm. J. Stewart and Thomas J. Grey, all full of congratulatory enthusiasm. Then the ice cream, cake and strawberries had their innings and the hundred ladies present warbled and cooed their appreciation of Boston's pet organization and its gallant presiding officer, Peter M. Miller.

AMERICAN GLADIOLUS SOCIETY.

The officers of the American Gladiolus Society are extremely busy these days. The large volume of inquiries, and requests for membership application blanks demonstrates the great popularity of the gladiolus today and the importance and necessity for such a society.

The interest in this movement is not confined to America, for two of the great specialists of Europe are among our charter members and our first meeting at Boston developed a strong sentiment for an International Society. There is much encouragement in the fact that the amateurs have taken hold of this movement so enthusiastically. This was evidenced by the large enrollment of amateurs on the charter list at Boston. Since I sent in the list of prizes offered for the Rochester exhibition the following have been received:

Stump and Walter Co., New York City, \$10.00 in gold for the best 12 shades in any varieties. Weeber & Don, New York City, \$10.00 in gold for the best 10 varieties to include Baron Hulot, Princeps and Contrast, 3 spikes each. A. L. Miller, Brooklyn, N. Y., \$5.00 in gold for best display of pink and white varieties, 3 spikes each, of at least six varieties. F. R. Pierson Co., Tarrytown, N. Y., \$10.00 in gold, class to be decided later. E. H. Cushman, Sylvania, O., \$5.00 in gold for vase of best 25 spikes white, any variety. A. T. Roddington, New York, \$10.00 in gold, class to be decided later. John Lewis Childs, Floral Park, N. Y., \$10.00 in gold for best collection of gladioli, Childs' varieties, 3 spikes each, to include Attraction, Blanche, Cardinal and Wild Rose; \$5.00 in gold for best vase of America not less than 12 spikes. I. S. Hendrickson, Floral Park, N. Y., \$5.00 in gold for best vase of Contrast, not less than 12 spikes. J. M. Thorburn & Co., New York City, silver cup for best collection of Gladiolus Primulinus, type and hybrids, to be exhibited by an amateur.

L. MERTON GAGE, Cor. Sec.

AMERICAN ASSOCIATION OF NURSERYMEN.

Among the more important actions taken by this association at its recent session in Denver, Colo., was the agreement to abolish the custom of replacing trees which fail to grow for the buyers. Another resolution was passed with the object of putting a stop to price cutting, and all stock not salable at standard price will find its way to the ash heap if the proposition carries out in practice. According to the nurserymen the State Horticultural Society is wrong in holding that the diseases known as root knot or crown gall are contagious and the law compelling the destruction of stock affected is pronounced unjust, and an effort will be made to secure its repeal.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The regular monthly meeting was held on Tuesday, 21st inst., routine business only being transacted. The date of the Sweet Pea Exhibition was fixed for Thursday, June 30th, 3 to 10 p.m. This promises to be a very good show, there being twelve classes for Sweet Peas, also classes for Hardy Perennials, Gloxinias and seasonable vegetables. DAVID RUST.

CLUB AND SOCIETY NOTES.

The vote of the American Peony Society at Boston, selecting Philadelphia as their meeting place in 1911, was in response to an invitation from the Pennsylvania Horticultural Society, which they knew was on the way but which had not been received at the time of voting. The official document, duly signed by Secretary David Rust, arrived the following morning and was placed in the archives.

It is a source of satisfaction to the Royal Horticultural Society to find that the amount of money taken for admission to the Temple Show was in excess of that of last year. There was less crowding of the tents than usual, many of the Fellows having taken advantage of visiting it on Wednesday morning, when the show was reserved for their inspection, and by this arrangement the crush on the Tuesday was greatly relieved.

DURING RECESS.

New York and New Jersey Association of Plant Growers.

The Association's Fourth Annual Outing will be held at Mountain View House, Lake Hopatcong, N. J., on Thursday, July 7, 1910. The members and their friends will meet at the Delaware, Lackawanna & Western R. R. Depot, in Hoboken, N. J., and there take the 8.15 a. m. train, to which the Association's special cars will be attached.

The committee has arranged many contests for prizes for both gentlemen and ladies, and the amusements provided will consist of bowling, shooting, boating, dancing, bathing, tennis, billiards, etc.

The price of tickets is \$4.00 per person and the same includes all transportation charges, luncheon, dinner and all expenses. The secretary, Wm. H. Siebrecht, Jr., 277 Broadway, New York, is desirous of knowing as soon as possible how many to provide for and members and others intending to participate in this delightful outing are earnestly requested to make known to him at once how many tickets will be required. The committee in charge consists of H. C. Steinhoff, Julius Roehrs, Jr., and Herman Schoelzel.

Astoria Florists' Bowling Club.

Last Saturday, June 18th, the Astoria (N. Y.) Florists' Bowling Club attended a matinee at the Broadway Theatre and saw the performance of the "Summer Widowers;" then they had dinner at Shanley's. After dinner they went to the New York Theatre and witnessed "The Merry Whirl." Strenuous times for the Astoria bowlers. There were 22 in all, with their wives. The tables at Shanley's were handsomely decorated with smiles, carnations, roses, etc. Favors were provided for the ladies.

Chicago Bowlers.

AMERICAN SEED TRADE ASSOCIATION

Annual Convention at Atlantic City, N. J.

The American Seed Trade Association closed a successful meeting at Atlantic City on Thursday, June 23d. Seven years ago they held a meeting at Atlantic City, at which time Mr. Walter P. Stokes of Philadelphia, was the president and Hon. S. F. Willard, secretary, and they then elected Mr. Willard to the position of president and he was highly commended by Mr. Stokes in installing him to that office. Both these gentlemen are now away in Europe, it being perhaps the first meeting that Mr. Willard has ever missed attending of the American Seed Association. The weather throughout the dates of the meeting was delightful and all other conditions favorable. There was a representative attendance, and under the leadership of Mr. J. C. Robinson and permeated by his genial personality every feature of the proceedings moved along smoothly and harmoniously. His address at the opening was sound and wholesome and thoroughly practical, and of itself confirmed the good judgment displayed in his election a year ago. Reports by the secretary and treasurer, Mr. C. E. Kendel, of Cleveland, showed that the membership was holding its own, and the finances in an encouraging condition. The following new members were duly elected, Herman Simmers of J. A. Simmers, Toronto, Can.; J. Edward Schultz, Washington, D. C.; Diggs & Beadles Co., Inc., Richmond, Va.; J. F. Noll & Co., H. G. Hastings, Atlanta, Ga.; Frank W. Howard, Pittsfield, Mass. President Robinson proposed for honorary membership, Mr. F. W. Bruggerhof of New York City, who was unanimously elected, and was informed by telegram and returned his acknowledgments and regret at inability to be present at convention and banquet. In order to carry out certain proposed good works, it was proposed to raise the membership fee to twenty dollars, double the former dues. This was amended to fifteen dollars and in amended form unanimously adopted. Mr. Albert McCullough, one of the delegates to national board of trade, the other being W. Atlee Burpee of Philadelphia, presented their report in part as follows:

It is the aim of the National Board of Trade, of which the American Seed Trade Association is a constituent member to keep all of the trade bodies supporting the Washington headquarters informed of what is going on. This will enable every commercial organization in the United States to come in direct contact with the various committees of Congress, to arrange for hearings before committees of House of Representatives and Senate and co-operate with respective committees of the National Board of Trade so that the opinion and influence of business men of the country may be exerted during the entire session of Congress.

The transportation interests, conservation of National resources, diplomatic and consular service, banking and currency, renewal of trade treaties

and postal affairs are among the important questions and subjects taken up at the last meeting. Mr. Frank D. LaLann, president National Board of Trade has been appointed by Secretary of State Knox as delegate to represent the United States at the Fourth International Congress of Chambers of Commerce and Commercial and Industrial Associations to be held in London, England, June 21st, 22nd and 23rd, 1911.

The questions to be taken up by the Congress are many and all of national interest. Mr. W. Atlee Burpee has been appointed a member of the council and Mr. Albert McCullough, one of the managers of the National Board of Trade. The National Board of Trade is taking on new life and through its commissioner Mr. Anderson, its work will be felt this coming year more than ever before. The American Seed Trade Association is at liberty at all times to call upon the commissioner for information as to what is going on in Congress and in this way keep posted and properly advised when there is any bill introduced in which we are directly interested.

Chas. H. Breck, C. H. Coy and W. F. Jones were appointed as obituary committee. Chas. H. Breck, E. L. Page and C. F. Wood were named as committee on recommendations in the president's address. Committee on customs and tariff, J. C. Vaughan, chairman, reported they had received no complaints as to the workings of the present Payne law, though the average advance in duties is probably thirty to thirty-five per cent. over what was paid on *ad valorem* basis. The customs operations as to seed importations are being handled with less friction than ever before. Francis Brill's paper on "The Past, Present and Future of the Seed Business in America," was then read. No discussion. No report was received from committee on irrigation of old Eastern farms or the committee to confer with nurserymen and florists. The auditing committee, Simeon F. Leonard, John W. May and Harvey Mixson, reported the books O K. The delegates to the National Council of Horticulture presented a report through Secretary Kendel showing continued good work and progress, and the usual sum was voted for use of the press bureau of the National Council of Horticulture in the interest of seed trade.

President Robinson announced that Prof. Chas. D. Woods was unable to be present and deliver his address on state legislation and expressed regret, in which the convention joined. George E. Green, chairman of committee on seed legislation, submitted a comprehensive report showing the condition of present and probable future legislation and work done in enlightening legislatures and Congressmen as to the true conditions of supply. He recounted the work done in Boston last December by a conference of representatives of various seed trade organizations and the National Association of Official Seed Analysts.

At this meeting it was the unanimous conclusion that if seed legislation is enacted in various states it should be reasonably uniform in character so that inter-state trade shall be restricted as little as possible. It is quite generally conceded that if reference to germination can be kept out of the seed laws it will tend to unify efforts all along the line to protect the public and the trade as well. The committee believes that quality restrictions should be only such as are necessary to protect against fraud but leave commerce free. A bill was prepared and is being considered that will include these views and it is hoped will tend to uniformity in legislation on seed subjects.

Correspondence was read showing a liberal attitude on the part of Congressmen and a desire to inform themselves fully before enacting laws which otherwise without due consideration and information could not help but be hurtful to all interests and to safeguard the public. Representative Mann expresses determination to refrain from hasty and ill-considered action and is willing to receive the views of seed men and others. Any legislation should not include under the same provisions the widely different classes in production and use, such as garden seeds and bulbs on the one hand as opposed to grass and clover seeds on the other. Arbitrary standards are declared against for reasons given. The best methods of testing seeds for purity and germination which are now in use are not sufficiently uniform and accurate, and the vitality of seeds is not sufficiently stable to warrant imposing heavy penalties for the sale of seeds falling below a certain arbitrary standard. While purity and germination constitute the only basis available for arbitrary standards, they are by no means a complete or accurate measure of the actual value of seeds to the user thereof. Many other qualities enter into the value of seeds such as color, size, locality of production, trueness to type, excellence of strain, etc. These considerations make it manifestly unjust to allow the terms "United States Standard" to be applied indiscriminately to all classes of seeds of certain variety which might reach certain standards of purity and germination. The apparatus and methods for making tests are only now in process of evolution and not by any means perfect. No legislation should restrict or prohibit exportation of any class of seeds having commercial value in any foreign country. For example, there are climates and countries where dodder does not thrive and there is no sound reason either commercial or moral for absolutely prohibiting exportation of such seeds. On the contrary, such prohibition would tend to cause such seed to be resown within our own country. If the original Mann bill had become a law it would have absolutely disorganized all existing methods of handling the seed business. If any large proportion of many proposed state laws had passed they would have

had the same result. But the prospects are that future state laws will be guided by wisdom and this is ardently hoped for.

Chas. N. Page, vice-chairman in charge of state seed legislation, in his report dealt with the state aspect. He declared that seed dealers have never seriously objected as a class to reasonable legislation which was intended to serve a good purpose, but most of the earlier bills introduced were unjust, ill-considered and unfair, and therefore met merited condemnation at the hands of legislators, as the proposers of such bills showed ignorance of conditions under which the seed trade is conducted and it would be absolutely impossible for seed dealers to carry out the provisions in many cases. But the seed trade protests against any legislation which would make law-breakers or criminals of honest men who are engaged in a reputable and useful calling and who are willing at all times to assist in the preparation of reasonable legislation.

A paper was read by Curtis Nye Smith on the relation of State seed laws to interstate commerce in which he congratulated members of this and kindred organizations on the newly awakened and effective interest taken in this matter which will benefit seedsmen and public alike. The problem is a serious one as seedsmen are often called to pay excessive license fees or purchase stamps for tax where unexpected and not allowed for under their contracts of sale. The legal relationship of state and federal laws is a question of constant and growing perplexity and complication. The right to sell in the original package in which the article is imported into the state is as much an inherent part of interstate commerce as is the actual transportation of commodities between the states. States have found a way to exercise power not rightfully theirs by what is termed, "Police power." The speaker went on to deal with various aspects of interstate commerce in seeds, what constitutes delivery and other interesting and vital matters to seedsmen. He said it is inadvisable at this time for sales to be made C. O. D. in states of Iowa, Georgia, Vermont, and possibly Colorado. Such sales are safe in Alabama, Arkansas, Illinois, Kansas, Kentucky, Maine, Massachusetts, Nebraska, New Hampshire, New York, North Carolina, Pennsylvania, Texas, West Virginia.

Further explanations of interesting questions make the paper valuable to all seedsmen and growers. Present laws where impracticable and unconstitutional cannot be too soon substituted by legislation of uniform and sane kind, fair to all interests. This Association and the official seed analysts are to be congratulated upon their cordial co-operation along these lines. The Association is capable of taking a leading part in these necessary reforms and by so doing will merit the commendation of all seedsmen and the public generally. The paper received the thanks of the Association and Mr. Smith was re-employed as counsel for ensuing year.

Crop reports by Messrs. Keeney, E. B. Clarke, Leonard, Robinson, were an appreciated feature and will be enlarged on at future conventions. Report of the committee on postal laws

presented by Mr. Vaughan. An interesting feature of the report and discussion was the matter of the recent more stringent enforcement somewhat extensively of the old regulation regarding the requirement of enclosing seeds in transparent coverings. This was discussed by Messrs. Allan, Burpee, Robinson, Ford, Maule, Hastings, Belgiano and Page. The regulation only applies to sealed packages or packets. Paper manufacturers are taking interest in finding proper materials, for envelopes and covers. Postmasters at the larger cities are liberally disposed but unable to do away with the regulation, while postmasters at small places at destinations rigidly and literally enforce the regulation oftentimes. Some general remedy is necessary and in absence of modification by the department, seedsmen must find some practicable means to comply with the law, which they are endeavoring to do as speedily as possible, but in many cases large stocks on hand will entail loss in compliance.

A paper by George H. Clark, Canadian seed commissioner, was read. In an interview with the reporter Mr. Clark said: "The attitude of the American Seed Trade Association both at the Boston Conference with the Association of Seed Analysts and at this convention seems a clear indication of a desire on its part to deal fairly with the question of seed trade legislation. It is my opinion that after a few years the present difficulties will clarify themselves and through education on seed matters will resolve themselves favorably to all concerned. I am informed that the quality of seeds now demanded throughout the United States as in Canada is markedly superior to that of five years ago. Canadian experience has been that we are not able to make good farmers by legislation; the principal benefits derived from the Canadian seed legislation have arisen in the protection of the legitimate trade against careless or unscrupulous and designing vendors. Today there is a wider range of prices paid to farmers as between high class seeds and lower grades which has had marked effect in discouraging production of seeds in lands that are foul with noxious weeds." Clark's paper was discussed by Messrs. Page, Robinson, Kendel and others, and interesting points brought out, with reference to effect of striation on germination of hard-coat seeds, and difference in percentage of germination in seeds of varying ages, those of greatest age sometimes showing greatest percentage of germination. Replying to a query by Asst. Com'r of Agriculture Hays the speaker said sweating if not too prolonged favored germination otherwise depleted vitality of seeds.

A paper by Hon. Willet M. Hayes, Assistant Secretary of Agriculture, on Recent Science in Plant and Animal Breeding, was listened to with close attention. A very interesting paper on The Spencer Type of Sweet Peas was presented by W. Atlee Burpee.

Dr. W. W. Tracy, of the Department of Agriculture, Washington, D. C., commenting on Mr. Burpee's paper, said it was "Especially interesting because it brought out some principles

of seed growing which are not generally recognized, namely, that there is a gradual development in aspects as a result of which we have a sudden break in varietal character. Such breaks may occur in a number of different locations, identical in each case, the same variation, and when occurring it is comparatively easy to establish an entire new race based on such variation. The same principle is illustrated as developed in the case of lima beans which in a single year, in a number of different places and from a number of different varieties, developed the same dwarf habit, something previously unknown.

The Banquet.

The banquet on Wednesday night at the Strand Hotel was attended by 175. Albert McCullough was toastmaster and responses were made by President J. C. Robinson, Frank C. Woodruff, C. F. Wood, Kirby White, Herbert Quick, Editor Farm and Fireside, and others. The menu was interspersed with monologues on Irish humor and satire by Lawrence Sharkey; vocal music by La Favorita concert quartette; concluded after midnight.

A number of members and ladies enjoyed a sail on the yacht Princeton and Viking on Wednesday afternoon, while others went to Philadelphia to visit Maule's establishment and Floracraft.

On Thursday morning there was a report by the committee on the president's address and on the seed analysts' conference. The obituary committee reported on the death of William Eber, Quincy, Ill.; James J. H. Gregory, Marblehead, Mass.; John H. Allan, Picton, Ont., and Isaac Funk, Bloomington, Ill. A presentation to President Robinson was a pleasing feature and agreeable surprise.

List of Attendants.

There were present on the opening day the following named firms or their representatives:

E. C. Luck and wife, Kansas City, Mo.; C. H. Allen, Floral Park, N. Y.; F. W. Belgiano & Co., Washington, D. C.; Jos. Breck & Son, Boston, Mass.; C. S. Briggs and wife, Rochester, N. Y.; Francis Brill, Hempstead, N. Y.; Geo. R. Brunjas and daughter, Brooklyn, N. Y.; J. Buffington & Co., Baltimore, Md.; W. Atlee Burpee, Philadelphia, Pa.; Cadwell & Jones, Hartford, Conn.; Arthur H. Goldsmith, Floral Park, N. Y.; C. H. Coy and wife, Valley, Neb.; Crabbs, Reynolds Taylor Co., Crawfordsville, Ind.; Chas. Dickinson, Chicago, Ill.; The Albert Dickinson Co., Chicago, Ill.; E. F. Squires, A. W. Chaefer, Frank Lukes, Chas. D. Boyles of S. W. Flower & Co., Toledo, Ohio; Ford Seed Co., Ravenna, O.; W. H. Greaell, Pierepont Manor, N. Y.; Melvin S. Griffith and wife, Baltimore, Md.; Geo. W. Gurney, D. B. Gurney, Yankton, S. D.; Alexander Forbes of Peter Henderson & Co., New York; Hogg and Lytle, Toronto, Canada; H. Holmes, Harrisburg, Pa.; The Illinois Seed Co., Chicago, Ill.; S. M. Isbell & Co., F. G. Johnson, Jackson, Mich.; J. Will Jefferson, Louisville, Ky.; N. B. Keeney & Son, Leeroy, N. Y.; C. E. Kendel, Cleveland, O.; S. L. Lombard Co., Baltimore, Md.; S. F. Leonard, E. S. Leonard and wife, Chicago, Ill.; Josiah Livingston, A. Krumh, Columbus, O.; Albert McCullough, Cincinnati, O.; J. Chas. McCullough, wife and daughter, Cincinnati, O.; W. T. Fonda, Rochester, N. Y.; Wm. Henry Maule, Philadelphia, Pa.; W. H. May and Son, Alexandria, Va.; P. B. Mingle Co., Philadelphia, Pa.; W. H. Mixon Seed Co., Charleston, S. C.; Max A. Felerstein, Jerome Wills, Philadelphia, Pa.; Northrup, King & Co., Minneapolis, Minn.; Henry Nungesser & Co., New York City; L. L. Olds Seed Co., Madison, Wis.; E. L.

Seventeen Years' Experience Back of Our Methods of Palm Growing

Seventeen years—and every year we have learned something new! Then it was only a small feature of our business; now we have several large houses devoted to Palms alone—in all stages from the little seedling plant to stately specimens in large tubs, such as we show here. Our men, some of whom have literally "grown up with the business," are real palm experts.

Such palms as we grow *must* be better than ordinary imported stuff—and they are, as any number of our customers will gladly testify. Ours are clean, vigorous, healthy, acclimated; you can depend upon them to give satisfaction, to please your trade, to bring you *more business*. And yet, as you'll see, our prices are no higher than you'd pay for the ordinary imported stock.

Let "Heacock Quality" guide you in placing your next order—we will give you the benefit of the choicest selections from this splendid stock, and can make shipments promptly.

"When in Philadelphia Be Sure to Look Us Up."

WHOLESALE GRASS SEED DEALERS' ASSOCIATION.

The Wholesale Grass Seed Dealers' Association held their second annual meeting at Atlantic City, N. J., Hotel Strand, on June 21 and 22. Albert McCullough, Cincinnati, president; C. F. Wood, Louisville, Ky., secretary. Reports of officers and proceedings of executive committee during the year past showed much work done of substantial benefit to the entire seed trade in enlightening law givers as to the needs of trade in general and earnest desires were manifested to carry on the good work in the future so auspiciously begun. Directors elected for three years were Chas. D. Boyles, Chicago; John A. Smith, Toledo, O.; A. E. Reynolds, Crawfordsville, Ind.

Seed Trade

Iowa Seed Dealers' Association.

The fourth annual meeting of the Iowa Seed Dealers' Association was held at Des Moines June 9.

Addresses were given at the afternoon session by Henry Wallace, Prof. J. R. Campbell of Ames, W. B. Barney, state seed commissioner; Prof. James Atkinson, H. W. Graham of The Twentieth Century Farmer, and Prof. L. H. Pammel of Ames, state botanist.

C. N. Page of Des Moines was elected president for the fourth successive term. Other officers were also re-elected. They are as follows: Henry Field of Shenandoah, vice-president; John T. Hamilton of Cedar Rapids, treasurer; B. H. Adams of Decorah, secretary.

About thirty members were present. Mr. Wallace's address had for its topic the necessity of improvement in quality of seeds and reliability of goods supplied to the public by the seed dealers. He deplored the present conditions on the Iowa farms and urged the seedsmen to assist in solving the problem of keeping the boys and girls on the farms by furnishing seeds and plants of such quality as will make country life attractive.

Notes.

A rumor is in circulation to the effect that two or three seed houses in Boston are about to consolidate.

Byromville, Ga.—The seed house of the Byromville Co. was damaged by fire to the extent of \$3,000 June 5th. The building was partially insured.

W. Atlee Burpee and Mrs. Burpee will sail from Quebec on the "British Empress" for Europe July 1st. They expect to return home to Philadelphia by middle of August. Mr. Burpee's trip this year is principally to inspect the British sweet pea exhibitions and will not extend as usual to the continent.

St. Paul, Minn.—R. I. Gould & Co., commission and seed merchants, Jackson St., between 9th and 10th, have under construction a new brick building three stories and basement. It has a ground space of 65 x 100 feet and will be completed by September 1st. The estimated cost of the building is about \$4,000.

N. B. Keeney, Le Roy, N. Y., in an interview at the Bingham Hotel, Philadelphia, on the 21st inst., reported that they had no novelties up their sleeves in peas; but that they had a few new selections in beans that were worthy of consideration and would be heard from. Mr. Keeney affirmed that while hybridizing has done much, the greatest advances have been made in selection from established types during the past twenty-five years. Mr. Keeney is a very modest man, but he is worthily awarded by the trade a much higher status than the above statement would indicate. He likes to keep in the background—and let the seedsmen do the shouting.

New York.—The U. S. Customs case against Jacs Smits & Co. of Naarden, Holland, concerning alleged undervaluation on a shipment of plants per S. S. Rotterdam, has been dismissed.

King Construction Co., North Tona-wanda, N. Y.—Descriptive catalogue of King Iron Frame Greenhouses. Illustrated with diagrams and half-tones of greenhouses from 21 ft. to 172 ft. in width.

Union Nurseries, Oudenbosch, Holland.—Catalogue and trade price list for 1910-1911, of ornamental deciduous and evergreen trees and shrubs, fruit stocks, etc. McHutchison & Co., 17 Murray street, New York City, are sole agents for this nursery and can supply copies of above list.

Wm. Fromow & Sons, Windlesham, England. Preliminary trade list and special offer of fruit and ornamental nursery stock to American buyers, season of 1910-1911. August Rolker & Sons of New York City are the American representatives of this house and will be pleased to supply copies of this special list to all trade applicants.

George Wittbold Co., Chicago, Ill.—Trade list of palms, dracenas, ferns, bays, etc. When you send an order ask for a copy of "The Laws of Financial Success." You get it free. The retail catalogue of this firm is also received and it is simply a beauty. If you want to get ideas on how to produce a catalogue that will command attention and shed lustre on your establishment send for a copy of this publication. It will give you something to think about.

Smith & Fettes, Cleveland, O.—This elegant little pamphlet attractively sets forth the capabilities of

this young concern in the art of decorating and, in general, catering to the requirements of a discriminating class of flower buyers. There are full page illustrations of views in their store, church decorations, etc., lists of notable weddings and society events in which they have figured prominently and other reading matter that will be read with interest by those for whom it is intended. Altogether it is in line with advanced practice in the retail florist industry.

CHICAGO NOTES.**Miscellaneous Trade News.**

The dealer with the longest shipping list is the most fortunate just now.

Elmer Sigwald of Arlington Heights is just completing three new carnation houses. Mr. Sigwald prefers White Lawson for a steady blooming white.

The Batavia Floral Co. were right in their first estimate of the damage to their peony crop. All the main buds were destroyed and only the laterals are blooming now and the quality is poor.

The E. H. Hunt Co. has been overhauling their show room and putting things in order after the spring rush. Their shelves show an unusually complete line of glassware, including many choice novelties in vases.

At Frank Beu's stand in the Flower Growers' Market, this week, are seen red poppies of immense size that are sold almost as fast as unpacked at \$1.00 per dozen. Some very tall larkspur are also attracting attention here.

Klem Bros., of Arlington Heights, who are the largest peony growers of this vicinity, are cutting about one-half a crop. Their nursery stock was not killed, but all bloom was destroyed and their cherry orchards are entirely without fruit. They are planting fifty acres of apple trees.

A strikingly beautiful out-of-door decoration was achieved by Poehlmann Bros. last week for the commencement exercises of the Morton Grove school, from which Earl, son of August Poehlmann, was graduated. A setting of green on an immense scale was constructed and 4000 roses were used in clusters and garlands. It required the labor of fifteen men two days to complete it.

Some of the wholesalers complain of a falling off in popularity of the peony, and say the same thing in a less degree was noticeable last year. The prolonging of the peony season by cold storage and shipments from the South, and the increased cultivation of this flower in private gardens are thought to be the cause of its decline. Customers claim it is becoming common; certainly it has not figured conspicuously in the prominent June weddings this year.

A. E. Hunt of Evanston is expected home this week from his trip to the Pacific Coast. He writes that he has purchased land near Seattle, Wash., upon which he will erect a greenhouse plant in the near future. His brother, H. H. Hunt of Park Ridge, will have charge of the business here with his father and another brother, all of whom are well known and highly respected florists. A. E. Hunt made a trip West last year and became convinced that there were opportunities there for him.

For Seed Trade Meeting.

Among the western delegates off for the Seedsmen's Convention at Atlantic City, N. J., are: S. F. Leonard, Mr. and Mrs. Ed. Leonard, L. W. Vaughan and J. C. Robinson of Chicago, Kirby B. White of Detroit, and Henry G. Windheim of Nebraska Seed Co., Omaha, Neb. The latter two joined the Chicago party.

Personal.

Ernest Farley of McKellar's is visiting his parents at Indianapolis, Ind.

Geo. Heidenrich, head of Bassett & Washburn's shipping force, will be married to Elfrieda Prillwitz at St. Ann, Ill., June 26.

Allie Zeck has returned after several months' absence and finds Chicago is as good or a little better than any place he has visited.

Chicago Visitors: L. A. Coles, Kokomo, Ind.; Mr. Dole of Dole Floral Co., Beatrice, Neb.; F. L. Tornquist, Benton Harbor, Mich.; Wm. Finnegan, Toledo, Ohio; J. Lambert, Sabula Floral Co., Sabula, Iowa.

PERSONAL.

Col. W. W. Castle and wife, of Boston, have gone to Cleveland, Ohio, to attend the wedding of the Colonel's niece, who is one of the heiresses of that prosperous city. After the wedding they may extend their trip as far as Detroit where several of the Castle Automatic Circulators are doing good work for enterprising greenhouse men, returning via New York.

Among the visitors in Boston is Mr. W. J. Bean, superintendent of Kew Gardens, London, England, who is taking notes at the Arnold Arboretum. Mr. Bean had an exceptional opportunity to see a section of New England landscape in its dress of laurel bloom on Monday last, when in company of J. K. M. L. Farquhar and Wm. J. Stewart he visited Nashua, and with Judge Hoitt and General Anderson took a 100-mile ride through southeastern New Hampshire in General Anderson's auto.

Herman G. Kretschmar, of Flatbush, N. Y., with his wife, oldest son and daughter, will sail on July 9, by S. S. Vaderland, for a European tour, including London, Antwerp, Paris, Switzerland and Holland and then his native home in Germany, returning from Hamburg, Sept. 29 by S. S. Cleveland. Mrs. Kretschmar is a native of Rochester, N. Y., and absence from the Convention this year will not be without regret on their part and on the part of many who know Mr. Kretschmar as a faithful S. A. F. attendant.

Flower Market Reports.

BOSTON

Roses are selling pretty well. Beauty, Killarney, both white and pink, Carnot and Richmond are in the lead, their only rival in popularity being the old-fashioned favorite Gen. Jacqueminot which is being sent here to Welch Bros. from Newport and, although out-door grown are the equal in substance and finish of flower and foliage, of any indoor grown stock. Sweet peas, which were suffering badly from the effects of the damp and rainy weather, have begun to improve but there is still much unsalable stock in sight. Carnations are good, considering the lateness of the date. Good Enchantress and other high-class pink varieties are moving very satisfactorily, bringing prices almost 50 per cent. better than at this time one year ago. Whites drag badly. Cattleyas are scarcer and higher in price. Among the things which are unloaded with difficulty are stocks and lilies. Lily of the valley is normal as to supply and demand.

CHICAGO

Shipping trade narrowly saved the Chicago market from experiencing a glut last week. The warm weather so long hoped for came suddenly and continued with the mercury close to 90 degrees, and three degrees higher on two days. Stock, under these conditions, became soft and everything was cut and prices dropped quickly. Roses are to be seen in all degrees of quality, but only good ones sell and then at a low figure. Carnations can be bought at the buyers' price and quality holds up well considering lateness of the season and hot weather. Sweet peas have felt the change in temperature as much as any flower and the supply declines. Peonies are to be seen in profusion, for demand is light, and they are being put into cold storage in considerable quantity. The season is considered a poor one for this flower, no matter which way the situation is viewed. Ferns are coming in from Michigan in such quantities that price is reduced to \$1.50 per 1000. Lilies are still in fair supply, and like all other stock sell for a low figure. Beauties are quoted lower and two dollars buys the fancy stock. Commencement orders have been a boon to both wholesalers and retailers this week.

PHILADELPHIA

Summer conditions are gradually asserting themselves in this market; but the past week's trading was satisfactory—all things considered. Early in the week there were a good many weddings and commencements, which gave a backing to the choicer trade and helped to keep a normal level. Later, there was a lot of business; but it was mostly of the bargain counter order. An immense amount of work for the wholesalers with very little money in it either for them or for the growers. The Beauty market went up with a jump—consequent on replanting, and falling off in production from the advancing season. But the reduced supplies arriving are generally of excellent quality. Richmonds and Marylands are both coming in in fine shape. Killarney is still good, the local stock keeping up better than usual for this season of the year. White Killarneys

WIRE SPECIAL

Florist's Cut Flower Wire at Bargain Prices

A big purchase from our manufacturer prior to stock taking enables us to make the following low price offer. The stock is our usual high grade quality wire and absolutely clean. We have a good supply in all numbers, both 12 in. and 18 in. lengths.

are not much in evidence—most of the growers seem to have thrown these out first—as their product at this season has no show alongside of Kaiserin. Brides are of indifferent quality and Bridesmaids are even worse. Carnations have never been seen here at this season in such quantity and quality. Splendid flowers—almost as good as in the middle of winter. And the prices are so low that every retailer has a chance to invest liberally and make "a

special" of them. Orchids in good demand and none too plenty. Peonies still in evidence and of very good quality for late June. Sweet peas are fine but the hot weather and the rain has knocked them a little at times. Gladoli are coming in freely and of good quality. Among minor items, Feverfew, centaurea, gaillardia, stocks, gypsophila, delphinium, iris and marguerites are most conspicuous.

Flower Market Reports

(Continued from page 961)

CINCINNATI Complaints in general show that business for the past week has been on the "good old summer time" order. Large quantities of all kinds of stocks are pouring into this market. There is an over-abundance of sweet peas with a light demand. The majority of roses received are of very poor quality, good stock averaging fair prices. Nearly all of the carnations are indifferent as to quality with good shipping stock selling fairly well. Peonies are about done for the season. Shasta daisies have made their appearance and are moving nicely, while the call for marguerites is only fair. Lily of the valley, which was scarce last week, is again plentiful. Special inducements as to price have to be made to move longiflorum lilies. Asparagus plumosus and Sprengeri from the South are arriving in very poor condition. Smilax is in good supply.

NEW YORK There is a great quantity of all varieties of flowers in the market at present and the demands of the best trade are for odds and ends and a few choice roses, and not a great many of any one thing. The supply is too heavy to maintain anything like steady prices. Growers are slow in throwing out, which is the only hope for an improvement of present conditions. The hope of a demand for the public school closing exercises is not likely to be realized as the ban has been put on flowers. White roses and good white carnations have the preference in selling over colored varieties.

THE PROPOSED PLANT AND FLOWER MARKET IN NEW YORK.

On Monday, June 20th, 1910, the committee on streets, highways and sewers of the Board of Aldermen gave a public hearing on the resolution to establish a plant and flower market under the Queensboro Bridge at 59th street. Among the speakers in opposition to the measure were Mr. Hunt, a grower from Staten Island, and Mr. Cromwell, the Borough President of Staten Island. Those who spoke in favor of the measure included two aldermen, John D. Crimmins, Wm. H. Siebrecht, Jr., Anton Schultheis, A. L. Miller, John Donaldson, John Birnie and a number of property owners of the vicinity of the bridge. Henry Stover, Commissioner of Parks, also spoke for same.

The committee acted favorably and reported the resolution to the Board, which latter body passed the measure. It now only remains for the Mayor to sign the bill to make the place a market and thus give the New York florists something that they have been trying to get over twenty years. The rent for stands will be about 25 cents per foot and the cheap rental, if nothing else, will bring the entire trade there very quickly.

Ernest Strehle, who has been connected with the Park Department as gardener for several years has been appointed superintendent of Parks at St. Louis, Mo. He takes the place of the late George Ostertag.

PHILADELPHIA NOTES.

Chas. E. Campbell reports an unusually good season on bedding plants—many lines being sold out earlier than usual. At their Penn Lynn place the specialties next year will be ferns, roses, carnations, and sweet peas—instead of all carnations as heretofore; Scotti and Schoelzeli in the ferns; Maryland and Killarney in the roses.

Among our visitors this week may be mentioned: John Paul, Cumberland, Md.; N. S. Peterman, Altoona, Pa.; Paul Lindley of J. Van Lindley Co., Greensboro, N. C.; Mr. Hake of Hake & Peterson, Huntington, Pa.; C. H. Vick, Rochester, N. Y., Supt. of the S. A. F. trade exhibition; and seedsmen from far and near going and coming to their annual convention at Atlantic City.

The Essay Committee of the Florists' Club announce that the speaker for the next meeting, July 5th, will be W. Albert Manda of South Orange, N. J. The subject will be, "Should we Consider our Calling a Trade or a Profession?" This topic ought to prove interesting and bring out a good crowd. The philosophers and wits will have ample opportunity to display themselves on a hot weather subject like that.

Godfrey Aschmann says he sells cheap; but does not throw his goods away like some of those who get overstocked because they do not advertise in HORTICULTURE. Nice stocky little araucarias at 35c. are one of the

specialties here at present. In his characteristic way Godfrey says: "Plenty of business, plenty of business—too much business! Even sending money back!" He is a live one all right.

Maybe you will have the pleasure of saying, "How do you do, Senator," to him one of these days. Joseph Heacock has been nominated for that honor on the Democratic ticket to succeed Senator Harper, deceased. If merit counts with the voters he will win in a walk. Joseph ought to consult our good friend, John Burton (another florist from the same county who has already been there), for some pointers. Voters are kittle cattle.

M. Rice & Co. had big importations on the steamers "Pollanze," "Schomburg," and "Pisa," this week; consisting mostly of baskets, bouquet holders, paper goods, matings, and florists' novelties. This influx, coming on top of their stock-taking and general business, has kept them on the jump lately, and much outside storage has been requisitioned in addition to their extensive storage facilities in their 7-story warehouse on Race street—the largest of its kind in America.

"Having had a copy of HORTICULTURE given me recently, I was greatly impressed by its splendid information, and feel I am at a disadvantage being without it. Enclosed please find money order for same."

O. A. H.,
Yonkers, N. Y.

PERSONAL.

D. R. Larson of Salt Lake City, Utah, has been appointed florist at Liberty Park.

Wm. Cohen is now employed by Johnson Bros., Providence, R. I. He was formerly with Joseph Kelpman & Co.

Christopher M. Lee has been appointed by the Providence, R. I., City Council as a member of the Park Commissioners for three years.

Miss Susie Dryden Ritchie and George F. Struck of the firm of Knight & Struck, were married at Toronto, Ont., on June 15, 1910. They will live at 304 Valley Road, Orange, N. J.

Visitors recorded in Cincinnati:—Mr. Johnson, of Chillicothe, O.; Mr. Rose, of the Sefton Mfg. Co., Anderson, Ind.; Myer Heller, New Castle, Ind.; Wm. Gardner, of P. Olinger's, New Castle, Ind.; Mr. Poole, of Poole & Purlaut, Bellefontaine, O.

GOOD RESULTS.

"You can run the Oncidium advertisement once more at any rate. We have sold 200 from this advertisement up to date, which we think warrant us running it again."

ARTHUR T. BODDINGTON.

Best for Garden Spraying

In vegetable or flower garden, on fruit trees and vines; for whitewashing, fire protection window and carriage washing; wherever you use it, the DeMing "Perfect Success" saves time and trouble and does better work.

DeMing Spray Pumps

Strokum Stops Caterpillars

Bind it around your trees. Stop the
third crop of caterpillars from crawl-
ing up. It is the most destructive
crop of all.

Caterpillars or tussock moths can-
not crawl under, and won't crawl over
Strokum. The only banding substance
that does the work and lasts an en-
tire season. It is not unsightly. Guar-
anteed not to harm the trees. Anyone
can put it on.

Send \$1.00 at once for a sample
package of five pounds, which is
enough to band five trees averaging
one foot in diameter. Express paid
East of the Mississippi; 50c. extra
West of it.

"Elastic-Lyke"

GREENHOUSE GLAZING PUTTY ("Semi-Liquid")

Absolutely the best glazing product ever produced. Guaranteed to be made of purest double boiled Linseed Oil and to contain a greater proportion of Pure White Lead than any other product. Weights 16½ lbs. to the gallon; each gallon will cover 300 running feet. Can be used in machine or putty bulb and we guarantee that ten years after using all that is necessary is to break the outer film and the body will be soft and pliable. Impervious to water and will not heave in cold, nor run in warm weather; in fact, it is "manufactured to meet the ever increasing demand of the man who wants the best."

NEWS NOTES.

Northampton, Mass.—H. W. Field, florist, has purchased the McGrath property on Button St.

Hollywood, Cal.—P. J. Stockman has formed a nursery and plant growing establishment here. Lathhouses are in process of construction, also cold frames and greenhouse.

Marysville, Cal. The Marysville Flower & Seed Store has been discontinued. Mr. Evans has found the business unprofitable especially at this season of the year, but as he had a good business during the fall and winter months he may resume later in the year.

Webster City, Ia.—Extensive improvements and additions will be made in the Follett greenhouse. One house is now under construction and within a short time it is expected they will begin the erection of another. Other improvements will be made, the cost totalling several thousands of dollars.

Iowa Falls, Ia.—The buildings and equipment of the Riverside Greenhouses have been purchased by W. W. Hall. He will use the material in constructing a range of houses in the rear of his residence on College Ave. He expects to have the new place ready for business about August 1st.

Canon City, Colo.—D. E. Goodnight is arranging to cover an acre of ground with canvas in order to protect early vegetables. Celery grown under canvas is now being sold in the market by Hot Springs gardeners. Beans are nearly ready for market and tomatoes are as large as hens' eggs. Lettuce and spinach grow here during the winter.

Bloomington, Ill.—Saddler Bros., nurserymen, have been notified that J. A. Delaney formerly employed by them as a nursery salesman and who was accused of crooked work while in their employ and for whom a warrant had been issued sometime ago, has been arrested. After leaving the employ of Saddler Bros. Delaney started to work for Arthur Bryant & Sons, nurserymen at Princeton and while in their employ it is alleged that he forged orders

and obtained money illegally to the sum of \$198.

GREENHOUSES BUILDING OR CONTEMPLATED.

Dayton, Ind.—S. P. Lentz, one house.
Lexington, Ky.—Anderson & White, conservatory.

Webster City, Ia.—Follett greenhouses, house 30 x 60 feet.

Interlakin, Mass.—Mrs. John E. Parsons, one house, 28 x 73 feet.

Canon City, Colo.—J. T. Calvert, house to cost \$5,000.

Hollywood, Cal.—P. J. Stockman, one house.

Baltimore, Md.—Albert Fielder, house 16 x 100 feet.

Iowa Falls, Ia.—W. H. Hall, range of houses.

Philadelphia, Pa.—Ellenwood Greenhouses, one house.

Worcester, Mass.—Edward J. Steele, carnation house.

Monongahela, Pa.—J. Shelby Crall Co., house 40 x 100 feet. Lord & Burnham Co., semi-iron construction.

INCORPORATED.

Dallas, Tex.—Lang Floral & Nursery Co., capital stock \$46,000. Incorporators: Otto Lang, W. W. Robinson and A. B. Mayhew.

Salt Lake City, Utah.—Great Western Seed & Produce Co., capital stock \$3,000. Peter Frost, president; Alvin Johnson, vice-president; Avern R. Poulton, secretary and treasurer.

Charleston, W. Va.—The Hampshire & Middle Ridge Orchard Co. has made application for a charter. The company is to be capitalized at \$125,000. Incorporators: Edward G. Donley, J. M. Wood, A. Rightmire, H. S. Vanderfoot and James H. McGrew.

The Story This Tells

It tells that Lord & Burnham Co., in designing their greenhouses, must give almost endless attention to the details of making attractiveness and practicalness agree. Take this hooded entrance way for example: how much it adds to the interest and actual beauty of the house, yet what thoroughly consistent greenhouse building it is in every way!

It is easy enough to make a house very ornamental, but how will this effect the number of rose blooms in December?—That's the vital point!

Back of the reputation you know we have for successful, enduring houses, is our half century or more of work, backing up that reputation.

It is such facts that give you entire confidence in a concern, and transacting business with them is free from the customary anxieties and "come backs." Because of these facts we trust you will write us when you are ready to build.

A Handy Combination

The combining of greenhouse and gardener's cottage in some such way as this, makes a handy arrangement for our gardener friends.

This house is 18 feet wide and 33 feet long, and has two compartments. It is small, but it's "a starter" and other compartments are easily enough added. Sometimes it is just as well to start small, and then make additions when required.

When you do build, make it our Iron Frame Construction—Curved Eave if you say so. Send for circular.
